

## CONTENTS

<b>Feldhusen K., Deiterding R. and Wagner C.</b> A dynamically adaptive lattice Boltzmann method for thermal convection problems .....	735
<b>Oprzędkiewicz K., Gawin E. and Mitkowski W.</b> Modeling heat distribution with the use of a non-integer order, state space model .....	749
<b>Avendaño-Garrido M.L., Gabriel-Argüelles J.R., Quintana-Torres L. and Mezura-Montes E.</b> A meta-heuristic for a numerical approximation to the mass transfer problem .....	757
<b>Janiszowski K.B. and Wnuk P.</b> Identification of parametric models with <i>a priori</i> knowledge of process properties .....	767
<b>Domański A., Domańska J., Czachórski T. and Klamka J.</b> The use of a non-integer order PI controller with an active queue management mechanism .....	777
<b>Hajdu S. and Gáspár P.</b> Reducing the mast vibration of single-mast stacker cranes by gain-scheduled control	791
<b>Jauberthie C., Travé-Massuyès L. and Verdière N.</b> Set-membership identifiability of nonlinear models and related parameter estimation properties .....	803
<b>Kościelny J.M., Syfert M., Rostek K. and Szyber A.</b> Fault isolability with different forms of the faults–symptoms relation .....	815
<b>Hakem A., Cocquempot V. and Pekpe K.M.</b> Switching time estimation and active mode recognition using a data projection method .....	827
<b>Tikhonenko O. and Kempa W.M.</b> Performance evaluation of an $M/G/n$ -type queue with bounded capacity and packet dropping .....	841
<b>Cera M. and Fedriani E.M.</b> An advance in infinite graph models for the analysis of transportation networks	855
<b>Abdallah L. and Shimshoni I.</b> Lookahead selective sampling for incomplete data .....	871
<b>Pérez E., Salamanca S., Merchán P. and Adán A.</b> A comparison of hole-filling methods in 3D .....	885
<b>Karcz-Duleba I.</b> The impatience mechanism as a diversity maintaining and saddle crossing strategy .....	905
<b>Bielecki W. and Pałkowski M.</b> Tiling arbitrarily nested loops by means of the transitive closure of dependence graphs .....	919
