

## Contents

<b>Avdonin S., Bulanova A. and Moran W.</b> Construction of sampling and interpolating sequences for multi-band signals. The two-band case .....	143
<b>Krawczyk-Stańdo D. and Rudnicki M.</b> Regularization parameter selection in discrete ill-posed problems — The use of the U-curve .....	157
<b>Kaczorek T.</b> Positive partial realization problem for linear discrete-time systems .....	165
<b>Czornik A. and Jurgaś P.</b> Falseness of the finiteness property of the spectral subradius .....	173
<b>Hu S., Meinke K., Chen R. and Huajiang O.</b> Iterative estimators of parameters in linear models with partially variant coefficients .....	179
<b>Mzyk G.</b> Generalized kernel regression estimate for the identification of Hammerstein systems .....	189
<b>Łangowski R. and Brdys M.A.</b> Monitoring of chlorine concentration in drinking water distribution systems using an interval estimator .....	199
<b>Ławryńczuk M.</b> A family of model predictive control algorithms with artificial neural networks .....	217
<b>Boukezzoula R., Galichet S. and Foulloy L.</b> Fuzzy feedback linearizing controller and its equivalence with the fuzzy nonlinear internal model control structure .....	233
<b>Mann Z.Á., Orbán A. and Farkas V.</b> Evaluating the Kernighan-Lin heuristic for hardware/software partitioning .....	249
<b>Tarapata Z.</b> Selected multicriteria shortest path problems: An analysis of complexity, models and adaptation of standard algorithms .....	269
