

CONTENTS

Special section

Cierniak R. An analytical iterative statistical algorithm for image reconstruction from projections	7
Kowal M. and Filipczuk P. Nuclei segmentation for computer-aided diagnosis of breast cancer	19
Markiewicz T., Dziekiewicz M., Maruszyński M., Bogusławska-Walecka R. and Kozłowski W. Recognition of atherosclerotic plaques and their extended dimensioning with computerized tomography angiography imaging	33
Mazurek P. and Oszutowska-Mazurek D. From the slit-island method to the Ising model: Analysis of irregular grayscale objects	49

Regular section

Karampetakis N.P. and Karamichalis R. Discretization of singular systems and error estimation	65
Kapustyan V. and Maksimov V. On attaining the prescribed quality of a controlled fourth order system	75
Bartoszewicz A. and Leśniewski P. An optimal sliding mode congestion controller for connection-oriented communication networks with lossy links	87
Janiszowski K.B. Approximation of a linear dynamic process model using the frequency approach and a non-quadratic measure of the model error	99
Martinović G., Bajer D. and Zorić B. A differential evolution approach to dimensionality reduction for classification needs	111
Gangl S., Mongus D. and Žalik B. An efficient eigenspace updating scheme for high-dimensional systems . .	123
Kulczycki P. and Łukasik S. An algorithm for reducing the dimension and size of a sample for data exploration procedures	133
Sabo K. Center-based l_1 -clustering method	151
Pławiak P. and Tadeusiewicz R. Approximation of phenol concentration using novel hybrid computational intelligence methods	165
Jaśkowski W., Krawiec K. and Wieloch B. Cross-task code reuse in genetic programming applied to visual learning	183
Shaker A. and Hüllermeier E. Survival analysis on data streams: Analyzing temporal events in dynamically changing environments	199
Szwed P. and Skrzyński P. A new lightweight method for security risk assessment based on fuzzy cognitive maps	213
