### SOLEMN APPEAL

TO THE

CITIZENS

OF

GREAT BRITAIN

AND

IRELAND,

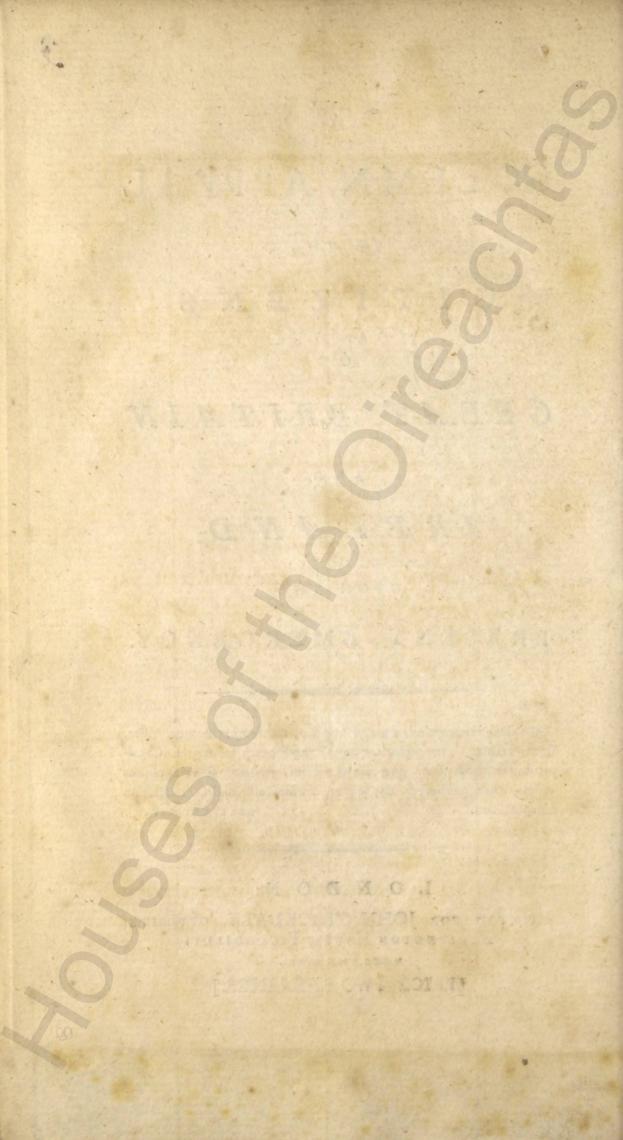

UPON THE

#### PRESENT EMERGENCY.

Per deos immortales, vos ego appello, qui femper domos, villas, figna, tabulas vestras, pluris quam rempublicam fecistis; fi ista cujuscunque modi fint, quæ amplexamini, retinere, fi voluptatibus vestris ocium præbere vultis; expergiscimini aliquando, et capessite rempublicam: BELL. CATILIN.

#### LONDON:

PRINTED FOR JOHN STOCKDALE, OPPOSITE BURLINGTON HOUSE, PICCADILLY. M.DCC.LXXXVIII. [PRICE TWO SHILLINGS.]

# SOLEMN APPEAL, &c. &c.

A

In a time of public affliction and public danger, when the diffolution of good government is threatened, and the fuccefs of unprincipled faction feems but too near; there needs little apology for an addrefs, which, dictated by the pureft motives, is meant as an inftrument (whatever may be its fortune) of advantage, caution, and information, to the citizens who compose this lately happy kingdom.

That its happines has received a shock which it requires great fortitude and B 2 great great wildom to fustain, it is perhaps needlefs to urge; not only from the mifchievous calamity which has befallen the King, confidering him as a private man, and as one whom we all of us loved and refpected; but from the opportunity which now offers for the advancement of men, whom the voice of the moderate, the wife, and the honeft, has declared to be obnoxious. Independent of this, the failure of the true executive power of a ftate, and the fubstitution of a deputed one, is almost always productive of a time of weaknefs and danger. In a crifis, therefore, like the prefent, it behoves every member of the community, let his fortune or his station be ever fo mean (fince, his rights being the fame with those of the greatest, his interest is equally concerned)-more particularly it behoves every one who has any degree of rank or character, any importance in the State, or any influence among his equals, to turn his thoughts to the ferious investigation of public affairs.

fairs. , Setting afide the natural rights of men, philosophically confidered; not modified by civil inftitutions, and not clogged by municipal law; it is a happinefs for us to confider, that legally and conftitutionally (a privilege bought with the best blood of our ancestors, and acquired by the nobleft ftruggles that dignify the annals of any nation) we may without reftraint examine and judge of every meafure of our government, legiflative or executive. To us the appointment of the lowest officer of justice, or the adoption of the most trifling refolution of a Minister, is not a matter of unconcern: what then must be our care, and what our feelings, when a moment prefents itfelf that is big with confequences on which our peace, our profperity, and our happinefs may ultimately depend? Nor let it have any weight with us, that just at this time a profound peace prevails among all orders of men; that no indications of a conspiracy against the public tranquillity have

have yet appeared; or that, foftened as we are by refinement and civilization, no minds are now thought fo daring as to bring into danger that conftitution which it has cost us ages to establish. There is the more to be apprehended from the prevalency of this opinion. Too often have men been ruined by an over fecurity; and if mischief happens to this recovering country, it will fall with a violence proportionably greater, as her prefent expectation and forefight are lefs. The most wicked of men, unlefs they are at the fame time the most foolish, do not, at once, discover their intentions; and oftentimes do not themfelves know whither their ambition, their paffions, or their neceffities may drive them.

Si paullum fummo deceffit, vergit ad imum,

is, perhaps, as well founded a maxim in politics as it is in poetry. Cæfar, firm as he was, debated a little with himfelf, whether or no he fhould pafs the Rubicon

con-his adopted heir was the fervant of the senate, a few moments before he joined the rebel \* to their authority-and in our own annals those violent spirits which first opposed themselves, and very properly, to the arbitrary power of the elder Charles, did not forefee the miferies and defolation to which the madnefs of their patriotifm, or rather their infolent licentiousness, afterwards most unfortunately gave birth. I would wish to remind you of this truth: That, where the fpirit of unbridled freedom prevails, and the people are accustomed to hear the nature of their liberties discussed before them (and God forbid that this should ever ceafe to be the cafe in this country), this inconvenience will almost always enfue: That it will be within the ability of a fet of desperate men, aspiring after power which their principles do not deferve, or hungry after bread from which their debts have almost precluded them, to blow up

\* Marc Antony.

the

the flame of difcord when it is leaft expected, and embroil in civil confusions and animofities, a community which a moment before had been peaceable and happy. The poffibility of this fhould never be out of our minds : and it will be remarkable if a nation, whofe very laws even in the calmest times, and under the most virtuous governors, are most peculiarly jealous of innovations which may only by poffibility arife; shall not be equally watchful, and equally jealous, when a time occurs which prefents opportunities for the advancement of ambition at the expence of good order, and of emolument at the expence of frugality; and men are by no means wanting who will eagerly grafp at those opportunities. Those who have lived long in the world and know things from experience, and those who have read much and know things by relation, must upon recollection be convinced, that there is no complexion of times, however apparently peaceable, which may not be eafily

1

eafily changed, by hypocrify and artful management from foberness and tranquillity to paroxy fms of fury .- In Athens there were no great public wars, no instances of encroachment or oppreffion, in any of the officers or orders of the state, when Pifistratus feized the government; and yet though Solon was alive-though he had modelled the commonwealth, and all fubmitted to his laws - this artful leader, by the means of the parties that prevailed, added to his great abilities and a fuccefsful artifice, contrived to acquire the supreme power of the commonwealth, at the expence of the fortunes and free-'dom of her citizens\* .- In Rome a feditious tribune, in times of peace both foreign and domestic, has often contrived to difturb that reft, which the fpirit of

\* Pififtratus was at the head of the democratic party : and, wounding himfelf and his mules, he one day complained to the people that he had been waylaid for their fakes. Though Solon oppofed it, they immediately voted him a guard, with which he feized the citadel, drove his adverfaries into exile, and accomplifhed his feheme.

HERODOT.

the

[ 10 ]

the tribunitial office feems to have prompted him to have been continually invading.

In France, the most difgraceful day with which her history is acquainted, a day of horror and a day of blood, arofe immediately after an evening of ferenity: for in the midst of rejoicings for a peace after intestine commotions, when every thing bore the appearance of reconciliation, and men allowed themfelves to look forward to happier times, the maffacre of Saint Bartholomew was most vilely and devilishly perpetrated. But to call our thoughts home from other nations to the hiftory of that nation which is the most interesting to us, and the most replete with leffons of wifdom and fortitude, but at the fame time with examples of turbulency and ambition, let us examine a little into our own. When a Duke of Lancaster, exiled and poor, without friends, and far removed from a throne, landed with a few adherents, at an obfcure port, with a view to claim merely his inheri-

inheritance; and when the true heir wore the crown, in the full vigour of his age, and the complete possession of his faculties; and not only this, but at the head of a fufficient army, and with a title for ages undisturbed ; was it possible for any one to conceive that the minds of men should in an instant be so inflamed, and their reason fo blinded, that this Duke should not only regain his inheritance, but usurp the kingdom ?- But let us come a little nearer to our own times; and leaving those when anarchy, and confused notions of right and wrong, were too apt to prevail, let us caft an eye on those, in which, like the prefent, a regard to justice, and more fettled ideas, were fupposed to reign. The beginning of the feventeenth century may be marked as an æra when the most profound peace prevailed in these kingdoms, and in the minds of their inhabitants. The ability of the first Tudor had beat down all opposition that could be made to his power, after ·C 2

the

the utter extinction of the civil wars, and the destruction of the ancient nobility and princes of the blood; his Son was as defpotic as his heart could wifh; and the glorious Elizabeth was not only without a fhadow of refiftance to her power, but poffeffed in the most eminent degree the affections of her fubjects. The most profound peace abroad prevailed during twenty years of her fucceffor, and happily it fostered no appearance of diforder at home. The first years of Charles were remarkable for the internal quiet, which, barring a few jealousies towards a favourite, was univerfally established. Lord Clarendon, in fpeaking of these times, comments upon their happiness; and pathetically applies the address of the Poet,

" O fortunatos nimium, sua fi bona norint!"

Even the Petition of Right, and its violation, did not produce much change; and though Hampden, who perhaps was the best of his party, called forth the the attention of the nation by his stand against ship money; yet every thing went on with an order and quietnefs at least equal to the prefent. Even when that Parliament met, which opposed with fuccess the encroachments of the Crown, and fupported with fuccefs their own innovations; which at one time was at the pinnacle of glory when it murdered its Sovereign, and at another was debafed and infulted by the dregs of mankind whom it had raifed; no one in the nation but the leaders of the faction (and perhaps not even they themfelves at the time) could by any human forefight perceive that injustice, rebellion, and destruction waited upon their deliberations. They did however wait upon them ; and in a time of tranquillity, a time of happinefs, there arose a dæmon who stalked through the land, carrying along with it murders, and ruin, and defolation. It was then (fo inflammable are the minds of men, and fo eafy is it to work upon them) that

that fuch desperate and dark enthusiasts as Cromwell, or Vane, or Ludlow, and fuch wretches as Pride or Harrison, were enabled to trample upon the necks of the nobleft men in this island-upon Falkland, Capel, and Cavendish; characters which feemed to have been born for the ornament of human nature. The Stuart reigns are full of instruction to a statesman, or a philosopher; and are peculiarly replete with proofs of the affertion I have made. The first years of Charles the Second are marked with unanimity and joy: and, circumfcribed as we are in our faculties, no one would have imagined that, by the artifices of a faction, the nation could in a moment have been wrought up to a pitch of phrenzy; and that, to the peaceable and unbiaffed course of justice, fhould have immediately fucceeded the most shocking scene of prejudice and cruelty, that ever difgraced the annals of a country. Men in power have been tyrannical and remorfelefs; they have delighted

delighted in the tortures of mankind; for their hearts have been hardened, or their intellects weak: but very few instances have occurred like those which present themselves in the persons of my Lord Shaftsbury, and the contrivers of the Popish plot. To set on foot a crime which never had existence; to accuse men of being acceffary to what they never knew; to hold out rewards to a perjury that was murderous; and to load the gibbets and fcaffolds with the bodies of innocent fufferers, condemned for a crime which they knew they could not poffibly have perpetrated; is perhaps without parallel in the Hiftory of Cruelty. What was it that impelled thefe wretches, these difgracers of the human fpecies, thefe-I will not call them bigots (for they, at least, know not what they do) but traitors-lost to all fense of shame, or honour, or compassion-to do what they did? They will tell you that ambition and abilities gilded their crimes; and that virtue and principle being only a name.

a name, the lives and fortunes of a thoufand individuals were of no confequence; if the lofs of them could tend to the gratification of their paffions !- and, if they tell you this, they will only talk to you in the true language of party fpirit, a language which is common to the villains of all ranks in the world. We fee, then, if fuch are the principles of violent men, who are at the fame time ambitious-if they stretch them to fuch lengths (and that they do fo has been pretty well shewn)-how very easy it is for them, even in times of domestic quiet, to work upon the prejudices and paffions of the multitude, if the least favourable opportunity offer; and in a moment, for the gratification of their pride, their luft of power, or their lust of gain, to change the whole order of things. I have been the longer in this deduction, becaufe the confequences of an over fecurity have often been dangerous; and I think we may perceive that it has almost become a fashion among us to think, that, because fuch

fuch enormities are not now committed as formerly, the age of violence is no more. We may every where observe a fpirit, I could almost fay of indifference, in the ranks of men not immediately concerned in public affairs, with regard to what paffes among the leaders of the parties. When they are told of the outrages and distractions that have happened, they content themfelves with faying that fuch times are over; and proceed to the enjoyment of their pleafures and their luxuries, and leave the battle to be fought without a reflection on the confequences. It was not by fuch indifference that the Roman people refifted the despotism of the fenate; it was not by fuch indifference that the United Provinces became a commonwealth; it was not thus that our anceftors fupported their rights against the crown; that the privileges of Englishmen, so glorious to human nature in this universal flavery of Europe, have been fo firmly established ! But we may perhaps arrive at the caufe of

of this. The jealoufy of the people has for ages been constantly and uniformly directed against the executive government; that has been confidered as the only enemy they have had to fear; and from the refolution they have always exerted, added to the milder notions of the late fovereigns, the fear of encroachment from that quarter being almost difpelled; they imagine they have done their work, and may now go to play. But it may not be improper to remind them, that encroachment may come from more quarters than one; it may come from those who have hitherto been our very defenders. There may happen in the civil politics of this country, what has already happened in the politics of Europe. The House of Austria at one time attained to fuch a degree of power and dominion, that the other nations were aftonished and trembled. For above a century their efforts were all directed against this power alone; and France, as the next in importance, naturally became their

their leader. Their efforts were fuccefsful, but they knew not where to ftop : and bred up in hereditary jealoufy and hatred, they were for a long time, without perceiving it, contributing to the elevation and tyranny of their great ally; to oppofe which it cost them a still greater expence than the other, of blood and treafure. Thus may it be with the people of this country, for the analogy is obvious : thus indeed it has already been.-The reign of Charles I. is a mine of political information. The people at large continued, and from the best principles, to fupport their reprefentatives in their opposition to the court; but they did fo till a confequence arofe which they little forefaw: they were ruined by those whom they confidered as their protectors; and like a weak nation that calls in a ftronger to its affistance, they were enflaved by their very defenders. Let us not therefore be fo blind, fo very much a flave to our prejudices, as to fuppofe that ruin, or at least distraction, may not enfue from men of

D 2

of an unreftrained ambition, becaufe they call themfelves the men and the friends of the people. Could jeft or ridicule be admitted on a fubject of the folemnity and importance of the prefent, we might apply to fuch friends as thefe, the translation which the favourite fon of wit \* once made of the motto of a rapacious judge,

" They fwear you are fo very good,

"You hug them till you fqueeze their blood." But if we muft needs be blinded, let it be through an ignorant indifference, not through a criminal one. And yet it is much to be feared that there are many among us fo contaminated by example, and fo immerfed in luxury; fo devoid of principle, and fo vitiated in their taftes; that nothing moderate will have any refpect from them. To many it is to be feared may be applied, what was applied by the Hiftorian to the manners of the great republic at the time he wrote— "Poftquam divitiæ honori effe cœpe-" runt, et eas gloria, imperium, potentia

\* Dr. Swift.

" feque-

" fequebatur : *bebefcere* virtus, paupertas " probro haberi, innocentia pro male-" volentia cœpit."—It would be eafy to continue the parallel thus begun, and in the very words of Salluft; nor perhaps would there be wanting characters (not yet it is to be hoped fo fhockingly depraved, but) which might pretty well anfwer to those of Cataline, Lentulus, Piso, and the rest of the conspirators.

The great leader of the faction which is now attempting to difturb the peace of the prefent government, will not be very unlike the nervous description of the Roman incendiary-" L. Catalina nobili " genere natus fuit, magna vi et animi " et corporis, sed ingenio malo pravoque; alieni appetens, sui profusi; ar-66 " dens in cupiditatibus, fatis eloquentiæ. Hunc lubido maxuma invaferat rei-66 pub. capiundæ; neque id, quibus mo-66 " dis affequeretur, dum fibi regnum pa-" raret, quidquam penfi habebat."

In the defcription of one of his feconds, there are traits perhaps to be found of of a character which has lately ftarted up in opposition, and aftonished the world— " Erat eodem tempore C. Piso, ado-" lescens nobilis, *fummæ audaciæ*, egens, " *factiofus*, quem ad peturbandam rem-" publicam *inopia* atque *mali mores* sti-" mulabant."

If we erafe the word *nobilis*, which in no fignification can apply to him, elevated as he is in the fcale of wit and Belle lettres, we fhall not be long in hefitating to pronounce it to be the man, who with all the fire of Ciceronic eloquence, upon a late great national trial, has nearly blafted the caufe he undertook to fupport, by uttering things impoffible to be believed !

The complexion therefore of the times, the factions that have long reigned, and the characters of their leaders, demand our most ferious and jealous attention. There are fometimes men who are never fo much gratified as by a period of diftraction; men of overbearing difpositions, and and hot tempers, most dangerously fupported by aftonishing abilities ; men who will dare any thing, and who, unfortunately for the world, have fuch talents as will fupport them in what they dare. These have always been the Catalines, the Clodios, the Guifes and the De Retz's, the Cromwells and the Shaftfburys, that are born for the destruction of the public happinefs. It is the curfe of mankind that they are fupported in general by all the fplendor of wit and knowledge, that they can dazzle and fafcinate at the moment that they stab: and it is a curfe, not merely on account of the power which it gives them of conducting their defigns, but from the attractions which it enables them to hold out to others; to young minds efpecially, who, blinded by fpecious manners and things fo brilliant and agreeable, never allow themfelves to confider the general confequences, nor the mifchiefs to which they may be an introduction. They do not confider the ufeful ful leffon which in a few words may be taught them,

[ 24 ]

" Decipit exemplar vitiis imitabile."

It is to fuch arts and qualities as thefe, one may imagine, that the great chiefs of the prefent opposition owe a large part of their confequence; and that they are enabled to hold in their chains many young perfons of high birth and naturally good dispositions, but who, just starting in their political career, choofe the most dazzling fide, without experience and without reflection. Some of them have fmarted for it in their reputations, many in their fortunes. Instead of acquiring the respect and good word of all honeft men, for acting properly upon the principles, whatever they may be, in which they have been educated; instead of confulting their own judgments, and not being fwayed by the influence of a chieftain; inftead of becoming by their conduct and habits

"Th' expectancy and role of the fair flate," the glafs into which all men who love their their country shall look for future wifdom and virtues—they lose fight of the duties which their births and their families require of them, and are content to become the tools of a leader, because he may be furrounded by the glare of uncommon talents, or the allurements of polite wit. And they are happy if a total furrender of their judgment, and a blind deference of opinion, are the only consequences. Oftentimes they fall a facrifice, in the receptacles of gaming, to the superiority of the solution of the fame leader; which prevails there also, as well as in the haunts of public business\*.

The partizans of this wonderful but dangerous man will affirm, that it is not fair to let his private occupations interfere with our judgment upon his public capacity; that, as long as he has been

\* There is not a fhadow of an intention to infinuate here any thing more than that kind of fuperiority derived from long experience, extraordinary judgment, and wonderful natural memory. Mr. — plays with extreme fairnefs; and those who encounter him, do fo with their eyes open.

uniform

E

## [ 26 ]

uniform and steady in his political prinples, and true to his political connections, it is not our part to push ourfelves into his penetralia, and, from his conduct there, to affume what his conduct may be in the management of the affairs of state; that he has shewn, by his frequent refignations of power when in his hands, that to enrich or to aggrandize himfelf are not his objects. But it is as impossible for us to abstract our thoughts from a man's private habits and principles, in our judgment of his public character, as it is for a man to have two natures. He whofe life has been a life of diffipation, as well as of ambitious ftruggles; who at this moment lives by the horfe courfe and the gaming table, and who has a paternal example of the impunity with which a man may grow rich at the expence of the nation; will not eafily induce the nation to love, or to truft him. Grant that he has been fleady in his political principles; grant that he has been true to his political anolidu conconnections; grant that he has refigned his power when he found that he could. not be abfolute!-we are talking of no common perfonage. His diffipation may be unbounded, and his avarice for its fupply immense; and yet these may not be the ruling paffions of his mind. Ambition may greatly overbalance them; power may be his object, and yet a fmall portion of it by no means fatisfy him; which may eafily account for refignations of what was not equal to his defires. Before the world began, or Great Britain and its factions were thought of, there is an inftance of a character which, though exalted as much as it could be above its rivals, yet, because it was not greater, could forfeit the station it really held :

" Lifted up fo high,

" I'fdain'd fubjection, and thought one ftep higher "Would fet me higheft."----

It was in an attempt of the fame kind, I apprehend, that this difinterested and unambitious minister lost that rank above E 2 others

others which he actually posseffed .- But to withdraw ourfelves from examples which archangels afford us, to contemplate those which are to be found among our own species; there is one which has before been mentioned, which will fhew that the refignation of power is perfectly compatible with the principles of the most ambitious mind. Lord Shaftsbury once held the highest legal office in the State, and at the fame time he was one of the leading members of the Cabal which advised the Sovereign. Here was enough, one might imagine, to fatiffy even an infatiable lust of power, or of money; yet he could forfeit, or rather refign these advantages, because the king's conduct did not please him, to put himfelf at the head of an opposition which he could rule with a fway that was uncontrolled. The horrid consequences of this man's madnefs are too well known to relate here: and yet, though he was the caufe of all the civil commotions of that reign, and though innumerable legal

legal murders might be traced to his machinations; yet fuch were his talents and his fpecioufnefs, that many of the firft families in the kingdom acknowledged him their leader. The virtuous Lord Ruffell and the gloomy Lord Effex had reafon to repent it.

That there is ground to expect the fame mifchiefs from the prefent head of oppofition, it is by no means my intention to infinuate: the ideas of men, upon all the grand queftions of Religion and Conftitution, are now, it is to be hoped, fo fettled, that no fuch confequences are to be apprehended. But did we live in times whose aspect was different from the prefent-did fome modern Shaftfbury, as formerly, madden and propel the mifchievous multitude-there is nothing in the tenour of his life to make us fuppose, that in him would be found a strenuous opponent .- We fee then that it is not his thirst of gain, so much as his love of power; nor his love of power merely, fo much as the nature of it, which we are

are to dread. Could he content himfelf fimply with that ambition which naturally leads men of public talents to look to an office in the State-even though it were the first, provided he purfued it peaceably and constitutionally, the minds of men would have an excuse for being indifferent whether or not he fucceeded. But when we fee that, while in office, and possess of authority enough to fatisfy any reasonable citizen, he aspires still higher, and endeavours to make the crown itself ' too contemptible for a gentleman to wear ;' and when properly expelled, that he observes no measures, but opposing the government and the voice of the people, he flies at the fame time in the face of the Majesty he has infulted; and the more effectually to do this, when we fee that he had coalefeed with the man and the party whom for years he had threatened with axes and impeachment; it is then time for us to open our eyes, and watch him as a desperado, who will have no remorfe in tearing up the

the Constitution by the roots, to gratify the cravings of his monftrous paffions .---It is no fmall misfortune for the country, that fuch a character as this has in all his enterprizes been too ably feconded. Men who have not much power and lefs fortune themselves-too ambitious to reft quietly in their stations, but too diffipated and idle to apply themfelves to profeffions which might raife them by proper degrees-finding their minds endowed with a weight and splendor of abilities, and their bofoms fwelling with the most daring boldnefs, eagerly grasp at any occasion which prefents itself, and unite clofely with almost any party that needs them. It was thus that the great but unprincipled Julius, panting with ambition and opprest with a load of debt, threw himfelf into the arms of Craffus and Pompey, in order to gain that importance which afterwards deftroyed the fenate; it was thus that Cromwell feconded the efforts of Hampden, that, after his death, he might deftroy the parliament;

[ 31 ]]

liament; and it was thus that Burke and Sheridan have attached themfelves to a respectable but dangerous aristocracy, in order through them to ftruggle into notice .- A man of contemplative habits, who lives in the world and loves his country, cannot but reflect with concern upon the misapplication of talents and a vigour of mind, which hitherto have only aftonished, but which might have been useful. Had these men contented themfelves with a ferious application to professions, which, after they had rifen to the first ranks in them (and of this who can doubt?), might properly, regularly, and conftitutionally have introduced them to a high rank in the Statethe community would have been ferved, and felt grateful for their fervices; and would not, as it now does, regard them as men who, at the expence of good order, will dare any thing for their own advancement. As it is, they have fucceeded in making them felves confpicuous; they have, in the fenate, aftonished and delighted

[ 32 ]

delighted their hearers, though feldom convinced; but the great object and fcope of their views has been hitherto difappointed. And indeed were fuch a man as the last-mentioned, favoured as he is with the gifts of nature, with every thing that can amuse or please, fascinate or instruct, to be appointed to a great office; how would the nation feel when it faw its bufinefs entrusted to a man, whofe habits have been the contrary to those of business. Did he aspire to a situation merely political, or even where a knowledge of the foreign interefts of the State was required (as this forms part of the matters which influence every man's curiofity, and may in fome measure be understood by all those whose taste or difposition have led them to historical refearch), we might not be much alarmed, on the point of abilities only, to fee him even in a very high public employment. But when we have already feen how his difposition lies; when we have feen him, though for a short time, in an employment

ment which absolutely requires a thorough knowledge of official business\*, and long habits of the most unremitting attention; when we are told (with what truth I will not pretend to fay) that he looks to the most important offices that concern our welfare, the direction of the Board of Control, and the Treasurership of the Navy-if we were ever fo well convinced of the purity of his heart, we cannot be without our fears for the abilities of his head .- But topics like thefe it is not fo much my with to imprefs; it is not the capacity of the opposition which we have reafon to dread: we have only to lament that their dangerous principles, their total difregard to our interests when they come in competition with their own, have led them to become the instruments of a knot of the greatest families in the kingdom; who would undermine this glorious and well-balanced conftitution; and draw the power,

\* Secretary to the Treasury.

which

which is now fo happily distributed, into the hands of an afpiring ariftocracy. It is a happinefs, however, for which we ought not to be a little thankful, that those leaders of this party, from whom, after all, is derived its most confiderable weight and luftre, have lately, by a kind of providence, been unfit either in difposition, or in those foaring abilities fo neceffary for fuch enterprizes, to carry things to the extremity which might be dreaded.

The Marquis of Rockingham was a man virtuous and honeft, loved by his friends, and respected by the people; but however he might be influenced by others who fpurred him into activity, however he might fuffer certain principles and views to fink into his mind, he was happily averse in temper (and, had he not been fo, deficient in ability) to push things to that extremity, to which there wanted not men, capable in all these points, to direct and drive him. As it was, they availed themfelves of what they could ; of

of his rank, countenance, and fortune.---Mutato nomine, this applies exactly to the prefent Head of the Whigs. The Duke of Portland is equally virtuous and honeft; equally loved by his friends, and equally refpected by the people; and, most fortunately for us, equally difinclined to those distractions and disorders, which are the pride, the element, and the glory of the men we have defcribed. The house of Cavendish lend much;-a great and unfullied name, interest, and credit; the house of Bedford, a princely fortune and poffeffions, which, could they add to it the abilities, the heat, and the daring of those who dupe them, would indeed be dangerous to the Crown and to the Commons. But finall as is the portion either of talents or temerity which diftinguishes these, and other dignified leaders of the party : the conftant tenour of their conduct and measures will eafily conduct us to the great aim of their wifhes ; which have been openly to controll the King, and, under the appearance of

of protecting the people, to fet themfelves above them. It is this which animates the union of the greatest fortunes in the island, which prompts this dangerous body to draw the ties of that union still clofer by perfonal friendships and alliances; it is this which perhaps induced the first nobleman among the peers to quit a faith, that, however mistaken, his ancestors had made it their glory to profefs; and it is this which could goad and awaken the fluggish avaries of the young heir of Bedford, to a degree of life that aftonished even his friends. When, therefore, fuch power and fuch wealth are united for fuch purposes, and have the fortune to be under the influence of fuch characters as we have already delineated-men whofe prodigality is only to be exceeded by their ambition, and whofe ambition is most unboundedwhat may not be expected from the junction? Part of the confequences we have already feen. When by their majorities in parliament, which fuch influence

fluence, added to the monstrous Coalition, could hardly fail to give them, they had forced themfelves upon the King, they refolved to keep no measures; but with a high hand endeavoured to govern the power which gave them, confequence, and to entrench themfelves behind a Bill, which at the expence of juftice, of faith, and the constitution, would have rendered them inexpugnable. It was here that the genius of Britain interpofed; it was here that his Majefty, calling up the fpirit of his illustrious line, difdained to ftoop to the indignity; and, feconded by the voice of an applauding people, drove them with difgrace from that station, to which it was hoped they never would again rife.

Common minds, minds open to conviction, or capable of remorfe, would have fubmitted to the correction; but it was unworthy of the fon of Lord Holland, accustomed as he was to foster the most daring projects, and towering fo high above the opinion of an honest nation, tion, to be at all humbled by a circumftance fo trifling. Supported therefore by the whole weight of the faction, then at its height, he hurled defiance to the throne, the people, and the conftitution.

The historians of future times, when, in recording the events of this reign, they come to the period we are fpeaking of, will pause to contemplate the lengths to which the paffions, when unrestrained by reason or principle, will carry human nature; and with grief will reflect upon the facility with which the best forms of human government, the work of ages, the darling object for which men have parted with their dearest blood, may be made to totter to their foundations ! It was not the fault of the expelled Secretary, that we were not involved in the horrors of a civil war; that a much injured monarch had not been forced, like many of his ancestors, to fly from a capital which was dangerous to him; and that the standard of the Con-

Conftitution, like that of his martyred predeceffor, had not been fet up against that of the Commons. And yet this man continues, with his two able feconds, to retain his influence in the country; and, backed by the weight of his dangerous party, to watch, with an attention worthy of a better caufe, for the smallest opening that may arife for the exertion of his unlicenfed ambition. At the time, however, to which we allude, there was, as there now is, a man who equalled him in firmnefs and talents, and excelled him in character and principle; a man over whom he derived no advantage from the fuperiority of age, fince age had only given the people opportunities of discovering his faults: and fo promifing was the youth of his opponent, that they with one voice cried out,

« Nec puer Iliaca quifquam de gente Latinos

" In tantum fpe tollet avos; nec Romula " quondam

" Ullo fe tantum tellus jactabit alumno."

Had

[ 40 ]

Had Mr. Pitt never profited fo ably as he has done, by the power which a profound peace gave him to revive the drooping spirits of Great Britain! had he never annihilated the fmugglers; had he never projected and executed the hardy undertaking of diminishing the national debt! had he never lent his fostering hand to the commercial treaty ! had the exchanges of every country in Europe, under his management, never been, as they are, in favour of our own ! had the credit and the power of the kingdom, under his direction, never again gone forth as it had been wont to do, to all the nations of the world-interfered with a ftrong arm in a neighbouring republic, in defiance, and to the terror, of that hereditary enemy, who had fo lately trampled upon her laurels! had it never, with a spirit truly Roman, commanded and forced the Dane to sheath the fword he had drawn !- still would his character shine out with a dazzling luftre, from the one circum-G ftance

[ 41 ]

ftance alone of having boldly oppofed himfelf to this demagogue of the Commons, and ftood forth the vindicator of the rights of the crown and of the people. For a firmnefs like this, worthy perhaps of Cato (for that virtuous Roman often offered himfelf to ftem the torrent of a dangerous faction), in the republics of antiquity, his ftatue would have been decreed : as it is, his monument will probably rank with his father's, and his memory will be engraven on the hearts of the honeft and the peaceable.

It is not at all my intention to enter into the comparative merits of thefe two great perfons, with refpect to their talents for internal regulation, or foreign politics—to defcant upon the wifdom of the meafures of either of them, while they have been in office; neither is it my plan to trace their tenets, or principles, or connections derived from a long line of parties, which for many years have been ftruggling for the direction of this country. country. Such a tafk would be contrary to my inclination, as I am fure it is above my ability: for, strange to tell ! after the decided opinions that have appeared in these pages, I am a man of no party; as unknown at the Treafury, as unacquainted with the hustings of a riotous election: nor has even my curiofity yet led me to join in the fashion of declating my principles, by eating with the whig or the conftitutional clubs: fo unimportant and fo independent is the man, who prefumes to call your attention. But though young and inexperienced; not an indifferent obferver of what passes before the eyes of men; warmly attached to the community to which I belong; bred up to a knowledge of its laws and government, and not totally ignorant of its hiftory-I cannot think myself to blame in endeavouring to do fervice. A very fmall attention to political philofophy, and the principles of general government, added to moderately fpeculative habits, has con-G 2 vinced vinced me that peace and good order are the bases of the happiness of nations; and a very fmall acquaintance with what has paffed in the focieties of the world, affures me as ftrongly that there have always been men, in free countries especially, the bent of whose genius, and restlessness of disposition, has always led them to disturb that happinefs. When, therefore, I observe a party of this defcription, whole whole lives have paffed in a state of cabal and intrigue, often fubverfive of the good order of this community, approaching once more, in the general fufpicions and the general fears, to a power which they have before mifufed; and in the places of men, who it needs but to walk abroad to fee, have the confidence of the people-I think I may, without being very violently influenced by the fpirit of party, come forth to my fellow citizens, and warn them of their danger .- Ever fince the last overthrow of Mr. Fox, the inhabitants of this kingdom have concurred

curred almost universally in the opinion, that he is no longer worthy of power; and they have as univerfally joined in declaring, that his rival is the man of their confidence. It is a new cafe in the political history of Britain, that we can judge of this by the most accurate standard. When a man has grown old in the arts of corruption; when his life has been spent in the packing of parties, and in working upon the confidence of his fovereign; if he happens to retain the helm of state for fome time, though in the very teeth of an oppofition the most eminent for activity and industry of intrigue, and the moft fplendid by the decorations of brilliant talents, as well as the most powerfully supported by an uncommon weight of rank and opulence-we may yet be doubtful whether he may not in a great meafure owe this to the opportunities which a long retention of power, given perhaps before that opposition was formed, has afforded him of acquiring friends. But when

when a youth, not yet arrived at the maturity of his age, nor the full vigour of his mind, with hardly a fupport not derived from his own ftores, backed by very few powerful families, and new to the ways of bufinefs-is enabled to entrench himfelf firmly against fuch an opposition as I have described; and, what is more, to enter upon his station even in defiance of a majority of them-furely there must be fomething peculiarly great in his character, or fomething peculiarly atrocious in the character of his antagonist, or a union of both, in the eyes of the people, which could give birth to fo uncommon and wonderful a phænomenon !- He is now entering on the fixth year of his power; and many things concur to fhew, that he would be still the people's minister. The shocks he has fuftained, and the storms he has been enabled to weather-his defeats upon the Irifh Propositions, and the Fortifications; . his dear-bought victories upon the De-

claratory Bill, and the Promotion of

Admirals,

-----

[ 46 ].

Admirals; and the ill-judged measure of the Shop Tax, had not yet been able to shake him: fo firmly was he supported by the independent interest; fo convinced were the people of his integrity, and fo much did they dread the dark genius of his rival. Common fenfe will tell us, that this could be only owing to his character : and while he preferves that character-while the nation under his wings, in addition to their own firmnefs, enjoy themfelves in the poffeffion of the great object of all communities, Peace and Security; I confess that, as a citizen and a philanthropist, I cannot feel happy at the profpect of a change. The inhabitants of this capital have of late met one another with the good humour which profperity and cordiality infpire; they have all felt the bleffings of a fleady and honeft administration; and every man has congratulated his fellow upon the permanency of the government, the reftoration of the credit of the country, and the thriving condition

tion of commerce. Money, it is obferved by moneyed men, was never in fuch plenty; and had not our kind Sovereign fallen under this affliction, he might have fulfilled, with fuch an administration, the compassionate wishes of the French Henry the IVth towards his people. In this general ferenity, therefore, what must be the feelings, what must be the anguish of all true lovers of civil harmony, to obferve the profpect blacken, " and cloud instead, and " ever during dark, furround us." I am far from faying, fhould the ariftocratic party, in the present conjuncture of affairs, make their way to the honours and power they have long coveted, that we shall be immediately plunged into dangers and commotions; for, should they attempt measures of any turbulent complexion, we have the fenfe to know our danger, and the spirit to refist it. But it must be obvious that, with an administration fuch as we are at prefent bleft with, we cannot but be alarmed at the idea

[ 48 ]

idea of a change: the conduct of any other, at best, must be uncertain; the conduct of the prefent we know to be good. And when, in addition to this confideration, we recollect the characters of those who will come into office, and the hot measures they have shewn themselves equal to, in order to force themfelves into office; when we recollect their rapacity, their wants, their ambition, and, what is of no lefs confequence, the views of their titled and opulent fupporters, to wreft the government from the Sovereign's hands, and to reduce it under the controll of a powerful oligarchy; above all, when we recollect that the present unhappy conjuncture must render the third eftate lefs mindful of its interefts, and lefs able to preferve its rights; who can refrain from bewailing the fituation of his country, and the profpect of lofing that stability and unanimity among all ranks of men, the prefervation of which is fo abfolutely neceffary to its welfare !

That

That there is a profpect of losing it; that, even should the wishes of the people be crowned with success, there will be the most strenuous and desperate efforts to remove these faithful stewards of the country; and that the public concord will be interrupted; no one, however fanguine in his hopes, can refuse to acknowledge.

The prefent unhappy fituation; the opportunity which it gives, and the efforts that have long been making; can hardly fail of overturning, or at least of deranging, the harmony which has hitherto prevailed. The intentions and enterprizes of opposition would have been forefeen in this emergency, without any indications from themfelves, by any one who had at all given his mind to the characters and conduct of fome of its leaders, and the absolute dominion in which they hold their mistaken supporters. But left this by poffibility fhould not be the cafe; in a time which calls for the utmost caution and forbearance, and in a cafe

a cafe fo entirely new in the law and in the history of the country, that it requires the strictest fearch into the annals for precedents that may be analagous to it for elucidation-most certainly requires theabfolute/fufpenfion of all decided opinion-they do not bluih to come forth and declare, what every moderate man must fee can only be meant to affift and promote their own defigns. Had this been done after fome little investigation, fome little honest discussion, we should not have quite fo much reason to tremble; as it would be fcarcely poffible for them, as men who had run a long courfe of political ambition, not to adopt what they thought would bring them again into power: this tho' we might fear, we might alfo forgive: but the marked determination and precipitancy of their conduct, in a question that cannot, upon the face of it, be fo quickly difposed of, is what now fills every honeft mind with alarm. Who can doubt, when he hears a man in the very first stage of what is only a preliminary H 2

liminary to a question of the greatest magnitude, and which is alfo entirely new, giving his clear and decided opinion upon it; and doubting whether the affembly in which he rofe, which is our only refource in cafes of emergency, which has often shewn that it is so, and the fuperintending power of which, in fuch cafes, he has too much knowledge not to know; had any right or title to proceed to its difcuffion-when in addition to this they recollect the course of this man's life, the distractions in which he has fo often floated, his daring capacity, and the power which fupports him-who can doubt that if he is not allowed to difturb the peaceful order of things, some dangerous storm will burst! fome dreadful thunder crash over the heads of this deeply wounded, though recovering country?

That we may all of us be aware of this; that we may be prepared for any violence on which, under his direction, the party may refolve; is the purpose of these pages. What we have furmised will perhaps never happen, we truft it never will; but too much caution cannot be entertained. The power of the great families who defpife the voice of the people, and are above popularity, except among the dregs of mankind, and the mobs they have occasion for; but who will rule in their own way, independent and paramount; has arifen to a pre-eminence truly alarming. The perfonal influence of the man whole talents might make us blefs him, but whofe character makes us fear him, is too well known to mention ; in every province of England he has a fupporter ; he revels in all the pride of dominion in Westminfter-" Serviat ultima 'Thule." It was fuch a combination of great families and falents, which in another kingdom, and under a despotic government, controlled and

and infulted the last prince of the house of Valois. It was fuch a combination. which, in the anarchies of the Roman republic (when, in the nervous period of Livy, " Jam pridem prevalentis populi " vires feipfæ conficiunt"), overcame the efforts of all good men, of Cicero and of Cato; and after tearing the very bowels of the state, ended in tyranny and a perpetual dictatorship. Who that has feen this man-who, like the conspirator Shaftsbury, has ten thousand brisk boys ready to ftart at a motion of his fingermaking his progrefs through his kingdom of Westminster, and supported by the Pompeii and the Craffi of Britain; will be able not to liken the prefent times and factions to that period of antiquity, when the Roman liberty, and the mild power of the fenate, perished together? Were our constitution different from what it is; were there no third eftate, one of the great uses of which is to curb and overbear fuch spirits as these; the confequence would be inevitable. As it IS.

is, we may not be furprised if some new Agrarian law should be promulgated, fome new Campania given away\*. Nor, did the forms of our government admit of it, if any one should be hardy enough to oppose the torrent of this power. should we wonder if, like Clodius, nobly born, he fued for an adoption into a plebeian family, in order to the expulfion of a virtuous adverfary +. It has been a fashion of late among the admirers of this man (I do not mean his more intimate affociates, for they are too like him in all points of his conduct not to suppose him perfection; but those admirers which he has among citizens who are even honeft and well difposed, but subject to the frailties and

\* In his first confulate Cæsar proposed and carried an Agrarian law, by which the lands of Campania were to be distributed to 20,000 poor citizens who had three children.

+ Cæfar finding a firong oppofer to his ambition in Cicero, encouraged Clodius, who was of the best blood of Rome, to be adopted amongst the plebeians, in order to fue for the tribunate; by which he proposed the law which banished his antagonist.

mistakes

mistakes common to human nature) to admit his profligacy and total difregard of all regularity, but to dwell upon those shining abilities, and that profundity of political knowledge, which mark him as the most accomplished minister of the age. It may be fo; those who have the fortune to be in the complete possession of his mind, may tell them fo: but we, who compose the mass and body of the citizens, are so far removed from this intimate acquaintance with his fuperiority, that we can only judge of his abilities in this point by the proofs he has given of them; and, whether well or ill for the country, he has not had much opportunity for difplaying thefe Where, I would ask, was this proofs. aftonishing knowledge, which is to penetrate into the views of all the courts of the world, overshadow all other minifters, and tower above the genius of all the enemies of Britain? where was it acquired? in those temples of the destruction of all that is good or generous, where

E 56 ]

where the dæmon of chance and gaming keeps his " pale-eyed vigils ?" or in that admirable selection of the accomplished youth of this country, who not dreaming that there are things in the state worthy their attention, wafte their spirits and their fortunes at Newmarket or Afcott? Was it acquired in those habitations of meannefs and filth, with which this metropolis, fplendid as it is, abounds, and with which this companion of the fcum of the people, as well as of the proudeft of the nobles, in his many canvaffes, has been perfectly acquainted? Or was it in the arms of a faded beauty, whom, reeking with public prostitution, this virtuous citizen is not ashamed to take to his bosom; and to the honour of Britain, and the pride of her matrons, to introduce as his companion among the nations of Europe? Human nature must figh when she contemplates these nauseating parts of his character; and lament that one who was formed to be her ornament and pride, can

## [ 58 ]

can fuffer his paffions to make him her difgrace.

But we should be too happy, if the only question which agitated us were his abilities for office: no one doubts of their magnitude, though they may be raifed too high. But though they foared, with the ftrong wings of eagles, to a point that would dazzle and confound other mortals; still would the opinion of his character defeat their effects ; and the people of this Island would have to lament, that the most vigorous mind among them was too dangerous to be trufted. And it may not be improper here to remind you of the perfect compatibility of great talents, and a difpofition to abufe them. Pericles and Cæfar were the ableft men in their states; the Dukes of Guife were the most accomplished princes of their time; and the firmest mind that ever guided the strength of this country, raifed itfelf to its preeminence by the murder of its Sovereign, by the wafte and defolation of every thing

thing that was good, great, or noble. Let not those therefore, who are friends to good order, exalt their idol for his talents, till they grow blind to the danger which his character threatens. I speak not rashly, I write not with petulance; I ground my assertions upon the indication of his views and principles, which is derived from the complexion of all his measures, from the tenour of his whole life!

And now let the warmest of his admirers-among those I mean who, not being actuated with the fame views as himfelf, are not, as his more immediate companions are, become part of himfelf-let them come forward and declare, that he has not departed from all that open firmnefs and manlinefs which were the only virtues left him-whether he has not been guilty of a bafe dereliction of a principle which he finds he had too rashly laid down, and been reduced to the defpicable meannefs of retracting what he had explicitly and publicly avowed? the ridiculous I 2

ridiculous fophiftry which he ufed, the glofs and explanations which the Houfe were forced to hear from him, are too degrading for an honeft man to delight in reiterating. I will not therefore infift, that every one who heard him, underftood him to mean, that, in emergencies like the prefent, an inherent and independent right to affume the Regency attached to the eldest fon of the King; I will not infift, that nobody fuppofed him not to mean, that it was fubject to no revision or adjudication of the two Houses! or that he was not at that time without an idea of his nice distinction between a right and a poffession! Could we think him lefs dangerous, or that the feelings of his party were at all wounded by this trifle, we might view him with a degree of compaffion. As it is, let us imitate the calm dignity of his rival, and let us with him be forry to fix on any gentleman a meaning, though ever so obvious, which be afterwards declares not to have been his meaning .---- Perhaps this grave perfonage,

fonage, fo fhielded by the rectitude of his intentions, fo intrenched within the cool majesty of independence, so strongly armed in honefty, that " words pass by him. " like the idle wind which he refpects " not;" who is indifferent to newspaper reports and representations, and thinks them beneath his notice; will despise the virtuous mischief which a mere pamphlet can do him. But let him have a care In this glorious country, where every individual member thinks himfelf, and is, interested in whatever is doing by his governors; pamphlets and newfpapers are the best, and indeed the only channels of intelligence to the different ranks of men not immediate spectators of the actions and views of parties; and often have awakened them from their blameable ignorance, or their criminal indifference. Let him recollect, that when the nation refounded, through its most distant provinces, with clamours against an oppreffive and feeble government, the fpirit which roufed them appeared in a newspaper:

newspaper: it was by fuch a vehicle, defpifed and spurned as it now is, that the bold and imposing foul of Junius condefcended to convey to his country whatever he thought would conduce to its fervice. But this is known too well by a man who has been nurfed in the arts of party, for him to have been ferious when he made the declaration which affected fo much dignity. It would have more properly become the mouth of the Son of Chatham, who difdains perhaps too much the arrows which, though blunted, are often directed against him, and loves popularity which follows, not which is to be followed.

[ 62 ]

Were I difpofed to purfue the line of thought which this creates, it might be fpun out to a length which would tire you. I will only therefore obferve, that with a difpofition cold and averfe to popular humiliations, the character alone of the one has placed him on a fummit of public favour, to which his adverfary, with all his arts of attaching to his perfon fon the nobleft together with the vileft of mankind, has never yet been able to reach : and that he owes his prefent feat in the fenate to the free choice of the refpectable fons of liberality and fcience; while the other is placed there chiefly by the efforts of a multitude whom he cajoles, and who, with tribunes at their head, fill the whole forum with riots and diforders. Yet even there, abfolute as he is, did the election proceed by centuries instead of tribes \* : could independence or property have weight against beggary and numbers, he might tremble on that throne, on which he feems fo firmly to have fet his foot. However, we shall not have much reason to grieve, if the only permanent promotion he has met with, in the course of his ambition, is from the reprefentation of a peaceable to that of a riotous multitude, from a venal borough to a prouder city.

\* Alluding to the original way of voting among the people at Rome, according to the division or Cenfus made by Servius Tullius.

## I feel that I ought to beg pardon for calling your attention for fo long a time to one character; but it is because of the feeble hand which is difplayed in its delineation, not because the necessity for fuch a sketch is not very strong. Did the fpirit of Junius now live as formerly, he would have dwelt upon it much longer, and with all that energy and coercion with which he terrified and degraded the dangerous power of a minister: he would have attacked, with equal fuccefs, the danger when it had changed fides. Penetrating and virtuous as he was, he would fee where the balance now lay; the unreftrained license with which it was fupported, and the neceffity of curbing it with a strong hand! But his genius perhaps no longer lives; and the furious fpirits which are now raging within the peaceful bosom of the country, will gain ftrength till they burft forth like a torrent of fire, and overwhelm the happy villages and vineyards which are unconfcious of of their danger. Who is there but must dread

[ 64 ]

dread this, when they fee the Sovereign, who had the firmness to bridle them, is incapable, by a most affiicting malady, any longer to affert his own rights, or the wifhes of the people ? when they behold them, with a most indecent elevation of joy, marshalling their power, and poifing their strength, in all the wildness of ambition, and the madness of approaching fuccefs ? This it was that prompted their leader to commit himfelf fo imprudently; this it was that could induce Sheridan to threaten, with a matchlefs audacity, what however drew upon him the indignation and the lash of that great man, who feems born for the reftoration of our credit, and the defence of our rights ! But, though the infolence of these men who have always been to daring, would teach us to fuspect, that they are convinced the time is now come for the indulgence of their ambition upon their own terms; what are we to expect when two men, highly dignified with the laticlave of Pa-K tricians.

[ 65 ]

tricians, arife gravely in their fenate, and endeavour to terrify us into compliance!

Are we then indeed fallen fo very low ! are we really fo humbled ! fo loft to all the spirit which animated our ancestors! fo inconceivably stupid and blunted in our sensibilities ! that we are judged capable of being thus impreffed ? Or are the Irish themselves (now grown a well regulated and loyal nation, through the fense and the virtues of their leaders) still judged fo inflammable, that we shall fear they may fly to arms upon any impulse, or the loofest hint ? What opinion of us could have been entertained by the noble lord, when he fuffered this threat to creep into his fpeech ? the fpeech itfelf, and the mistaken principles it contains, are more excusable to a generous people than fuch an intimidation : for to mistakes the wifest of men are often liable. That he is mistaken, that he will find it difficult to fulfil the promise which he pledged himself to the peers to perform; the fuperior

perior knowledge of his opponent, and the renunciation of his party, both unite in confeffing. What though his life has been called to the ftudy of the laws! what though he be dignified with the ermine of magistracy ! it happens that the question which he fo boldly decides, is, from its never having occurred, taken out of the law; and the gentleman, the hiftorian, and the fenator, are equally entitled to inveftigate and determine. But he is too fenfible of this, too well endowed with natural and acquired talents, and his fentiments and words were too nearly alike to others that had been uttered, for us not to suppose that he was in concert with his party. It is therefore that we watch him, it is therefore that we fear for the effects of that determined ambition, which can make a man to high in his profession expose himfelf to censure. Retract, my good lord! the nation expect it of you; there can be no difgrace in a candid confession; and what perhaps is of equal weight, the party have K 2

have for once repented their precipitation. The first prince of the blood, next to the heir apparent, declares in his place, that the illustrious perfon whom they wished to excite, is an enemy to the violence which they would not have been ashamed to have hazarded. We owe them no thanks that they did not hazard it; that this violence for an independent right, fubject to no revision, subject to no adjudication, did not break forth with a de-Aructive rage: but finding that, with a madnesseven with them unufual, they had determined upon what would not have been supported; they quit, though with reluctance, a ground that is not tenable, and are reduced to retractations which a gentleman would difdain .- The errors in judgment however, of any man, though ever fo high in office, we may be induced to pafs over; they may be really errors, and as fuch human nature must forgive them : for the mind may be fo warped by the fpirit of party, that the clearest understanding may not perceive them. But when

when a man whole station, habits, and abilities have ever given him a weight and authority above others that are not fupported by the dignity of office; most daringly declares a fact, calculated to diftrefs, intimidate, and confuse ; if that fact should not be as he represents it to be, what excuse can we make for him, or how can any error in judgment be affigned on that, which was not the object of the understanding but of the fenses? Yet fuch a fact has been stated ; we have been threatened with the diffolution of the union, and the indignation of the Scotch nobility, if we do not depart from a right which may belong to us, and fuffer the fame personage to assume as his birthright, what every one perceives will belong to him by election .- Come forth, thou rash man ! and tell us, who have a right to know, by what authority you have endeavoured to influence a question, which from the nature of juffice and truth should be determined by nothing but themfelves? How have you arrived at

at the knowledge of the intentions of your order? Have they waited upon you in a body ? have they addreffed you ? or have you confulted them all collectively, and been deputed to reprefent them on this fubject ? If you have done none of these things, confess that you have exceeded your authority, and that you are forgetful of the interests of those who gave you that feat which you fill with fo much gravity, and of the nation whom in part you are appointed to govern. If you have done these things, I will humble myself before you, and alk your pardon, from the fame regard to justice which now induces me to reflect upon a character hitherto respectable. But there will be no necessity for this humiliation; it is impossible that the Peers of Scotland, one of whofe characteristics is an extensive knowledge and acquaintance with the nature of things, as well as a spirit to affert their rights, could, in fo early a stage of a bufinefs which required fo much caution, have declared what this Viscount declared-

[ 70 ]

ed-Not merely that there was no occafion for a fearch after precedents on a subject, which, of all others, depended upon their judgment for elucidation ! not merely that the rule of fucceffion would be departed from, though the men most competent in the wildom of the state, fhould upon fage deliberation decide that it was not-not merely this !--- but that, if fuch was the decision, they would judge the caufe over again, and break the bonds of that union, the very fecond article of which declares, " That the fucceffion of " the Monarchy of Great Britain, shall " be the fame as was before fettled with " regard to that of England."

If the fuccefilion of the Monarchy is the fame, the fuccefilion of the Regency muft be the fame, whenever the voice of those competent to decide, has determined what that fuccefilion is. But I will not wafte my time and your patience in useles argument; the misfortunes which we fear do not depend upon argument: if they did, notwithstanding fuch

fuch a conftellation of shining talents as appear against us, backed by fuch an immenfe weight of title and opulence, influence and alliances, as are in close junction among the greater Nobles and Commons ; we fhould not have much reafon to be alarmed, when fuch men as our prefent Clarendon and Falkland prefide. It is that determined daring, that marked defign to rule without control, that defperation of character and preffing neceffity in fome, and that fleady view to ariftocracy in others, which are the things that fill every moderate or fenfible man with . alarm. And before we quit this point, I must remind you, that in the commencement of those times when every thing that was good or noble, when the virtuous and the wife, the greatest lovers of the laws, the Peers, and the Sovereign himfelf, fell a facrifice to the dregs and the vileft of the people-the ftorm firft lowered in Scotland, though the native and hereditary kingdom of Charles; and advancing fouth, it at last broke with fuch

[ 72 ]

fuch violence, that the flate was convulfed to its foundations, was defolated, and destroyed. I am far from faying or imagining that fuch confequences will now happen, or that they are expected by the party that now rages; but neither could the party who raged with all the violence of civil war, in the times I mention, foresee the extent of the consequences of exciting the Scotch to rebel, of encouraging them while in arms, and of actually paying and rewarding them when they difbanded. Yet, when they did arrive, none were fo active in promoting them still farther ; in arming their impious hands against a king, to whom they pretended all poffible refpect, and defying all law, or justice, or good order, in drawing all the power under their own tyranny. Nor will it be totally irrelevant to observe on our happiness, that the civil discords of our hereditary enemies on the opposite shores, prevent them from interfering, with a hand that blafts whatever it touches, in the emergency which now L

now presents itself. America is a striking instance of their disposition and ability; English quarrels and English patriots have often proved their greatest friends; and, before the kingdoms were united, Scotland was, in every reign, the caufe of the most powerful diversions in their favour. We fee then the fimilarity between the fpirits and difpositions of many in the prefent times and those of the middle of the last century. Thank God ! the times themfelves are different; the minds of men are become enlightened; we are not now a people ftruggling under the weight of feudal oppreffion; we have long been emancipated : if we have any fear now, it is from our own prejudices. Having for ages been taught, that nothing which comes from the fide oppofed to the Court, can poffibly tend to our difadvantage, indeed, which can poffibly not tend to our interest, we are become blind to our danger, in the quarter from which it is now most likely to come. Power, in all countries, times, and climates, is the

[ 74 ]

the fame in its nature, and uniform in its operations upon the human mind. Its general tendency is to render us overbearing and haughty, often unjust, and not unfrequently cruel; and these are its effects, whether it is enjoyed by the many or the few, as well as by a fingle perfon : it has been proved by the Offracism of Athens, and the Ephori of Sparta; by the Comitia of the Romans, and the Inquisitors of Venice; by the Parliament of England, and the Major Generals of Cromwell. We are not to suppose, therefore, because the power of the Crown is what we have conftantly been taught to dread, that we may not have the fame reason to dread the power of a Parliament. It is in the proper balance of power that the true happiness of a nation confifts, and whenever that balance is in danger of being deftroyed, whether from the usurpations of the Crown, or that union among the Great which would render them almost independent, then is that happiness also in danger.

Thefe

These are truths which I trust are difficult to be shaken; they must equally meet with the affent of the Representatives of the Landed and the Moneyed Interefts, the dignified Noble, and the moderate Citizen. And I leave to your own judgments, from every thing that has been faid, from the opulence, the fhining qualities, the influence, and indefatigability of the Party, whether or not fuch an union is not now to be dreaded. But whatever may be the fortune of this Community, I cannot help felicitating its members, on having at least posseft, for five years, a band of ftewards, from whom they had nothing of this nature to fear. Among them was no firm junction of the first families of the kingdom; among them was no overgrown wealth, no influence that was alarming; no daring spirit which dazzled; no brilliancy of talents which captivated. Their integrity, their industry, their characters, alone introduced them; the people alone fupported them; their breath would have destroyed

destroyed them. Can you then really take your leave of these faithful and conflitutional fervants, without the tribute of fome public honours to their memory? Understanding, as you do, the nature of government, and of national happines in general, and your own in particular, can you be indifferent to the retreat of your friends? Or, in more energetic language than it is ever poffible for mine to be, " Can you on this fair mountain leave to feed, and batten on this moore ?" Forgive the warmth that has appeared in these pages; it can only be meant for -, your fervice. Mine is the last heart in the world, fo convinced am I of the pernicious effects of an inflammable temper, and difaffection in the people, on the happiness of a nation, to wish to excite your minds to fedition or tumult. My great and only aim is to call your attention to a part of the constitution, in which the balance feems to be verging too much on one fide. It is your province and duty to fee it properly trimmed, to give it your

opinions, and a proper exertion in the approaching elections, to reftore whatever you may think to be wanting to the fafety or happiness of the community.

All that has hitherto been faid, relates only to (what is indeed the most important) our internal welfare. But there are other points, which, upon a change of administration, must fink deep into every feeling mind : I mean the total change of our Councils and Servants. In a time not merely the most glorious on the ocean during the last war, but which is almost without parallel in the naval annals of Britain; in a moment of victory and of triumph, when the kingdom refounded with his praises, and every man called down bleffings on the name of RODNEY; Mr. Fox did not blufh to degrade him, and in his room appoint another, whofe name, however privately or professionally respectable, most certainly, except in parliament, had not been heard of

of during the war.-Had Hannibal, immediately after the battle of Cannæ, when eighty thousand of the Romans perished, and their generals and great captains were cut off, been recalled by fome infatuated party at Carthage (and parties raged there also with all their usual violence); had a general not much known been appointed in his room, how would the Romans have felt? They would have felt as the French did, aftonished, encouraged, and invigorated. Such, however, is the man whom a race of people in this country extol as the greatest minister we have. May we not then expect a repetition of the fame conduct? May we not expect, in his total neglect of every thing that interferes with the interests of his party, the recal of one on whom the nation have placed their hopes for the falvation of the Eastern Provinces of the Empire, as they did upon Lord Rodney for the defence of the Western !- the recal of Cornwallis, the firm, the brave, the virtuous, and the wife ? In vain will that great

great man plead (if he condefcends to plead) that the profperity of British Asia depends upon the conftancy and permanency of its government; in vain will he deprecate the folly of a change. Regardlefs of the high character of this Nobleman, not more dignified by title and anceftry, than by the virtues of a Man and of a Citizen; regardless of the stability both of measures and of governors, neceffary for the direction of an immense power; he will no doubt confirm the world in the opinion they have long entertained of the miserable fluctuation of British councils. I am not versed in the views of foreign cabinets, I am ignorant of those of our own; I am equally unacquainted with what is doing in Illyria or Sarmatia; upon the fhores of the Baltic or the banks of the Euxine; with the ravages in the Bannat, or the conventions in Finland. But I know that it is a received opinion among the kingdoms of Europe, that no nation is fo little to be depended upon in politics as ours; fo various

rious are our councils, fo often has a party forced itself into office. This is no new opinion, taken up upon flight grounds; it is at least as old as De Witt. That great man told Sir William Temple, that the only thing that frightened him in his negociations with England, was the little ftability of her plans; which ever fince the reign of Elizabeth had been fo changeable, that it was impoffible to take measures with her for two years together .- If any thing could have induced the most powerful Prince of the German continent, and the commander of the best army in the world, to make common caufe with us, and fo ftrongly fecond our views; it must have been that opinion which he began to entertain of the permanency of the prefent administration, and the stability and weight of our alliance, when the King, the Minifter, and the decided majority of the people, coalesced in its formation. Here was a Coalition indeed ! the most glorious for any country, and the most unlike that M ininfamous one which we have feen ; a monfter of fo heterogeneous a nature, composed of fo many difcordant parts, of men who had for fo many years been tearing one another to pieces; that we have only to wonder at and to dread the ftrength of that open difposition to violate, in the face of the world, every thing that was decent, honeft, or principled, which can, for for long a time, have retained them in fuch close conjunction. But I am wrong; we may indeed dread, but we ought not to wonder ! Having now quitted all pretenfions to the appearance even of character or public principle; having with an infolence and audacity, which posterity will fcarce believe, bearded the nation to whom they are accountable, and told. them that they never had any principles but those of ambition; that they had not the common fpirit of gentlemen, who refule to affociate with those whom they have once reprobated ; I do not fee what they have left for it, but to fet the world at

[ 8z ]

at defiance, and depend for fupport upon the closeness of their own union.

It will be impoffible, in this place, not to admire that firmness of character, that honeft haughtinefs, with which their noble opponent difdained their overtures. Superior to an union which he felt would be contamination, he imitated Cicero in his conduct, as he does in his eloquence, and refused to owe his power to this Britifh Triumvirate. But in what has he not shewn himself superior to his rivals? In the prefent contest, which, long as this differtation has been, it will be impoffible to pass by, his character and abilities shine out with an approved luftre; and whatever may be our fortunes-whether we may yet govern ourfelves, in concert with the Houfe of Chatham; or whether we are doomed to be governed defpotically by the House of Holland-an useful lesson may be taught to our children, from the prefent conduct of our rulers. They may observe to what a transcendent height of M 2 fupe-

fuperiority greatnefs may foar, when fupported by the wings of honefty; and to what a depth the fame greatnefs must neceffarily fall, when oppreft by unbridled ambition, and defalcation of principle! The precipitation, and the mean endeavour to avoid the confequences of that precipitation; the invafion of our rights, and the attempt to threaten us out of the prudent conduct we were purfuing; all unite in finking the Oppofition still lower in the minds of men than they were funk before. They may be ftrong in numbers, they may ftrain every nerve, they may wade to power through a quickfand of meannefs, turbulence, and inconfistency : but they will never reign in the hearts of the people: the Wife will never trust them; the Good will never love them !

Is it not abominable to behold these men, with a most inconsistent ingenuity, first attacking and denying our rights, afterwards accusing us for undertaking their

their defence, and laftly denying that we have a power to defend them? Is it not monstrous to observe their bold leader, not content with allowing us to guess at his views, from the daring indecency of his conduct; not content with shewing us, by his measures, that he means to obtrude himfelf upon the government of the country ; but, in defiance of all decorum, coming forward in the house, and telling his noble adversary in fubstance, if not in words, that he means to tear from him the high station he holds ! The behaviour of these Men of the People, on this occasion, has affronted and roufed even the most moderate perfons-" Populares ifti jam etiam modestos homines fibilare docuerunt." But it is vain to fuppose that the honest warmth, the indignation, the reproaches of their fellow citizens, can have any effect upon fuch characters. We can only endeavour, by mutual communication, to alleviate the grief which agitates us. We can only lament

lament that in fuch times as thefe, when Virtue, or at least Decency, Liberality, and Science, affect to boaft that they have civilized and enlightened our minds; men shall be found capable of fuch a phrenzy of ambition, that having failed in endeayours to ftorm the closet of the Sovereign, out of very madnefs at their defeat, they take advantage of his affliction, and profit by his misfortunes. Have they no fense of the calamities of our natures? no common feelings of humanity about them? or, hardened as they are, has this opportunity fo blinded them, that they cannot fee the general odium it will reflect? But what need these appeals? Fear of the odium into which they will fall, fense of the unhappiness that will attend upon universal detestation, have no effect upon their minds. They are dead to all feeling; reverence for their King they know not; of gratitude they are incapable; shame belongs not to them ! O unwife anceftors, to have formed

formed the conftitution ! O mistaken patriots, to have bled in its defence ! Unhappy country, to be unequal to its protection ! In the moment when we had overcome the Aristocratic fury; in the moment when we had reftored the balance fo neceffary; when our hearts went along with the meafures of our Sovereign; when we looked with fond hope to the continuance of his measures ! when we enjoyed the warm funfhine of a permanent government, and when we dreamt not, alas! of the interruption of our prosperity-to be fuddenly dashed from the fummit of our wifhes; to fee our King fall under the most dreadful affliction ; and to be exposed anew to the fury of party ! what must be our anguish ! what our defpair ! " Oh fallacem homi-" num spem, fragilemque fortunam, et " inanes nostras contentiones! quæ in " medio spatio sæpe franguntur et cor-" ruunt, et ante in ipfo curfu obruuntur, " quam portum conspicere potuerunt !" By

[ 87 ]

By those who are not entirely lost to all feeling, by those who may think there is fome little truth in what I have faid, I shall be forgiven the warmth which swells in these pages. However, amidst the depravity of some, and delusion of others, as if to shew that our nation is not through all its members abandoned to the blind pursuits of faction and party, a glorious cohort remains to oppose them.

As lovers of our country, and lovers of human nature, we muft rejoice to fee that a powerful body has had the common fpirit of honour in them, and not forfaken their beloved Sovereign, nor the interefts of the people. Pofterity will rejoice to obferve that fome virtue was left among us, when they contemplate the names of thofe who dared to defend themfelves when attacked in their very vitals; of thofe who voted in the majority, on the morning of the feventeenth. But had we not had a majority; had we not even obtained the triumph that we did; ftill

[ 88 ]

still would two names, by the fuperior excellence that attaches to them, refcue us from the difgrace which otherwife would have covered us. Throughout the present contests they have been eminently illustrious, for the firmness, the confiftency, the honeft integrity, the calm wifdom of their poffeffors. Long after the period when we shall be taken from this fcene of agitation and ftruggle; when the factions of Britain shall be no more; when her obfcurity will perhaps equal that of the prefent Ilium, or of Athens; will the names of THURLOW and of PITT be known to future Patriots; the virtuous Leaders of Party will be emulous to imitate them; and the generous youth, while grounding themfelves in the principles of public honour, will think of them with veneration, and mention them with rapture. In this cruel affliction of the King, cut off from the family whom he loved, and the wife whom he adored, and with whom he had lived a matchlefs example of conjugal fidelity

delity and happines; the virtuous heart dwells with emotion upon those generous words, that still vibrate upon the ear of of fensibility, "When I forget his favours, may God forget me !"

If there was any thing wanting to ruin and blaft the credit of Oppofition with the nation, violent to thruft themfelves upon them, and with the moft indecent eagerness to take advantage of this public misfortune; first attacking our just rights, but, discovering their folly, accusing us of seditious intentions because we defended them; it was a contrast of this kind.

Common fenfe can form but one judgment on the matter; and low, very low must this party fall, in the minds of the feeling and the generous.

Whatever may be the fortune of Mr. Pitt; whether he will remain to govern a willing nation, or whether he will be made to yield to the torrent; ftill will increafed reputation await upon his name. If he retires, he will retire covered with laurels;

laurels; the people will receive him with open arms; they will love, cherifh, and revere him: and he will refemble his father, as he does in abilities, in the refpect and the gratitude which, though ftript of his power, he will obtain from an admiring and applauding country. That firm regard to the rights of the citizens, and that clear purfuit of honest ambition, which led him to oppose the invasions of Opposition-compared to the defpicable meannels of Oppolition themselves, who departing from the fpirit of the principles they had long held, facrificed them to prerogative, to force themselves into office-will fupport and increase his virtuous popularity. If to this we add, as we cannot fail to do, the broad path of honour he has purfued; his candid acknowledgment of the expediency of meafures, which he knew would inevitably deprive him of power; his opennes; his manlines; his gratitude to his benefactor; and his dignified superiority to all interested concerns, and every thing that inter-

# [ 92 ]

interfered with the people's profperity; we cannot furely refufe to affert, that he is an illustrious example of that wellfounded opinion,

Juftum et tenacem propofiti virum, Non civium ardor prava jubentium, Non vultus inftantis Tyranni, Mente quatit folida ; neque Aufter Dux inquieti turbidus Hadriæ, Nec fulminantis magna manus Jovis. Si fractus inlabatur orbis, Impavidum ferient ruinæ.
