TABLES OF INTEREST, &c.

FOR the better underſtanding of the following Tables, it is neceſſary to ſay ſomething of Decimal Fractions, the Nature of which may be eaſily apprehended, by conſidering, That

As Whole Numbers increaſe in a Decimal Proportion, by the Addition of Cyphers to the right Hand; ſo, on the contrary, Decimal Fractions decreaſe in the ſame Proportion, by the Addition of Cyphers to the left.

As——10 is Ten Unites.
100——One hundred.
1000——One thouſand.
10000——Ten thouſand.
100000——One hundred thouſand, &c.

So——.1—— is One tenth Part of an Unite.
.01——One hundredth Part.
.001——One thouſandth Part.
.0001——Ten thouſandth Part.
.00001——One hundred thouſandth Part, &c.

For the Denominator of a Decimal Fraction is always an Unite, with ſo many Cyphers to the right Hand, as there are Places in the Decimal Fraction.

Therefore Cyphers on the right Hand of a Decimal Fraction, alter not the Value; .5 being $\frac{5}{10}$ .50 $\frac{50}{100}$ .500 $\frac{500}{1000}$, &c. each of them being equal to one half of an Unite.

Decimal Fractions are diſtinguiſhed from whole Numbers, by a Point, or Comma, placed before them.

Addition, Subtraction, Multiplication, and Diviſion of Decimals, are all of them performed as in whole Numbers, obſerving theſe few Rules; *viz.*

In Addition and Subtraction, to place the Points of Diſtinction one under the other.

In Multiplication, to ſeparate with a Point ſo many Places of the Product to the right Hand, as there are Decimal Places both in the Multiplicand and Multiplier; and if there are not ſo many Places in the Product, then to add Cyphers to the left Hand, till there are ſo many Places.

In Diviſion, to ſeparate with a Point ſo many Places of the Quotient to the right, as there are Decimal Places in the Dividend more than are in the Diviſor; and if there are not ſo many Places, then to add Cyphers to the left, till there are ſo many.

And by adding Cyphers to the right Hand of the Dividend, any leſſer Number given may be divided by a greater.

Examples in Addition.

.034375	.183333	23.2375	372.5125
.139583	.229167	.734375	145.266667
.340625	2.125	42.58125	769.1375
.441667	3.234375	.936458	938.083333
.95625	5.771875	67.489583	2225.

Examples in Subtraction.

.240625	.934375	7.6875	267.5
.088542	.239583	2.746875	136.345833
.152083	.694792	4.940625	131.154167

Examples in Multiplication.

Multiplicand,	.95	.125	25.525	653.	423.
Multiplier,	.25	.075	.75	.125	2.25
Product,	.2375	.009375	19.14375	81.625	951.75

Multiplicand,	372.775	127.025	.003125
Multiplier,	16.25	154.	800.
Product,	6057.59375	19561.85	2.5

Examples in Division.

Divisor.	Dividend.	Quotient.
.25)	.2375	(.95
.125)	.009375	(.075
.75)	19.14375	(25.525
653.)	81.625	(.125
2.25)	951.75	(423.
16.25)	6057.59375	(372.775
127.025)	19561.850	(154.
800.)	2.500000	(.003125

To reduce a Vulgar Fraction to a Decimal of the same Value, divide the Numerator by the Denominator, and the Quotient will be the Decimal Fraction required.

And, to reduce a Decimal Fraction to a Vulgar, multiply the Decimal by the Denominator of the Vulgar, and the Product will be the Vulgar Fraction required.

But to prevent the Trouble of such Reduction, the following Table is made.

Shillings, Pence, and Farthings, reduced to the Decimal Parts of a Pound.

16	.8	17	.85	18	.9	19	.95	20	1.

Examples of the Uſe of the preceding Table.

WHAT Decimal Part of a Pound is 9 *d.* ½?

Look in the Table for 9 *d.* ½, and even with it you will find .0395,8333; which is the Decimal required.

What is the Value of this Decimal .7468,75 in Shillings, Pence, and Farthings?

Look in the Table for that Decimal, and even with it you will find 14 *s.* 11 *d.* ¼; which anſwers the Queſtion.

Note, If you cannot find in the Table the exact Decimal ſought for, take that which is neareſt to it, and you can never err above half a Farthing.

This Table of Reduction will likewiſe anſwer all Queſtions uſually performed by the Rule of Practice: As for Example,

What will 2364 Ounces of Silver come to, at 5 *s.* 3 *d.* ¾ *per* Ounce?

Look in the Table for 5 *s.* 3 *d.* ¾; and even with it you will find—— .2656,25

Which multiplied by—— 2364.

The Product will be—— 627.9375

Anſwer, 627 *l.* 18 *s.* 9 *d.*

But if the Queſtion had been, What 10, 100, 1000, or 10000 Ounces would come to? the Anſwer had been much eaſier.

			l.	*s.*	*d.*
For, if the Value of one Ounce is——	.2656,25	or——	00	5	3¾
Then, 10 Ounces will come to——	2.6562,5	——	2	13	1½
100——	26.5625	——	26	11	3
1000——	265.625	——	265	12	6
10000——	2656.25	——	2656	5	0

Multiplication of Decimals by 10, 100, 1000, &c. being performed only by removing the Point of Diſtinction, as above; therefore Queſtions of that Kind may be anſwered, by looking upon the Table, without the Trouble of a Pen.

For which Reaſon, thoſe who are not well acquainted with Decimal Fractions, ſhould carefully look over this Table, till they perfectly well underſtand it, and thereby all the other Tables which follow: The Trouble will not be great; it will not be long in doing; but, when it is done, it will be very pleaſant to tell by Sight, That a thouſand Pence comes to 4 *l.* 3 *s.* 4 *d.* ten thouſand Groats to 166 *l.* 13 *s.* 4 *d.* &c.

Of *SIMPLE INTEREST.*

THE Annual Intereſt of any Sum of Money is found, by multiplying the Principal Sum by the hundredth Part of the Rate of Intereſt, the Product being the Anſwer.

If the Rate of Intereſt be 2 *per Cent.* the hundredth Part is .02; if 2½ *per Cent.* .025; if 3 *per Cent.* .03; if 3½ *per Cent.* .035, *&c.*

Examples.

What is the Intereſt of 75 *l.* for one Year, at 3 *per Cent*?

75.
.03

2.25 Anſwer, 2 *l.* 5 *s.* 0 *d.*

What is the Intereſt of 157 *l.* 17 *s.* 6 *d.* at 5 *per Cent*?

157.875
.05

7.89375 Anſwer, 7 *l.* 17 *s.* 10 *d.* ½

What is the Intereſt of 3635 *l.* at 4 *per Cent*?

3635.
.04

145.40 Anſwer, 145 *l.* 8 *s.* 0 *d.*

Thus the yearly Intereſt of any Sum is found by one Multiplication.

Daily Intereſt is found by dividing the Annual Intereſt by 365, the Quotient being the Anſwer.

Thus .05 being the Intereſt of one Pound for one Year at 5 *per Cent.* divided by 365. the Quotient will be, .0001,3698,6301, *&c.* which is the Intereſt of one Pound for one Day at the ſame Rate.

The Intereſt for one Day being thus found, that Intereſt multiplied by 2, 3, 4, 5, 6, *&c.* gives the Intereſt of one Pound for any Number of Days.

Example,

Example, at the ſaid Rate of 5 per Cent.

The Intereſt of one Pound for one Day, is		.0001,3699 *
Which multiplied by 2. gives the Intereſt for	2 Days	.0002,7397
3.	3	.0004,1096 *
4.	4	.0005,4795 *
5.	5	.0006,8493
6.	6	.0008,2192 *
7.	7	.0009,5890
8.	8	.0010,9589
9.	9	.0012,3288 *
10.	10	.0013,6986
100.	100	.0136,9863

&c.

And thus the following Table of Simple Intereſt is made.

Note, That in contracting a Decimal Fraction, from many to fewer Places, it is proper to add one to the laſt Figure retained, if the next Figure omitted exceed 5. This is obſerved in all the following Tables, as it is above, where marked *.

A Table of Simple Intereſt.

The Intereſt of One Pound for any Number of Days, &c.

Days.	At 2 per Cent.	2½ per Cent.	3 per Cent.	3½ per Cent.	4 per Cent.	4½ per Cent.	Days.
1	.0000,5479	.0000,6849	.0000,8219	.0000,9589	.0001,0959	.0001,2329	1

24	1.2	1.44	1.68	1.92	2.16	2.4	24
25	1.25	1.5	1.75	2.	2.25	2.5	25

The Uſe of the preceding Table.

When the Intereſt of any Sum of Money is required for any Number of Days, look in the Table fo the Number of Days, and even with that Number, under the given Rate, will be found the Interef of one Pound, for that Time, and at that Rate; which Intereſt ſo found, being multiplied by th Principal Sum, the Product anſwers the Queſtion.

Examples.

What is the Intereſt of 462 *l.* for 85 Days, at 5 *per Cent. per Annum*?
In the Table, even with 85 Days, and under 5 *per Cent.* I find the Intereſt of 1 *l.* to be .0116,4384
Which multiplied by the Principal —— 462

The Product will be —— 5.3794,5408

Anſwer, 5 *l.* 7 *s.* 7 *d.*

What is the Intereſt of 83 *l.* 13 *s.* 6 *d.* for 235 Days, at 4 *per Cent. per Annum*?
In the Table, even with 235 Days, and under 4 *per Cent.* I find the Intereſt of 1 *l.* to be .0257,534
Which multiplied by the Principal —— 83.675

The Product will be —— 2.1549, &c.

Anſwer, 2 *l.* 3 *s.* 1 *d.* $\frac{1}{4}$.

What is the Intereſt of 2534 *l.* for 192 Days, at $4\frac{1}{2}$ *per Cent. per Annum*?
In the Table, even with 192 Days, and under $4\frac{1}{2}$ *per Cent.* I find the Intereſt of 1 *l.* to be .0236,7123
Which multiplied by the Principal —— 2534

The Product will be —— 59.9829, &c.

Anſwer, 59 *l.* 19 *s.* 8 *d.*

In like manner, the Intereſt of any Sum of Money for any Number of Days, is found by One Multiplication.

But if the Principal Sum for which the Intereſt is required, be 10 *l.* 100 *l.* 1000 *l.* &c. it may be found by Inſpection only.

For, Suppoſe the Number of Days, and Rate of Intereſt, as in the laſt Queſtion;

		l.	*s.*	*d.*
Then, As I ſee the Intereſt of 1 *l.* to be	.0236,7123, or	—	—	$5\frac{3}{4}$
So I likewiſe ſee 10 to be	.2367,123	—	4	$8\frac{3}{4}$
100	2.3671,23	2	7	4
1,000	23.6712,3	23	13	5
10,000	236.7123,	236	14	3
100,000	2367.123	2367	2	$5\frac{1}{2}$

Multiplication of Decimals, by 10. 100. 1000. &c. being performed only by removing the Point of Diſtinction, as hath been already ſaid.

When the Intereſt of any Sum is required for any Number of Years and Days together, as it frequently happens upon paying off a Bond or Mortgage, add the Intereſt of One Pound for the Years at the End of the Table, to the Intereſt of One Pound for the odd Days; multiply that by the Principal Sum, and the Product will anſwer the Queſtion.

For the more eaſy finding the Number of Days, from any one time given to any other, the following Table is made.

A Table

A Table of Days; Shewing

The Number of Days, from any Day in any One Month, to the ſame Day in any other Month, *viz.*

From	January.		February.		March.		April.		May.		June.	
To	February	31	March	28	April	31	May	30	June	31	July	30
	March	59	April	59	May	61	June	61	July	61	Auguſt	61
	April	90	May	89	June	92	July	91	Auguſt	92	September	92
	May	120	June	120	July	122	Auguſt	122	September	123	October	122
	June	151	July	150	Auguſt	153	September	153	October	153	November	153
	July	181	Auguſt	181	September	184	October	183	November	184	December	183
	Auguſt	212	September	212	October	214	November	214	December	214	January	214
	September	243	October	242	November	245	December	244	January	245	February	245
	October	273	November	273	December	275	January	275	February	276	March	273
	November	304	December	303	January	306	February	306	March	304	April	304
	December	334	January	334	February	337	March	334	April	335	May	334
	January	365	February	365	March	365	April	365	May	365	June	365

From	July.		Auguſt.		September.		October.		November.		December.	
To	Auguſt	31	September	31	October	30	November	31	December	30	January	31
	September	62	October	61	November	61	December	61	January	61	February	62
	October	92	November	92	December	91	January	92	February	92	March	90
	November	123	December	122	January	122	February	123	March	120	April	121
	December	153	January	153	February	153	March	151	April	151	May	151
	January	184	February	184	March	181	April	182	May	181	June	182
	February	215	March	212	April	212	May	212	June	212	July	212
	March	243	April	243	May	242	June	243	July	242	Auguſt	243
	April	274	May	273	June	273	July	273	Auguſt	273	September	274
	May	304	June	304	July	303	Auguſt	304	September	304	October	304
	June	335	July	334	Auguſt	334	September	335	October	334	November	335
	July	365	Auguſt	365	September	365	October	365	November	365	December	365

This Table ſhews the Number of Days, from any Day in any one Month, to the ſame Day in any other Month; As, from the 1ſt, 5th, 10th, or 20th of *May*, to the 1ſt, 5th, 10th, or 20th of *November*, is 184 Days: Which is thus known.

I find *May* at the Head of one of the Columns, and looking down that Column I find *November*, and even with it 184.

But, if the Queſtion is from the 5th of *May* to the 10th of *November*, I muſt add 5, and the Number of Days will be 189: On the contrary, if it be demanded, from the 10th of *May* to the 5th of *November*, 5 muſt be ſubtracted, and the Number will be 179. And thus any Number of Days not exceeding a Year, are found by Inſpection.

Of *DISCOUNT.*

TO find the Annual Diſcount of One Pound, at 2 *per Cent.* divide .02, by 1.02 ; at $2\frac{1}{2}$ *per Cent.* divide .025, by 1.025 ; at 3 *per Cent.* .03, by 1.03 ; at $3\frac{1}{2}$ *per Cent.* .035, by 1.035, *&c.* and the ſeveral Quotients will be the Diſcounts required.

And thus the Diſcount of One Pound for One Year is found, at the ſeveral Rates following, *viz.*

At 2 *per Cent.* the Diſcount is found to be	.0196,0784,3137
$2\frac{1}{2}$	.0243,9024,3902
3	.0291,2621,3592
$3\frac{1}{2}$	.0338,1642,5121
4	.0384,6153,8462
$4\frac{1}{2}$	.0430,6220,0957
5	.0476,1904,7619
6	.0566,0377,3585
7	.0654,2056,0748
8	.0740,7407,4074
9	.0825,6880,7339
10	.0909,0909,0909

The Diſcount of One Pound for One Year, being multiplied by any Principal Sum, the Product will be the Annual Diſcount of that Principal.

Examples.

What is the Diſcount of 100 *l.* for One Year, at 5 *per Cent* ?
The Diſcount of One Pound for One Year, at 5 *per Cent.* is .0476.19, *&c.*
Which multiplied by the Principal Sum —— 100.

The Product will be —— 4.7619, *&c.*

Anſwer, 4 *l.* 15 *s.* 2 *d.* $\frac{3}{4}$.

So that he who allows 5 *l.* for the Diſcount of 100 *l.* for One Year, at 5 *per Cent.* (than which nothing is more common) wrongs himſelf ; for he ought to receive ſo much Money, as at 5 *per Cent.* Intereſt, will amount to 100 *l.* in One Year, which leſs than 95 *l.* 4 *s.* 9 *d.* $\frac{1}{4}$ will not do.

What is the Diſcount of 9342 *l.* at $4\frac{1}{2}$ *per Cent.* for One Year ?
The Diſcount of One Pound for One Year, at $4\frac{1}{2}$ *per Cent.* is .0430,62, *&c.*
Which multiplied by the Principal Sum —— 9342.

The Product will be —— 402.2852, *&c.*

Anſwer, 402 *l.* 5 *s.* 8 *d.* $\frac{1}{2}$.

Thus the Annual Diſcount of any Sum, is found by One Multiplication.

The Diſcount of One Pound for any Number of Days is thus found, *viz.*

Firſt, find in the Table of Simple Intereſt, what is the Intereſt of One Pound, for any given Number of Days, at any given Rate: Then ſay, by the Rule of Three, as 1 *l.* and the Intereſt ſo found, is to 1 *l.* ſo is 1 *l.* to a 4th Number, the Arithmetical Complement of which ſaid 4th Number will be the Diſcount of 1 *l.* for the ſame Number of Days, at the ſame Rate.

Or to expreſs it otherwiſe; Divide Unity by 1 *l.* and the Intereſt thereof, and the Arithmetical Complement of the Quotient, will be the Diſcount required.

Example at 5 per Cent.

I find 1 *l.* and the Intereſt thereof, for

1 Day to be	1.0001,3699
2 —— ——	1.0002,7397
3 —— ——	1.0004,1096
4 —— ——	1.0005,4795
5 —— ——	1,0006,8493

&c.

Then, Divide Unity, by

	and the Quotient will be	the Arithmetical Complement of which is	and is the Diſcount of one Pound for	
1.0001,3699	.9998,6303	.0001,3697	1	Day
1.0002,7397	.9997,2610	.0002,7390	2	
1.0004,1096	.9995,8921	.0004,1079	3	
1.0005,4795	.9994,5235	.0005,4765	4	
1.0006,8493	.9993,1554	.0006,8446	5	
1.0008,2192	.9991,7876	.0008,2124	6	
1.0009,5890	.9990,4202	.0009,5798	7	
1.0010,9589	.9989,0531	.0010,9469	8	
1.0012,3288	.9987,6864	.0012,3136	9	
1.0013,6986	.9986,3201	.0013,6799	10	
1.0136,9863	.9864,8649	.0135,1351	100	
1.0273,9726	.9733,3333	.0266,6667	200	

&c.

And thus the following Table of Diſcount is made.

A Table

A Table of Diſcount.

The Diſcount of One Pound for any Number of Days, &c.

Days.	At 2 *per Cent.*	2½ *per Cent.*	3 *per Cent.*	3½ *per Cent.*	4 *per Ccnt.*	4½ *per Cent.*	Days.

365	.0476,1905	.0566,0377	.0654,2056	.0740,7407	.0825,6881	.0909,0909	365

The Uſe of the preceding Table.

When the Diſcount of any Sum of Money is required for any Number of Days, look in the Table for the Number of Days, and even with that Number, under the given Rate, will be found the Diſcount of One Pound for that Time; which Diſcount ſo found, being multiplied by the Principal Sum, the Product anſwers the Queſtion.

Examples.

What is the Diſcount of 462 *l.* for 85 Days at 5 *per Cent. per Annum*?
In the Table, even with 85 Days, and under 5 *per Cent.* I find the Diſcount of 1 *l.* to be .0115,0982
Which multiplied by the Principal——— 462.

The Product will be——— 5.3175,3684

Anſwer, 5 *l.* 6 *s.* 4 *d.* ¾.

What is the Diſcount of 83 *l.* 13 *s.* 6 *d.* for 235 Days, at 4 *per Cent. per Annum*?
In the Table, even with 235 Days, and under 4 *per Cent.* I find the Diſcount of 1 *l.* to be .0251,0684
Which multiplied by the Principal——— 83.675

The Product will be——— 2.1008, &c.

Anſwer, 2 *l.* 2 *s.* 0 *d.* ¼.

What is the Diſcount of 2534 *l.* for 192 Days, at 4½ *per Cent. per Annum*?
In the Table, even with 192 Days, and under 4½ *per Cent.* I find the Diſcount of 1 *l.* to be .0231,2386
Which multiplied by the Principal——— 2534.

The Product will be——— 58.5958, &c.

Anſwer, 58 *l.* 11 *s.* 11 *d.*

In like manner, the Diſcount of any Sum of Money, for any Number of Days, is found by One Multiplication.

But if the Principal Sum for which the Diſcount is required, be 10 *l.* 100 *l.* 1000 *l.* &c. it may be found by Inſpection only.

For, Suppoſe the Number of Days, and Rate as in the laſt Queſtion.

			l.	*s.*	*d.*
Then, As I ſee the Diſcount of 1 *l.* to be	.0231,2386, or		—	—	5½
So I likewiſe ſee 10 to be	.2312,386		—	4	7½
100	2.3123,86		2	6	3
1,000	23.1238,6		23	2	5¼
10,000	231.2386		231	4	9¼
100,000	2312.386		2312	7	8¼

&c.

Of

Of *COMPOUND INTEREST.*

CASES in Compound Intereſt, if for any conſiderable Number of Years, being anſwered with great Difficulty, eſpecially by thoſe who are Strangers to *Algebra*, and the Uſe of the *Logarithms*, by reaſon of the continued Multiplications or Diviſions, which in many Caſes muſt be performed: Therefore the Five following Tables were calculated, by which all Queſtions relating to Compound Intereſt may be anſwered with Eaſe, provided the Rate of Intereſt, either given or ſought for, be any of the ſeveral Rates of Intereſt, mentioned at the Head of the Tables, and that the Time given or ſought for, be any of thoſe Times for which the ſaid Tables are made.

I ſhall ſhew my Reader how theſe Tables were conſtructed, then give him the Tables themſelves, and afterwards give Solutions to all the Caſes I have ever met with in Compound Intereſt.

The *Firſt Table* ſhews the Amount of One Pound in any Number of Years, *&c.* and is made by the continued Multiplication of the Amount in Half a Year, and in One Year, by 1.02, if the Rate of Intereſt be 2 *per Cent.* by 1.025, if 2½ *per Cent.* by 1.03, if 3 *per Cent.* by 1.05, if 5 *per Cent.* *&c.*

Example, at 5 per Cent.

The Amount of One Pound in		multiplied by 1.05, the Amount will be		at the End of	
½ a Year	1.0246,9508		1.0759,2983	1½	Year.
1	1.05		1.1025,	2	
1½	1.0759,2983		1.1297,2632	2½	
2	1.1025,		1.1576,25	3	
2½	1.1297,2632		1.1862,1264	3½	
3	1.1576,25		1.2155,0625	4	
3½	1.1862,1264		1.2455,2327	4½	
4	1.2155,0625		1.2762,8156	5,	*&c.*

Note, The Amount of One Pound in Half a Year, is known by extracting the Square Root of the Amount of One Pound in One Year, at any given Rate; which Root when found, will be the Amount in Half a Year at the ſame Rate: So, in the foregoing Example, the Square Root of 1.05 is found to be 1.0246,9508, and is the Amount of One Pound in Half a Year at 5 *per Cent.*

1.0246,9508 the Amount in ½ a Year, as above,
Being multiplied by——1.0246,9508

The Product will be——1.0500,0000 the Amount in 1 Year.
Which multiplied by——1.0246,9508

The Product will be——1.0759,2983 the Amount in 1½ Year.
Which multiplied by——1.0246,9508

The Product will be——1.1025,0000 the Amount in 2 Years.
&c.

And this is another way of making the Firſt Table.

It

It may not be improper in this Place to obſerve, That as Compound Intereſt is a Series of Geometrical Proportions, and the Ratio given, being always ſo much *per Cent. per Annum*; the Intereſt or Amount therefore, of any Sum of Money, for any time leſs than a Year, will not come to ſo much at Compound, as it doth at Simple Intereſt.

For if 100 *l.* at Compound Intereſt, were to amount to 102 *l.* 10 *s.* in half a Year, then the Ratio would not be at 5 *per Cent.* but at 5 *l.* 1 *s.* 3 *d. per Cent. per Annum*; and if 100 *l.* were to amount to 101 *l.* 5 *s.* in a Quarter of a Year, then the Ratio would be very near 5 *l.* 1 *s.* 10 *d.* $\frac{1}{2}$ *per Cent. per Annum.*

As the Firſt Table is the Foundation of all the other Tables of Compound Intereſt, and being like the reſt, calculated only for every half Year; and as Queſtions may be put, for knowing the Amount in a leſs time than half a Year, I have by way of Supplement, added a Table to ſhew the Amount of One Pound at Compound Intereſt, for any Number of Days; which the Reader will find, after I have ſhewn the Uſe of the other Tables.

That Table is made by the continual Multiplication of the Amount of One Pound in One Day into it ſelf, *&c.* as may be ſeen by the following Example, at 5 *per Cent.*

	1.0001,3368	being the Amount in 1 Day,
Multiplied by	1.0001,3368	
The Product will be	1.0002,6738	the Amount in 2 Days.
Which multiplied by	1.0001,3368	
The Product will be	1.0004,0110	the Amount in 3 Days.
Which multiplied by	1.0001,3368	
The Product will be	1.0005,3483	the Amount in 4 Days.
Which multiplied by	1.0001,3368	
The Product will be	1.0006,6858	the Amount in 5 Days, *&c.*

I have likewiſe added two other Tables, one for reducing any Number of Days to the Decimal Parts of a Year, the other a Table of Geometrical Progreſſion, the Uſes of which will be mentioned in their proper Places.

The

The *Second Table* ſhews the Preſent Value of One Pound, *&c.* and may be made after this manner. Find the Amount of One Pound in the Firſt Table, at any given Rate, and for any given Time; then divide Unity by the Amount ſo found, and the Quotient will be the Preſent Value of One Pound, at the ſame Rate, for the ſame Time.

Example, at 5 *per Cent.*

Unity, or 1. divided by the ſeveral Amounts in the Firſt Table, *viz.* by—	The Quotient will be	And is the Preſent Value of One Pound for
1.0246,9508	.9759,0007	½ a Year
1.05	.9523,8095	1
1.0759,2983	.9294,2864	1½
1.1025,	.9070,2948	2
1.1297,2632	.8851,7013	2½
1.1576,25	.8638,3760	3
1.1862,1264	.8430,1918	3½
1.2155,0625	.8227,0247	4
1.2455,2327	.8028,7540	4½
1.2762,8156	.7835,2616	5 Years, *&c.*

The *Third Table* ſhews the Amount of One Pound *per Annum*, *&c.* and is eaſily made from the Firſt Table, thus: To 1 *l.* being the firſt Year of the Third Table, add the firſt Year of the Firſt Table, the Amount will be the ſecond Year of the Third Table; to which add the ſecond Year of the Firſt Table, the Amount will be the third Year of the Third Table, *&c.*

Example, at 5 *per Cent.*

Years of the Firſt Table to be added;

1. — 1.
1 — 1.05
2.05 — 2.
2 — 1.1025
3.1525 — 3.
3 — 1.1576,25
4.3101,25 — 4.
4 — 1.2155,0625
5.5256,3125 — 5.
.4939,0154 — ½
½ — 1.0246,9508
1.5185,9662 — 1½
1½ — 1.0759,2983
2.5945,2645 — 2½
2½ — 1.1297,2632
3.7242,5277 — 3½
3½ — 1.1862,1264
4.9104,6541 — 4½

Years of the Third Table, *&c.*

Note, The Amount of One Pound *per Annum* in half a Year, is found, by dividing the Intereſt of One Pound for half a Year at any given Rate, by the hundredth part of that Rate, the Quotient

being the Amount of One Pound *per Annum* in half a Year at the ſame Rate: So .0246,9508, the Intereſt of One Pound for half a Year, at 5 *per Cent.* divided by .05, the Quotient will be .4939,0154, the Amount of One Pound *per Annum*, in half a Year, at the ſame Rate.

The *Fourth Table* ſhews the Preſent Value of One Pound *per Annum*, *&c.* and is eaſily made from the ſecond Table; thus,

The Preſent Value of the firſt Year in the Second Table, is the ſame in the Fourth Table, the firſt and ſecond Years in the Second Table added together, make the ſecond Year in the Fourth Table; the third Year in the Second Table, added to the ſecond Year in the Fourth Table, make the third Year in the Fourth, *&c.*

Example, at 5 per Cent.

Years in the Second Table;		Years in the Fourth Table, *&c.*
1	.9523,8095	1.
2	.9070,2948	
	1.8594,1043	2.
3	.8638,3760	
	2.7232,4803	3.
4	.8227,0247	
	3.5459,5050	4.
5	.7835,2616	
	4.3294,7666	5.
	.4819,9854	½
1½	.9294,2864	
	1.4114,2718	1½
2½	.8851,7013	
	2.2965,9731	2½
3½	.8430,1918	
	3.1396,1649	3½
4½	.8028,7540	
	3.9424,9189	4½

Note, The Preſent Value of One Pound *per Annum* for half a Year is thus found.

Multiply the Amount of One Pound *per Annum* for half a Year, in the Third Table—	.4939,0154
By the Preſent Value of One Pound for half a Year, in the Second Table————	.9759,0007
The Product will be the Preſent Value of One Pound *per Annum* for half a Year, in the Fourth Table, as above————	.4819,9854

The

The *Fifth Table* ſhews the Annuity which One Pound will purchaſe, *&c.* and is made in this manner. Find the Preſent Value of One Pound *per Annum* in the Fourth Table, at any given Rate, and for any given Time; then divide Unity by the Preſent Value ſo found, and the Quotient will be the Annuity which One Pound will purchaſe at the ſame Rate, for the ſame Time.

Example, at 5 per Cent.

The Preſent Value of One Pound *per Ann.* for		By which divide 1 or Unity, the Quotient will be		And is the Annuity which 1 *l.* will purchaſe for	
1 Year, is	.9523,8095		1.05		1 Year
1½	1.4114,2718		.7085,0272		1½
2	1.8594,1043		.5378,0488		2
2½	2.2965,9731		.4354,2679		2½
3	2.7232,4803		.3672,0856		3
3½	3.1396,1649		.3185,1024		3½
4	3.5459,5050		.2820,1183		4
4½	3.9424,9190		.2536,4668		4½
5	4.3294,7667		.2309,7480		5 *&c.*

The Reader is deſired to take Notice, that *Principal* and *Preſent Value* are Terms of the ſame Signification; and therefore by *Preſent Value* in the Second Table, is to be underſtood, a certain Principal Sum of which One Pound is the Amount, at the Rate and in the Time given; and that by *Preſent Value* in the Fourth Table is to be underſtood, ſuch a Principal Sum as will purchaſe an Annuity of One Pound *per Annum* at the Rate, and for the Time given.

Altho theſe Tables ſeem to be calculated only to anſwer ſuch Caſes as relate to *Sterling* Money, yet they are of equal Uſe in Calculations relating to any other Species of Money whatever; and therefore if a Queſtion is put, to know the Amount, Preſent Value, *&c.* of any Principal Sum, or of any Annuity, in Crowns, Guilders, Florins, Livers, *&c.* the Anſwer will be the ſame as if the Queſtion had been put in Pounds *Sterling*; only obſerving that the Fraction, if any, will not be the Decimal Part of a Pound, but the Decimal Part of that particular Species mentioned in the Queſtion.

The First Table of Compound Interest.

The Amount of One Pound in any Number of Years, &c.

Years.	At 2 per Cent.	2½ per Cent.	3 per Cent.	3½ per Cent.	4 per Cent.	4½ per Cent.	Years.

The Uſe of the preceding Tables.

The *Amount*, or *preſent Value of any Sum of Money*, for any Number of Years not exceeding One hundred, at any of the aforeſaid Rates of Intereſt, is thus found:

Look in the Firſt or Second Table for the given Number of Years, and even with that Number, under the given Rate of Intereſt, is the Amount or Preſent Value of One Pound; which Amount or Preſent Value ſo found, being multiplied by any given Principal Sum, the Product will be the Amount or Preſent Value required.

After the ſame manner, the *Amount*, or *preſent Value of any Annuity*, or yearly Payment is found, by the Third or Fourth Table.

And the *Annuity which any Sum of Money will purchaſe*, by the Fifth Table.

So that moſt uſeful Queſtions in Compound Intereſt, are anſwered by One Multiplication.

But, as there are a great Variety of Caſes relating to Compound Intereſt, ſome of which are more curious than uſeful, I ſhall proceed by way of *Problem*, to ſtate all the Caſes I can remember ever to have met with, and ſhew how they may be reſolved by theſe Tables.

PROBLEM I. Any *Principal*, *Rate* and *Time* being given, to find the *Amount*.

The Rule. Find in the Firſt Table the Amount of 1 *l.* at the Rate and for the Time given; which being multiplied by the Principal, the Product anſwers the Queſtion.

Example. What will 523 *l.* amount to in 15 Years, at the Rate of 5 *l. per Cent. per Annum*?

The Amount of 1 *l.* in 15 Years at 5 *per Cent.* is found in the Firſt Table to be 2.0789, *&c.* which being multiplied by 523. the Product will be 1087.2794, *&c.*

Anſwer, 1087 *l.* 5 *s.* 7 *d.*

PROBLEM II. Any *Principal*, *Rate* and *Amount* being given, to find the *Time*.

The Rule. Divide the Amount by the Principal, and the Quotient will be the Amount of 1 *l.* at the given Rate; which look for in the Firſt Table under that Rate, and it will be found even with the Time required.

Example. In what Time will 523 *l.* amount to 1087 *l.* 5 *s.* 7 *d.* at the Rate of 5 *l. per Cent. per Annum*?

Divide 1087.2794, *&c.* by 523. the Quotient will be 2.0789, *&c.* which under 5 *per Cent.* in the Firſt Table, is found to be even with 15 Years, and anſwers the Queſtion.

PROBLEM III. Any *Principal*, *Time* and *Amount* being given, to find the *Rate*.

The Rule. Divide the Amount by the Principal, and the Quotient will be the Amount of 1 *l.* in the given Time; which look for in the Firſt Table, even with that Time, and it will be found under the Rate required.

Example. At what Rate *per Cent. per Annum* will 523 *l.* amount to 1087 *l.* 5 *s.* 7 *d.* in 15 Years?

Divide 1087.2794, *&c.* by 523. the Quotient will be 2.0789, *&c.* which, even with 15 Years in the Firſt Table, is found to be under 5 *per Cent.* and anſwers the Queſtion.

PROBLEM IV. Any *Amount*, *Rate* and *Time* being given, to find the *Principal*.

The Rule. Divide the Amount, by the Amount of 1 *l.* in the Firſt Table, at the Rate and for the Time given, and the Quotient will be the Principal required.

Example. What Principal Sum will amount to 1087 *l.* 5 *s.* 7 *d.* in 15 Years, at the Rate of 5 *l. per Cent. per Annum*?

Divide 1087.2794, *&c.* by 2.0789, *&c.* being the Amount of 1 *l.* at the Rate and in the Time given, the Quotient will be 523.

Anſwer, 523 *l.*

Note, This Queſtion is eaſier anſwered, by the ſecond Table, as you will find by *Problem* the 13*th*.

PROBLEM V. Any *Principal*, *Rate* and *Time* being given, to find the *Annuity*.

The Rule. Find in the Fifth Table, the Annuity which 1 *l.* will purchaſe, at the Rate, and for the Time given; multiply the Annuity ſo found by the Principal, and the Product will be the Annuity required.

Example. What Annuity to continue 15 Years, will 523 *l.* purchaſe, computing at the Rate of 5 *l. per Cent. per Annum*?

The Annuity which 1 *l.* will purchaſe for 15 Years at 5 *per Cent.* is found in the Fifth Table to be .0963, *&c.* which multiplied by 523. the Product will be 50.3870, *&c.*

Anſwer, 50 *l.* 7 *s.* 9 *d. per Annum.*

If the Queſtion had been, What Annuity to continue 15 Years, will pay off a Debt of 523 *l.* computing at the Rate of 5 *l. per Cent. per Annum*? the Anſwer had been the ſame.

PROBLEM VI. Any *Principal*, *Annuity* and *Rate* being given, to find the *Time*.

The Rule. Divide the Annuity by the Principal, and the Quotient will be the Annuity which 1 *l.* will purchaſe at the given Rate; which look for in the Fifth Table under that Rate, and it will be found even with the Time required.

Example. An Annuity of 50 *l.* 7 *s.* 9 *d.* is purchaſed with 523 *l.* at the Rate of 5 *l. per Cent. per Annum*; What Time ought that Annuity to continue?

Divide 50.3870, *&c.* by 523. the Quotient will be .0963, *&c.* which under 5 *per Cent.* in the Fifth Table, is found to be even with 15 Years, and anſwers the Queſtion.

If the Queſtion had been, In what Time will an Annuity of 50 *l.* 7 *s.* 9 *d.* pay off a Debt of 523 *l.* computing at the Rate of 5 *per Cent. per Annum*? the Anſwer had been the ſame.

PROBLEM VII. Any *Principal*, *Annuity* and *Time* being given, to find the *Rate*.

The Rule. Divide the Annuity by the Principal, and the Quotient will be the Annuity which 1 *l.* will purchaſe for the given Time; which look for in the Fifth Table, even with that Time, and it will be found under the Rate required.

Example. If an Annuity of 50 *l.* 7 *s.* 9 *d.* to continue 15 Years, is purchaſed with 523 *l.* What Rate of Intereſt *per Cent. per Annum* is made of the Purchaſe-Money?

Divide 50.3870, &c. by 523. the Quotient will be .0963, &c. which, even with 15 Years in the Fifth Table, is found to be under 5 *per Cent.* and anſwers the Queſtion.

PROBLEM VIII. Any *Annuity*, *Rate* and *Time* being given, to find the *Principal*.

The Rule. Divide the Annuity, by the Annuity which 1 *l.* will purchaſe in the Fifth Table, at the Rate and for the Time given, and the Quotient will be the Principal required.

Example. What Principal Sum will purchaſe an Annuity of 50 *l.* 7 *s.* 9 *d.* to continue 15 Years, at the Rate of 5 *l. per Cent. per Annum*?

Divide 50.3870, &c. by .0963, &c. being the Annuity which 1 *l.* will purchaſe for the Time and at the Rate given, the Quotient will be 523.

Anſwer, 523 *l.*

Note, This Queſtion is eaſier anſwered by the Fourth Table, thus: Multiply 50.3870, &c. the Annuity, by 10.3796, &c. the preſent Value of 1 *l. per Annum* in the Fourth Table, at the Rate and for the Time given, the Product will be 523.

PROBLEM IX. Any *Annuity*, *Rate* and *Time* being given, to find the *Amount*.

The Rule. Find in the Third Table, the Amount of 1 *l. per Annum* at the Rate, and for the Time given; by which multiply the Annuity, and the Product will be the Amount required.

Example. What will an Annuity of 50 *l.* 7 *s.* 9 *d.* being forborn 15 Years, amount unto at the Rate of 5 *l. per Cent. per Annum*?

The Amount of 1 *l. per Annum* in 15 Years at 5 *per Cent.* is found in the Third Table to be 21.5785, &c. which being multiplied by 50.3870, &c. the Product will be 1087.2794, &c.

Anſwer, 1087 *l.* 5 *s.* 7 *d.*

PROBLEM X. Any *Annuity*, *Rate* and *Amount* being given, to find the *Time*.

The Rule. Divide the Amount by the Annuity, and the Quotient will be the Amount of 1 *l. per Annum* at the given Rate; which look for in the Third Table under that Rate, and it will be found even with the Time required.

Example. In what Time will an Annuity of 50 *l.* 7 *s.* 9 *d.* amount to 1087 *l.* 5 *s.* 7 *d.* at the Rate of 5 *l. per Cent. per Annum*?

Divide 1087.2794, &c. by 50.3870, &c. the Quotient will be 21.5785, &c. which under 5 *per Cent.* in the Third Table, is found to be even with 15 Years, and anſwers the Queſtion.

PROBLEM XI. Any *Annuity*, *Time* and *Amount* being given, to find the *Rate*.

The Rule. Divide the Amount by the Annuity, and the Quotient will be the Amount of 1 *l. per Annum* for the given Time; which look for in the Third Table even with the Time, and it will be found under the Rate required.

Example. At what Rate *per Cent. per Annum* will an Annuity of 50 *l.* 7 *s.* 9 *d.* amount to 1087 *l.* 5 *s.* 7 *d.* in 15 Years?

Divide 1087.2794, *&c.* by 50.3870, *&c.* the Quotient will be 21.5785, *&c.* which, even with 15 Years in the Third Table, is found to be under 5 *per Cent.* and anſwers the Queſtion.

PROBLEM XII. Any *Amount*, *Rate* and *Time* being given, to find the *Annuity*.

The Rule. Divide the Amount, by the Amount of 1 *l. per Annum* in the Third Table, at the Rate, and for the Time given, and the Quotient will be the Annuity required.

Example. What Annuity will amount to 1087 *l.* 5 *s.* 7 *d.* in 15 Years, at the Rate of 5 *l. per Cent. per Annum*?

Divide 1087.2794, *&c.* by 21.5785, *&c.* being the Amount of 1 *l. per Annum* in the Time, and at the Rate given; the Quotient will be 50.3870, *&c.*

Anſwer, 50 *l.* 7 *s.* 9 *d.*

PROBLEM XIII. Any *Principal Sum in Reverſion*, *Rate* and *Time* being given, to find the *Preſent Value*.

The Rule. Find in the Second Table the Preſent Value of 1 *l.* at the Rate and for the Time given; which being multiplied by the Principal, the Product anſwers the Queſtion.

Example. What is the Preſent Value of 1087 *l.* 5 *s.* 7 *d.* payable at the end of 15 Years, at the Rate of 5 *l. per Cent. per Annum*?

The Preſent Value of 1 *l.* payable at the end of 15 Years, at 5 *per Cent.* is found in the Second Table to be .4810, *&c.* which being multiplied by 1087.2794, *&c.* the Product will be 523.

Anſwer, 523 *l.*

Note, This is the ſame with *Problem* the 4*th*, only the Queſtion is put in different Terms, and the Anſwer given by a different Table.

PROBLEM XIV. Any *Annuity*, *Time in Reverſion*, and *Rate* being given, to find the *Preſent Value*.

The Rule. Find in the Fourth Table the Preſent Value of 1 *l. per Annum* at the given Rate, both for the Time in being, and the Time in being and Time in Reverſion added together; ſubtract the one from the other, and multiply the Remainder by the Annuity, the Product anſwers the Queſtion.

Example. What is it worth in Preſent Money to add 14 Years to a Term of 7 Years in being, and thereby make up the Term 21 Years, the Annuity or Rent being 35 *l. per Annum*, computing at the Rate of 5 *l. per Cent. per Annum*?

The Preſent Value of 1 *l. per Annum* in the Fourth Table, for 21 Years, is——	12.8211,5271
for 7 Years, is——	5.7863,7340
Remainder ——	7.0347,7931
Multiplied by——	35.
The Product is——	246.2172, *&c.*

Anſwer, 246 *l.* 4 *s.* 4 *d.*

PROBLEM

PROBLEM XV. Any *Annuity, ſeveral Times in Reverſion,* and *Rate* being given, to find the *ſeveral Preſent Values*.

The Rule. Find the Preſent Value of 1 *l. per Annum* in the Fourth Table, at the given Rate, and for the ſeveral given Times; which being ſeverally multiplied by the Annuity, the Products will be the ſeveral Preſent Values of that Annuity for thoſe ſeveral Times: ſubtract the ſeveral Preſent Values the one from the other, and the ſeveral Remainders anſwer the Queſtion.

Example. *A.* has a Term of 7 Years in an Eſtate of 35 *l. per Annum*; *B.* has a Term of 14 Years in the ſame Eſtate in Reverſion, after the Expiration of the 7 Years; and *C.* has a further Term of 20 Years in Reverſion after the 21 Years: It is required to know, What is the Preſent Value of the ſeveral Terms, computing at the Rate of 5 *l. per Cent. per Annum*?

		l.	*s.*	*d.*
The Preſent Value of 35 *l. per Annum* for 41 Years, will be found to be—		605	6	½
See *Problem* 8.	21	448	14	9½
	7	202	10	5½

Which being ſubtracted one from the other, it will appear,

	l.	*s.*	*d.*
That the Preſent Value of *A*'s Term is—	202	10	5½
B's—	246	4	4
C's—	156	11	3
Which anſwers the Queſtion.	605	6	½

PROBLEM XVI. Any *Annuity in Fee Simple,* and *Rate* being given, to find the *Preſent Value*.

The Rule. Find the Preſent Value of 1 *l. per Annum* in Fee Simple at the end of the Fourth Table at the given Rate; which multiplied by the Annuity, the Product anſwers the Queſtion.

Example. What is the Value of an Eſtate of 35 *l. per Annum* in Fee Simple, computing at the Rate of 5 *l. per Cent. per Annum*?

The Preſent Value of 1 *l. per Annum* in Fee Simple, is found to be 20; which multiplied by 35, the Product will be 700.

Anſwer, 700 *l.*

PROBLEM XVII. Any *Preſent Value, Time in Reverſion,* and *Rate* being given, to find the *Annuity*.

The Rule. Find by *Problem* the *1ſt*, what the Preſent Value will amount to, in the Time preceding the Commencement of the Annuity; then find by *Problem* the *5th*, what Annuity that Amount will purchaſe, which anſwers the Queſtion.

Example. What Annuity to continue 14 Years, after the Expiration of 7 Years, will 246 *l.* 4 *s.* 4 *d.* purchaſe, computing at the Rate of 5 *l. per Cent. per Annum*?

By *Problem* the *1ſt*, I find 246 *l.* 4 *s.* 4 *d.* will at that Rate in 7 Years, amount to 346 *l.* 9 *s.* 0 *d.* ½; and by *Problem* the *5th*, I find that 346 *l.* 9 *s.* 0 *d.* ½ will at the ſame Rate, purchaſe an Annuity of 35 *l. per Annum* to continue 14 Years.

Anſwer, 35 *l. per Annum.*

PROBLEM XVIII. Any *Annuity in Reverſion*, *Preſent Value*, and *Rate* being given, to find the *Time*.

The Rule. Find the Amount of the Preſent Value as above, by *Problem* the *1ſt*; then by *Problem* the *6th*, find the Time the Annuity ought to continue.

Example. An Annnity of 35 *l. per Annum* to commence after the Expiration of 7 Years, is purchaſed with 246 *l.* 4 *s.* 4 *d.* What time ought that Annuity to continue, computing at the Rate of 5 *l. per Cent. per Annum*?

I find by *Problem* the *1ſt*, that 246 *l.* 4 *s.* 4 *d.* will in 7 Years amount to 346 *l.* 9 *s.* 0 *d.* ½ as above; by which divide the Annuity, the Quotient will be .1010,2397, which in the Fifth Table under 5 *per Cent.* will be found even with 14 Years, as by *Problem* the 6th, and anſwers the Queſtion.

PROBLEM XIX. Any *Annuity in Reverſion*, *Preſent Value*, and *Time* being given, to find the *Rate*.

The Rule. Find the Amount of the Preſent Value as above, by *Problem* the *1ſt*; then by *Problem* the 7th, find the Rate of Intereſt.

Example. An Annuity of 35 *l. per Annum* to continue 14 Years, after the Expiration of 7 Years, is purchaſed with 246 *l.* 4 *s.* 4 *d.* What Rate of Intereſt *per Cent. per Annum* is made of the Purchaſe Money?

I find by *Problem* the *1ſt*, that 246 *l.* 4 *s.* 4 *d.* will in 7 Years amount to 346 *l.* 9 *s.* 0 *d.* ½ as above; by which divide the Annuity, the Quotient will be .1010,2397, which in the Fifth Table, even with 14 Years, will be found under 5 *per Cent.* as by *Problem* the *7th*, and anſwers the Queſtion.

PROBLEM XX. Any *Principal*, and *Rate* being given, to find the *Annuity in Fee Simple*.

The Rule. Divide the Principal, by the Preſent Value of 1 *l. per Annum* in Fee Simple, at the End of the Fourth Table, and the Quotient anſwers the Queſtion.

Example. What Annuity in Fee Simple, will 700 *l.* purchaſe, at the Rate of 5 *l. per Cent. per Annum*?

700. the Principal, divided by 20. the Preſent Value of 1 *l. per Annum* in Fee Simple, the Quotient will be 35.

Anſwer, 35 *l. per Annum.*

PROBLEM XXI. Any *Principal*, *Annuity*, and *Rate* being given, to find the *Amount*.

The Rule. Find the Time by *Problem* the *6th*. Then, having Principal, Annuity, Rate and Time, find the Amount, either by *Problem* the *1ſt*, or *9th*.

PROBLEM XXII. Any *Principal*, *Annuity*, and *Time* being given, to find the *Amount*.

The Rule. Find the Rate by *Problem* the 7th. Then having Principal, Annuity, Rate and Time, find the Amount as before, either by *Problem* the *1ſt*, or *9th*.

PROBLEM XXIII. Any *Annuity*, *Amount*, and *Time* being given, to find the *Principal*.

The Rule. Find the Rate by *Problem* the *11th*. Then having Annuity, Amount, Rate and Time, find the Principal, either by *Problem* the *4th*, or *8th*.

PROBLEM XXIV. Any *Annuity*, *Amount*, and *Rate* being given, to find the *Principal*.
The Rule. Find the Time by *Problem* the 10*th*. Then having Annuity, Amount, Rate and Time, find the Principal as before, either by *Problem* the 4*th*, or 8*th*.

PROBLEM XXV. Any *Amount*, *Principal*, and *Time* being given, to find the *Annuity*.
The Rule. Find the Rate by *Problem* the 3*d*. Then having Amount, Principal, Rate and Time, find the Annuity either by *Problem* the 5*th*, or 12*th*.

PROBLEM XXVI. Any *Amount*, *Principal*, and *Rate* being given, to find the *Annuity*.
The Rule. Find the Time by *Problem* the 2*d*. Then having Amount, Principal, Rate and Time, find the Annuity as before, either by *Problem* the 5*th*, or 12*th*.

PROBLEM XXVII. Any *Amount*, *Principal*, and *Annuity* being given, to find the *Time*.
The Rule. This is found, either by dividing the Amount by the Principal, as in *Problem* the 2*d*, or by dividing the Annuity by the Principal, as in *Problem* the 6*th*.

PROBLEM XXVIII. Any *Amount*, *Principal*, and *Annuity* being given, to find the *Rate*.
The Rule. This is likewiſe found, either by dividing the Amount by the Principal, as in *Problem* the 3*d*, or by dividing the Annuity by the Principal, as in *Problem* the 7*th*.

Theſe are all the Caſes I can remember ever to have met with; if there are any other, I hope my Reader will be able, by theſe Tables, to anſwer them without any Difficulty.

In all theſe Tables I have carried the Decimal Fraction to Eight Places, tho Four or Five would have been ſufficient to have anſwered moſt Queſtions: I was willing to make them as compleat as I could, and in particular that *Millions* might be computed by them with exactneſs; of which I ſhall give an *Example* by *Problem* the 5*th*.

What annual Sum is ſufficient to pay off a Debt of 50 Millions in 30 Years, computing at the Rate of 4 *l. per Cent. per Annum*?

By the Fifth Table, the Annuity, which will diſcharge a Debt of 1 *l.* in 30 Years at 4 *per Cent.* is found to be ——— .0578,3010.
Which being multiplied by ——— 50,000,000.

The Product will be ——— 2,891,505.

Anſwer, 2,891,505 *l. per Annum.*

So that ſuppoſe the *National Debt* to be at this Time 50 *Millions*, and ſuppoſe the Intereſt paid 2 *Millions per Annum*, or 4 *per Cent.* then will a *Sinking Fund* of 891,505 *l. per Annum* clear the whole Debt in 30 Years.

Another

Of the ADDITIONAL TABLES.

THERE are three of theſe Tables, the *Firſt* is to ſhew the Amount of One Pound in any Number of Days; how it was made, I have already ſhewn in Page 48. to which I refer.

The *Next* is a Table for reducing any Number of Days to the Decimal Parts of a Year, and is thus made; divide Unity by 365, and the Quotient will be .0027,3972,6027, *&c.* and is the Decimal Fraction for One Day: When One is found, that Decimal multiplied by 2. 3. 4. 5. *&c.* the ſeveral Products, will be the ſeveral Decimal Fractions that anſwer to any Number of Days in the Year.

The *Laſt* is a Table of Geometrical Progreſſion, and is made by a continued Multiplication by 2, or doubling. After the Tables themſelves, I ſhall ſhew the Uſe of them, but think proper before I proceed, to ſhew in what Time any Sum will double, at any given Rate.

		At *Com. Intereſt.*	At *Sim. Intereſt.*
		Years. Dec. Parts.	Years. Dec. Parts.
At 2		35.0027,8878	50.
2½		28.0710,3453	40.
3		23.4497,7225	33.3333,3333
3½		20.1487,9168	28.5714,2857
4		17.6729,8769	25.
4½	*per Cent.* One Pound, or any	15.7473,0184	22.2222,2222
5	other Sum will double, in	14.2066,9908	20.
6		11.8956,6105	16.6666,6667
7		10.2447,6835	14.2857,1429
8		9.0064,6834	12.5
9		8.0432,3173	11.1111,1111
10		7.2725,4090	10.

1st. A Supplement to the First Table of Compound Interest.

The Amount of One Pound in any Number of Days, &c.

Days.	At 2 per Cent.	2½ per Cent.	3 per Cent.	3½ per Cent.	4 per Cent.	4½ per Cent.	Days.
1	1.0000,5426	1.0000,6765	1.0000,8099	1.0000,9426	1.0001,0746	1.0001,2060	1

340	1.0186,1747	1.0232,6791	1.0279,1680	1.0325,6414	1.0372,0995	1.0418,5422	340
350	1.0191,7026	1.0239,6039	1.0287,4957	1.0335,3780	1.0383,2507	1.0431,1140	350
360	1.0197,2334	1.0246,5335	1.0295,8302	1.0345,1237	1.0394,4139	1.0443,7009	360
361	1.0197,7867	1.0247,2267	1.0296,6641	1.0346,0988	1.0395,5309	1.0444,9604	361
362	1.0198,3400	1.0247,9199	1.0297,4979	1.0347,0739	1.0396,6480	1.0446,2201	362
363	1.0198,8933	1.0248,6133	1.0298,3319	1.0348,0492	1.0397,7652	1.0447,4799	363
364	1.0199,4466	1.0249,3066	1.0299,1659	1.0349,0246	1.0398,8825	1.0448,7399	364
365	1.0200,0000	1.0250,0000	1.0300,0000	1.0350,0000	1.0400,0000	1.0450,0000	365

Another Example *by* Problem *the* 8th, *in Proof of the foregoing.*

What is the Preſent Value of 2,891,505 *l. per Annum* for 30 Years to come, at the Rate of 4 *l. per Cent. per Annum*?

By the 4*th* Table, 1 *l. per Annum*, 30 Years to come, at 4 *per Cent.* is found to be worth	17.2920,3330
Which being multiplied by	2,891,505.
The Product will be	50,000,000.

Anſwer, 50 *Millions*.

In like manner, it will be found, that a *ſinking Fund* of 1,200,598 *l. per Annum* will pay off a Debt of 50 *Millions*, in 25 Years; That 1,679,087 *l.* 10 *s. per Annum* will do the ſame in 20 Years, *&c.*

Another Example, *by* Problem *the* 6th.

Suppoſe *Ten Millions* were borrowed at the Rate of 6 *l. per Cent. per Annum.* Then the Fund for payment of the Intereſt muſt be 600,000 *l. per Annum.* Suppoſe, after ſome time, by agreement, the Intereſt ſhould be reduced to 4 *l. per Cent. per Annum.*

Qu. In what Time will the ſaid Fund of 600,000 *l. per Annum*, pay off the ſaid Debt of *Ten Millions*, after the Intereſt is ſo reduced?

The Annuity of 600,000 *l.* being divided by the Principal 10,000,000. the Quotient will be .0600,0000, which look for in the 5th Table under 4 *per Cent.* and you will find .0600,1298, which is very near what was looked for, even with 28 Years.

Anſwer, 28 Years, very near.

By the 4*th* Table, 1 *l. per Annum* 28 Years to come, at 4 *per Cent.* is found to be worth	16.6630,6322
Which being multiplied by the Annuity of	600,000.
The Product will be the exact Principal, which will be paid off in that Time	9,997,838.—

Which wants about 2162 *l.* of the *Ten Millions.*

And therefore, 2 Days more than the 28 Years, will be ſufficient to overpay the whole Debt.

This ſhews the great difference between paying a large, or a moderate Intereſt for Money, ſince by ſinking only 2 *per Cent.* as you find by this Example, *Ten Millions* are paid off in 28 Years, which otherwiſe would have remained a Debt for ever.

Note, The greater the Rate of Intereſt, the ſooner by ſuch a Reduction will the Debt be paid off: For inſtance, reducing the Intereſt from 10 to 8 *per Cent.* will diſcharge a Debt in leſs than 21 Years; from 8 to 6 in leſs than 24 Years: Whereas if it be from 6 to 4, it will require ſomething more than 28 Years, as above.

I have not given theſe Examples to inſtruct thoſe Gentlemen whoſe Buſineſs it is to make Calculations of this Kind; for tho theſe Tables may be of Uſe to them, yet am I far from thinking they want any Directions from me how to apply them: my Intent was only, by theſe Examples, to let my Reader know the reaſon of my carrying the Decimal Fraction to ſo many Places.

Compound Intereſt is a Series of Geometrical Proportions, as was before obſerved; and therefore the Amount in any one Time given, being multiplied into it ſelf, the Product will be the Amount in double that time; and the Amount of any two ſeveral times given, multiplied one into the other, the Product will be the Amount in thoſe two ſeveral times added together.

This the Reader may eaſily prove: for if he multiplies the Amount of 1 *l.* in 50 Years, at any given Rate, into it ſelf, he will find the Product to be the Amount of 1 *l.* in 100 Years at the ſame Rate; and that the Product will be the ſame, if he multiplies the Amount in 60, by the Amount in 40 Years, or the Amount in 80, by the Amount in 20 Years, *&c.*

So that if a Queſtion ſhould be put, for knowing the Amount of any Sum in any Number of Years, exceeding thoſe to which theſe Tables are limited; Multiplication will very eaſily reſolve it, let it be for ever ſo long a Time.

Example.

What will 1 *l.* amount unto in 1000 Years, at the Rate of 5 *l. per Cent. per Annum*?
By the Firſt Table, I find that 1 *l.* in 100 Years, at 5 *per Cent.* will amount to 131.5012,5784; but to avoid many Fractions, I will ſuppoſe the ſaid Amount to be no more than 131 *l.* 10*s.*

Then the Amount in 100 Years, as above	131.5
being multiplied into it ſelf	131.5
The Product will be the Amount in 200 Years	17292.25
which being likewiſe multiplied into it ſelf	17292.25
The Product will be the Amount in 400 Years	299,021910.0625
which being alſo multiplied into it ſelf	299,021910. +
The Product will be the Amount in 800 Years	89414,102697,425838. +
which multiplied by the Amount in 200 Years, as above	17292.25
The Product will be the Amount in 1000 Years	1546,171017,369561,960192. +

And anſwers the Queſtion.

I ſay it anſwers the Queſtion, and ſo it doth, near enough the Truth, for any Uſe that I think can poſſibly be made of it: But the Decimal Fraction .0012,5784 being left out of the firſt Multiplication, and conſequently the Amount of it in the other, has occaſioned the Sum Total to be many Millions leſs than otherwiſe it would have been; for the true Amount of 1 *l.* in 1000 Years, at 5 *per Cent.* is, 1546,318921, *&c.*

The Preſent Value of 1 *l.* payable at the end of any Number of Years exceeding 100, may likewiſe be very eaſily found; but as the extending any of the Tables, excepting the Firſt, can ſerve no manner of Purpoſe that I know of, I ſhall here conclude what I had to ſay of the Uſe of the preceding Tables.

Of

1st. A Supplement to the First Table of Compound Interest.

The Amount of One Pound in any Number of Days, &c.

The Uſe of the Additional Tables.

When the Amount of any Sum of Money is required for any Number of Days at Compound Intereſt, look in the 1*ſt* of theſe Tables for the Number of Days, and even with that Number, under the given Rate, will be found the Amount of One Pound for that Time; which Amount ſo found, being multiplied by the Principal Sum, the Product anſwers the Queſtion.

If the exact Number of Days ſought for be not in the Table, take Two Numbers, which being added together will make the exact Number; multiply thoſe two one into the other, and the Product will be the Amount of One Pound in the Time ſought for.

Examples.

Qu. What will 523 *l.* amount to, in 194 Days, at the Rate of 5 *l. per Cent. per Annum*?

The Amount of 1 *l.* in 190 Days, at 5 *per Cent.* is found in the Table to be ——— 1.0257,2289
Multiplied by the Amount of 1 *l.* in 4 Days, at the ſame Rate ——— 1.0005,3483

The Product will be the Amount of 1 *l.* in 194 Days ——— 1.0262,7148
Which being multiplied by the Principal ——— 523.

The Product will be ——— 536.7399,8404

Anſwer, 536 *l.* 14 *s.* 9 *d.* ½.

Qu. What will 523 *l.* amount to in 5 Years and 194 Days, at the Rate of 5 *l. per Cent. per Annum*?

The Amount of 1 *l.* in 5 Years, at 5 *per Cent.* by the Firſt Table of Compound Intereſt 1.2762,8156
Multiplied by the Amount of 1 *l.* in 194 Days, as above ——— 1.0262,7148

The Product will be the Amount of 1 *l.* in 5 Years and 194 Days ——— 1.3098,1136
Which being multiplied by the Principal ——— 523.

The Product will be ——— 685.0313,4128

Anſwer, 685 *l.* 00 *s.* 7 *d.* ½.

And thus, if there ſhould be any odd Days in any Queſtion given, the ſame may be anſwered with very little Trouble.

The 2*d* of theſe Tables being only to ſhew, what Decimal Part of a Year anſwers to any Number of Days; or, what Number of Days is contained in any Decimal Part of a Year; the Uſe of it is ſo obvious, that there needs no Example to illuſtrate it.

The 3*d* and Laſt is the Table of Geometrical Progreſſion, which is applicable to a great variety of Caſes, ſome of them of real Uſe, but for the moſt part, only for Speculation or Amuſement: I ſhall give ſome few Examples of the Uſe of this Table, and then leave my Reader at his Leiſure to amuſe himſelf with it, in other Matters that may occur to him.

Qu. 1. What will 1 *l.* amount to, in 1000Years, at the Rate of 5 *l. per Cent. per Annum*?

You will find in Page 101. That 1 *l.* at 5 *per Cent.* Compound Intereſt, will double in 14 Years, and .2066,9908 Decimal Parts of a Year; therefore divide 1000. by 14.2066,9908, and you will have 70. for the Quotient, with a Remainder of 5.5310,6440: That is, 1 *l.* will double 70 times in 994 Years and about 171 Days, which wants 5 Years and almoſt 194 Days of 1000 Years, the time given in the Queſtion.

It appears by the 3*d* of the additional Tables, that 1 *l.* doubled 70 Times, amounts to — 1180,591620,717411,303424.
Which being multiplied by the Amount of 1 *l.* in 5 Years and 194 Days — 1.3098,1136

The Product will be — 1546,352316,336476,675017.

And *Anſwers* the Queſtion.

I ſay, as I did in Page 100. that it *anſwers*, near enough the Truth for any Uſe; but as in that Anſwer it wanted, ſo in this it exceeds the true Amount: the Reaſon is, I have computed the remainder at 5 Years and 194 Days, whereas it really wants about 4 Hours of that time.

No doubt but it will appear ſurprizing to thoſe who are unacquainted with Things of this Nature, That computing about 4 Hours too much, ſhould make a difference in the Amount of 1 *l.* of greater Value than all the Money the whole World is worth! But, I believe what follows will greatly increaſe their Wonder.

Qu. 2. Suppoſe the Earth to be a perfect Globe, whoſe Diameter is in Miles — 8000.
Let that be multiplied into it ſelf — 8000.

And it will give in Square Miles — 64,000000.
Which again multiplied by — 8000.

Will give the Cubick Miles, in a Cubick Body, whoſe Root is equal to the Diameter of the Earth — 512000,000000.
Which being multiplied by the Proportion which a Globe bears to a Cube — .5235,9877,5598

The Product will be the Cubick Miles contained in the Globe of the Earth — 268082,573106.

The Length of a Mile is 1760 Yards, or in Inches — 63360.
Which being multiplied into it ſelf — 63360.

Gives the Square Inches in a Square Mile — 4014,489600.
Which again multiplied by — 63360.

Gives the Cubick Inches in a Cubick Mile — 254,358061,056000.
Which being multiplied by the Cubick Miles in the Globe — 268082,573106.

Gives the Cubick Inches contained in the Globe — 68,188963,498145,531559,936000.
And if a Cubick Inch of fine Gold is ſuppoſed to be worth 35 *l.* then the Cubick Inches in the Globe, multiplied by — 35.
The Product will be, the Value of a ſolid Body made of fine Gold, equal in Magnitude to the whole Globe of the Earth — 2386,613722,435093,604597,760000 *l.*

One

One Pound at 10 *per Cent.* Compound Intereſt doubles in 7 Years, and .2725,4090 Decimal Parts of a Year, conſequently it will double 91 Times, in ſomething leſs than 662 Years.

1 *l.* doubled 91 Times, amounts to——————————2475,880078,570760,549798,248448 *l.*

Therefore, 1 *l.* at 10 *per Cent.* in 662 Years, will amount to more than a ſolid Body as big as the whole Globe of the Earth is worth, tho made of fine Gold!

Qu. 3. Suppoſe a Horſe was to be ſold, according to the Number of Nails in his Shoes, and that the Number was ſix in each Shoe, that the Price was to be a Farthing for the firſt Nail, an Halfpenny for the ſecond, a Penny for the third, *&c.* ſtill doubling for every Nail of the Twenty four; and that it was required to know, what the Horſe would ſell for?

It is plain in this Caſe there will be 23 doubles, and one more muſt be taken to know the Sum Total, which is always the double of the laſt Term, leſs Unity: So that this Queſtion is eaſily anſwered, thus, Look in the 3*d* Table for the Number even with 24. and it will be found to be 16,777216. therefore the Price of the Horſe will be 16,777215. Farthings, or 17476 *l.* 5 *s.* 3 *d.* ¾.

4. *Dr. Wallis* mentions a Story, from *Alſephad* an *Arabick* Writer, of one *Seſſa* an *Indian*, who having invented the Game at Cheſs, taught it to his Prince *Shehram:* The *King*, who was highly pleaſed with it, bid him ask what he would for the Reward of his Invention; whereupon he asked, that for the firſt little Square of the Cheſs-board, he might have one Grain of Wheat given him, for the ſecond, two; and ſo on doubling continually, according to the Number of Squares in the Cheſs-board, which was 64. The *King* who intended to give him a very noble Reward, was much diſpleaſed that he had asked ſo trifling a one; but *Seſſa* declared, that he ſhould be very well contented with it. So the Reward he had deſired, was ordered to be given him: But the *King* was quickly aſtoniſhed, when he found it would riſe to ſo vaſt a Quantity, that the whole Earth it ſelf could not furniſh ſo much Wheat.

What the Number of Grains is, may be found in the 3*d* Table, in like manner as in the foregoing Caſe; in this there are 63 doubles, therefore the Number in the Table, even with 64. leſs one, muſt be the Sum Total of all the Grains; which Number is 18,446744,073709,551615. Grains.

In the Statute intituled, *Aſſiſa Panis & Cerviſiæ*, made *Anno* 51. *H.* III. and *Anno Dom.* 1266. is the following Clauſe, *viz.*

" By the Conſent of the whole Realm of *England*, the Meaſure of Our Lord the King was made, " That is to ſay, that an *Engliſh* Penny, called a *Sterling*, round and without any Clipping, ſhall weigh " xxxii Wheat Corns in the midſt of the Ear, and xx *d.* do make an Ounce, and xii Ounces one " Pound, and eight Pound do make a Gallon of Wine, and eight Gallons of Wine do make a *London* " Buſhel, which is the eighth part of a Quarter."

So that according to this Statute there ſhould be 3,932160. Grains of Wheat in a Quarter; and if the Price of Wheat is reckoned at 20 *s.* the Quarter, then the Value of the Reward *Seſſa* deſired, is 4,691249,611844. Pounds Sterling.

WHEN one conſiders, to what an immenſe Sum a very ſmall matter will amount, in a long Courſe of Years, there is no wonder to be made, That in *Popiſh* Countries, thoſe Gentlemen who call themſelves *the Church*, ſhould have made ſuch great Acquiſitions; it is rather a ſurpriſe to me, that, like their Brethren the *Magi* of old, they have not uſurped all Power over the Poſſeſſions as well as Conſciences of the Laity; ſince in all Probability it would have been attended with better Succeſs as to the Continuance of it.

What

What they might have acquired in *England* before the Reformation, had it not been for the Statute of *Mortmain*, is not to be determined: but certainly it would have been very great; for notwithſtanding that Statute, their Revenues increaſed from time to time, till the Reign of King *Henry* VIII. which was above Two hundred Years after the making of it.

In his Reign they ſuffered much, both with reſpect to their Power and Eſtates; as has been ſince greatly bewailed by many good Proteſtant Divines: But, if they will have Patience for a few Ages, they will find, that the late Queen *Anne* has furniſhed them with Materials ſufficient, not only to repair the Dilapidations of King *Henry* VIII. but alſo to erect much more noble Structures than were demoliſhed in that Reign.

The late Reverend and Learned Dr. *Prideaux*, Dean of *Norwich*, in his Vindication of an Award of King *Charles* I. *Page* 64. ſays, "The Queen's Majeſty's late Bounty to *the Church*, hath laid a very good Foundation for the redeeming again of Impropriations to it, were this Bounty wholly appropriated thereto, and to a better Uſe I am poſitive to ſay it cannot be applied; and having the Honour to be one of the Commiſſioners for the diſpoſal of this Bounty, I have the more Right to declare my Judgment herein. If it be diſtributed in Penſions, it will better only ſome ſingle Perſons, but leave *the Church* in the ſame State of deficiency for *God's Service* which it was in before. But if it be laid out for the buying in of Impropriations again to the Pariſh Churches from which they have been alienated, *it is ſufficient to buy in Twenty or Thirty of them every Year*; and in thus Year by Year the Work be carried on, it will every Year help to deliver us from the greateſt Miſchief which *the Church* hath groaned under ſince the time of the Reformation, and in proceſs of Time, will wholly remove it from us. And if the Forfeitures of all thoſe Lands, and other Donations, which are given contrary to Law for the maintaining of *Popiſh* Prieſts here, and *Popiſh* Monaſteries and Convents beyond Sea, were all taken by the Government, and aſſigned to the ſame Uſe, the whole Work would be ſoon done, and *the Church again reſtored to that Competency of Revenue which is neceſſary for it.* Theſe Donations now in the Hands of the *Popiſh* Party for thoſe ſuperſtitious and unlawful Ends, are computed by ſuch as can gueſs beſt of the Matter, to amount in Value to at leaſt a Million of Money. And it being by this Fund that they are enabled to carry on their dark and helliſh Deſigns, whereby they are continually working for the ſubverſion both of our *Church* and *State*, we can never be ſafe as to either, till it be wholly taken from them. And ſince they were the *Popiſh* Clergy that gave the Handle for this Alienation of Tythes, by their having firſt appropriated them to their Monaſteries and Convents, I think this Wealth of theirs cannot be more properly imployed, than for the remedying of the Evil which they have occaſioned. And altho it were deſigned, like the Cenſers of *Korah* and his Company, for the offering up of falſe Incenſe unto *the Lord*, yet ſince it hath been conſecrated to *God's Altar*, it is fitteſt that it ſhould with them, for a better Uſe, be nailed thereto."

I have quoted this Learned *Dean* to ſhew that I am not ſingular in my Opinion; I could wiſh he had told us, what he thought the Commiſſioners for the diſpoſal of this Bounty might do with *the Revenue of Tenths and Firſt Fruits*, after they have bought in all the *Impropriations*, *Abbey Lands*, &c. for they are a *Corporation*, which are to have *perpetual Succeſſion*, with full Capacity to purchaſe and receive, as well from Perſons diſpoſed to give, as from others willing to ſell, *without Licence, or Writ of Ad quod Damnum*, the Statute of *Mortmain*, or any other Statute or Law to the contrary notwithſtanding. *Vide* 2° & 3° *Annæ*, cap. 11. §. 4.

And by Virtue of this Power they have already made many Purchaſes, and have received a great Number of Benefactions from private Perſons, amongſt which there was a Legacy left them by one Gentleman of the clear Value of Ten thouſand Pounds; ſo that, as the Dean ſays, in Time *the Church may be again reſtored to a Competency of Revenue.*

The

The Dean likewiſe ſays in the ſame Treatiſe, That *Perſonal Tithes* ought to be paid of the clear Profits gained by the Labour and Induſtry of Man, as by Merchandize, Handycraft-Trades, and all other Imployments by which Men get their Livings; and to prove this he quotes St. *Ambroſe*, St. *Auſtin*, and a great Number of other Authorities, all of them, I freely acknowledg, very full and clear in this Point: and adds, that every Man is guilty of *the horrid Crime of Sacrilege*, who detains from *God* and his *Church*, for the Maintenance of *his Miniſters*, what he knows to be duly conſecrated thereto; that is, the Tenth Part of the Profits of Trade, Labour, *&c.* Now if the *Laity* could be perſuaded to be of Opinion with the Dean in this matter, the *Clergy* would be very well provided for in Cities, Trading Towns, and Pariſhes where Manufactures are eſtabliſhed; many of them would then have vaſtly greater Incomes, than the Archbiſhops and Biſhops themſelves have now. It is true, he ſays the People and their Miniſters may make ſuch *a Compoſition* for theſe *Perſonal Tithes*, as ſhall *hold good in Law*, and bind their Succeſſors to the Obſervance of it. But who can imagine, that ſuch a Compoſition can diſcharge any Man from the Guilt of that *horrid Crime of Sacrilege* beforementioned?

In that curious Piece, *The Connection of the Hiſtory of the Old and New Teſtament*, written by the ſame Dean *Prideaux*, there is a Relation of a moſt dreadful Deſtruction which befel the whole Army of *Brennus the Gaul*, only for deſigning to plunder the Temple of *Delphos*; upon which the *Dean* ſays, *Thus was God pleaſed, in a very extraordinary manner, to execute his Vengeance upon thoſe Sacrilegious Wretches.* Certainly every one muſt agree, that *compounding with*, or in other Words, detaining from the *Chriſtian* Prieſthood any part of what is really their due, is a much greater Crime than intending to plunder a *Pagan* Temple; and therefore I think there can be no one who has any Senſe of Religion, and believes the Clergy have ſuch a Right, that would make any ſuch *Compoſition*, notwithſtanding it might *hold good in Law*, but on the contrary pay the utmoſt Farthing. For my Part I freely own, That I no more believe they have any ſuch Right, than I believe that GOD deſtroyed Two hundred thouſand Soldiers for intending to plunder.

That the Livings of the poor Clergy want Augmentation is moſt certain, ſome of them being ſo very mean, that they are hardly ſufficient to buy the Incumbent Bread for himſelf, much leſs to maintain a Family; and therefore I heartily wiſh they were ſo augmented, as that all of them had competent Revenues to ſupport them ſuitable to their Education and Character: And, if I knew any way to do it ſooner than by the Manner the Corporation hath taken, I ſhould as readily, and with as much Pleaſure communicate it, as any Man alive. But yet at the ſame time I muſt take the Liberty, as an *Engliſhman*, to declare, that I do not like any Repeal of the Statute of *Mortmain*, upon any account whatever, nor ſettling a Revenue *without Limitation*, upon a Corporation that is to have *perpetual Succeſſion*, and thereby would in Time be able to engroſs all the Eſtates in the Kingdom into their Hands. Not that I think any body ſhould be very uneaſy about it, ſince there is no doubt but Poſterity will put a ſtop to their Proceedings, whenever they apprehend any Danger from them.

There is another thing I ſhall likewiſe take the Liberty of ſaying I do not like, and that is, the ſettling a certain annual Sum of Money in lieu of Tithes, upon the ſeveral Parſons, Vicars and Curates, in the Pariſhes of the City of *London*, which were burnt by the late dreadful Fire; this was done by an Act paſſed *Anno* 22° & 23° *Car.* II. *Cap.* 15.

By this Settlement, there is not one of them has above 200 *l. per Annum*, beſides his Glebe, *&c.* and ſeveral of them no more than 100 *l. per Annum*. Now, what ſort of a Maintenance will this be an Age or two hence? Moſt aſſuredly in Time the Clergy of the City of *London* will have the pooreſt Livings in the whole Kingdom, if they remain upon the Foot they now are. As Trade and Money increaſe from Time to Time, the Expences of Life muſt neceſſarily increaſe in Proportion; and if ſo, is it reaſonable their Livings ſhould remain the ſame? Experience has ſhewn us, that he who had 20 *l. per Annum* Two hundred Years ago, had as good an Income as he who has now 100 *l. per Annum*. Therefore I cannot help thinking, that inſtead of a certain annual Sum of Money, a certain Pound-Rate ſhould have been ſettled; as ſuppoſe 8 *d.* or 9 *d. per l.* upon the Rents of the Houſes within each Pariſh: and then, as it is very probable that Rents will increaſe with other things, their

their Livings would increaſe alſo, and conſequently their Livings continue to be in Value what they now are, and that is no more than a bare Competency for Gentlemen who live in ſuch a City as *London*. But this muſt be left to the Wiſdom of the Legiſlature.

As the Conſideration of the foregoing Tables naturally led me into this Digreſſion, I hope the Reader will excuſe it.

I ſhall conclude with a Paragraph from Mr. *Locke*'s *Eſſay upon Human Underſtanding*, B. 2. Chap. 16. § 6. which I think very proper to inſert, for the Information of ſuch of my Readers, who have not been uſed to Numbers conſiſting of a great many Figures.

" I doubt not but we might diſtinctly number in Words a great deal farther than we uſually do, " would we find out but ſome fit Denominations to ſignify them by; whereas in the way we take " now, to name them by Millions of Millions of Millions, *&c.* it is hard to go beyond eighteen, or " at moſt four and twenty decimal Progreſſions without Confuſion. But to ſhew how much *diſtinct* " *Names conduce to our well Reckoning*, or having uſeful *Ideas* of Numbers, let us ſet all theſe " following Figures in one continued Line, as the Marks of one Number; *v.g.*

Nonilions.	Octilions.	Septilions.	Sextilions.	Quintrilions.	Quatrilions.	Trilions.	Bilions.	Millions.	Units.
857324.	162486.	345896.	437916.	423147.	248106.	235421.	261734.	368149.	623137.

" The ordinary way of naming this Number in *Engliſh*, will be the often repeating of Millions, " of Millions, of Millions, of Millions, of Millions, of Millions, of Millions, of Millions, which is " the Denomination of the ſecond ſix Figures. In which way it will be very hard to have any " diſtinguiſhing Notions of this Number: But whether, by giving every ſix Figures a new and orderly " Denomination, theſe and perhaps a great many more Figures in Progreſſion might not eaſily be " counted diſtinctly, and *Ideas* of them both got more eaſily to our ſelves, and more plainly ſignified " to others, I leave it to be conſidered."

Of

Of ANNUITIES *upon* LIVES.

I DID intend to have calculated ſome Tables, of the probable Values of One, Two and Three Lives, according to the different Ages of Mankind, and at ſeveral Rates of Intereſt: But, as ſuch Tables muſt be founded upon Obſervations made upon the Number of Perſons dying at ſuch different Ages, and as I could meet with very few ſuch Obſervations that could be depended on, and thoſe but for a few Years, I laid aſide my Deſign; not doubting but hereafter, when proper Obſervations ſhall have been made, ſome one or other will take the Pains of conſtructing ſuch Tables.

In order thereunto, if thoſe in whoſe Power it is, would oblige the *Pariſh Clerks* weekly to make a Return of the Age of every Perſon dying in each reſpective Pariſh within the *weekly Bills of Mortality*, in like manner as they now make their Returns of the Diſeaſes and Caſualties; and if the Number dying of every Age were printed at the end of every Year, with the yearly Bill; then there would in Time be a good Foundation to build upon: and when ever this is done in *London*, it is probable it will be done likewiſe in other Places both at home and abroad, where Accounts of Births and Burials are kept, which would make the Foundation ſtill more certain; and therefore I hope in time it will be done, tho I may not live to ſee it.

At preſent I ſhall take the Liberty to ſay, the Valuation of Annuities upon Lives, is no other than Gueſs-work, and therefore the beſt Method I can propoſe to my Reader for their Valuation is, to conſider with himſelf, what Number of Years certain, he ſuppoſes to be equal to the Life or Lives in Queſtion, having always regard to the Age, and State of Health of the Annuitant or Annuitants. When any Number of Years certain are agreed upon, the preſent Value of thoſe Years at any given Rate, is readily found by the *fourth Table* of Compound Intereſt, and will be the probable Value of the Life or Lives required.

The common Method of buying theſe Annuities, is at a certain Number of Years Purchaſe; for which Reaſon, I have made the following Table, to ſhew how long the Annuitant muſt live, to be reimburſed his Principal Money, with Intereſt at any given Rate.

The Table is very plain, as appears by this Example.

Suppoſe 11 Years Purchaſe is given for an Annuity.

Then, if the Annuitant lives	Yrs. Days.	he will be reimburſed his Principal with Intereſt at the Rate of	
	12.200		2
	13. 9		2½
	13.200		3
	14. 48		3½
	14.286		4
	15.190		4½
	16.134		5
	18.188		6
	21.264		7
	27.201		8
	53.160		9

per Cent. per Annum.

I choſe to make the Fractions of a Year in Days, for the greater Exactneſs, tho 'tis well known Annuities are generally paid, either Half-yearly or Quarterly.

And this is all I ſhall ſay with reſpect to Annuities upon Lives.

A Table to calculate the Value of Annuities upon Lives.

Years Purchase given for a Life or Lives.	Continuance of the Lives to reimburse the Annuitants their Purchase Money.						Years Purchase given for a Life or Lives
	At 2 *per Cent.*	2½ *per Cent.*	3 *per Cent.*	3½ *per Cent.*	4 *per Cent.*	4½ *per Cent.*

AND now to conclude the Whole, I ſhall give a ſhort Account of our *Money*, or the *Silver Coin* of this Kingdom, from the Conqueſt down to this Time, with reſpect to the *Denominations* of the ſeveral Pieces, its *Weight* and *Fineneſs*, and the *Rate of Intereſt* which from time to time has been allowed by Law to be taken for the Loan of it.

Our Accounts of Money have always been kept in *Pounds*, *Shillings*, *Pence*, and *Farthings*; and tho the *Weight* of them has frequently been altered, and the *Fineneſs* ſometimes, yet they have always born the ſame Proportion one to the other as they do at this Day.

A *Pound* was ſo called, becauſe antiently Twenty Shillings, or Two hundred and forty Pence weighed a Pound, or twelve Ounces *Troy* weight; but there never was any ſuch piece of Silver coined.

There was a ſmall difference in the Payments which were made in the King's Exchequer, between One Pound and another, there being three ſorts of them, the Pound *de Numero*, *ad Scalam*, and *ad Penſum*; as may be ſeen in *Madox's Hiſtory of the Exchequer*, p. 187. but I think not very material to be inſerted here.

A *Shilling* was always the 20*th* part of a Pound, and was for many Ages only Nominal, there not having been any ſuch Piece coined till the 19 *H.* VII.

A *Penny* was always the 12*th* part of a Shilling, and was *the firſt Piece of Silver Coin* we have any Notice of; it was alſo in antient Times called *a Sterling*, as may be ſeen in the Statutes of 51 *H.* III. and 31 *E.* I. And it is for this Reaſon our Money then was, and ſtill is, called *Sterling Money*.

A *Farthing* was always the 4*th* part of a Penny, and that, and the *Half-penny* were *Silver Coins*; Half-pence and Farthings of Copper, not having been coined by any legal Authority, till the Reign of King *Charles* II.

Pence, *Half-pence*, and *Farthings*, were the only *Silver Coin* in *England*, till 27 *E.* III. when *Groats*, and *Half-groats* were firſt coined: they were then called *Groſſes*, becauſe of their being ſo much larger than any Silver Pieces coined before.

When *Shillings* were firſt coined, I have mentioned above.

Crowns, *Half-Crowns*, *Six-penny*, and *Three-penny* pieces, were firſt coined by *E.* VI. And by Q. *Eliz.* pieces of *Three-half-pence*, and *Three-farthings* were coined; and theſe are all the ſeveral Species of *Silver Coin*, that I have met with.

In an Ordinance of Parliament, paſſed 17 *July* 1649, is the following Table, which is there ſaid to expreſs the true *Values* and *Weights* of the *Silver Coin*, according to the Accompt of the Mint, within the *Tower* of *London*.

The Piece of-	*s.* *d.*	Penny Wts.	Grains.	Mites.	Droits.	Perits.	Blanks.
	5. —	19	8	10	8	—	—
	2. 6	9	16	5	4	—	—
	1. —	3	20	18	1	10	—
	6	1	22	9	—	15	—
	2	—	15	9	16	5	—
	1	—	7	14	20	2	12
	½	—	3	17	10	1	6

Memorandum, Twelve Ounces makes a Pound weight Troy; Twenty Penny-weight makes an Ounce; Twenty four Grains make a Penny-weight; Twenty Mites makes a Grain; Twenty four Droits makes a Mite; Twenty Perits makes a Droit; Twenty four Blanks makes a Perit.

This being the only Table I ever ſaw, which gives the Weight of the particular Pieces of Money, I was willing to inſert it as a Curioſity, tho I think ſome of the Weights therein mentioned to be only

only imaginary, and in particular the Blank; for ſurely no one ſuppoſes there can be any real Weight, that is but the Two hundred and thirty thouſand four hundredth part of a Grain.

The words *Sterling*, *old Sterling*, *antient Sterling*, and *Standard*, when applied to *Money*, are all of the ſame Signification, and mean ſuch coined Money as hath eleven Ounces and two Penny-weight of fine Silver, and eighteen Penny-weight of Allay in every Pound weight of ſuch Money. This has been our *Standard* for the *Fineneſs* of the Coin, from the *Norman* Conqueſt, down to this very time; the ſhort ſpace between the latter end of *H.* VIII. and the beginning of Q. *Eliz.* only excepted.

But tho the *Fineneſs* hath had ſo little Alteration, it hath been otherwiſe with the *Weight*, for that hath undergone many Alterations from time to time: ſo that inſtead of twenty Shillings weighing a Pound, as it antiently did, there is now no leſs than ſixty two Shillings in a Pound weight; as may be particularly ſeen in the following Table.

A *Table* ſhewing the ſeveral Alterations which have been made, from time to time, in the *Weight* and *Fineneſs* of the *Silver Coins*.

Years.	Money by Tale, in a Pound weight Troy.		Fine Silver in a Pound weight.		Allay in a Pound weight.

In the Times when theſe Alterations were made, there was little Commerce in the Kingdom, and that little chiefly carried on by foreign Merchants; notwithſtanding which, the Effects which thoſe Alterations produced, were bad enough: but, how very miſchievous the Conſequences of making an Alteration in our Time would have been, when Trade both Domeſtick and Foreign is at ſo great an height, is dreadful to imagine: and yet, about thirty Years ago there was a bold Attempt made, to raiſe the Value of the Coin, for ſo it was falſly called, from ſixty two Shillings, to ſeventy ſeven Shillings and ſix Pence the Pound weight. That ſuch a vile Project did not ſucceed, was in a great Meaſure owing to thoſe excellent Pieces relating to the Coin, wrote by Mr. *John Locke*, and which the Reader may find in the Second Volume of his Works.

Mr.

Mr. *Lowndes* in his *Eſſay for Amendment of the Silver Coins*, p. 34. ſays, there is an I denture in the Exchequer of 28 *E.* I. which mentions a Pound of *Old Sterling* to be coined in twenty Shillings and three Pence; and from him, the late Biſhop *Fleetwood* in his *Chronicon Pr tioſum*, p. 52. ſays to the ſame Effect: but I believe it to be a Miſtake. For the *Ordinance f Meaſures*, made 31 *E.* I. which was three Years after, is in theſe Words: "By Conſent of th "whole Realm of *England*, the King's Meaſure was made, ſo that an *Engliſh* Penny, which is calle "the Sterling, round, without Clipping, ſhall weigh xxxii Grains of Wheat well dried, and g "thered out of the middle of the Ear: and xx Pence make an Ounce; and xii Ounces make "Pound; and viii Pounds make a Gallon of Wine; and eight Gallons of Wine make a Buſhel "*London*, which is the eighth part of a Quarter." By which I think it very plain, that there wer at that time but 240 Pence in a Pound, which is exactly twenty Shillings; and what confirms me i this is, That this Statute of 31 *E.* I. is almoſt in the ſame Words with that made 51 *H.* III. which time I ſuppoſe it is agreed, that a Pound of Silver was coined into no more than twenty Shi lings; and therefore I have in the Table ſet down the firſt Alteration to be made 20 *E.* III. fro twenty Shillings, to twenty two Shillings and ſix Pence the Pound, tho it is of no great Moment whic of us is miſtaken in this Matter.

In the ſame *Eſſay*, p. 93. there is a very particular Deſcription of the manner of making bot the *Gold* and *Silver Coins* at the Mint, which I have taken the Liberty to tranſcribe, as follow "All the Moneys we have now in *England*, both Gold and Silver, are reducible to two ſorts; th "one ſtampt with a Hammer, and the other preſt with an Engine, called the *Mill*. The Gold "Silver of the hammer'd Money, is firſt caſt from the melting Pot into long Bars, thoſe Bars are cu "with Sheers into ſeveral ſquare Pieces of exact Weights, for Sovereigns, Angels, Crowns, Hal "Crowns, Shillings, *&c.* Then with the Tongs and Hammer they are forged into a round Shap "after which they are blanched, that is, made white or refulgent by Nealing or Boiling, and afte "wards ſtampt or impreſſed with an Hammer to make them perfect Money. This method "making Money with the Hammer, was practiſed in the Reign of King *Edward* I. who, among "other great Atchievements of his moſt prudent Government, left that of reſtoring and eſtabliſh "ing good Moneys for the Uſe of his People, to recommend his Name to ſubſequent Generation "He ſent for Mr. *William de Turnemire*, and his Brother *Peter*, and others from *Marſeilles*, and on "*Friſcobald* and his Companions from *Florence*; and imployed them in the working this kind "Money, and the buying and exchanging of Silver for that Purpoſe: for which he had thirty Fu "naces at *London*, eight at *Canterbury*, beſides three the Archbiſhop had there, twelve at *Briſto* "twelve at *York*, and more in other great Towns; in all which Places they made the ſaid hammer' "Money of Silver, ſupplied by the King's Changers eſtabliſhed at the ſame Places, who according t "certain Rates or Prices preſcribed to them, took in the Clipt, Rounded and Counterfeit Moneys "to be recoined, and bought Gold and Silver of the Merchants and others, to be fabricated into Ne "Money; at the ſame time ordaining, *Quod Proclametur per totum Regnum quod nulla fiat tonſur "de nova Moneta ſub periculo Vitæ, & Membrorum, & amiſſionis omnium Terrarum & Tenemen "torum*, &c. And this kind of hammer'd Money continued thro' all the Reigns of ſucceedin "Kings and Queens, till about the Year of our Lord 1663. when by ſeveral Warrants, and Com "mand of King *Charles* II. the other ſort called *Milled Money* was firſt fabricated, to be current i "*England* in this manner: Firſt, the Gold or Silver is caſt out of the melting Pot into long flat Bars "which Bars are drawn thro' a Mill, wrought by a Horſe, to produce the juſt Thickneſs of Guineas "Half-Guineas, Crowns, Half-Crowns, Shillings, *&c.* Then with forcible Engines, called *Cutters* "which anſwer exactly to the reſpective Sizes or Dimenſions of the Money to be made, the round "Pieces are cut out from the flat Bar, ſhaped as aforeſaid; the reſidue whereof, called *Sizel*, is melted "again: and then every Piece is weighed and made to agree exactly with the intended Weight "and afterwards carried to other Engines, wrought ſecretly, which put the Letters upon the Edge "of the larger Silver Pieces, and mark the Edges of the reſt with a Graining. The next thing i "the Blanching, performed as above; and at laſt, every Piece is brought to the Preſs, which i "called the *Mill*, wrought by the Strength of Men, and there receives the Impreſſion, which make "it perfect *Milled Money*."

And this was the firſt *Milled Money* which was made by any of our *Kings*: But, the firſt of this ſort of Money was really coined by *Oliver Cromwell*, in the Year 1658. and is the moſt beautiful Coin I ever ſaw; but it being done the ſame Year in which he died, there was, as I ſuppoſe, no great Quantity of it, and therefore 'tis now ſcarce to be met with.

Beſide

Beſides the recoining by *Edward* I. abovementioned, the Money was in a manner all recoined again by Queen *Elizabeth*, occaſioned by the wretched debaſement of it by her Father and Brother; and this was deſervedly look'd upon as one of the Glories of her Reign.

It was again recoined by King *William* III. and this laſt recoining was occaſioned by one of the moſt unaccountable Negligences that ever a Government was guilty of. Biſhop *Fleetwood*, in his *Chronicon Pretioſum*, which I have before mentioned, p. 57. ſpeaking of this Matter, has the following Remark: "It will be much for the Honour of the late Reign, to have remedied the greateſt Abuſe of "Money, that was ever known in *England*, at a Time of the greateſt Danger and Expence, with "very little Grievance of the People. But ſure, 'tis better to prevent a moderate Miſchief, than re-"dreſs a very great one; and perhaps, a Proclamation of three or four Lines, forbidding any clipped "Money to be received into the King's Exchequer in 1690, would have prevented the clipping and "ſpoiling five Millions." And I am intirely of Opinion with the Biſhop, that the Government might have prevented it, with a great deal of Eaſe.

That moſt wicked Trade of Clipping was begun in the time of the Civil War; but the Parliament put an early ſtop to it, by an Ordinance they paſſed the *6th September* 1647. the firſt Clauſe of which is in theſe Words: "Foraſmuch as during theſe Diſtractions, great Sums of Moneys clipped "and unlawfully diminiſhed, have been diſperſed and given out amongſt the People throughout the "Kingdom; for the ſpeedy ſuppreſſion thereof, and prevention of the like in the future, be it "Ordained, by the Lords and Commons in Parliament aſſembled, That from henceforth no Money "diminiſhed by Clipping or Filing, ſhall be current or payable in this Kingdom, or be offered in "Payment, or received as due Payment, by any Perſon whatſoever, but be eſteemed as Bullion, "and no otherwiſe." This Ordinance expiring upon the Reſtoration of King *Charles* II. the Trade of Clipping was again revived, but not the Law to prevent it: And is it not an amazing thing, that it ſhould be ſuffered to go on for the ſpace of Thirty five Years, without putting any ſtop to it, when at the ſame time there was ſuch a Precedent before them, which, if followed, would have ſo effectually cured the Evil?

What makes it ſtill more ſurpriſing is, That when the Earl of *Rocheſter* was made Lord Treaſurer by King *James* II. he eſtabliſhed an Order, that the *Tellers* ſhould weigh every Bag of Money they received at the Exchequer; ſo that for above ten Years before the recoining, it was known at the Receipt there, how the Money diminiſhed from time to time in its Weight, till the Bags of 100 *l.* each in Tale, which ſhould have weighed, according to the Standard of the Mint, 32 *l.* 3 *oz.* 1 *dwt.* 22 *gr.* weighed no more than 16 *l.* 6 *oz.* 18 *dwt.* upon a Medium one with the other: As may be ſeen in the Eſſay before-mentioned.

However, by the wiſe and prudent Methods taken by his then Majeſty, his Miniſtry, and Parliament, the Diſeaſe was cured at laſt, and we have been happy in enjoying the benefit of a noble Coin ever ſince.

I have purpoſely omitted ſaying any thing of the *Gold Coins*, or of the *Silver Coins before the Conqueſt*; but if the Reader deſires any Information about them, let him read *Chronicon Pretioſum*, that curious and inſtructive Piece which I have before quoted, and I doubt not but it will give him a pleaſurable Satisfaction.

As to *Uſury*, or the taking of any Intereſt for the Loan of Money, it was in former Days b moſt *Chriſtians* deemed abſolutely unlawful, and therefore practiſed by very few, except thoſe ol Uſurers *the Jews*, who tho forbidden by the Law of *Moſes* to lend upon Uſury to their Brethren yet they never made any ſcruple of Trading that way with thoſe who were not of their ow Nation.

The *Jews* were firſt brought into *England* by *William* the Conqueror, and being then a numerou Body, they ſettled in moſt of the Cities and great Towns of the Kingdom, where they chiefl followed the Trade of Uſury for many Reigns after; but becoming odious by their Extortions they were totally expelled, to the great Joy of the People, about the 18*th* of *E.* I. *Anno Dom* 1290.

Fabian, in his Chronicle, the 47*th* of *H.* III. *Anno Dom.* 1263, which was about 27 Year before this Expulſion, gives the following Relation: " In this paſſetyme on Palme-ſondaye weeke a " the Jewes in *London* were ſpoiled and robbed, and the number of fyve hundred of theym were " ſlayne, and dyvers of theyr manſyons brent and deſtroyed, and ſuch as of theym were ſaved " were conveyed for great neede unto the Towre, and there kepte from the furye of the commons " Whereof the occaſion was, for ſo much as a Jewe, woulde have forced a Chriſten manne to have " geven unto hym *moore* then twopence, for the uſurye of twentye ſhyllinges for a weeke. For y " ſhall underſtand, that thoſe daies by licence graunted unto the Jewes of the king, they myght take " by uſurye of every man that of theym woulde borowe money, two pence of a pounde for a week " lendyng, and ſo of greater and of ſmaller ſummes, after that rate." And *Stowe* relates it much t the ſame purpoſe, but places it one Year ſooner; ſo that it may be ſuppoſed, the common Intereſt they took for the Loan of Money, was about 40 *l. per Cent. per Annum.*

There is no room to doubt but that their Uſury was very exorbitant, but then it is moſt certainly true, that as they fleeced the Subjects, the King fleeced them, and by *Tallages*, *Fines*, *Amerciaments*, &c. drew a conſiderable Revenue from them. Part of the King's Exchequer was ſet apart purpoſely for the Receipt and Management of this Revenue, and was called the *Exchequer of the Jews*: there were Perſons called *Juſtices of the Jews*, and Clerks and others under them for this particular Buſineſs; the Counterparts of their *Chirographs*, and of their *Starrs*, were laid up in Cheſts kept for that purpoſe, under the Care of the King's Officers; and by theſe means their Eſtates were, in a great meaſure, under the Power of the King, who taxed them at his Pleaſure. Theſe *Chirographs* were written Contracts, of the ſame Nature with our Bonds and Mortgages, and their *Starrs* like our general Releaſes. An Account at large, of this Affair relating to the Jews, may be ſeen in *Madox's Hiſtory of the Exchequer*, Chap. 7.

After the Baniſhment of the Jews, there were from time to time many Laws and Ordinances made, as well by the Church as State againſt Uſury; but all to little or no purpoſe, for Perſons who wanted Money, and were willing to give great Intereſt, always found thoſe who would lend enough to ſupply their Wants upon good Security.

Therefore, as the Practice could not be prevented, the Parliament *Anno* 37 *H.* VIII. *cap.* 9. made an Act to prohibit the taking more than 10 *per Cent.* and great Penalties were to be inflicted on thoſe who ſhould take above that Rate: This Act commenced from 31*ſt January* 1545, and is the firſt Act of Parliament in which I find any Rate of Intereſt mentioned. In this Act *Uſury* was declared to be *a thing unlawful.*

In

In leſs than ſeven Years, *Anno* 5 *E.* VI. *cap.* 20. the forementioned Statute was repealed; and it was enacted, *That no Perſon by any means ſhould lend or forbear any Sum of Money, for any manner of Uſury or Encreaſe, to be received or hoped for, above the Sum lent*; and this under ſevere Penalties.

Anno 13 *Eliz.* cap. 8. The Statute of *E.* VI. was repealed, and that of *H.* VIII. was revived, with additional Clauſes, ſtill prohibiting the taking above 10 *per Cent.* This Act commenced from the 25*th* of *June* 1571, and in it are theſe Words, That *all Uſury being forbidden by the Law of God, is Sin, and Deteſtable.*

When this Act was depending in the Houſe of Commons, there were warm Debates about it, in which Uſury had a great many hard Names given it: It was ſaid to be *præter Naturam, idem ac hominem occidere, proxima homicidio, Malum in Se*, and *Damnable.* As may be ſeen at large in D'Ewe's *Journal of Queen* Elizabeth's *Parliaments*, p. 171. & Seq.

Anno 21 *Jac.* I. *cap.* 17. It was made Penal to take above 8 *per Cent.* This Act commenced from the 24*th* of *June* 1625, and concludes thus, *Provided, That no Words in this Law contained, ſhall be conſtrued or expounded to allow the practice of Uſury, in Point of Religion or Conſcience.*

After this, I cannot find in any Act of Parliament, that Uſury, or the taking Intereſt for the Loan of Money, is ſaid to be unlawful; but if any of my Readers think it is, let them read *Grotius, Of the Rights of War and Peace*, B. 2. Chap. 12. and *Puffendorf, Of the Law of Nature and Nations*, B. 5. Chap. 7. and I doubt not of their being fully ſatisfied.

Anno 12. *Car.* II. *cap.* 13. It was made Penal to take above 6 *per Cent.* This Act commenced from 29*th* of *September* 1660. *Note*, The Intereſt of Money was reduced from 8 to 6 *per Cent.* nine Years before, by an Ordinance paſſed the 8*th* of *Auguſt* 1651, and which commenced the 29*th* of *September* following; but this being made in the time of Uſurpation, could be of no force after the Reſtoration of King *Charles* II.

Anno 12 *Annæ. cap.* 16. It was made Penal to take above 5 *per Cent.* This Act commenced from the 29*th* of *September* 1714. and remains in force at this Time.

Having thus given a ſhort Account of *legal Intereſt*, it will not be improper to add, that there is likewiſe *a natural Intereſt of Money*, which may be very well compared to the Market Price of *other* Commodities; I ſay *other*, for I look upon Money it ſelf to be a Commodity, which like others riſes and falls as there is a Demand for it; and therefore I have known, when the legal Intereſt was 6 *per Cent.* Money enough to be had at 5 or $4\frac{1}{2}$ *per Cent.* and ſometimes under that Rate; on the contrary, I have known ſince the legal Intereſt was at 5 *per Cent.* that 10 *per Cent.* and more, has been given for the Loan of Money, not for a Year, but for a very few Days. This I think plainly ſhews, that no Law can abſolutely fix the Intereſt of Money.

It is to be obſerved, that till the Year 1625, the legal Intereſt was never under 10 *per Cent.* and that within the ſpace of Ninety Years after that time, it was reduced to 5 *per Cent.*

This is owing to the great encreaſe of Trade in this Kingdom: For, the encreaſe of Trade under proper Regulations, will always be attended with an encreaſe of Wealth; and as Riches encreaſe, the Intereſt of Money will ſink in Courſe, whether there be, or be not a Law for that purpoſe.

Then, as Trade flouriſhes moſt in a Country where the Property of every Man is ſecure, w may not we expect of this kind? The late GLORIOUS REVOLUTION, and the Acceſſion the preſent PROTESTANT Family to the Throne, having, in all human probability, ſecu to us both our Civil and Religious Rights for Ages to come.

It was with this pleaſant View, that I began all the foregoing Tables, with ſuch low Rates Intereſt, and doubt not but that thoſe low Rates will be uſeful, at leaſt to the next Generatio being firmly perſuaded, that nothing but our own Folly, can hinder us from being the moſt opul People in *Europe*, and as ſuch the envy of all the reſt.

GOD grant, That as we encreaſe in Riches, we may alſo encreaſe in good Works; that we m be more Virtuous, as well as Richer than our Neighbours; and in particular, that we may gua againſt *Luxury*, that conſtant attendant on, and almoſt as conſtant a Canker to, Riches, that it n not grow to ſuch a height as to end in our Deſtruction, as it has of many flouriſhing Kingdoms a States in former Ages.

Then we may expect a Bleſſing upon all our honeſt Endeavours, and that in our Days, and in th of our Children's Children after us, *Peace will continue to be within our Walls, and Plenteouſn within our Dwellings.* AMEN.
