Le grand objet de l'art etymologique n'est pas de rendre raison de l'origine de tous les mots sans exception, & j'ose dire que ce seroit un but assez frivole. OR, THE

DIVERSIONS OF PURLEY.

INTRODUCTION.

B.

—THE mystery is at last unravelled. I shall no more wonder now that you engross his company at Purley *, whilst his other friends can scarce get a sight of him. This, you say, was President Bradshaw's feat. That is the secret of his attachment to the place. You hold him by the best security, his political prejudices and enthusiasm. But do not let his veneration for the memory of the antient possessor pass upon you for affection to the present.

* The feat of William Tooke, Esq. near Croydon, Surrey.

B

H. Should

H.

Should you be altogether so severe upon my politics; when you reflect that, merely for attempting to prevent the effusion of brother's blood and the final dismemberment of the empire, I stand the single legal victim during the contest, and the single instance of proscription after it? But I am well contented that my principles, which have made so many of your way of thinking angry, should only make you laugh. Such however as they are, they need not now to be defended by me: for they have stood the test of ages; and they will keep their ground in the general *commendation* of the world, till men forget to love themselves; though, till then perhaps, they are not likely to be seen (nor credited if seen) in the *practice* of many individuals.

But are you really forced to go above a hundred years back to account for my attachment to Purley? Without considering the many strong public and private ties by which I am bound to its present possessor, can you find nothing in the beautiful prospect from these windows? nothing in the entertainment every one receives in this house? nothing in the delightful rides and walks we have taken round it? nothing in the cheerful disposition and
easy

easy kindness of its owner, to make a rational man partial to this habitation?

T.

Sir, you are making him transgress our only standing rules. Politics and compliments are strangers here. We always put them off when we put on our boots; and leave them behind us in their proper atmosphere, the smoke of London.

B.

Is it possible! Can either of you—Englishmen and patriots!—abstain for four and twenty hours together from politics? You cannot be always on horseback or at piquet. What, in the name of wonder, your favourite topic excluded, can be the subject of your so frequent conversations?

T.

You have a strange notion of us. But I assure you we find more difficulty to finish than to begin our conversations. As for our subjects, their variety cannot be remembered; but I will tell you on what we were discoursing yesterday when you came in; and I believe you are the fittest person in the world to decide between us. He insists, contrary to my opinion, that all sorts of wisdom and useful knowledge may be obtained by a plain man of sense without what is

commonly called Learning. And when I took the easiest instance, as I thought, and the foundation of all other knowledge, (because it is the beginning of education, and that in which children are first employed) he declined the proof of his assertion in this instance, and maintained that I had chosen the most difficult: for, he says, that, though Grammar be usually amongst the first things taught, it is always one of the last understood.

B.

I must confess I differ from Mr. H. concerning the difficulty of grammar: if indeed what you have reported be really his opinion. But might he not possibly give you that answer to escape the discussion of a disagreeable, dry subject, remote from the course of his studies and the objects of his inquiry and pursuit? By his general expression of—*what is commonly called Learning*—and his declared opinion of that, I can pretty well guess what he thinks of grammatical learning in particular. I dare swear (though he will not perhaps pay me so indifferent a compliment) he does not in his mind allow us even the poor consolation which we find in Athenæus—*εἰ μὴ ἰατροὶ ἦσαν*; but concludes, without a single exception, *ἔθεν τῶν Γραμματικῶν μωρότερον* *.

* Οὐ γὰρ κακῶς τινὶ τῶν εἰαιρῶν ἡμῶν ἐλεχθῆ το, εἰ μὴ ἰατροὶ ἦσαν ἔθεν αἰ πῶν τῶν γραμματικῶν μωρότερον.

Deipnosoph. Lib. 15.

I must however intreat him to recollect, (and at the same time whose authority it bears,) that—*Qui Sapientiæ & literarum divortium faciunt, nunquam ad solidam sapientiam pertingent. Qui verò alios etiam à literarum linguarumque studio absterrent, non antiquæ sapientiæ sed novæ stultitiæ Doctores sunt habendi.*

H.

Indeed I spoke my real sentiments. I think Grammar difficult, but I am very far from looking upon it as foolish : indeed so far, that I consider it as absolutely necessary in the search after philosophical truth ; which if not the most useful perhaps, is at least the most pleasing employment of the human mind. And I think it no less necessary in the most important questions concerning religion and civil society. But since you say it is easy, tell me where it may be learned.

B.

If your look and the tone of your voice were less serious, the extravagance of your compliment to grammar would incline me to suspect that you were taking your revenge, and bantering me in your turn by an ironical encomium on my favourite study. But, if I am to suppose you in earnest, I answer, that our English grammar may be sufficiently

ficiently and easily learned from the excellent Introduction of Doctor Lowth: or from the *first* (as well as the *best*) English grammar, given by Ben Johnson.

H.

True, Sir. And that was my first slight answer to our friend's instance. But his inquiry is of a much larger compass than you at present seem to imagine. He asks after the causes or reasons of Grammar *: and for satisfaction in them I know not where to send him; for I assure you, he has a troublesome, inquisitive, scrupulous mind of his own that will not take mere words in current payment.

B.

I should think that difficulty easily removed. Dr. Lowth in his preface has done it ready to your hands. "Those,"

T.

The recommendation no doubt is full, and the authority great ; but I cannot say that I have found the performance to correspond : nor can I boast of any acquisition from its perusal, except indeed of hard words and frivolous or unintelligible distinctions. And I have learned from a most excellent authority, that “ Tout ce qui varie, tout ce qui

 “ absolument faux : parcequ’il marque un embarras que

B.

And you, Sir ?

* BOSSUET des variations des Eglises Protestantes.

H.

I am really in the same situation.

B.

Have you tried any other of our English authors on the subject?

H.

I believe all of them, for they are not numerous*; but none with satisfaction.

B. You

* The authors who have written professedly on this subject, in any language, are not numerous. Caramuel, in the beginning of his *Grammatica Audax*, says,—“*Solus, ut puto, SCOTUS, & post eum SCALIGER & CAMPANELLA (alios enim non vidi) Grammaticam speculativam evulgarunt; vias tamen omnino diversas ingressi. Multa mihi in Scaligero, & plura in Campanella displicuerunt; & pauciora in Scoto, qui vix alibi subtilius scripsit quam cum de Grammaticis modis significandi.*”

The reader of Caramuel (who, together with Campanella, may be found in the Bodleian Library) will not be disappointed in him; but most egregiously by him, if the smallest expectations of information are excited by the character which is here given of Scotus: whose *De Modis Significandi*, should be intitled, not *Grammatica Speculativa*, but—an Exemplar of the subtle art of saving appearances, and of discoursing deeply and learnedly on a subject with which we are totally unacquainted. *Quid enim subtilius vel magis tenue, quam quod nihil est.*

Wilkins, Part 3. Chap. 1. of his Essay towards a Real Character, says, after Caramuel,—“*The first of these (i. e. philosophical, rational, universal Grammar) hath been treated of but by few; which makes our learned*

You must then give up one at least of your positions. For if, as you make it out, Grammar is so difficult that a

 “ by *Vossius* in his *Aristarchus*.” So far *Wilkins*: who, for what reason I
 know not, has omitted the *Minerva* of *Sanctius*; though well deserving his
 notice; and the declared foundation of *Scioppius*. But he who should
 confine himself to these authors, and to those who, with *Wilkins*, have
 since that time written professedly on this subject, would fall very short of
 the assistance he might have, and the leading hints and foundations of rea-
 soning which he might obtain, by reading even all the authors who have
 confined themselves to particular languages.

The great *BACON* put this subject amongst his *Desiderata*, not, as *Wilkins*
 says, because “ few had treated of it;” but because none had given a satis-
 factory account of it. At the same time *Bacon*, though evidently wide of
 the mark himself, yet conjectured best how this knowledge might most
 probably be attained; and pointed out the most proper materials for re-
 flection to work upon. “ *Illa demum* (says he) *ut arbitramur, foret nobi-*

knowledge

knowledge of it cannot be obtained by a man of sense from any authors in his own language, you must send him to what is commonly called Learning, to the Greek and Latin authors, for the attainment of it. So true, in this science at least, if not in all others, is that saying of Roger Afcham; that—" Even as a hawke fleeth not hie with
 " one wing, even so a man reacheth not to excellency
 " with one tongue."

H.

On the contrary, I am rather confirmed by this instance in my first position. I acknowledge philosophical Grammar (to which only my suspected compliment was intended) to be a most necessary step towards wisdom and true knowledge. From the innumerable and inveterate mistakes which have been made concerning it by the wisest philosophers and most diligent inquirers of all ages, and from the thick darkness in which they have hitherto left it, I imagine it to be one of the most difficult speculations. Yet, I suppose, a man of plain common sense may obtain it, if he will dig for it; but I cannot think that what is commonly called Learning, is the mine in which it will be found. Truth, in my opinion, has been improperly imagined at the bottom of a well: it lies much nearer to the surface; though buried indeed at present under mountains of
 9 learned

learned rubbish; in which there is nothing to admire but the amazing strength of those vast giants of literature who have been able thus to heap Pelion upon Ossa. This at present is only my opinion, which perhaps I have entertained too lightly. Since therefore the question has been started, I am pleased at this occasion of being confirmed or corrected by you; whose application, opportunities, extensive reading, acknowledged abilities, and universal learning enable you to inform us of all that the ancients have left or the moderns have written on the subject.

B.

Oh! Sir, your humble servant! compliments, I perceive, are banished from Purley. But I shall not be at all inticed by them to take upon my shoulders a burthen which you seem desirous to shift off upon me. Besides, Sir, with all your caution, you have said too much now to expect it from me. It is too late to recall what has passed your lips: and if Mr. T. is of my sentiments you shall not be permitted to explain yourself away. The satisfaction which he seeks after, you say *is to be had*; and you tell us the mine where you think it is *not to be found*. Now I shall not easily be persuaded that you are so rash and take up your opinions so lightly, as to advance or even to imagine this; unless you had first searched that mine your-

self, and formed a conjecture at least concerning the place where you suppose this knowledge is to be found. Instead therefore of making me display to Mr. T. my reading, which you have already declared insufficient for the purpose, is it not much more reasonable that you should communicate to us the result of your reflection?

H.

With all my heart, if you chuse it should be so, and think you shall have patience to hear me through. I own I prefer instruction to correction, and had rather have been informed without the hazard of exposing myself; but if you make the one a condition of the other, I think it still worth my acceptance; and will not lose this opportunity of your judgment for a little shame. I acknowledge then that the subject is not intirely new to my thoughts: for, though languages themselves may be and usually are acquired without any regard to their principles; I very early found it, or thought I found it, impossible to make many steps in the search after *truth* and the nature of *human understanding*, of *good* and *evil*, of *right* and *wrong*, without well considering the nature of language, which appeared to me to be inseparably connected with them. I own therefore I long since formed to myself a kind of system, which seemed to me of singular use in the very small extent

of my younger studies to keep my mind from confusion and the imposition of words. After too long an interval of idleness and pleasure, it was my chance to have occasion to apply to some of the modern languages; and, not being acquainted with any other more satisfactory, I tried my system with these, and tried it with success. I afterwards found it equally useful to me with some of the dead languages. Whilst I was thus amusing myself the political struggle commenced; for my share in which you so far justly banter me, as I do acknowledge that, both in the outset and the progress of it, I was guilty of two most egregious blunders; by attributing a much greater portion of virtue to individuals and of understanding to the generality than any experience of mankind can justify. After another interval therefore (not of idleness and pleasure) I was again called by the questions of our friend *Mr. T. (for yesterday is not the first time by many that he has mentioned it) to the consideration of this subject. I have hitherto declined attempting to give him the satisfaction he required: for, though the notion I had of language had satisfied my own mind and answered my own purposes, I could not venture to detail to him my crude conceptions without having ever made the least inquiry into the opinions of others. Besides, I did not at all suspect that my notions, if just, could be peculiar to myself: and
I hoped

I hoped to find some author who might give him a clearer, fuller, and more methodical account than I could, free from those errors and omissions to which I must be liable. Having therefore some small intervals of leisure and a great desire to give him the best information; I confess I have employed some part of that leisure in reading every thing I could easily and readily procure that has been suggested by others.

——I am afraid I have already spoken with too much presumption: But when I tell you that I differ from all those who with such infinite labour and erudition have gone before me on this subject; what apology——

B.

Oh! make none. When men think modestly they may be allowed to speak freely. Come—Where will you begin?—*Alpha*—Go on.

H.

Not with the organical part of language, I assure you. For, though in many respects it has been and is to this moment grossly mistaken, (and the mistakes might, with the help of some of the first principles of natural philosophy and anatomy, be easily corrected) yet it is an inquiry more of curiosity than immediate usefulness.

B. You

You will begin then either with *things* or *ideas*: for it is impossible we should ever thoroughly understand the nature of the *signs*, unless we first properly consider and arrange the *things signified*. Whose system of philosophy will you build upon?

H.

What you say is true. And yet I shall not begin there. Hermes, you know, put out the eyes of Argus: and I suspect that he has likewise blinded philosophy: and if I had not imagined so, I should never have cast away a thought upon this subject. If therefore Philosophy herself has been misled by Language, how shall she teach us to detect his tricks?

B.

Begin then as you please. Only begin.

ΕΠΕΑ ΠΤΕΡΟΕΝΤΑ, &c.

PART I.

CHAP. I.

OF THE DIVISION, OR DISTRIBUTION OF LANGUAGE.

H.

THE purpose of Language is to communicate our thoughts —

B.

You do not mention this, I hope, as something new, or wherein you differ from others?

H.

You are too hasty with me. No. But I mention it as that principle, which, being kept *singly* in contemplation, has misled all those who have reasoned on this subject.

D

B. Is

B.

Is it not true then ?

H.

I think it is. And that on which the whole matter rests.

B.

And yet the confining themselves to this true principle, upon which the whole matter rests, has misled them !

H.

Indeed I think so.

B.

This is curious !

H.

Yet I hope to convince you of it. For thus they reasoned——Words are the *signs* of *things*. There must therefore be as many sorts of words, or *parts of speech*, as there are sorts of *things* *. The earliest inquirers into language proceeded then to settle how many sorts there

* *Distinctio rerum nota: pro rerum speciebus partes quotque suas sortietur.*

J. C. SCALIGER de Causis L. L.

were

were of things; and from thence how many sorts of words, or parts of speech. Whilst this method of search *strictly* prevailed, the parts of speech were very few in number: but *two*. At most *three*, or *four*.

All things, said they, must have names*. But there are two sorts of things:

1. *Res quæ permanent.*
2. *Res quæ fluunt.*

There must therefore be *two* sorts of words or *parts of speech*: viz.

1. *Notæ rerum quæ permanent.*
2. *Notæ rerum quæ fluunt.*

Well; but surely there are words which are neither *notæ rerum permanentium*, nor yet *notæ rerum fluentium*. What will you do with them?—We cannot tell: we can find but these two sorts *in rerum natura*: call therefore those other words, if you will, for the present, *particles* †, or

* From this moment Grammar quits the day-light; and plunges into an abyss of utter darkness.

† A good convenient name for all the words which we do not understand: for as the denomination means nothing in particular, and contains no description,

or inferior parts of speech, till we can find out what they are. Or, as we see they are constantly interperfed between nouns and verbs, and seem therefore in a manner to hold our speech together, suppose you call them *conjunctions* or *connectives* *.

This seems to have been the utmost progress that philosophical Grammar had made till about the time of Aristotle, when a *fourth* part of speech was added,—the *definitive*, or *article*.

scription, it will equally suit any short word we may please to refer thither. There has latterly been much dispute amongst Grammarians concerning the use of this word, *particle*, in the division and distribution of speech: particularly by Girard, Dangeau, the authors of the Encyclopedie, &c. In which it is singular that they should all be right in their arguments against the use made of it by others; and all wrong, in the use which each of them would make of it himself. Dr. S. Johnson adopts N. Bailey's definition of a *particle*—"A word unvaried by inflexion." And Locke defines *particles* to be—"The words whereby the mind signifies what connection it gives to the several affirmations and negations, that it unites in one continued reasoning or narration."

* The Latin Grammarians amuse themselves with debating whether *Συνδεσμος* should be translated *Convincitio* or *Conjunctio*. The Danes and the Dutch seem to have taken different sides of the question: for the Danish language terms it *Bindeord*, and the Dutch *Köppelwoord*.

Here

Here concluded the search after the different sorts of words, or parts of speech, from the difference of things : for none other apparently rational, acknowledged, or accepted difference has been suggested.

According to this system it was necessary that all sorts of words should belong to one of these four classes. For words being the *signs* of things, their sorts must necessarily follow the sorts of the things *signified*. And there being no more than four differences of things, there could be but four parts of speech. The difficulty and controversy now was, to determine to which of these four classes each word belonged. In the attempting of which, succeeding Grammarians could neither satisfy themselves nor others : for they soon discovered some words so stubborn, that no sophistry nor violence could by any means reduce them to any one of these classes. However, by this attempt and dispute they became better acquainted with the differences of words, though they could not account for them ; and they found the old system deficient, though they knew not how to supply its defects. They seem therefore to have reversed the method of proceeding from things to signs, pursued by the philosophers ; and, still allowing the principle, (*viz.* that there must be as many sorts of words as of things,) they travelled backwards, and sought for the
things.

things from the signs: adopting the converse of the principle; namely, that there must be as many differences of things as of signs. Misled therefore by the useful contrivances of language, they supposed many imaginary differences of things: and thus added greatly to the number of parts of speech, and in consequence to the errors of philosophy.

Add to this, that the greater and more laborious part of Grammarians (to whose genius it is always more obvious to remark a multitude of effects than to trace out one cause) confined themselves merely to notice the differences observable in words, without any regard to the things signified.

From this time the number of parts of speech has been variously reckoned: you will find different Grammarians contending for more than thirty. But most of those who admitted the fewest, acknowledged *eight*. This was long a favourite number; and has been kept to by many who yet did not include the same parts to make up that number. For those who rejected the *article*, reckoned eight: and those who did not allow the *interjection* still reckoned eight. But what sort of difference in words should intitle them to hold a separate rank by themselves, has not to this moment been settled.

B. You

B.

You seem to forget, that it is some time since words have been no longer allowed to be the signs of *things*. Modern Grammarians acknowledge them to be (as indeed Aristotle called them, *συμβολα παθημάτων*) the signs of *ideas*: at the same time denying the other assertion of Aristotle, that *ideas* are the *likenesses of things* *. And this has made a great alteration in the manner of accounting for the differences of words.

H.

That has not much mended the matter. No doubt this alteration approached so far nearer to the truth; but the nature of Language has not been much better understood by it. For Grammarians have since pursued just the same method with *mind*, as had before been done with *things*. The different operations of the mind, are to account now for what the different things were to account before: and when they are not found sufficiently numerous for the purpose; it is only supposing an imaginary operation or two, and the difficulties are for the time shuffled over.

* *Εστὶ μὲν γὰρ τὰ ἐν τῇ φωνῇ τῶν ἢ τῇ ψυχῇ παθημάτων συμβολα—ἢ ὡς ταῦτα ὁμοιωμάτα, πραγμάτα.*

ARISTOT. de Interpretat.

So that the very same game has been played over again with *ideas*, which was before played with *things*. No satisfaction, no agreement has been obtained: But all has been dispute, diversity, and darkness. Inasmuch that many of the most learned and judicious Grammarians, disgusted with absurdity and contradictions, have prudently contented themselves with remarking the differences of words, and have left the causes of language to shift for themselves.

B.

That the methods of accounting for Language remain to this day various, uncertain and unsatisfactory, cannot be denied. But you have said nothing yet to clear up the paradox you set out with; nor a single word to unfold to us by what means you suppose Hermes has blinded philosophy.

H.

I imagine that it is, in some measure, with the vehicle of our thoughts, as with the vehicles for our bodies. Necessity produced both. The first carriage for men was no doubt invented to transport the bodies of those who from infirmity, or otherwise, could not move themselves: But should any one, desirous of understanding the purpose and meaning of all the parts of our modern elegant carriages,

carriages, attempt to explain them upon this one principle alone, *viz.*—That they were necessary for conveyance——; he would find himself wofully puzzled to account for the wheels, the seats, the springs, the blinds, the glasses, the lining, &c. Not to mention the mere ornamental parts of gilding, varnish, &c.

Abbreviations are the *wheels* of language, the *wings* of Mercury. And though we might be dragged along without them, it would be with much difficulty, very heavily and tediously.

There is nothing more admirable nor more useful than the invention of signs: at the same time there is nothing more productive of error when we neglect to observe their complication. Into what blunders, and consequently into what disputes and difficulties, might not the excellent art of Short-hand writing (practised almost exclusively by the English *) lead foreign philosophers; who, not knowing
that

* “ The art of Short-hand is, in its kind, an ingenious device, and of
“ considerable usefulness, applicable to any language, much wondered at by

that we had any other alphabet, should suppose each mark to be the sign of a single sound. If they were very laborious and very learned indeed, it is likely they would write as many volumes on the subject, and with as much bitterness against each other, as Grammarians have done from the same sort of mistake concerning Language: until perhaps it should be suggested to them, that there may be not only signs of sounds; but again, for the sake of abbreviation, signs of those signs, one under another in a continued progression.

B.

I think I begin to comprehend you. You mean to say that the errors of Grammarians have arisen from supposing

“ Short-hand, an art, as I have been told, known only in England.”

LOCKE on Education.

In the *Courier de l'Europe*, No. 41, November 20, 1787, is the following article:

“ Le Sieur Coulon de Thevenot, a eu l'honneur de presenter au roi sa methode d'ecrire aussi vite que l'on parle, approuvée par l'Academie Royale des sciences, et dont sa Majesté a deigné accepter la dedicace. On fait que les *Anglois* sont depuis très-long temps en possession d'une pareille methode adaptée à leur langage, et qu'elle leur est devenue extrêmement commode et utile pour recueillir avec beaucoup de precision les discours publics: la methode du Sieur Coulon doit donc être très-avantageux à la langue Française.”

all

all words to be *immediately* either the signs of things or the signs of ideas: whereas in fact many words are merely *abbreviations* employed for dispatch, and are the signs of other words. And that these are the artificial wings of Mercury, by means of which the Argus eyes of philosophy have been cheated.

H.

It is my meaning.

B.

Well. We can only judge of your opinion after we have heard how you maintain it. Proceed, and strip him of his wings. They seem easy enough to be taken off: for it strikes me now, after what you have said, that they are indeed put on in a peculiar manner, and do not, like those of other winged deities, make a part of his body. You have only to loose the strings from his feet, and take off his cap. Come—Let us see what sort of figure he will make without them.

H.

The first aim of Language was to *communicate* our thoughts: the second, to do it with *dispatch*. (I mean intirely to disregard whatever additions or alterations have

been made for the sake of beauty, or ornament, ease, gracefulness, or pleasure.) The difficulties and disputes concerning Language have arisen almost entirely from neglecting the consideration of the latter purpose of speech: which, though subordinate to the former, is almost as necessary in the commerce of mankind, and has a much greater share in accounting for the different sorts of words *. Words have been called *winged*: and they well deserve that name, when their abbreviations are compared with the progress which speech could make without these inventions; but compared with the rapidity of thought, they have not the smallest claim to that title. Philosophers have calculated the difference of velocity between sound and light: But who will attempt to calculate the difference between speech and thought! What wonder then that the invention of all ages should have been upon the stretch to add such wings

* M. Le President de Brosses, in his excellent treatise *De la formation mechanique des Langues*, tom. 2. says—"On ne parle que pour être entendu. Le plus grand avantage d'une langue est d'être claire. Tous les procédés de Grammaire ne devraient aller qu'à ce but." And again—"Le vulgaire & les philosophes n'ont d'autre but en parlant que de s'expliquer clairement." Art. 160. Pour le vulgaire, he should have added—& *promptement*. And indeed he is afterwards well aware of this: for Art. 173, he says, "L'esprit humain veut aller vite dans son operation; plus empressé de s'exprimer *promptement*, que curieux de s'exprimer avec une justesse exacte & réfléchie. S'il n'a pas l'instrument qu'il faudroit employer, il se sert de celui qu'il a tout prêt."

to their conversation as might enable it, if possible, to keep pace in some measure with their minds.—Hence chiefly the variety of words.

Abbreviations are employed in language three ways :

1. In terms.
2. In sorts of words.
3. In construction.

Mr. Locke's *Effay* is the best *guide* to the *first* : and numberless are the authors who have given particular explanations of the *last*. The *second* only I take for my province at present ; because I believe it has hitherto escaped the proper notice of all.

CHAP. II.

SOME CONSIDERATION OF MR. LOCKE'S ESSAY.

B.

I CANNOT recollect one word of Mr. Locke's that corresponds at all with any thing that you have said. The *third* Book of his Essay is indeed expressly written—“*On the Nature, Use and Signification of Language.*” But there is nothing in it concerning *abbreviations*.

H.

I consider the *whole* of Mr. Locke's Essay as a philosophical account of the *first* sort of abbreviations in Language.

B.

Whatever you may think of it, it is certain, not only from the *title*, but from his own declaration, that Mr. Locke did not intend or consider it as such: for he says,—“*When I first began this discourse of the Understanding,*

“ and a *good while after*, I had not the least thought that
 “ any confideration of *words* was at all necessary to it *.”

H.

True. And it is very strange he should so have imagined †.

But

* Perhaps it was for mankind a lucky mistake (for it was a mistake) which Mr. Locke made when he called his book, *An Essay on Human Understanding*. For some part of the inestimable benefit of that book has, merely on account of its title, reached to many thousands more than, I fear, it would have done, had he called it (what it is merely) *A Grammatical Essay*, or a *Treatise on Words*, or on *Language*. The human *mind*, or the human *understanding*, appears to be a grand and noble theme; and all men, even the most insufficient, conceive that to be a proper object for their contemplation: whilst inquiries into the nature of *Language* (through which alone they can obtain any knowledge beyond the beasts) are fallen into such extreme disrepute and contempt, that even those who “ neither have the “ accent of christian, pagan, or man,” nor can speak so many words together with as much propriety as Balaam’s ass did, do yet imagine *words* to be infinitely beneath the concern of their exalted understanding.

† “ Aristotelis profectò judicio Grammaticam non solum esse *Philosophie*
 “ partem, (id quod nemo sanus negat): sed ne ab ejus quidem cognitione
 “ dissolvi posse intelligeremus.” J. C. SCALIGER *de Causis. Præfat.*

“ And lastly,” says Bacon, “ let us consider the false appearances that
 “ are imposed upon us by words, which are framed and applied according
 “ to the conceit and capacities of the vulgar sort: and although we think
 “ we govern our words, and prescribe it well—*loquendum ut vulgus, senti-*
 “ *endum ut sapientes*;—yet certain it is, that words, as a Tartar’s bow, do
 “ shoot back upon the understanding of the wisest, and mightily entangle
 “ and.

But what immediately follows?—" But when, having
 " passed over the original and composition of our * ideas,
 " I began to examine the extent and certainty of our
 " knowledge; I found it had so near a connexion with
 " words, that unless their *force* and *manner* of signification
 " were first well observed, there could be very little said
 " clearly and pertinently concerning knowledge: which
 " being conversant about truth, had constantly to do with
 " propositions. And though it terminated in things, yet
 " it was for the most part so much by the intervention of
 " words, that they seemed scarce separable from our general
 " knowledge."

And again,—“ I am apt to imagine that, were the *im-*
 “ *perfections* of Language, as the instrument of knowledge,

“ and pervert the judgment. So as it is almost necessary in all contro-
 “ versies and disputations to imitate the wisdom of the mathematicians, in
 “ setting down *in the very beginning* the definitions of our words and terms,
 “ that others may know how we accept and understand them, and whether
 “ they concur with us or no. For it cometh to pass, for want of this, that
 “ we are sure to end there where we ought to have begun, which is in
 “ questions and differences about words.”

Of the Advancement of Learning.

* It may appear presumptuous, but it is necessary here to declare my
 opinion; that Mr. Locke in his Essay never did advance one step beyond
 the origin of Ideas and the composition of Terms.

“ more

“ more thoroughly weighed, a great many of the contro-
 “ verſies that make ſuch a noiſe in the world would of
 “ themſelves ceaſe ; and the way to knowledge, and per-
 “ haps peace too, lie a great deal opener than it does *.”

So that, from theſe and a great many other paſſages throughout the Effay, you may perceive that the more he reflected and ſearched into the human underſtanding, the more he was convinced of the neceſſity of an attention to Language ; and of the infeparable connexion between words and knowledge.

* “ This deſign (ſays Wilkins) will likewiſe contribute much to the
 “ clearing of ſome of our modern differences in religion ;” (and he might
 have added, in all other diſputable ſubjects ; eſpecially in matters of *law*
 and *civil government* ;)—“ by unmasking many wild errors, that ſhelter
 “ themſelves under the diſguiſe of affected phraſes ; which, being phi-
 “ loſophically unfolded, and rendered according to the genuine and natural
 “ importance of words, will appear to be inconſiſtencies and contradictions.
 “ And ſeveral of thoſe pretended myſterious, profound notions, expreſſed
 “ in great ſwelling words, whereby ſome men ſet up for reputation, being
 “ this way examined, will appear to be either nonſenſe, or very flat and
 “ jejune. And though it ſhould be of no other uſe but this, yet were
 “ it in theſe days well worth a man's pains and ſtudy ; conſidering the
 “ common miſchief that is done, and the many impoſtures and cheats that
 “ are put upon men, under the diſguiſe of affected, inſignificant phraſes.”

Epift. Dedicat.

B. Yes.

B.

Yes. And therefore he wrote the *third* Book of his Effay, on—"the Nature, Use, and Signification of Language." But you say, the *whole* of the Effay concerns Language: whereas the two first Books concern the *Origin* and *Composition* of *Ideas*: and he expressly declares that it was not till *after* he had passed over them, that he thought any consideration of *words* was at all necessary.

H.

If he had been aware of this sooner, that is, *before* he had treated of (what he calls) the origin and *composition* of Ideas; I think it would have made a great difference in his Effay. And therefore I said, Mr. Locke's Effay is the best *Guide* to the first sort of Abbreviations.

B.

Perhaps you imagine that, if he had been aware that he was only writing concerning Language, he might have avoided treating of the origin of Ideas; and so have escaped the quantity of abuse which has been unjustly poured upon him for his opinion on that subject.

H.

No. I think he would have set out just as he did, with the origin of Ideas; the proper starting-post of a Gram-
I
marian

marian who is to treat of their signs. Nor is he singular in referring them all to the Senses; and in beginning an account of Language in that manner*.

B. What

* Nihil in intellectu quod non prius in sensu, is, as well as its converse, an antient and well known position.

B.

What difference then do you imagine it would have made in Mr. Locke's Effay, if he had sooner been aware of the inseparable connexion between words and knowledge; or, in the language of Sir Hugh, in Shakespeare, that "the lips is *parcel* of the *mind* * ?"

H.

Much. And amongst many other things, I think he would not have talked of the *composition* of *ideas*; but

"ciascuno intendendo nella sua pura potenza, non possono per tutte come lo 'ntelletto discorrere. E siccome il Principe, senza lasciarsi vedere o sentire, fa noto altrui la sua volontà per mezzo degli stessi ministri; così ancora l'Intelletto fa intendersi per via de medesimi Sensi."

BUNMATTEI. *Tratt. 2. Cap. 2.*

* "Divers philosophers hold that the lips is parcel of the mind."

Merry Wives of Windsor, Act I. Scene 4.

Rowland Jones agrees with his countryman, Sir Hugh Evans. In his "Origin of Language and Nations," Preface, page 17, he says (after others)—"I think that Language ought not to be considered as mere arbitrary sounds; or any thing less than a part, *at least*, of that living soul which God is said to have breathed into man." This method of referring words *immediately* to God as their framer, is a short cut to escape inquiry and explanation. It saves the philosopher much trouble; but leaves mankind in great ignorance, and leads to great error.—*Non dignus vindice nodus*.—God having furnished man with senses and with organs of articulation; as he has also with water, lime and sand; it should seem no more necessary to form the words for man, than to temper the mortar.

would

would have seen that it was merely a contrivance of Language: and that the only composition was in the *terms*; and consequently that it was as improper to speak of a *complex idea*, as it would be to call a constellation a complex star: And that they are not ideas, but merely *terms*, which are *general* and *abstract*. I think too that he would have seen the advantage of "thoroughly weighing" not only (as he says) "the *imperfections* of Language;" but its *perfections* also: For the perfections of Language, not properly understood, have been one of the chief causes of the imperfections of our philosophy. And indeed, from numberless passages throughout his Essay, Mr. Locke seems to me to have suspected something of this sort: and especially from what he hints in his last chapter; where, speaking of the doctrine of signs, he says—"The consideration then
 " of Ideas and Words, as the great instruments of know-
 " ledge, makes no despicable part of their contemplation
 " who would take a view of human knowledge in the
 " whole extent of it. And perhaps, if they were *distinctly*
 " weighed and *duly* considered, they would afford us *another*
 " sort of *Logick* and *Critick* than what we have hitherto
 " been acquainted with."

B.

Do not you think that what you now advance will bear a dispute: and that some better arguments than
 your

your bare assertion are necessary to make us adopt your opinion?

H.

Yes. To many persons much more would be necessary; but not to you. I only desire you to read the Essay over again with attention, and see whether all that its immortal author has justly concluded will not hold equally true and clear, if you substitute the composition, &c. of *terms* wherever he has supposed a composition, &c. of *ideas*. And if that shall upon strict examination appear to you to be the case, you will need no other argument against the composition of Ideas: It being exactly similar to that unanswerable one which Mr. Locke himself declares to be sufficient against their being innate. For the supposition is unnecessary: Every purpose for which the composition of Ideas was imagined being more easily and naturally answered by the composition of Terms: whilst at the same time it does likewise clear up many difficulties in which the supposed composition of Ideas necessarily involves us. And, though this is the only argument I mean to use at present, (because I would not willingly digress too far, and it is not the necessary foundation for what I have undertaken) yet I will venture to say, that it is an easy matter, upon Mr. Locke's own principles and a physical consideration of the
Senses

Senses and the Mind, to prove the impossibility of the composition of Ideas.

B.

Well. Since you do not intend to build any thing upon it, we may safely for the present suppose what you have advanced; and take it for granted that the greatest part of Mr. Locke's Essay, that is, all which relates to what he calls the composition, abstraction, complexity, generalization, relation, &c. of Ideas, does indeed merely concern *Language*. But, pray, let me ask you; If so, what has Mr. Locke done in the *Third* Book of his Essay? In which he *professedly* treats of the nature, use, and signification of *Language*?

H.

He has really done little else but enlarge upon what he had said before, when he thought he was treating only of *Ideas*: that is, he has continued to treat of the composition of *Terms*. For though, in the passage I have before quoted, he says, that "unless the *force* and *manner* of "signification of words are first well observed, there can "be very little said clearly and pertinently concerning "knowledge;"—and though this is the declared reason of writing his *Third* Book concerning *Language*, as *distinct*
from

from Ideas; yet he continues to treat singly, as before, concerning the *Force* * of words; and has not advanced one syllable concerning their *Manner* of signification.

The only Division Mr. Locke has made of words, is, into—*Names* of Ideas and *Particles*. This division is not made regularly and formally; but is referred to his *seventh* Chapter. And even there it is done in a very cautious, doubting, loose, uncertain manner, very different from that incomparable author's usual method of proceeding. For, though the general title of the *seventh* Chapter is,—*Of Particles*;—yet he seems to chuse to leave it uncertain whether he does or does not include *Verbs* in that title, and particularly what he calls “*the Marks of the Mind's affirming or denying.*” And indeed he himself acknowledges, in a letter to Mr. Molyneux, that—“Some parts of that *Third* Book concerning Words, though the thoughts were easy and clear enough, yet cost him more pains to express than all the rest of his Essay. And that therefore he should not much wonder if there were in some parts of it obscurity and doubtfulness.” Now whenever any man finds this difficulty to express himself,

* The Force of a word depends upon the number of Ideas of which that word is the sign.

in a language with which he is well acquainted, let him be persuaded that his thoughts are *not* clear enough: for, as Swift (I think) has somewhere observed, “When the water is clear you will easily see to the bottom.”

The whole of this vague Chapter—*Of Particles*—(which should have contained an account of every thing but *Nouns*) is comprized in *two pages* and a half: and all the rest of the Third Book concerns only, as before, the *Force* of the names of Ideas.

B.

How is this to be accounted for? Do you suppose he was unacquainted with the opinions of Grammarians, or that he despised the subject?

H.

No. I am very sure of the contrary. For it is plain he did not despise the subject; since he repeatedly and strongly recommends it to others: and at every step throughout his Essay, I find the most evident marks of the journey he had himself taken through all their works. But it appears that he was by no means satisfied with what he found there concerning *Particles*: For he complains that “this part of Grammar has been as much neglected,

“ as some others over-diligently cultivated.” And says, “ that “ He who would shew the right use of Particles, “ and what significancy and force they have,” (that is, according to his own division, the right use, significancy, and force of ALL words except the names of Ideas) “ must “ take a little more pains, enter into his own thoughts, “ and observe nicely the several postures of his mind in “ discoursing.” For these *Particles*, he says,—“ are all “ marks of some *action* or *intimation* of the *Mind*; and “ therefore, to understand them rightly, the several views, “ postures, stands, turns, limitations and exceptions, and “ *several other thoughts* of the *Mind*, for which we have “ *either none or very deficient names*, are diligently to be “ studied. Of these there are a great variety, much “ exceeding the number of Particles.” For himself, he declines the task, however necessary and neglected by all others; and that for no better reason than—“ I *intend* “ not here a full explication of this sort of signs.” And yet he was (as he professed and thought) writing on the human *Understanding*; and therefore should not surely have left mankind still in the same darkness in which he found them, concerning these hitherto *unnamed* and (but by himself) *undiscovered* operations of the *Mind*.

In short, this seventh Chapter is, to me, a full confession and proof that he had not settled his own opinion concerning the *manner* of signification of Words: that it still remained (though he did not chuse to have it so understood) a *Desideratum* with him, as it did with our great Bacon before him: and therefore that he would not decide any thing about it; but confined himself to the prosecution of his original inquiry concerning the first sort of *Abbreviations*, which is by far the most important to knowledge, and which he supposed to belong to *Ideas*.

But though he declined the subject, he evidently leaned towards the opinion of Aristotle, Scaliger, and Mess. de Port Royal: and therefore, without having sufficiently examined their position, he too hastily adopted their notion concerning the pretended *Copula*—"Is, and Is not." He supposed with them, that *affirming* and *denying* were operations of the *Mind*; and referred all the other sorts of Words to the same source. Though, if the different sorts of Words had been (as he was willing to believe) to be accounted for by the different operations of the Mind, it was almost impossible they should have escaped the penetrating eyes of Mr. Locke.

ΕΠΕΑ ΠΤΕΡΟΕΝΤΑ, &c.

CHAP. III.

OF THE PARTS OF SPEECH.

B.

YOU said some time ago, very truly, that the number of Parts of Speech was variously reckoned: and that it has not to this moment been settled, what sort of difference in words should entitle them to hold a separate rank by themselves.

By what you have since advanced, this matter seems to be ten times more unsettled than it was before: for you have discarded the differences of *Things*, and the differences of *Ideas*, and the different *operations* of the *Mind*, as guides to a division of Language. Now I cannot for my life imagine any other principle that you have left to conduct us to the *Parts* of Speech.

H.

I thought I had laid down in the beginning, the principles upon which we were to proceed in our inquiry into the *manner of signification* of words.

B.

Which do you mean?

H.

The same which Mr. Locke employs in his inquiry into the *Force* of words: viz.—The two great purposes of speech.

B.

And to what distribution do they lead you?

H.

1. To words *necessary* for the *communication* of our Thoughts. And

2. To *Abbreviations*, employed for the sake of dispatch.

B.

How many of each do you reckon? And which are they?

H. In

H.

In what particular language do you mean? For, if you do not confine your question, you might as reasonably expect me (according to the fable) “to make a coat to fit “the moon in all her changes.”

B.

Why? Are they not the same in all languages?

H.

Those *necessary* to the communication of our thoughts are.

B.

And are not the others also?

H.

No. Very different.

B.

I thought we were talking of Universal Grammar.

H.

I mean so too. But I cannot answer the whole of your question, unless you confine it to some particular language
I with

with which I am acquainted. However, that need not disturb you : for you will find afterwards that the principles will apply univerfally.

B.

Well. For the prefent then confine yourfelf to the *necessary* Parts : and exemplify in the Englifh.

H.

In Englifh, and in all Languages, there are only *two* forts of words which are *necessary* for the communication of our thoughts.

B.

And they are ?

H.

1. Noun, and
2. Verb.

B.

Thefe are the common names, and I fuppofe you ufe them according to the common acceptation.

H.

I fhould not otherwife have chofen them, but becaufe they are commonly employed ; and it would not be eafy
to

to dispossess them of their prescriptive title : besides, without doing any mischief, it saves time in our discourse. And I use them according to their common acceptance.

B.

But you have not all this while informed me how many *Parts of Speech* you mean to lay down.

H.

That shall be as you please. Either *Two*, or *Twenty*, or more. In the strict sense of the term, no doubt both the necessary words and the Abbreviations are all of them Parts of Speech ; because they are all useful in Language, and each has a different manner of signification. But I think it of great consequence both to knowledge and to Languages, to keep the words employed for the different purposes of speech, as distinct as possible. And therefore I am inclined to allow that rank only to the *necessary* words* : and to include all the others (which are not necessary to speech, but merely *substitutes* of the first sort) under the title of *Abbreviations*.

* “ Res necessarias Philosophus primo loco statuit : accessorias autem & vicarias, mox.”

I. C. Scaliger de Causis L. L. cap. 110.

B.

Merely Substitutes ! You do not mean that you can discourse as well without as with them ?

H.

Not as well. A sledge cannot be drawn along as smoothly, and easily, and swiftly, as a carriage with wheels ; but it may be dragged.

B.

Do you mean then that, without using any other sort of word whatever, and merely by the means of the Noun and Verb alone, you can relate or communicate any thing that I can relate or communicate with the help of all the others ?

H.

Yes. It is the great proof of all I have advanced. And, upon trial, you will find that you may do the same. But, after the long habit and familiar use of *Abbreviations*, your first attempts to do without them will seem very awkward to you ; and you will stumble as often as a horse, long used to be shod, that has newly cast his shoes. Though indeed (even with those who have not the habit to struggle against) without *Abbreviations*, Language can

H

get

get on but lamely : and therefore they have been introduced, in different plenty, and more or less happily, in all Languages. And upon these two points—*Abbreviation of Terms*, and *Abbreviation in the manner of signification* of words—depends the respective excellence of every Language. All their other comparative advantages are trifling.

B.

I like your method of proof very well ; and will certainly put it to the trial. But before I can do that properly, you must explain your Abbreviations : that I may know what they stand for, and what words to put in their room.

H.

Would you have me then pass over the *two necessary Parts* of Speech ; and proceed immediately to their Abbreviations ?

B.

If you will. For I suppose you agree with the common opinion, concerning the words which you have distinguished as necessary to the communication of our thoughts. Those you call necessary, I suppose you allow to be the *signs* of different sorts of *Ideas*, or of different *operations* of the mind.

I

H. Indeed

H.

Indeed I do not. The business of the mind, as far as it concerns Language, appears to me to be very simple. It extends no farther than to receive Impressions, that is, to have Sensations or Feelings. What are called its operations, are merely the operations of Language. A consideration of *Ideas*, or of the *Mind*, or of *Things* (relative to the Parts of Speech) will lead us no farther than to *Nouns*: i. e. the signs of those impressions, or names of ideas. The other Part of Speech, the *Verb*, must be accounted for from the necessary use of it in communication. It is in fact the communication itself: and therefore well denominated *ῥημα*, *dictum*. For the Verb is *QUOD loquimur**; the *Noun*, *DE QUO*.

B.

Let us proceed then regularly; and hear what you have to say on each of your *two* necessary Parts of Speech.

* “ Alterum est quod loquimur; alterum de quo loquimur.”

Quintil. lib. i. cap. 4.

CHAP. IV.

OF THE NOUN.

H.

OF the first Part of Speech—the Noun,—it being the best understood, and therefore the most spoken of by others, I shall need *at present* to say little more than that it is the *simple* or *complex*, the *particular* or *general sign* or *name* of *one* or *more Ideas*.

I shall only remind you, that at this stage of our inquiry concerning Language, comes in most properly the consideration of the Force of terms: which is the whole business of Mr. Locke's Essay; to which I refer you. And I imagine that Mr. Locke's *intention* of confining himself to the consideration of the *Mind* only, was the reason that he went no farther than to the *Force* of Terms; and did not meddle with their *Manner* of signification, to which the Mind alone could never lead him.

B. Do

B.

Do you say nothing of the Declension, Number, Case and Gender of Nouns?

H.

At present nothing. There is no pains-worthy difficulty nor dispute about them.

B.

Surely there is about the Gender. And Mr. Harris particularly has thought it worth his while to treat at large of what others have slightly hinted concerning it *: and has supported his reasoning by a long list of poetical authorities. What think you of that part of his book?

* “ Pythagorici *sexum* in *cunctis* agnoscunt, &c. *Agens*, Mas; *Patiens*, “ *Fœmina*. Quapropter *Deus* dicunt masculinè; *Terra*, fœmininè; & “ *Ignis*, masculinè; & *Aqua*, fœmininè: quoniam in his *Actio*, in istis “ *Passio* relucebat.”

Campanella.

“ In rebus inveniuntur duæ proprietates generales, scilicet proprietas “ *Agentis*, & proprietas *Patientis*. Genus est modus significandi nominis “ sumptus a proprietate activa vel passiva. Genus masculinum est modus “ significandi rem sub proprietate agentis: Genus femininum est modus “ significandi rem sub proprietate patientis.”

Scotus-Gram. Spec. Cap. xvi.

H. That,

H.

That, with the rest of it, he had much better have let it alone. And as for his poetical authorities; the Muses (as I have heard Mrs. Peachum say of her own sex in cases of murder) are bitter bad judges in matters of philosophy. Besides that Reason is an arrant Despot; who, in his own dominions, admits of no authority but his own. And Mr. Harris is particularly unfortunate in the very outset of that—"subtle kind of reasoning (as he calls it) which discerns even in things without sex, a distant analogy to that great natural distinction." For his very first instances,—the SUN and the MOON,—destroy the whole subtilty of this kind of reasoning *. For Mr. Harris ought to have known, that in many Asiatic Languages, and in all the northern Languages of this part of the globe which we inhabit, and particularly in our Mother-language the Anglo-saxon (from which SUN and MOON are immediately

* It can only have been Mr. Harris's authority, and the ill-founded praises lavished on his performance, that could mislead Dr. Priestley, in his thirteenth lecture, hastily and without examination, to say—"Thus, for example, the SUN having a stronger, and the MOON a weaker influence over the world, and there being but two celestial bodies so remarkable; *All nations*, I believe, that use genders, have ascribed to the Sun the gender of the *Male*, and to the Moon that of the *Female*."

In the Gothic, Anglo-saxon, German, Dutch, Danish and Swedish, SUN is *feminine*: In modern Russian it is *neuter*.

derived to us) SUN is *Feminine*, and MOON is *Masculine* *. So feminine is the Sun, ["that fair hot wench in flame-colour'd taffata"] † that our northern Mythology makes her the *Wife* of Tuifco.

And if our English Poets, Shakespeare, Milton, &c. have, by a familiar Protopopeia, made them of different genders; it is only because, from their classical reading, they adopted the southern not the northern mythology; and followed the pattern of their Greek and Roman masters.

* " Apud Saxones, Luna, *Mona*. *Mona* autem Germanis superioribus *Mon*, alias *Man*; a *Mon*, alias *Man* veterrimo ipsorum rege & Deo patrio, quem Tacitus meminit, & in *Luna* celebrabant.—Ex hoc Lunam masculino (ut *Hebræi*) dicunt genere, *Der Mon*: Dominamque ejus & Amasiam, e cujus aspectu aliàs languet, aliàs resipiscit, *Die Son*; quasi *bunc* Lunam, *banc* Solem. The ingenious author of—Notes on the Grammatica Sinica of M. Fourmont—says, “ According to the Grammaire Raisonnée, *les genres ont été inventés pour les terminaisons*. But the Mess. du Port Royal have discovered a different origin; they tell us that—*Arbor est feminine, parceque comme une bonne mere elle porte du fruit*.—*Miratur non sua*. How could Frenchmen forget that in their own *la meilleure des langues possibles*, Fruit-trees are masculine, and their fruits feminine? OF THE ARTICLE AND INTERJECTION.

B.

HOWEVER connected with the *Noun*, and generally treated of at the same time, I suppose you forbear to mention the *Articles* at present, as not allowing them to be a separate Part of Speech; at least not a necessary Part; because, as Wilkins tells us, “the Latin is without them*.” Notwithstanding which, when you consider with him that “they are so convenient for the greater distinctness of speech; and that upon this account, the Hebrew, Greek, Slavonic, and most other languages have them;” perhaps you will not think it improper to follow the example of many other Grammarians: who, though like you, they deny them to be any part of speech, have yet treated of them separately from those parts which they enumerate. And this you may very consistently do, even though you

should

should consider them, as the Abbé Girard calls them, merely the *avant-coureurs* to announce the approach or entrance of a Noun *.

* “ J’abandonne l’art de copier des mots dits & répétés mille fois avant
 “ moi ; puisqu’ils n’expliquent pas les choses essentielles que j’ai deffein de
 “ faire entendre à mes lecteurs. Une étude attentive faite d’après l’usage
 “ m’instruit bien mieux. Elle m’apprend que l’Article est un mot établi
 “ pour annoncer & particulariser simplement la chose sans la nommer : c’est
 “ à dire, qu’il est une expression indéfinie, quoique positive, dont la juste
 “ valeur n’est que de faire naître l’idée d’une espee subsistante qu’on
 “ distingue de la totalité des etres, pour être ensuite nommée. Cette de-
 “ finition en expose clairement la nature & le service propre, au quel on
 “ le voit constamment attaché dans quelque circonstance que ce soit. Elle
 “ m’en donne une idée nette & déterminée : me le fait reconnoître par
 “ tout : & m’empêche de le confondre avec tout autre mot d’espee diffé-
 “ rente. Je sens parfaitement que lorsque je veux parler d’un objet, qui
 “ se présente à mes yeux ou à mon imagination, le génie de ma langue ne
 “ m’en fournit pas toujours la denomination précise dans le premier instant
 “ de l’exécution de la parole : que le plus souvent il m’offre d’abord un
 “ autre mot, comme un commencement de sujet proposé & de distinction
 “ des autres objets ; enforte que ce mot est un vrai préparatoire à la deno-
 “ mination, par lequel elle est annoncée, avant que de se présenter ille
 “ même : Et voilà l’*Article* tel que je l’ai défini. Si cet *Avant-coureur*
 “ diminue la vivacité du langage, il y met in récompense une certaine po-
 “ liteffe & une délicatesse qui naissent de cette idée préparatoire & indéfinie
 “ d’un objet qu’on va nommer : car par ce moyen l’esprit étant rendu at-
 “ tentif avant que d’être instruit, il a le plaisir d’aller au devant de la déno-
 “ mination, de la desirer, & de l’attendre avant que de la posséder. Plaisir
 “ qui a ici, comme ailleurs, un mérite fateur, propre à piquer le gout.—

 “ noître d’une manière sensible une chose *tres-metaphysique*.” *Disc. iv.*

60 OF THE ARTICLE AND INTERJECTION.

H.

Of all the accounts which have been given of the Article, I must own I think that of the very ingenious Abbé Girard to be the most fantastic and absurd. The fate of this very necessary word has been most singularly hard and unfortunate. For though without it, or some equivalent invention *, men could not communicate their thoughts at all; yet (like many of the most useful things in this world) from its unaffected simplicity and want of brilliancy, it has been ungratefully neglected and degraded. It has been considered, after Scaliger, as “*otiosum loquacissimæ gentis Instrumentum;*” or, at best, as a mere *vaunt-courier* to announce the coming of his master: whilst the brutish inarticulate *Interjection*, which has nothing to do with speech, and is only the miserable refuge of the speechless, has been permitted, because beautiful and gaudy, to usurp a place amongst words, and to exclude the Article from its well-earned dignity. But though the Article is denied by many Grammarians to be a Part of Speech; it is yet, as you say, treated of by many, separately from those parts

* For some equivalent invention, see the Persian and other Eastern languages; which supply the place of our Article by a termination to those Nouns which they would indefinitely particularize.

This circumstance of fact (if there were not other reasons) sufficiently explodes Girard's notion of *Avant-coureurs*.

which they allow. This inconsistency * and the cause of it are pleasantly ridiculed by Buonmattei, whose understanding had courage sufficient to restore the Article; and to launch out beyond *quelle fatali colonne che gli antichi avevan segnate col—Non plus ultra*. “Dodici” says he, “Tratt. 7. Cap. 22, 23.” “afferriamo esser le Parti dell’ orazione nella nostra lingua. Nè ci fiam curati che gli altri quasi tutti non ne voglion conceder piu d’ otto; mossi, come si vede, da una certa sopraffiziosa ostinazione (sia detto con pace e riverenza loro) che gli autori piu antichi hanno stabilito tal numero: Quasi che abbiano in tal modo proibito a noi il passar quelle fatali colonne che gli antichi avevan segnate col—*Non plus ultra*. Onde perchè i Latini dicevan tutti con una voce uniforme—*Partes Orationis sunt octo* :—quei che intorno a cent anni sono scriffon le regole di questa lingua, cominciavan con la medesima cantilena. Il che se sia da commendare o da biasimare non dirò: Basta che a me par una cosa ridicolosa, dire—*Otto son le parti dell’ orazione*,—e subito soggiugnere—*Ma innanzi che io di quelle incominci a ragionare, fa mestiero che sopra gli Articoli alcuna cosa ti dica*.

* What Scaliger says of the Participle may very justly be applied to this manner of treating the Article. “Si non est *Nota*, imo verò si nonnullis ne pars quidem orationis ulla, ab aliis separata, judicata est; quo consilio ei rei, quæ nusquam extat, sedem statuunt.” *Lib. 7. Cap. cxl.*

“ Questo

“ Questo è il medesimo che se diceffimo—Tre son le
“ parti del mondo: Ma prima ch’ io ti ragioni di quelle,
“ fa mestiero che sopra l’Europa alcuna cosa ti dica.”

B.

As far as respects the Article I think you are right. But why such bitterness against the Interjection? Why do you not rather follow Buonmattei’s example; and, instead of excluding both, admit them both to be Parts of Speech? *

H.

Because the dominion of Speech is erected upon the downfall of Interjections. Without the artful contrivances of Language, mankind would have nothing but Interjections with which to communicate, orally, any of their feelings. The neighing of a horse, the lowing of a cow,

* “ Interjectionem non esse partem orationis, sic ostends. Quod naturale est, idem est apud omnes: sed gemitus et signa lætitiæ idem sunt apud omnes: sunt igitur naturales. Si vero naturales non sunt partes orationis. Nam eæ partes, secundum Aristotelem *ex instituto*, non *natura*, debent constare. Interjectionem Græci adverbiiis adnumerant, sed falso: nam neque Græcis literis scribantur, sed signa tristitiæ, aut lætitiæ, qualia in avibus, aut quadrupedibus, quibus tamen nec vocem nec orationem concedimus. Valla interjectionem a partibus orationis rejicit. Itaque Interjectionem a partibus orationis excludimus: tantum abest, ut eam primam et precipuam cum Cæsare Scaligero constituamus.” Sanctii Minerva. Lib. i. Cap. 2. De partibus orationis. Page 17. Edit. Amst. 1714.

the barking of a dog, the purring of a cat, sneezing, coughing, groaning, shrieking, and every other involuntary convulsion with oral sound, have almost as good a title to be called Parts of Speech, as Interjections have. Voluntary Interjections are only employed when the suddenness or vehemence of some affection or passion returns men to their natural state; and makes them, for a moment forget the use of speech *: or when, from some circumstance,

* The industrious and exact *Cinonio*, who does not appear ever to have had a single glimpse of reason, speaks thus of *one* interjection:—

the shortness of time will not permit them to exercise it. And in books they are only used for embellishment, and to mark strongly the above situations. But where Speech can be employed, they are totally useless; and are always insufficient for the purpose of communicating our thoughts. And indeed where will you look for the Interjection? Will you find it amongst laws, or in books of civil institutions, in history, or in any treatise of useful arts or sciences? No. You must seek for it in rhetorick and poetry, in novels, plays and romances.

B.

If what you say is true, I must acknowledge that the Article has had hard measure to be displaced for the Interjection. For by your declamation, and the zeal you have shewn in its defence, it is evident that you do not intend we should, with Scaliger, consider it merely as *otiosum Instrumentum*.

H.

Most assuredly not: though I acknowledge that it has been used *otiose* by many nations*. And I do not wonder that, keeping his eyes solely on the superfluous use (or rather abuse) of it, he should too hastily conclude against this very necessary instrument itself.

B.

Say you so! very *necessary* instrument! Since then you have, contrary to my expectation, allowed its necessity, I should be glad to know how the Article comes to be so necessary to Speech: and, if necessary, how can the Latin language be without it, as most authors agree that it is †?

And

* “ Il feroit à souhaiter qu'on supprimât l'Article, toutes les fois que les noms sont suffisamment déterminés par la nature de la chose ou par les circonstances; le discours en feroit plus vif. Mais la grande habitude que nous nous en sommes faite, ne le permet pas: & ce n'est que dans des proverbes, plus anciens que cette habitude, que nous nous faisons une loi de le supprimer. On dit—*Pauvreté n'est pas vice*: au lieu de dire—*La pauvreté n'est pas un vice*.” CONDILLAC. *Gram. Part 2. Chap. 14.*

Without any injury to the meaning of the passage, the *article* might have been omitted here by Condillac, twelve or thirteen times.

And when you have given me satisfaction on those points, you will permit me to ask you a few questions farther.

You may learn its necessity, if you please, from Mr. Locke. And that once proved, it follows of consequence that I must deny its absence from the Latin or from any other language *.

It is pleasant after this to have Scaliger's authority against himself, and to hear him prove that the Latin not only has *Articles*; but even the very identical Article 'O of the Greeks: for he says (and, notwithstanding the etymological dissent of Vossius, says truly) that the Latin *Qui* is no other than the Greek $\kappa\iota$.

“ *Articulum*, Fabio teste, Latinus sermo non desiderat: imo, me iudice, planè ignorat.”

B.

Mr. Locke! He has not so much as even once mentioned the Article.

H.

Notwithstanding which he has sufficiently proved its necessity; and conducted us directly to its use and purpose. For in the eleventh Chapter of the second Book of his *Essay*, Sect. 9, he says,—“ The use of words being to
“ stand as outward marks of our internal ideas, and those
“ ideas being taken from particular things; if every par-
“ ticular idea should have a distinct name, names would
“ be endless.” So again, Book 3. Chap. 3. treating of
General Terms, he says,—“ All things that exist being
“ particulars, it may perhaps be thought reasonable that
“ words, which ought to be conformed to things, should
“ be so too; I mean in their signification. But yet we
“ find the quite contrary. The far greatest part of words

“ croire mal-à-propos que les Latins n'avoient aucun Article; & qui avoit
“ fait conclure plus mal-à-propos encore que l'Article n'étoit pas une partie
“ du discours.”

COURT de GEBELIN, *Gram. Universelle*, p. 192.

The Latin *quis* is evidently *ος*; and the Latin terminations *us*. *a*. *um*,
no other than the Greek article *ος*, *η*. *ου*.

“ that make all languages, are *General Terms*. Which
 “ has not been the effect of neglect, or chance, but of
 “ reason and necessity. For, first, it is impossible that
 “ every particular thing should have a distinct peculiar
 “ name. For the signification and use of words depend-
 “ ing on that connection which the mind makes between
 “ its ideas and the sounds it uses as signs of them; it is
 “ necessary, in the application of names to things, that
 “ the mind should have distinct ideas of the things, and
 “ retain also the peculiar name that belongs to every
 “ one, with its peculiar appropriation to that idea. We
 “ may therefore easily find a reason why men have never
 “ attempted to give names to each sheep in their flock, or
 “ crow that flies over their heads; much less to call every
 “ leaf of plants or grain of sand that came in their way
 “ by a peculiar name.—Secondly, If it were possible, it
 “ would be useless: because it would not serve to the
 “ chief end of Language. Men would in vain heap up
 “ names of particular things, that would not serve them
 “ to communicate their thoughts. Men learn names, and
 “ use them in talk with others, only that they may be
 “ understood; which is then only done, when by use or
 “ consent, the sound I make by the organs of speech
 “ excites in another man’s mind who hears it, the idea I
 “ apply to it in mine when I speak it. This cannot be
 “ done

“ done by names applied to particular things, whereof I
 “ alone having the ideas in my mind, the names of them
 “ could not be significant or intelligible to another who
 “ was not acquainted with all those very particular things
 “ which had fallen under my notice.”—And again, Sect.
 I I.—“ General and Universal belong not to the real
 “ existence of things; but are the inventions and creatures
 “ of the Understanding, made by it for its own use, and
 “ concern only *signs*. Universality belongs not to things
 “ themselves which are all of them particular in their
 “ existence. When therefore we quit Particulars, the
 “ *Generals* that rest are only creatures of our own making;
 “ their *general* nature being nothing but the capacity they
 “ are put into of signifying or representing many Parti-
 “ culars.”

Now from this necessity of *General Terms*, follows im-
 mediately the necessity of the *Article*: whose business it
 is to reduce their generality, and upon occasion to enable
 us to employ *general terms* for *Particulars*.

So that the Article also, *in combination with a general
 term*, is merely a *substitute*. But then it differs from those
 substitutes which we have ranked under the general head
 of *Abbreviations*: because it is *necessary* for the communi-
 cation.

70 OF THE ARTICLE AND INTERJECTION.

cation of our thoughts, and supplies the place of words which *are not* in the language. Whereas *Abbreviations* are *not necessary* for communication; and supply the place of words which *are* in the language.

B.

As far then as regards the *Article*, Mr. Harris seems at present to be the author most likely to meet with your approbation: for he not only establishes its necessity, in order “to circumscribe the latitude of genera and species,” and therefore treats of it separately; but has raised it to a degree of importance much beyond all other modern Grammarians. And though he admits of only two Articles, “properly and strictly so called,” viz. A and THE; yet has he assigned to these two little words full one fourth part in his distribution of language: which, you know, is into—“Substantives, Attributives, Definitives, and Con-
“nectives.”

H.

If Mr. Harris has not intirely secured my concurrence with his Doctrine of *Definitives*, I must confess he has at least taken effectual care to place it compleatly beyond the reach of confutation. He says,

1. “The

1. " The Articles have no meaning, but when associated
" to some other word."
2. " Nothing can be more nearly related than the Greek
" article 'O to the English article THE."
3. " But the article A defines in an imperfect manner."
4. " *Therefore* the Greeks have no article correspondent
" to our article A."
5. However " they supply its place."
—And *How*, think you?
6. " By a *Negation*"—(observe well their method of
supply)—" by a *negation* of their article 'O;"
(that is, as he well explains himself,)—" without
" any thing prefixed, but only the article 'O
" withdrawn."
7. " Even in English, we also *express* the force of the
" article A, in plurals, by the same *negation* of the
" article THE *."

Now

* " It is perhaps owing to the imperfect manner in which the Article A
" defines, that the Greeks have no article correspondent to it, but supply
" its place, by a negation of their Article 'O.—'Ο ανθρωπος επεσεν, THE man
" fell; ανθρωπος επεσεν, A man fell;—without any thing prefixed, but only
" the Article withdrawn."

" Even

Now here I acknowledge myself to be compleatly thrown out; and, like the philosopher of old, merely for want of a firm resting-place on which to fix my machine: for it would have been as easy for him to raise the earth with a fulcrum of ether, as for me to establish any reasoning or argument on this sort of *negation*. For, “*nothing being prefixed,*” I cannot imagine in what manner or in what respect a *negation* of ‘O or of THE, differs from a *negation* of *Harris* or of *Pudding*. For lack however of the light of comprehension, I must do, as other Grammarians do in similar situations; attempt to illustrate by a parallel.

I will suppose Mr. Harris (when one of the Lords of the Treasury) to have addressed the Minister in the same style of reasoning.—“Salaries, Sir, produce no benefit, “ unless associated to some receiver: my salary at present “ is but an imperfect provision for myself and family: “ but your salary as Minister is much more compleat.

“ Even in English, where the Article A cannot be used, as in plurals, “ its force is expressed by the same negation.—*Those are THE men,* means, “ *Those are individuals of which we possess some previous knowledge.—* “ *Those are men,* the Article apart, means no more than they are so many “ vague and uncertain individuals; just as the phrase,—*A man,* in the “ singular, implies one of the same number.”

Book 2. Chap. 1.

“ Oblige

“ Oblige me therefore by withdrawing my present scanty
“ pittance; and supply its place to me, by a *negation* of
“ your salary.”—I think this request could not reasonably
have been denied: and what satisfaction Mr. Harris would
have felt by finding his theory thus reduced to practice,
no person can better judge than myself; because I have
experienced a conduct not much dissimilar from the Rulers
of the Inner Temple: who having first *inticed* me to quit
one profession, after many years of expectation, have very
handsomely supplied its place to me by a *negation* of the
other.

ADVERTISEMENT.

THE three following chapters (except some small alterations and additions) have already been given to the public in *A Letter to Mr. DUNNING* in the year 1778: which, though published, was not written on the spur of the occasion. The substance of that Letter, and of all that I have farther to communicate on the subject of Language, has been amongst the loose papers in my closet now upwards of thirty years; and would probably have remained there some years longer, and have been finally consigned with myself to oblivion, if I had not been made the miserable victim of—*Two Prepositions and a Conjunction*.

The officiating Priests indeed * were themselves of rank and eminence sufficient to dignify and grace my fall. But

that the Conjunction THAT, and the Prepositions OF and CONCERNING (words which have hitherto been held to have NO meaning) should be made the abject instruments of my *civil extinction*, (for such was the *intention*, and such has been the *consequence* of my prosecution); appeared to me to make my exit from civil life as degrading as if I had been brained by a lady's fan. For mankind in general are not sufficiently aware that words without meaning, or of equivocal meaning, are the everlasting engines of fraud and injustice: and that the *grimgrubber* of Westminster-Hall is a more fertile, and a much more formidable, source of imposture than the *abracadabra* of magicians.

Upon a motion made by me in arrest of judgment in the court of King's-Bench in the year 1777, the Chief Justice adjourned the decision: and instead of arguments on the merits of my objection, (which however by a side-wind were falsely represented by him as merely *literal flaws* *) desired that *Precedents* might be brought by the Attorney General on a future day. None were however adduced, but by the Chief Justice himself; who indeed

“ Read the paper. What is it? Why it is this; that our beloved American Fellow-subjects—in REBELLION *against the state*—not beloved so as to be *abetted in their* REBELLION.” Again,—“ What is the employment they (the troops) are ORDERED upon? Why then what are *they who gave the ORDERS?* Draw the conclusion.” Again,—“ The unhappy resistance to the LEGISLATIVE AUTHORITY of this kingdom by many of our Fellow-subjects in America: the LEGISLATURE of this kingdom have avowed that the Americans REBELLED: Troops are EMPLOYED *upon this ground.* “ The case is here between a *just Government and REBELLIOUS subjects.*”—Again,—“ You will read this paper; you will judge whether it is not *denying the Government and Legislative authority of England.*” And again,—“ If you are of opinion that they were all murdered (like the cases of
“ *undoubted*

I say, on the strength of these two precedents alone. For the gross perversion and misapplication of the technical term *de bene esse*, was merely *pour eblouir*, to introduce the proceedings on the trial, and to divert the attention from the only point in question—the sufficiency of the charge in the Record.—And I cannot believe that any man breathing (except Lord Mansfield) either in the profession or out of it, will think it an argument against the validity of my objection; that it was brought forward only by myself, and *had not been alleged before by the learned Counsel for the Printers*. This however I can truly tell his lordship; that the most learned of them all, (*absit invidia*) Mr. Dunning, was not

“ *undoubted murders, of Glenco, and twenty other massacres that might be named*) why then you may form a different conclusion.”

And again—“ If some soldiers, *Without authority*, had got in a drunken fray, and murder had ensued, and that this paper could relate to that, it would be quite a different thing from the charge in the information: “ *BECAUSE it is charged—as a seditious Libel tending to disquiet the minds of the People.*” See the Trial.

A man must be not only well practised, but even *backneyed* in our Courts of Justice to discover the above description of my crime in the *Prepositions, OF and CONCERNING*. Be that as it may: It is evident that the Attorney General and the Chief Justice did not expect the Jury to be so enlightened; and therefore (*when I had no longer a right to open my lips*) they described a crime to them in that plain language which I still contend I had a right to expect in the *Information*; *BECAUSE—“ A seditious Libel tending to disquiet the minds of the people,”*—has been determined to be mere *paper and packbread*, and no part of the *Charge*.

aware of the objection when I first mentioned it to him; that he would not believe the information could be so defective in all its Counts, till I produced to him an Office Copy : when to his astonishment he found it so, he felt no jealousy that the objection had been missed by himself ; but declared it to be *insuperable* and *fatal* : and bad me rest assured, that whatever might be Lord Mansfield's wishes, and his *courage* on such occasions, he would not *dare* to overrule the objection. And when after the close of the first day, I hinted to him my suspicions of Lord Mansfield's intentions by the " *God forbid* ;" and by the perverted and misapplied " *De bene esse*," in order to mix the proceedings on the trial with the question of record ; he smiled at it, as merely a method which his lordship took of letting the matter down gently, and breaking the abruptness of his fall.

Strange as it may appear ! One of those Precedents was merely *imagined* by the Chief Justice, but never really existed. And the other (through ignorance of the meaning of the Conjunction THAT) had never been truly understood ; neither by the Counsel who originally took the exception, nor perhaps by the Judges who made the decision, nor by the Reporter of it, nor by the present Chief Justice who quoted and misapplied it.

Mr.

Mr. Dunning undertook to prove (and did actually prove in the House of Lords) the *non-existence* of the main precedent. And I undertook, in that Letter to Mr. Dunning, to shew the real merits and foundation, and consequently Lord Mansfield's misapplication of the other. And I undertook this, because it afforded a very striking instance of the importance of the meaning of words; not only (as has been too lightly supposed) to Metaphysicians and Schoolmen, but to the rights and happiness of mankind in their dearest concerns—the decisions of Courts of Justice.

In the House of Lords these two Precedents (the foundation of the Judgment in the Court of King's Bench) were abandoned: and the description of my crime against Government was adjudged to be sufficiently set forth by the Propositions OF and CONCERNING.

Perhaps it may make my readers smile; but I mention it as a farther instance of the importance of inquiry into the meaning of words;—that in the decision of the Judges in the House of Lords, the Chief Justice De Grey (who found OF and CONCERNING so comprehensive, clear, and definite) began by declaring that—“the word *Certainty*” [which the Law requires in the description of Crimes] “is as indefinite [that is, as *Uncertain*] as any word that
“ could

“ could be used.” Now though *certainty* is so *uncertain*, we must suppose the word *Libel* to be very *definite*: and yet if I were called upon for an equivalent term, I believe I could not find in our language any word more popularly apposite than *Calumny*; which is defined by Cicero, in his *Offices*, to be—“ *callida & malitiosa juris interpretatio.*”

If there was any *Mistake* (which however I am very far from believing) in this decision, sanctioned by the Judges and the House of Lords; I shall be justified in applying (with the substitution of the single word *Grammatici* for *Istorici*) what Giannone, who was himself an excellent lawyer, says of his countrymen of the same profession:—
 “ Tanta ignoranza avea loro bendati gli occhi, che si pregiavano d’effere solamente Legisti, e non Grammatici;
 “ non accorgendosi, che perché non erano Grammatici,
 “ eran perciò CATTIVI LEGISTI.”

CHAP. VI.

OF THE WORD *THAT*.

B.

BUT besides the Articles “properly and strictly so called,” I think Mr. Harris and other Grammarians say that there are some words which, according to the different manner of using them, are sometimes *Articles* and sometimes *Pronouns*: and that it is difficult to determine to which class they ought to be referred*.

H. They

* “It must be confessed indeed that all these words do not always appear as Pronouns. When they stand by themselves and represent some Noun, (as when we say—*THIS is virtue*, or *δειλίκως*, *Give me THAT*) then are they *Pronouns*. But when they are associated to some Noun, (as when we say—*THIS habit is virtue*, or *δειλίκως*, *THAT man defrauded me*) then as they supply not the place of a Noun, but only serve to ascertain one, they fall rather into the species of *Definitives* or *Articles*. That there is indeed a near relation between Pronouns and Articles, the old grammarians have all acknowledged; and some words it has been doubtful to which class to refer. The best rule to distinguish them is this.—The

H.

They do so. And by so doing, sufficiently instruct us (if we will but use our common sense) what value we ought to put upon such classes and such definitions.

B.

Can you give us any general rule by which to distinguish when they are of the one sort, and when of the other ?

H.

Let them give the rule who thus confound together the *Manner* of signification of words, and the Abbreviations in their *Construction* : than which no two things in Language are more distinct, or ought to be more carefully distinguished. I do not allow that *Any* words change their nature in this manner, so as to belong sometimes to one Part of Speech, and sometimes to another, from the different ways of using them. I never could perceive any such fluctuation in any word whatever : though I know it is a general charge brought erroneously against words of

“ genuine Pronoun always stands by itself, assuming the power of a noun, and supplying its place.—The genuine Article never stands by itself, but appears at all times associated to something else, requiring a noun for its support, as much as Attributives or Adjectives.”

HERMES, Book I. Chap. V.

almost

almost every denomination *. But it appears to me to be all, Error: arising from the false measure which has been taken of almost every sort of words. Whilst the words themselves appear to me to continue faithfully and steadily attached, each to the standard under which it was originally insisted. But I desire to wave this matter for the present; because I think it will be cleared up by what is to follow concerning the other sorts of words: at least, if that should not convince you, I shall be able more easily to satisfy you on this head hereafter.

B.

I would not willingly put you out of your own way, and am contented to wait for the explanation of many things till you shall arrive at the place which you may think proper for it. But really what you have now advanced seems to me so very extraordinary and contrary to fact, as well as to the uniform declaration of all Grammarians; that you must excuse me, if, before we proceed any farther, I mention to you one instance.

* “ Certains mots sont *Adverbes, Prepositions, & Conjonctions* en même temps: & repondent ainsi au même temps à diverses parties d’oraison selon que la grammaire les emploie diversément.”

BUFFIER, Art. 150.

And so say all other Grammarians.

Mr. Harris and other Grammarians say that the word *THAT*, is sometimes an *Article* and sometimes a *Pronoun*. However I do not desire an explanation of *that* [point]: because I see how you will easily reconcile *that* [difference], by a *subauditur* or an abbreviation of Construction: and I agree with you there. But what will you do with the *Conjunction* *THAT*?

Is not this a very considerable and manifest fluctuation and difference of signification in the same word? Has the *Conjunction* *THAT*, any the smallest correspondence or similarity of signification with *THAT*, the *Article*, or *Pronoun*?

H

In my opinion the word *THAT* (call it as you please, either *Article*, or *Pronoun*, or *Conjunction*) retains always one and the same signification. Unnoticed abbreviation in construction and difference of position have caused this appearance of fluctuation; and misled the Grammarians of all languages both antient and modern: for in all they make the same mistake. Pray, answer me a question. Is it not strange and improper that we should, without any reason or necessity, employ in English the same word for two different meanings and purposes?

B.

I think it wrong : and I see no reason for it, but many reasons against it.

H.

Well ! Then is it not more strange that this same impropriety, in this same case should run through ALL languages ? And that they should ALL use an *Article*, without any reason, unnecessarily, and improperly, for this same *Conjunction* ; with which it has, as you say, no correspondence nor similarity of signification ?

B.

If they do so it is strange.

H.

They certainly do ; as you will easily find by inquiry. Now does not the uniformity and universality of this supposed mistake, and unnecessary impropriety, in languages, which have no connexion with each other, naturally lead us to suspect that this usage of the *Article* may perhaps be neither mistaken nor improper ? But that the mistake may lie only with us, who do not understand it ?

LET B. SPEAK

No doubt what you have said, if true, would afford ground for suspicion.

H. If

H.

If true! Examine any languages you please, and see whether they also, as well as the English, have not a supposed *Conjunction* which they employ as we do *THAT*; and which is also the same word as their supposed *Article*, or *Pronoun*. Does not this look as if there was some reason for employing the *Article* in this manner? And as if there was some connexion and similarity of signification between it and this *Conjunction*?

B.

The appearances, I own, are strongly in favour of your opinion. But how shall we find out what that connexion is?

H.

Suppose we examine some instances; and, still keeping the same signification of the sentences, try whether we cannot, by a resolution of their construction, discover what we want.

Le gouvernement de *Siam* est despotique : le souverain jouit seul du droit de la liberté naturelle à tous les hommes. Ses sujets sont ses esclaves ; chacun d’eux lui doit six mois de service personnel chaque année, sans aucun salaire et même sans nourriture. Il leur accorde les six autres pour se procurer de quoi vivre.” [Happy, happy England, if ever thy miserable inhabitants shall, in respect of taxation, be elevated to the condition of the *Siamois* ; when thy Taskmasters shall be contented with half the produce of thy industry !] “ Sous un tel gouvernement il n’y a point de loi qui protège les particuliers contre la violence, et qui leur assure aucune propriété. Tout dépend des fantaisies d’un prince abruti par toute sorte d’excès, et surtout par ceux du pouvoir ; qui passe ses jours enfermé dans un ferrail, ignorant tout ce qui se fait hors de son palais, et sur tout les malheurs de ses peuples. Cependant ceux-ci sont livrés à la cupidité des grands, qui sont les premiers esclaves, et approchent seuls à des jours marqués, mais toujours en tremblant, de la personne du despote, qu’ils adorent comme une divinité—sujette à des caprices dangereux.”

The above heart-rending reflections which Savary makes at the sight of Egypt, and Monf. Poivre at the condition of Siam, might serve as other examples for the *Conjunction* in question : but I give them for the sake of their matter. And I think myself at least as well justified (I do not expect

to be as well rewarded) as our late Poet Laureat; who, upon the following passage of Milton's *Comus*,

“ *And fits as safe as in a Senate house,*”

adds this flagitious note:

“ Not many years after this was written, MILTON'S FRIENDS shewed that the safety of a Senate house was not inviolable. But when the people turn Legislators, what place is safe against the tumults of innovation, and the insults of disobedience.”

I believe our late Laureat meant not so much to cavil at Milton's expression, as to seize an impertinent opportunity of recommending himself to the *powers which he*, by a cowardly insult on the dead and persecuted author's memory, and on the aged, defenceless constitution of his country.

A critic who should really be displeased at Milton's expression, would rather shew its impropriety by an event which had happened *before* it was used, than by an event which the poet could not at that time foresee. Such a critic adverting to the 5th of November, 1605, and to the 4th of January, 1641, might more truly say—“ Not many years both *before and after* this was written, WHARTON'S FRIENDS shewed that the safety of a Senate house was not inviolable.”

With equal impertinence and malignity (pages 496, 538.) has he raked up the ashes of Queen Caroline and Queen Elizabeth; whose private characters and inoffensive amusements were as little connected with Milton's poems, as this animadversion on Wharton is with the subject I am now treating.

Perhaps, after all, the concluding line of Milton's epitaph,

“ *Rege sub augusto fas fit laudare Catonem,*”

is artfully made by Mr. Wharton the concluding line also of his *Notes*; in order to account for his present virulence, and to soften the resentment of his readers, at the expence of his patron.

RESOLUTION.

Thieves may cut men's throats, (*for*) *THAT* (*purpose*) they rife by night.

After the fame manner, I imagine, may all sentences be refolved (in all languages) where the *Conjunction* *THAT* (or its equivalent) is employed: and by fuch refolution it will always be difcovered to have merely the fame force and fignification, and to be in fact nothing elfe but the very fame word which in other places is called an *Article* or a *Pronoun*.

B.

For any thing that immediately occurs to me, this may perhaps be the cafe in English, where *THAT* is the only *Conjunction* of the fame fignification which we employ in this manner. But your laft example makes me believe that this method of refolution will not take place in thofe languages which have different *Conjunctions* for this fame purpose. And if fo, I fufpect that your whole reasoning on this fubject may be without foundation. For how can you refolve the original of your laft example; where (unfortunately for your notion) *UT* is employed, and not the neuter *Article* *QUOD*?

“ Ut jugulent homines furgunt de nocte latrones.”

I suppose you will not say that *UT* is the Latin neuter Article. For even Sanctius, who struggled so hard to withdraw *QUOD* from amongst the Conjunctions, yet still left *UT* amongst them without molestation*.

H. You

* It is not at all extraordinary that *UT* and *QUOD* should be indifferently used for the same conjunctive purpose: for as *UT* (originally written *UTI*) is nothing but *ὅτι*: So is *QUOD* (anciently written *QUODDE*) merely *Καὶ ὅτι*.

“*Quodde* tuas laudes culpas, nil proficis hilum.”

LUCILIUS.

(See Note in Havercamp's and Creech's Lucretius; where *QUODDE* is mistakenly derived from *ὀτιδῆ*.) *QU*, in Latin, being founded (not as the English but as the French pronounce *qu*, that is) as the Greek *κ*; *Καὶ* (by a change of the character, not of the sound) became the Latin *Que*, (used only enclitically indeed in modern Latin). Hence *Καὶ ὅτι* became in Latin *Qu'otti—Quoddi—Quodde—Quod*. Of which if Sanctius had been aware, he would not have attempted a distinction between *UT* and *QUOD*: since the two words, though differently corrupted, are in substance and origin the same.

The perpetual change of *τ* into *δ*, and *vice versa*, is so very familiar to all who have ever paid the smallest attention to Language, that I should not think it worth while to notice it in the present instance; if all the etymological canonists, whom I have seen, had not been remarkably inattentive to the *organical* causes of those literal changes of which they treat.

Skinner (who was a Physician) in his Prolegomena Etymologica, speaking of the frequent transmutation of *s* into *z*, says very truly—“*Sunt fanè literæ sono ferè eadem.*”

But

H.

You are not to expect from me that I should, in this place, account etymologically for the different words which
some

But in what does that *ferè* consist? For s is not nearer in found to z, than p is to b, or than t is to d, or than f is to v, or than k is to c, or than TH (⊙) in *Tbing*, is to TH (Ð) in *That*, or than sh is to the French j.

(N. B. TH and SH are simple consonants, and should be marked by single letters. J, as the English pronounce it, is a double consonant; and should have two characters.)

For these seven couple of simple consonants, viz.

differ each from its partner, by no variation whatever of articulation; but singly by a certain unnoticed and almost imperceptible motion or compression of or near the Larynx; which causes what Wilkins calls "*some kind of murmur.*" This compression the Welch never use. So that when a Welchman, instead of

some languages (for there are others beside the Latin) may sometimes borrow and employ in this manner instead of their own common Article. But if you should hereafter exact it, I shall not refuse the undertaking: although it is not the easiest part of Etymology: for *Abbreviation and Corruption are always busiest with the words which are most frequently in use*. Letters, like soldiers, being very apt to desert and drop off in a long march, and especially if their passage happens to lie near the confines of an enemy's country*. Yet I doubt not that, with this clue,

he articulates in every other respect exactly as we do; but omits the compression nine times in this sentence. And for failing in this one point only, changes seven of our consonants: for we owe seven additional letters, (i. e. seven additional sounds in our language) solely to the addition of this one compression to seven different articulations.

* “ Nous avons déjà dit, que l'alteration du dérivé augmentoit à mesure que le temps l'éloignoit du primitif; & nous avons ajouté—*toutes choses d'ailleurs égales*,—parceque la quantité de cette alteration depend aussi du cours que ce mot a dans le public. Il s'use, pour ainsi dire, en passant dans un plus grand nombre de bouches, sur tout dans la bouche du peuple: & la rapidité de cette circulation equivaut à une plus longue durée. Les noms des Saints & les noms de baptême les plus communs, en font un exemple. Les mots qui reviennent le plus souvent dans les langues, tels que les verbes *Etre, faire, vouloir, aller*, & tous ceux qui servent à lier les autres mots dans le discours, sont sujets à de plus grandes alterations. Ce sont ceux qui ont le plus besoin d'être fixes par la langue écrite.”

you will yourself be able, upon inquiry, to account as easily (and in the same manner) for the use of all the others, as I know you can for *UT*; which is merely the Greek neuter Article $\delta\tau\iota$ *, adopted for this conjunctive purpose by the Latins, and by them originally written *UTI*: the *o* being changed into *u*, from that propensity which both the ancient Romans had †, and the modern Italians still have ‡, upon many occasions, to pronounce even their

ADVERTISEMENT.

I PRESUME my readers to be acquainted with French, Latin, Italian and Greek : which are unfortunately the usual boundaries of an English scholar's acquisition. On this supposition, a friend of mine lamented that, in my Letter to Mr. Dunning, I had not confined myself to the common English character for the Anglo-saxon and Gothic derivations.

In the present publication I should undoubtedly have conformed to his wishes, if I had not imagined that, by inserting the Anglo-saxon and Gothic characters in this place, I might possibly allure some of my readers to familiarize themselves with those characters, by an application of them to the few words of those languages which are here introduced: and thus lead the way to their better acquaintance with the parent language, which ought long ago to have made a part of the education of our youth. And I flatter myself that one of the consequences of my present inquiry will be, to facilitate and abridge the tedious and mistaken method of instruction which has too long continued in our seminaries: the time which is at present allotted to Latin and Greek, being amply sufficient for the

acquirement also of French, Italian, Anglo-faxon, Dutch, German, Danish and Swedish. Which will not seem at all extraordinary, when it is considered that the five last mentioned (together with the English) are little more than different dialects of one and the same language. And though this was by no means the leading motive, nor is the present object of my inquiry; yet I think it of considerable importance: although I do not hold the acquisition of languages in so very great estimation as the Emperor Charles the Vth did. Who, as Brantome tells us, “disoit

OF CONJUNCTIONS.

H.

I WAS afraid of some such instances as these, when I wished to postpone the whole consideration of this subject till after we had discussed the other received Parts of Speech. Because, in order to explain it, I must forestall something of what I had to say concerning *Conjunctions*. However, since the question is started, perhaps it may be as well to give it here.

The truth of the matter is, that IF is merely a *Verb*. It is merely the Imperative of the Gothic and Anglo-saxon verb ΓΙΨΑΝ, *Giþan*. And in those languages, as well as in the English formerly, this supposed *Conjunction* was pronounced and written as the common Imperative, purely ΓΙΨ, *Giþ*, *Gif*. Thus

—“ My

———“ My largeffe
 “ Hath lotted her to be your brother's mistresse
 “ Gif shee can be reclaim'd; Gif not, his prey *.”

And accordingly our corrupted IF has always the signification of the English Imperative *Give*; and no other. So that the resolution of the construction in the instances you have produced, will be as before in the others.

RESOLUTION.

“ His feelings be the same with mine, GIVE THAT, I
 “ wonder he can move, &c.”

“ The King may have forgotten your good deserts,
 “ GIVE THAT in any way, he bids you name your griefs.”

And here, as an additional proof, we may observe, that whenever the *Datum*, upon which any conclusion depends, is a sentence, the Article THAT, if not expressed, is always understood, and may be inserted after IF. As in the instance I have produced above, the Poet might have said,

“ *Gif that she can be reclaimed,*” &c.

For the resolution is—“ She can be reclaimed, *Give that*; my largeffe hath lotted her to be your brother's

* Sad Shepherd, Act II. Scene 1.

“ miftrefle. She cannot be reclaimed, *Give that*; my largefle
 “ hath lotted her to be your brother’s prey.”

But the Article *THAT* is not understood, and cannot be
 inferted after *IF*, where the *Datum* is not a fentence, but
 fome Noun governed by the Verb *IF* or *GIVE*. *As*,—

E X A M P L E.

“ How will the weather difpofe of you to-morrow? *IF*
 “ fair, it will fend me abroad; *IF* foul, it will keep me
 “ at home.”

Here we cannot fay—“ *IF THAT* fair it will fend me
 “ abroad; *IF THAT* foul it will keep me at home.”—Be-
 caufe in this cafe the verb *IF* governs the Noun; and the
 refolved conftruction is,

“ *GIVE* fair weather, it will fend me abroad; *GIVE* foul
 “ weather, it will keep me at home.”

But make the *Datum* a fentence, *As*—“ *IF* it is fair
 “ weather, it will fend me abroad; *IF* it is foul weather,
 “ it will keep me at home.”

And then the article *THAT* is understood, and may be
 inferted after *IF*; *As*—“ *IF THAT* it is fair weather, it will

“ send me abroad ; IF THAT it is foul weather, it will keep
 “ me at home.”

The resolution then being,

“ It is fair weather, GIVE THAT ; it will send me abroad ;
 “ It is foul weather, GIVE THAT ; it will keep me at home.”

And this you will find to hold univerfally, not only with IF ; but with many other fuppofed *Conjunctions*, fuch as, *But that, Unless that, Though that, Left that, &c.* (which are really *Verbs*) put in this manner before the *Article* THAT.

B.

One word more to clear up a difficulty which occurs to me concerning your account of IF, and I have done.

We have in English another word which (though now rather obfolete) ufed frequently to fupply the place of IF. As—“ AN you had any eye behind you, you might fee more
 “ detraction at your heels, than fortunes before you *.”

In this and in all fimilar inftances, what is AN ? For I can by no means agree with the account which Dr. S. Johnson

* Twelfth Night, Act II. Scene 8.

gives of it in his Dictionary : and I do not know that any other person has ever attempted to explain it.

H.

How does he account for it?

B.

He says,—“ AN is sometimes in old authors a contraction of *And if*.” Of which he gives a very unlucky instance from Shakespeare *; where both AN and IF are used in the same line.

———“ He cannot flatter, He !

“ An honest mind and plain: he must speak Truth :

“ AN they will take it,—So. IF not; He's plain.”

Where, if AN was a contraction of AND IF ; AN and IF should rather change places.

H.

I can no more agree with Dr. S. Johnson than you do. A part of one word only, employed to shew that another word is compounded with it, would indeed be a curious method of *con-traction*. Though even this account of it would serve my purpose. But the truth will serve it better :

* Lear, Act II. Scene 6.

and therefore I thank you for your difficulty. It is a fresh proof, and a very strong one in my favour. AN is also a *Verb*, and may very well supply the place of IF; it being nothing else but the Imperative of the Anglo-saxon verb *Anan*, which likewise means to *Give*, or to *Grant*.

B.

It seems indeed to be so. But, if so, how can it ever be made to signify AS IF? For which also, as well as for *And if*, Johnson says AN is a contraction*.

H.

It never signifies *As if*: nor is ever a contraction of them.

B.

Johnson however advances Addison's authority for it. —“ My next pretty correspondent, like Shakespeare's “ *Lion in Pyramus and Thisbe*, roars AN it were any “ *nightingale*.”

H.

If Addison had so written, I should answer roundly, that he had written false English. But he never did so write.

* This arbitrary method of *contraction* is very useful to an idle or ignorant expofitor. It will fuit any thing. S. Johnson also fays—

“ AN'T, a contraction for *And it*; or rather *And if it*; as—An't please “ you—that is, *And if it please you*.” It is merely—AN *it please you*.

He only quoted it in mirth and ridicule, as the author wrote it. And Johnson, an Editor of Shakespeare, ought to have known and observed it. And then, instead of Addison's or even Shakespeare's authority, from whom the expression is borrowed; he should have quoted *Bottom's*, the Weaver: whose Language corresponds with the character Shakespeare has given him,—

“ *The shallow'st thickskull of that barren sort, viz.*

“ *A crew of Patches, rude Mechanicals,*

“ *That work for Bread upon Athenian Stalls *.*”

“ I will aggravate my voice so (says Bottom) that I will
 “ roar you as gently as any fucking Dove: I will roar you
 “ AN 'twere any nightingale †.”

If Johnson is satisfied with such authority as this, for the different signification and propriety of English words, he will find enough of it amongst the clowns in all our comedies; and *Master Bottom* in particular in this very sentence will furnish him with many new meanings. But, I believe, Johnson will not find AN used for *As if*, either seriously or clownishly, in any other part of Addison or Shakespeare; except in this speech of *Bottom*, and in

* *Midsummer Night's Dream*, Act III. Scene 2.

† *Midsummer Night's Dream*, Act I. Scene 2.

another of Hostefs *Quickly*—" He made a finer end, and
" went away AN it had been any Christom child *."

B.

In English then, it seems, these two words which have been called *conditional* Conjunctions (and whose *force* and *manner* of signification, as well as of all the others, we are directed by Mr. Locke to search after in " the several
" views, postures, stands, turns, limitations, and excep-
" tions, and several other thoughts of the mind, for which
" we have *either none or very deficient names*") are, according to you, merely the original Imperatives of the *verbs* to *Give* or to *Grant*.

Now let me understand you. I do not mean to divert you into an etymological explanation of each particular word of other languages, or even of the English, and so to change our conversation from a philosophical inquiry concerning the nature of Language in general, into the particular business of a polyglot Lexicon. But, as you have said that your principles will apply universally, I desire to know whether you mean that the *conditional conjunctions* of all other languages are likewise to be found, like IF and

* Henry V. Act II. Scene 3.

AN, in the original Imperatives of some of their own or derived *verbs*, meaning to *Give*?

H.

No. If that was my opinion I know you are ready instantly to confute it by the Conditionals of the Greek and Latin and Irish, the French, Italian, Spanish, Portugueze and many other Languages. But I mean, that those words which are called *conditional conjunctions*, are to be accounted for in ALL languages in the same manner as I have accounted for IF and AN. Not indeed that they must all mean precisely as these two do,—*Give* and *Grant*; but some word equivalent: Such as,—*Be it, Suppose, Allow, Permit, Put, Suffer, &c.* Which meaning is to be sought for from the particular etymology of each respective language, not from some *un-named* and *un-known* “Turns, Stands, Postures, &c. of the mind.” In short, to put this matter out of doubt, I mean to discard all supposed mystery, not only about these *Conditionals*, but about all those words also which Mr. Harris and others distinguish from Prepositions, and call *Conjunctions* of Sentences. I deny them to be a separate sort of words or Part of Speech by themselves. For they have not a separate *manner of signification*: although they are not *devoid* of signification. And the particular signification of each must be sought for from amongst
the

the other parts of Speech, by the help of the particular etymology of each respective language. By such means alone can we clear away the obscurity and errors in which Grammarians and Philosophers have been involved by the corruption of some common words, and the useful Abbreviations of Construction. And at the same time we shall get rid of that farrago of useless distinctions into *Conjunctive, Adjunctive, Disjunctive, Subdisjunctive, Copulative, Negative copulative* *, *Continuative, Subcontinuative, Positive, Suppositive, Causal, Collective, Effective, Approbative, Discretive, Ablative, Presumptive, Abnegative, Completive, Augmentative, Alternative, Hypothetical, Extensive, Periodical, Motival, Conclusve, Explicative, Transitive, Interrogative, Comparative, Diminutive, Preventive, Adequate Preventive, Adversative, Conditional, Suspensive, Illative, Conductive, Declarative, &c. &c. &c.* which explain nothing; and (as most other technical terms are abused) serve only to throw a veil over the ignorance of those who employ them †.

* “ *Non, Non, non minus disjungit, quam Nec, Nec. Quoniam neutrum ego Disjunctivum appello, sed copulativum potius negativum.*”

Aristarchus Anti-Bentleianus. Pars secunda. Pag. 12.

† Technical terms are not invariably abused to cover the *ignorance* only of those who employ them. In matters of law, politicks, and Government, they are more frequently abused in attempting to impose upon the ignorance of *others*; and to cover the injustice and knavery of those who employ them.

B.

You mean, then, by what you have said, flatly to contradict Mr. Harris's definition of a *Conjunction*; which he says, is—"a Part of Speech devoid of signification itself, but so formed as to help signification, by making two or more significant sentences to be one significant sentence."

H.

I have the less scruple to do that, because Mr. Harris makes no scruple to contradict himself. For he afterwards acknowledges that *some* of them—"have a kind of obscure signification when taken alone; and appear in Grammar, like Zoophytes * in nature, a kind of middle Beings of amphibious character; which, by sharing the attributes of the higher and the lower, conduce to link the whole together."

Now I suppose it is impossible to convey a *Nothing* in a more ingenious manner. How much superior is this to

* These *Zoophytes* have made a wonderful impression on Lord Monboddo, I believe (for I surely have not counted them) that he has used the allusion at least twenty times in his progress of language; and seems to be always hunting after extremes merely for the sake of introducing them. But they have been so often placed between two stools, that it is no wonder they should at last come to the ground.

the oracular Saw of another learned author on Language (typified by Shakespeare in *Sir Topaz* *) who, amongst much other intelligence of equal importance, tells us with a very solemn face, and ascribes it to Plato, that—"Every man that opines, must opine something: the subject of opinion therefore is not nothing." But the fairest way to Lord Monboddó is to give you the whole passage.

"It was not therefore without reason that Plato said that the subject of opinion was neither the *το ὄν*, or the thing itself, nor was it the *το μὴ ὄν*, or nothing; but something betwixt these two. This may *appear* at first fight a little mysterious, and difficult to be understood; but, like other things of that kind in Plato, when *examined to the bottom*, it has a *very clear* meaning, and

 “ à sa profonde erudition.”

But his lordship's philosophical writings are full of information, expla-
 nations and observations of equal importance. Vol. I. p. 136, he informs
 us, that—Porphyry, *the greatest philosopher as well as best writer of his age*,
 “ relates that crows and magpies and parrots were taught in his time not
 “ only to imitate human speech, but to attend to what was told them and
 “ to remember it; and many of them, says he, have learned to inform
 “ against those whom they saw doing any mischief in the house. And he
 “ himself tamed a partridge that he found somewhere about Carthage to
 “ such a degree, that it not only played and fondled with him, but answered
 “ him when he spoke to it in a voice different from that in which the
 “ partridges call one another : but was so well bred, that it never made

it very clearly; and no doubt must have sweated much to get thus to the bottom.

But Mr. Harris has the advantage of a Simile over this gentleman: and though Similies appear with most beauty

“ this noise but when it was spoken to. And he maintains, that all animals
 “ who have sense and memory are capable of reason: and this is not only
 “ his opinion, but that of the Pythagoreans, *the greatest philosophers in*
 “ *my opinion that ever existed*, next to the masters of their master, I mean
 “ the Egyptian priests. And besides the Pythagoreans, Plato, Aristotle,
 “ Empedocles, and Democritus, were of the same opinion. *One thing*
 “ *cannot be denied*, that their natures may be very much improved by use
 “ and instruction, by which they may be made to do things that are really
 “ wonderful and far exceeding their natural power of instinct.”—So far we
 “ are obliged to *the greatest of all philosophers that ever existed*. And thus
 “ far the judgment of the extract can alone be called in question. Now for
 “ the farther confirmation of this doctrine by their illustrious disciple.—
 “ There is a man in England at present, who has practised more upon them
 “ and with greater success than any body living:”—(I suspect his lordship
 “ means the owner of the learned Pig)—“ and he says, *as I am informed*,”—
 “ (Ay, Right, my lord, Be cautious how you take an assertion so important
 “ as this, upon your own authority! Well, He says? What?)—“ That, *if*
 “ *they lived long enough*, and pains *sufficient* were taken upon them,”—
 “ (Well, what then?)—“ *it is impossible to say to what lengths some of them*
 “ *might be carried*.”

Now if this, and such stuff as this, be Philosophy; and that too, of the
 greatest philosophers that ever existed; I do most humbly intreat your
 lordship, if you still continue obstinate to discard Mr. Locke, that I may
 have my *Tom Thumb* again. For this philosophy gives to my mind as much
 disgust, though not so much indignation, as your friend and admirer Lord
 Mansfield's LAW.

and propriety in works of imagination, they are frequently found most useful to the authors of philosophical treatises : and have often helped them out at many a dead lift, by giving them an appearance of saying something, when indeed they had nothing to say : For Similies are in truth the bladders upon which they float ; and the Grammarian sinks at once if he attempts to swim without them.

As a proof of which, let us only examine the present instance ; and, dismissing the *Zoophytes*, see what intelligence we can draw from Mr. Harris concerning the nature of *Conjunctions*.

First he defines a *Word* to be a “ *sound significant* *.” Then he defines *Conjunctions* to be words (i. e. *sounds significant*) “ *devoid of signification.*”—Afterwards he allows that they have—“ *a kind of signification.*”

But this kind of signification is—“ *obscure,*” (i. e. a signification unknown) : something I suppose (as Chillingworth couples them) like a *secret Tradition*, or a *silent Thunder* : for it amounts to the same thing as a *signification* which does *not signify* : an obscure or unknown signification

* And (page 329) he defines a word to be “ a voice articulate, significant by compact.”

being no signification at all. But, not contented with these inconsistencies, which to a less learned man would seem sufficient of all conscience, Mr. Harris goes farther, and adds, that they are a—"kind of middle beings"—(he must mean between signification and no signification)—"sharing the Attributes of both"—(i. e. of signification and no signification) and—"conduce to link them both"—(i. e. signification and no signification) "together."

It would have helped us a little, if Mr. Harris had here told us what that *middle state* is, between signification and no signification *! What are the *attributes* of no signification! And how signification and no signification can be *linked* together!

* If common reason alone was not sufficient to keep Mr. Harris and Lord Monboddo from this middle state between the *το ον* and the *το μη ον*, and between signification and no signification; they should at least have listened to what they are better acquainted with, *Authority*.

"Ὅσα δὲ τῶν ἐναντίων τριῶν εἰν, ὡς ἐκ οἷς πρῶτον γίνεσθαι, ἢ ὡς κατὰ γένεσιν, ἀναγκαῖον αὐτῶν διαίρετον ὑπαρχειν;—τούτων ἕθεν εἰν ἀνα μέσον." Aristot. Categ.

Now

Now all this may, for aught I know, be “ read and
 “ admired as long as there is any taste for *fine writing* in
 “ Britain *.” But with such unlearned and vulgar philo-
 sophers

* “ The truly philosophical language of my worthy and learned friend
 “ Mr. Harris, the author of *Hermes*, a work that will be read and admired
 “ as long as there is any taste for philosophy and fine writing in Britain.”

Orig. and Prog. of Language, Vol. i. p. 8.

“ But I can hardly have the same indulgence for the philosopher, especially
 “ one who *pretended*, like Mr. Locke, to be so attentive an observer of
 “ what passed in his own mind, and has written a whole book upon the
 “ subject.—If Mr. Locke would have taken the trouble to study what had
 “ been discovered in this matter by the ancients, and had not resolved to
 “ have the merit of inventing himself a whole system of philosophy, he
 “ would have known that every material object is composed of *matter* and
 “ *form*.”

Orig. and Prog. of Lang. Vol. i. p. 38.

“ Mr. Locke wrote at a time when the old philosophy, I mean the
 “ scholastic philosophy, was generally run down and despised, but no other
 “ come in its place. In that situation, being naturally an acute man, and
 “ not a bad writer, it was no wonder that his *Essay* met with great applause,
 “ and was thought to contain wonderful discoveries. And I must allow
 “ that I think it was difficult for any man, without the assistance of books,
 “ or of the conversation of men more learned than himself, to go further
 “ in the philosophy of mind than he has done. But now that Mr. Harris
 “ has opened to us the treasures of Greek philosophy, to consider Mr.
 “ Locke still as a standard book of philosophy, would be, to use an ancient
 “ comparison, continuing to feed on *acorns* after *corn* was discovered.”

Page 53.

fophers as Mr. Locke and his disciples, who seek not *Taste* and *elegance*, but truth and common sense in philosophical subjects, I believe it will never pass as a “*perfect Example of Analysis*;” nor bear away the palm for “*acuteness of investigation and perspicuity of explication*.” For, separated from the *Fine Writing*, (which however I can nowhere find in the book) thus is the *Conjunction* explained by Mr. Harris.—A sound significant devoid of signification,

Having at the same time a kind of *obscure* signification;

And yet having neither signification nor no signification;

But a *middle something* between signification and no signification,

Sharing the attributes both of signification and no signification;

And linking signification and no signification together.

“ It was the misfortune of us in the western parts of Europe, that after we had learned Greek, and got some taste of the Greek philosophy, we immediately set up as masters ourselves, and would needs be inventors in philosophy, instead of humble scholars of the ancient masters. In this way Descartes philosophized in France, Mr. Hobbes and Mr. Locke in England, and many since their time of less note. I would fain hope, if the indolence and dissipation that prevail so generally in this age would allow me to think so well of it, that Mr. Harris would put a stop to this method of philosophizing without the assistance of the ancients, and revive the genuine Greek philosophy among us.” *Id.* p. 54.

If

If others, of a more elegant Taste for *Fine Writing*, are able to receive either pleasure or instruction from such *truly philosophical language**, I shall neither dispute with them nor envy them: But can only deplore the dullness of my own apprehension, who, notwithstanding the great authors quoted in Mr. Harris's treatise, and the great authors who recommend it, cannot help considering this "perfect example of analysis," as—An improved compilation of almost all the errors which Grammarians have been accumulating from the time of Aristotle down to our present days, of technical and learned affectation †.

* " Clarus ob obscuram linguam magis inter inanes

" Quamde graveis inter Grajos, qui vera requirunt.

" Omnia enim stolidi magis admirantur amantque

" Inversis quæ sub verbis latitantia cernunt :

" Veraque constituunt, quæ belle tangere possunt

" Aures, & lepido quæ sunt fucata sonore."

LUCRETIVS, *Lib.* I. 640.

† I must however do Mr. Harris and Dr. Lowth the justice to acknowledge, that the *Hermes* of the former has been received with universal approbation both at home and abroad; and has been quoted as undeniable authority on the subject by the learned of all countries. For which however I can easily account; not by supposing that its doctrine gave any more satisfaction to their minds who quoted it than to mine; but because, as Judges shelter their knavery by *precedents*, so do scholars their ignorance by *authority*: and when they cannot reason, it is safer and less disgraceful to repeat that nonsense at second hand, which they would be ashamed to give originally as their own.

B. I

B.

I am afraid, my good friend, you still carry with you your old humour in politics, though your subject is now different. You speak too sharply for Philosophy. Come, Confess the truth. Are not you against *Authority*, because Authority is against you? And does not your spleen to Mr. Harris arise principally from his having taken care to fortify his opinions in a manner in which, from your singularity, you cannot?

H.

I hope you know my disposition better. And I am persuaded that I owe your long and steady friendship to me, to the conviction which an early experience in private life afforded you, that—*Neminem libenter nominem, nisi ut laudem; sed nec peccata reprehenderem, nisi ut aliis prodessem.*—Indeed you have borne your testimony for me in very trying situations, where few besides yourself would have ventured so much honesty. At the same time, I confess, I should disdain to handle any useful truth daintily, as if I feared lest it should sting me; and to employ a philosophical inquiry as a vehicle for interested or cowardly adulation.

R

I protest

I protest to you, my notions of Language were formed before I could account etymologically for any one of the words in question, and before I was in the least acquainted with the opinions of others. I addressed myself to an inquiry into their opinions with all the diffidence of conscious ignorance; and, so far from spurning authority, was disposed to admit of half an argument from a great name. So that it is not my fault, if I am forced to carry instead of following the lanthorn: but at all events it is better than walking in total darkness.

And yet, though I believe I differ from all the accounts which have hitherto been given of Language, I am not so much without authority as you may imagine. Mr. Harris himself and all the Grammarians whom he has, and whom (though using their words) he has not quoted, are my authorities. Their own doubts, their difficulties, their dissatisfaction, their contradictions, their obscurity on all these points are my authorities against them*: for their

better employed, and his perseverance better rewarded with discovery ; let us hear what he says.

—“ According to the true philosophy of speech, I cannot conceive this kind of words” (he speaks of Adverbs and Conjunctions) “ to be properly a distinct part of speech, as they are commonly called. But until they can be distributed into their proper places, I have so far complied with the Grammars of instituted languages, as to place them here together.”—And again,

“ For the accurate effecting of this [i. e. a *real character*] it would be necessary that the theory itself [i. e. of *language*] upon which such a design were to be founded, should be exactly suited to the nature of things. But upon supposal that this theory [viz. of *language*] is defective, either as to the fulness or the order of it ; this must needs add much perplexity to any such attempt, and render it imperfect. And that this is the case with that common theory already received, need not much be doubted.”

It appears evidently therefore that Wilkins (to whom Mr. Locke was much indebted) was well convinced that all the accounts hitherto given of Language were erroneous.

And

And in fact, the languages which are commonly used throughout the world, are much more simple and easy, convenient and philosophical than Wilkins's scheme for a *real character*; or than any other scheme that has been at any other time imagined or proposed for the purpose.

Mr. Locke's dissatisfaction with all the accounts which he had seen, is too well known to need repetition.

Sanctius rescued QUOD particularly from the number of these mysterious Conjunctions, though he left UT amongst them.

And Servius, Scioppius, G. J. Voffius, Perizonius, and others, have explained and displaced many other supposed Adverbs and Conjunctions.

Skinner (though I knew it not previously) had accounted for IF before me, and in the same manner; which, though so palpable, *Lye* confirms and compliments. Even S. Johnson, though mistakenly, has attempted AND; and would find no difficulty with THEREFORE.

In short, there is not such a thing as a *Conjunction* in *Any* Language, which may not, by a skilful Herald, be traced

traced home to its own family and origin; without having recourse to contradiction and mystery with Mr. Harris: or, with Mr. Locke, cleaving open the head of man, to give it such a birth as Minerva's from the brain of Jupiter.

B.

Call you this authority in your favour? When the full stream and current sets the other way, and only some little brook or rivulet runs with you? You know very well that all the authorities which you have alleged, except Wilkins, are upon the whole against you. For though they have explained the meaning, and traced the derivation of many Adverbs and Conjunctions; yet (except Sanctius in the particular instance of *quod*,—whose conjunctive use in Latin he too strenuously denies) they all acknowledge them still to be *Adverbs* or *Conjunctions*. It is true, they distinguish them by the title of *reperta* or *usurpata*: But they at the same time acknowledge (indeed the very distinction itself is an acknowledgment) that there are others which are *real, primigenia, nativa, pura*.

H.

True. Because there are some, of whose origin they were totally ignorant. But has any Philosopher or Gram-
 marian ever yet told us what a *real, original, native, pure*
 Adverb

Adverb or Conjunction is? Or which of these Conjunctions of Sentences are so? Whenever that is done, in *any* language, I may venture to promise you that I will shew those likewise to be *repertas* and *usurpatas*, as well as the rest. And till then I shall take no more trouble about them. I shall only add, that though *Abbreviation and corruption are always busiest with the words which are most frequently in use*; yet the words most frequently used are least liable to be *totally laid aside*. And therefore they are often retained,—(I mean that branch of them which is most frequently used)—when most of the other words—(and even the other branches of these retained words)—are, by various changes and accidents, quite lost to a Language. HENCE the difficulty of accounting for them. And HENCE (because only one branch of each of these *declinable* words is retained in a language) arises the notion of their being *indeclinable*; and a separate sort of words, or Part of Speech by themselves. But that they are not *indeclinable*, is sufficiently evident by what I have already said. For *Imper,* *An,* &c. certainly could not be called *indeclinable*, when all the other branches of those *Verbs*, of which they are the regular Imperatives, were likewise in use. And that the words *IF,* *AN,* &c. (which still retain their original signification, and are used in the very same manner and for the same purpose as formerly) should now be called *indeclinable*,

proceeds

proceeds merely from the ignorance of those who could not account for them; and, who therefore, with Mr. Harris, were driven to say that they have neither *meaning* nor *inflection*: whilst notwithstanding they were still forced to acknowledge (either directly, or by giving them different titles of *conditional, adversative, &c.*) that they have a “*kind of obscure meaning* *.”

How much more candid and ingenuous would it have been, to have owned fairly that they did not understand the nature of these *Conjunctions*; and, instead of wrapping it up in mystery, to have exhorted and encouraged others to a farther search.

B.

You are not the first person who has been misled by a fanciful etymology. Take heed that your derivations be not of the same ridiculous cast with theirs who deduced

If I have been misled, it most certainly is not by Etymology: of which I confess myself to have been shamefully ignorant at the time when these my notions of language were first formed. Though even that previous ignorance is *now* a circumstance which confirms me much in my opinion concerning these Conjunctions: For I knew not even the *character* of the language from which my particular proofs of the *English* conjunctions were to be drawn. And (notwithstanding Lord Monboddo's discouraging Sneer *,) it was general reasoning *à priori*, that led me

“ Pipkin—Pippin-king—King Pepin.”

I forget my merry author of this etymology; but it is altogether as plausible as even *Menage*'s derivation of *CHEZ* from *Apud*.

* “ Now as I am not able from Theory merely, and *à priori*, to form the idea of a perfect language, I have been obliged to seek for it in the study of the Greek.—What men of *superior Genius* may do in such speculations, I cannot tell; but I know well that *ordinary* men, without the
“ study

me to the particular instances; not particular instances to the general reasoning. This Etymology, against whose fascination you would have me guard myself, did not occur to me till many years after my system was settled: and it occurred to me suddenly, in this manner;—"If my reasoning concerning these conjunctions is well founded,

"study of some model of the kind, would be as unable to conceive the
 "idea of a perfect language, as to form a high taste in other arts, such as
 "sculpture and painting, without having seen the best works of those kinds
 "that are to be found.—It would be doing injustice to *those superior minds*
 "who have in themselves the standard of perfection in all the Arts, to judge
 "of them by myself; but I am confident that *my idea* of perfection in
 "language would have been ridiculously imperfect, if I had known no other
 "language than the modern languages of Europe."

Origin and Progress of Language. Vol. II. Page 183.

Read this, *Mr. Burges*, and then complain of illiberality to Lord Monboddo: who places himself *ansatus in Cathedra*, and thus treats all other men in advance. Whoever, after his lordship, shall dare to reason on this subject *à priori*, must assume then, it seems,—to have in his own superior mind the standard of perfection in *All the Arts*!—Do you, *Mr. Burges*, acquiesce to this condition? If it were possible (which I am very far from believing) that the same sentiments should pervade any considerable part of the very learned and respectable body to which you belong; I should be sorrowfully compelled to join in the exclamation,—O! aurita Arcadiæ pecora! qui, *Romæ*, hujus cuculi vocem veluti lusciniolæ melos, in aures admittere sustinetis! And perhaps *Mr. Burges* himself may have reason hereafter to regret, that (with all his real or pretended admiration of Lord Monboddo's writings) he neglected to avail himself of the only useful lesson to be drawn from them: viz. To be at least as well bred as *Porphyry's partridge*; and to have forborne his noise, until he was himself spoken to.

“ there muſt then be in the original language from which
“ the Engliſh (and ſo of all other languages) is derived,
“ literally *ſuch* and *ſuch* words bearing precisely *ſuch* and
“ *ſuch* ſignifications.”—I was the more pleaſed with this
ſuggeſtion, becauſe I was entirely ignorant even of the
Anglo-ſaxon and Gothic characters: and the experiment
preſented to me a mean, either of diſabuſing myſelf from
error (which I greatly feared;) or of obtaining a con-
firmation ſufficiently ſtrong to encourage me to believe
(what every man knowing any thing of human nature will
always be very backward in believing of himſelf) that I had
really made a diſcovery. For, if upon trial I ſhould find
in an unknown language precisely thoſe very words both
in ſound, and ſignification, and application, which in my
perfect ignorance I had foretold; what muſt I conclude, but
either that ſome Dæmon had maliciously inſpired me with
the ſpirit of true prophecy in order the more deeply to de-
ceive me; or that my reaſoning on the nature of language
was not fantaſtical. The event was beyond my expecta-
tion: for I inſtantly found upon trial, all my predictions
verified. This has made me preſumptuous enough to
aſſert it univerſally. Beſides that I have ſince traced theſe
ſuppoſed unmeaning, indeclinable conjunctions with the
ſame ſucceſs in many other languages beſides the Engliſh.
And becauſe I know that the generality of minds receive
conviction

conviction more easily from a number of particular instances, than from the surer but more abstracted arguments of general proof; if a multiplicity of uncommon avocations and engagements (arising from a very peculiar situation) had not prevented me, I should long before this have found time enough from my other pursuits and from my enjoyments (amongst which idleness is not the smallest) to have shewn clearly and satisfactorily, the origin and precise meaning of each of these pretended unmeaning, indeclinable Conjunctions, at least in all the dead and living languages of Europe.

B.

Men talk very safely of what they *may do*, and what they *might have done*. But, though present professions usually outweigh past proofs with the people, they have never yet passed current with philosophers. If therefore you would bring me over to your opinion, and embolden me to quit the beaten path with you, you must go much beyond the example of Henry Stephens, which was considered by Mer. Casaubon as the *ne plus ultra* on this subject *, and must do what Wilkins required, before he
would

* “ Henricus Stephanus (author immortalis operis, quod Thesaurus
“ linguæ Græcæ indigitavit) ita omnes orationis particulas (*quarum quanto*
“ *in*

would venture to differ from the Grammars of instituted languages: that is, you must distribute all our *English* Conjunctions at least into their proper places. And if it should seem unreasonable in me thus to impose upon you a task which—"no man, however learned or sagacious has yet been able to perform *;"—you must thank yourself for it, and the peremptory roundness of your assertion. Besides, I do really think that after you have professed so much of all the languages of Europe, I may fairly expect you to perform a little in your own.

"*in omni lingua difficilior, tanto utilior observatio*) omnes idiotismos excussit, eruit, explicavit, similia cum similibus comparavit, ut exemplum quidem in hoc genere aliis ad imitandum reliquerit absolutissimum; sed quod pauci sint affecuturi." Mer. Caf. de lingua Saxonica.

* "The Particles are, among all nations, applied with so great latitude, that they are not easily reducible under any regular scheme of explication: this difficulty is not less, nor perhaps greater, in English than in other languages. I have laboured them with diligence, I hope with success: such at least as can be expected in a task, which no man, however learned or sagacious, has yet been able to perform."

to amuse their readers and cover their own ignorance, by very learnedly disputing the propriety of the simile, instead of explaining the nature of the Conjunction.

But, pray, have you any authority for the derivation of these words? Are not all former etymologists against you?

H.

Except in IF, and BUT (in one of its meanings) I believe they are all against me. But I am persuaded that all future etymologists, and perhaps some philosophers, will acknowledge their obligation to me. For these troublesome conjunctions, which have hitherto caused them so much mistaken and unsatisfactory labour, shall save them

many an error and many a weary step in future. They shall no more expose themselves by unnatural forced conceits to derive the English and all other languages from the Greek, or the Hebrew; or some imaginary primæval tongue. The Particles of every language shall teach them whither to direct and where to stop their inquiries: for wherever the evident meaning and origin of the Particles of any language can be found, *there* is the certain source of the whole.

B.

Without a moment's reflection, every one must perceive that this assertion is too general and comprehensive. The mixture which is found in all cultivated languages; the perpetual accession of new words from affectation as well as from improvement, and the introduction of new Arts and Habits, especially in learned nations; and from other circumstances; forbid the deduction of the *whole* of a language from any one single source.

H.

Most certainly. And therefore when I say the *whole*, I must beg to be understood with those exceptions. And, that I may not seem to contradict myself when we shall hereafter come to treat of them, I beg you likewise to re-

member, that I by no means include in my assertion, the *Abbreviations* of language: for they are always *improvements* superadded by language in its progress; and are often borrowed from some other more cultivated languages. Whereas the original Mother-tongue is always rude and tedious, without those advantages of *Abbreviation*. And were he once more in being, I should not at all doubt of being able to convince even Junius himself (who with many others could so far mistake the course and progress of speech, as to derive an uncultivated from a cultivated language) that, instead of referring the Anglo-saxon to his favourite Greek as its original, he must seek out (and I suppose he would easily find) a Parent for the latter.

But, I beg pardon, this is rather digressing from my purpose. I have nothing to do with the learning of mere curiosity*: nor am any farther concerned with Etymology, than as it may serve to get rid of the false philosophy received concerning language and the human understanding. If you please, therefore, I will return to the Con-

IF and **AN** may be used mutually and indifferently to supply each other's place.

Besides having Skinner's authority for **IF**, I suppose that the meaning and derivation of this *principal* supporter of the *Tripod of Truth**, are so very clear, simple and univer-

Lye, in his edition of Junius, fays—"Haud incitè

GIF is to be found not only, as Skinner fays, in Lincolnshire, but in all our old writers. G. Douglas almost always ufes *Gif*: once or twice only he has ufed *If*; once he ufes GEWE, and once GIFFIS, and fometimes IN CASE and IN CAIS for GIF.

And it is to be observed that in Chaucer and in other old writers, the verb to GIVE suffers the same variations in the manner of writing and pronouncing it, whether used

conjunctively or otherwise: as does also the *Noun* derived from it.

“ And after on the daunce went

In Henry the viith's will, dated 1509, you will also find YEVE used where we now employ GIVE: and in the time of Queen Elizabeth it was written in the same manner.

“ YEOVEN under our signet.”

Lodge's Illustrations. The Queen to Sir W. Cecil and Dr. Watton, Vol. 1. Pag. 343.

GIN * is often used in our Northern counties and by the Scotch, as we use IF or AN: which they do with equal

* Ray fays—“ *Gin, Gif*, in the old Saxon is *Gif*; from whence the word
“ *If* is made per aphæresin literæ G. *Gif*, from the verb *Gifan*, dare;
“ and is as much as *Dato*.”

propriety and as little corruption : for GIN is no other than the participle *Given*, *Gʻen*, *Gʻn*. (As they also use *Gie* for *Give*, and *Gien* for *Given*, when they are not used *conjunctively*.) And *boc dato* is of equal conjunctive value in a sentence with *Da boc*.

“ Then *wi*’ his spear he turn’d hir owre,
 “ O GIN hir face was wan!
 “ He turn’d her owre and owre again,
 “ O GIN hir skin was whyte.”

Percy’s Reliques, Vol. i. *Edom o’Gordon*.

Even our Londoners often pronounce *Give* and *Given* in the same manner : As

“ *Gi*’ me your hand.”
 “ I have *Gin* it him well.”

So Wycherly, *Love in a Wood*, Act V. “ If my daughter there should have done so, I wou’d not have *gi’n* her a groat.”

A N.

I do not know that AN has been attempted by any one, except S. Johnson : and, from the judicious distinction he has made between Junius and Skinner *, I am persuaded that

* “ Junius appears to have excelled in extent of learning, and Skinner in rectitude of understanding. Junius was accurately skilled in all the
 X 2 “ northern

that he will be the first person to relinquish his own conjecture*: especially when he notices his own self-contradiction: for after having (under the article AN) told us that “AN is a contraction of *And if*,” and given the following instance,

—————“ Well I know
 “ The clerk will ne'er wear hair on's face that had it.
 ———“ He will AN'IF he live to be a man.”

He very truly (under the article AND) says—“ In *And if*, the *And* is *redundant*; and is omitted by all later writers. As

—————“ I pray thee, Launce,
 “ AN'IF thou see'st my boy, bid him make haste.”

“ northern languages; Skinner probably examined the antient and remoter
 “ dialects only by occasional inspection into dictionaries: But the learning
 “ of Junius is often of no other use than to shew him a track by which he
 “ may deviate from his purpose; to which Skinner always presses forward
 “ by the shortest way. Skinner is often ignorant, but never ridiculous:
 “ Junius is always full of knowledge; but his variety distracts his judgment,
 “ and his learning is very frequently disgraced by his absurdities.”

Preface to Dictionary.

* Immediately after the publication of my letter to Mr. Dunning, I was informed by Mr. S. (an intimate friend of Dr. Johnson) that I was not mistaken in this opinion; Dr. Johnson having declared, that if he lived to give a new edition of his Dictionary, he should certainly adopt my derivations.

The author of "*Criticisms on the Diversions of Purley*," who publishes under the feigned name of CASSANDER, (I suppose, because he was born in the island of *Cadfan*, in Dutch Flanders) and who is a Teacher and Preacher in the City of Norwich, thus elegantly amuses his readers. Pages 36, 37, 38.

" I have known a public speaker who would now and
" then take a survey of his audience, and call out (if he
" espied any drooping noddles or falling jaws)—*Brethren*,
" *I will tell you a story*.—As I think this an excellent
" method of rousing the attention of a reader or hearer,
" for ever inclined to grow drowsy when the subject is so,
" I shall not scruple to make use of it upon this occasion.

" It is well known that the Boors in Friesland, one of
" the United Provinces, have so far retained ancient
" customs, as to be, in dress, language, and manners,
" exactly the same people which they were five hundred
" years ago; a circumstance that induced Junius the son
" to pay them a visit, and to pass a few months among
" them. In a tour I made to that country some years
" ago, I was at a gentleman's house, from which I made
" frequent excursions into the inner part of the province.
" In one of these I was obliged to take the first sheltering
" place.

“ place in my way, being overtaken by a violent shower.
 “ It was a farm house, where I saw several children ; and
 “ *I shall never forget* the speech which one of them, an
 “ overgrown babe, made to his mother. He was standing
 “ at her breast ; and after he had done with one, I heard
 “ him say to her,—*Trientjen, yan my t'cor.*—i. e. Kate,
 “ give me t'other.—*I little thought at the time*, I should
 “ have so good an opportunity of making use of the story
 “ as I have at present.”

This story of the babe, he says, is certainly in my favour. I think it is decisively.

But the Critic proceeds—“ But we should not fancy
 “ that words exist, or must have existed, because, having
 “ adopted a certain method of finding out origins, we can-
 “ not possibly do without them. I have been looking out
 “ with some anxiety for the Anglo-Saxon verb *Ānan*, but
 “ but can get very little information about it. I find, in-
 “ deed, in King Alfred's Will the following article :—
 “ *ÆEþur ic an Eaðþarðe minum elðra suna.*—First I give to
 “ Edward my eldest son.—And from the expression *ic*
 “ *ĀN*, it should seem as if there really existed such verb
 “ in the Anglo-Saxon as *Ānan*. But as this is the only
 “ sign of life it has given, as one may say, for these

“ thousand years, I am inclined to look upon that sign as
 “ being rather equivocal, and suspect that the true reading
 “ of the Will is, not *ic an*, but *ic un*, from *unnan*
 “ *cedere*, *concedere*; this last verb being common in the
 “ Anglo-Saxon, and nothing more easy than to mistake
 “ an *u* for an *a*, in that language, as well as in English.
 “ However, as I have not seen hitherto any manu-
 “ script, on whose authority I can ground the justness of
 “ my conjecture, I do not give it you as any thing certain;
 “ and if you persist in giving the preference to the old
 “ reading, the story of the babe is certainly in your
 “ favour; for there is as little difference between *An* and
 “ and *yan*, as between *un* and *An*. With me it will re-
 “ main a matter of doubt, whether there ever existed such
 “ a verb as *Anan*, the same in signification and yet dif-
 “ ferent in origin, with *Gīan*. It is by no means pro-
 “ bable, that a people, who had hardly a conveyance for
 “ one idea in a thousand, should have procured two such
 “ noble conveyances for one single idea. This is a piece
 “ of luxury, which even the most civilized nation seldom
 “ allow themselves *.”

* *Reprehenfor audaculus verborum—qui perpauca eademque a vulgo
 protrita legerat, habebatque nonnullas disciplinæ grammaticæ inauditun-
 culas, partim rudes inchoatasque, partim non probas; easque quasi pulverem
 ob oculos, quum adortus quemque fuerat, adspergebat;—neque rationem
 verbum hoc, inquit, neque auctoritatem habet.*

To this I answer, that *Ānan*, *Ānnan*, and *Unnan*, are all one and the same word differently spelled (as almost all the Anglo-Saxon and old English words are) because differently pronounced.

But “ he has been looking for *Ānan*, he says, with “ some anxiety, and can get very little information about “ it.” If he looks so carelessly when he is anxious, we may pretty well guess with how much accuracy he looks upon other occasions. I will relieve his anxiety. I know he has Lye’s collection of Anglo-Saxon words before him; (for he quotes it in his 66th page) let him put on his spectacles and open the book : he will there find *Ānan*, and *Ānnan*, with references to places where they are used. And if, after that, he should still continue anxious, I will furnish him with more.

“ Nothing, he says, is more easy than to mistake an *u* “ for an *a*, in that language, as well as in the English.”— It is not so easy to mistake the Anglo-Saxon character *U* for *Ā*, or *u* for *a*; as it is to mistake the *written* English character *u* for *a*.

It is not true that any people are now, or ever were in the condition he represents the Anglo-Saxons; viz. of
having

having “hardly a conveyance for one idea in a thousand;” unless he means to include in his expression, of *one idea*, each man’s particular perception. No. Cheer up, *Cassander*: your lot is not peculiar to yourself: for the people who have the poorest and scantiest language, have yet always many more words than ideas. And I leave the reader to judge whether to have two words for one idea, be “a piece of luxury which even the most civilized nation seldom allows itself.”

UNLESS.

Skinner says—“*Unless* nisi, præter, præterquam, q. d. “*One-less*, uno dempto seu excepto: vel potius ab *Onleran*, “*dimittere*, liberare, q. d. *Hoc dimisso*.”

It is extraordinary, after his judicious derivation of IF, that Skinner should have been at a loss about that of UNLESS; especially as he had it in a manner before him: For *Onler*, *dimitte*, was surely more obvious and immediate than *Onlered*, *dimisso*.—As for, *One-less*, i. e. *Uno dempto seu excepto*, it is too poor to deserve notice.

So low down as in the reign of Queen Elizabeth, this conjunction was sometimes written *Oneles* and *Onelesse*. And this way of spelling it, which should rather have directed

Skinnner to its true etymology, might perhaps contribute to mislead him to the childish conjecture of *One less, Uno dempto*.—But in other places it is written purely ONLES : and fometimes ONLESSE.

Thus, in the Trial of Sir John Oldcastle, An. 1413,
 “ It was not possible for them to make whole Christes cote
 “ without seme, ONLESSE certeyn great men were brought
 “ out of the way.”

So Thomas Lupset, in the early part of Henry the 8th's reign ;

“ But alway, sifter, remembre that charitie is not perfect ONLES that it be burninge.”

Treatise of Charitie, pag. 8.

“ This peticion cannot take effect ONLES man be made like an aungel.”

“ The more shamfully that men for the most parte feare to die, the greater profe there is, that such extreme

“ poyntes of feare against all fhame fhuld not in fo many
 “ dayly appere, whan death approcheth, ONLES bi natur
 “ some juft feare were of the fame.” *Ibid.* pag. 166.

In other places Lupfet spells it ONELES and ONLESSE.

So, in “ The Image of Governace ” by Sir T. Elliott,
 1541, “ Men do feare to approche unto their foverayne
 “ Lorde, ONELES they be called.”

“ This noble empire is lyke to falle into extreme ruyne

“ The foule waxeth feble, ONLESSE the same be cherished.”

“ In vayne, ONLESSE there were some facultie.”

“ It cannot begynne, ONELESSE by the grace of God.”

So in the “ Supplication to King Henry VIII.” by Barnes.

So in the “ Declaration against Joye” by Gardiner, Bishop
of Winchester.

“ No,

Votaries by Ibon Bale. Dedicated to Edward the 6th. 1550.*

“ A wonderful thyng, that this shoulde be cryed lawful in their cathedrall

The expression in Hamlet (Act I. Sce. 1.) —“ Of *unimproved* mettle
 “ hot and full.”—ought not to have given Shakespeare's commentators any
 trouble: for *unimproved* means *unimpeached*; though Warburton thinks it
 means “ *unrefined* :” Edwards, “ *unproved* ;” and Johnson (with the appro-
 bation of Malone) “ *not regulated nor guided by knowledge or experience* :”
 and in his Dictionary he explains it to be “ *not taught, not meliorated by in-*

I believe that William Tyndall, our immortal and match-
 less translator of the bible, was one of the first who wrote

In a note on this passage S. Johnson says—“ Slacken or loofen. Put in
 “ danger of dropping; or, perhaps, strip of its ornaments.” And in his
 Dictionary, he says,—“ To make loose; to put in danger of being lost.—
 “ Not in use.” But he gives no reason whatever for this interpretation. I
 believe that *Unlace* in this passage means—“ You UNLESS OR ONLES your
 “ reputation,” from the same verb *Onlepan*.

I do not know that Onley is employed *conjunctively* by the Anglofaxon writers, as we use *Unless*; (though I have no doubt that it was so used in discourse); but instead of it, they frequently employ *nymðe* or *nemðe*: (which is evidently the Imperative *nym* or *nem*, of *nymman* or *neman*, to which is subjoined *ðe*, i. e. *That* *.) And *nymðe*—*Take away that*,—may very well supply the place of—*Onley* (*ðe* expressed or understood)—*Dismiss that*.

* It is too singular to be left unnoticed, that the ancient Romans used *Nemut*, instead of *Nisi*. For which Festus cites Cato *de potestate Trib.* but the passage is lost.

LES, the Imperative of Leran (which has the same meaning as Onleran) is likewise used sometimes by old writers instead of UNLESS.

* It is this fame Imperative LES, placed at the end of nouns and coalescing with them, which has given to our language such adjectives as *hopeless, restless, deathless, motionless, &c.* i. e. *Dismiss* hope, rest, death, motion, &c.

The two following lines of Chaucer in the Reve's Tale, in Wylliam Thynne's edition,

And when the horse was *lose*, he gan to gon

“ Towarde the fen, there wylde mares rynne.”

are thus printed in Mr. Tyrwhit's edition,

“ And whan the hors was *laus*, he gan to gon

“ Toward the fen, ther wilde mares renne.”

I am to suppose that Mr. Tyrwhit is justified for this reading by *some* manuscript; and that it was not altered by himself merely for the sake of introducing “ *Laus, Island. and the Consuetud. de Beverley,*” into his Glossary.

“ LAUS (says Mr. Tyrwhit) adj. Sax. *Loose*. 4062. *Laus, Island. Solutus*. “ This is the true original of that termination of adjectives so frequent in “ our language, in *les* or *less*. *Consuetud. Beverley. MS. Harl. 560.*— “ *Hujus sacrilegii emenda non erat determinata, sed dicebatur ab anglis* “ *Botalaus*. i. e. *sine emenda.*—So Chaucer uses *Boteles*, and other words “ of the same form; as *Detteles, Drinkeles, Gilteles, &c.*”

I think, however, there will be very little doubt concerning this derivation; when it is observed that we say indifferently either *sleep-less*, or *without-sleep*, &c. i. e. *Dismiss* sleep or *Be-out* sleep, &c. And had not these words *les* and *without* been thus convertible, Shakespeare would have lost a pun.—“ Thrice have I sent him (says Glendower) weather-beaten “ home, and *bootless* back.” “ Home *without boots* (replies Hotspur); “ and

“ You must no more aim at those easie accesses,
 “ LESS you can do't in air.”

Beaumont and Fletcher. Beggars Bush, Act V. Sce. 2.

“ and in foul weather too! How scapes he agues in the Devil's name?”
 So, for those words where we have not by habit made the coalescence, as the Danish *Folkelös* and *Halelös*, &c. we say in English *Without* people, *Without* a tail, &c. But any one may, if he pleases, add the termination *less* to any noun: and though it should be unusual, and heard for the first time, it will be perfectly understood. Between Wimborn-minster and Cranbourn in Dorsetshire, there is a wood called *Harley*: and the people in that country have a saying perfectly intelligible to every English ear.—
 “ When *Harley* is *bare-less*, *Cranbourn* *whore-less* and *Wimborn* *poor-less*,
 “ the world will be at an end.” And it is observable that in all the northern languages, the termination of this adjective in each language varies just as the correspondent verb, whose Imperative it is, varies in that language.

		Termination.		Infin. of the verb.
Goth.	—	ΛΛNS	—	ΛΛNSGAN
A. S.	—	Lear	—	Leoran
Dutch	—	Loos or Lofs	—	Löffen
German	—	Los	—	Löfen
Danish	—	Lös	—	Löfer
Swedish	—	Lös	—	Löfa

I must be permitted here to say, that I sincerely lament the principle on which Mr. Tyrwhit proceeded in his edition of Chaucer's tales. Had he given invariably the text of that manuscript which he judged to be the oldest, and thrown to the bottom the variorum readings with their authority; the obligation of his readers (at least of such as myself) would indeed have been very great to him: and his industry, care, and fidelity would then have been much more useful to inquirers, than any skill which he has shewn in etymology or the northern languages; were it even much greater than it appears to me to have been.

You will please to observe that all the languages which have a correspondent conjunction to *Unless*, as well as the manner in which its place is supplied in the languages which have not a conjunction correspondent to it; all strongly justify my derivation. The Greek *Ει μη*. The Latin *Nisi*. The Italian *Se non*. The Spanish *Sino*. The French *Si non*. All mean *Be it not*. And in the same manner do we sometimes supply its place in English either by *But*, *Without*, *Be it not*, *But if*, &c.

“ Without profane tongues thou canst never rise,
“ Nor be upholden, *Be it not* with lies.”

Sir CAULINE. PERCY'S *Reliques*.

Though it certainly is not worth the while, I am tempted here to observe the gross mistake Mr. Harris has made in the *Force* of this word; which he calls an “ *Adequate Preventive*.”

His

His example is—"Troy will be taken, UNLESS the Palladium be preserved."—"That is (says Mr. Harris) This alone is sufficient to preserve it."—According to the oracle, so indeed it might be; but the word UNLESS has no such force.

Let us try another instance.

"England will be enslaved UNLESS the House of Commons continues a part of the Legislature."

Now, I ask, is this alone sufficient to preserve it? We who live in these times, know but too well that this very house may be made the instrument of a tyranny as odious and (*perhaps*) more lasting than that of the Stuarts. I am afraid Mr. Harris's *adequate Preventive* will not save us. For, though it is most cruel and unnatural; yet we know by woful experience that the Kid may be seethed in the mother's milk, which providence appointed for its nourishment; and the liberties of this country be destroyed by that very part of the Legislature, which was most especially appointed for their security.

Junius says,—“ *Eak*, etiam. Goth. **ANK**. A. s. **Ɔac**.

 “ **Ɔacan** vero, vel auchon, sunt ab αυξειν vel αεξειν, addere,

Skinner says—“ *Eke*. ab A. s. **Ɔac**. **Ɔeac**. *Belg. Oock*.
Teut. Auch. Fr. Tb. Ouch. D.oc. etiam.”

Skinner then proceeds to the verb,

“ *To Eke*, ab A. s. **Ɔacan**. **Geican**. **Iecan**. augere, adjici-
 “ cere. *Fr. Jun. suo more*, deflectit. a Gr. αυξειν. *Mallet*
 “ ab **Ɔac**, iterum, quod vide: quod enim augetur, secun-
 “ dum partes suas quasi iteratur & de novo fit.”

In this place Skinner does not seem to enjoy his usual superiority of judgment over Junius. And it is very strange that he should chuse here to derive the verb **Ɔacan** from the conjunction **Ɔac** (that is, from its own Impera-

* An instance has been already given where **IF** is used as a preposition. In the following passage of Dryden, *Unless* is also used as a preposition;

 “ because it never comes *Unless* extorted.”

tive ; rather than the conjunction (that is, the Imperative) from the verb. His judgment was more awake when he derived IF or GIF from $\Gamma\text{I}\text{F}\text{an}$, and not $\Gamma\text{I}\text{F}\text{an}$ from $\Gamma\text{I}\text{F}$; which yet, according to his present method, he should have done.

Perhaps it may be worth remarking, as an additional proof of the nature of this conjunction; that in each language, where this imperative is used conjunctively, the Conjunction varies just as the verb does.

In Danish the Conjunction is *og*, and the verb *öger*.

In Swedish the Conjunction is *och*, and the verb *öka*.

In Dutch the Conjunction is *ook*, from the verb *oecken*.

In German the Conjunction is *auch*, from the verb *auchon*.

In Gothic the Conjunction is ANK , and the verb ANKAN .

As in English the Conjunction is *Eke* or *Eak*, from the verb *Eacan*.

Y E T. S T I L L.

I put the conjunctions YET and STILL here together; because (like If and An) they may be used mutually for each other without any alteration in the meaning of the sentences; a circumstance which (though not so obviously as in these instances) happens likewise to some other of the

the

the conjunctions; and which is not unworthy of consideration.

According to my derivation of them both, this mutual interchange will not seem at all extraordinary: for YET (which is nothing but the Imperative $\gamma\epsilon\tau$ or $\gamma\acute{\gamma}\tau$, of $\gamma\epsilon\tau\alpha\eta$ or $\gamma\acute{\gamma}\tau\alpha\eta$, obtinere) and STILL (which is only the Imperative $\delta\tau\epsilon\lambda\lambda$ or $\delta\tau\epsilon\alpha\lambda\lambda$, of $\delta\tau\epsilon\lambda\lambda\alpha\eta$ or $\delta\tau\epsilon\alpha\lambda\lambda\alpha\eta$ *, ponere) may very well supply each other's place, and be indifferently used for the same purpose.

ALGATE and even ALGATES, when used adverbatively by Chaucer, I suppose, though so spelled, to mean no other than *All-get*.

“ For ALBEIT tarieng be noyful, ALGATE it is not to be
“ reproued in *yeuyng*e of iugement, ne in vengeaunce
“ takyng.”

Tale of Chaucer, Fol. 74, Pag. 2. Col. 1.

* Though this verb is no longer current in English, except as a Conjunction, yet it keeps its ground in the collateral languages.

In German and Dutch it is	—	<i>Stellen</i>
In the Swedish	—	<i>Ställa</i>
And in the Danish	—	<i>Stiller.</i>

“ A great waue of the see cometh somtyme with fo
 “ great a vyolence, that it drowneth the shyppe: and the
 “ fame harme dothe sometyme the small dropes of water
 “ that entreth through a lytell creueys, in to the tymbre
 “ and in to the botome of the shyppe, *yf* men be so neg-
 “ ligente that they discharge hem not by tymes. And
 “ therefore all though there be a difference betwixt these
 “ two causes of drowning, *ALGATES* the shyppe is
 “ drowned.”

The verb *to get* is sometimes spelled by Chaucer *geate*.

But I will repeat to you the derivations which others have given, and leave you to chuse between us.

Mer. Casaubon says—“ *ETI*, adhuc, Yet.”

Junius says—“ *YET*, adhuc. A. S. *ȝȳt*. Cymrœis *etwa*,
 “ *etto*, significat, adhuc, etiam, iterum; *EX ETI* vel *αυθις*.”

Skinner says—“ *YET*, ab A. S. *Țet*, *Țeta*, adhuc. modo.
 “ Teut. *Jetzt*, jam, mox.”

Again he says—“ *STILL*, assidue, indefinenter, incessan-
 “ ter. Nescio an ab A. S. *till*, addito tantum *fibilo*; vel a

This word ELSE, formerly written *Alles*, *Alys*, *Alyse*,
Elles, *Ellus*, *Ellis*, *Ells*, *Els*, and now *Else*; is, as I have said,
 no other than *Aler* or *Alyr*, the Imperative of *Aleran* or
Alyran, dimittere.

Mr. Wharton, in his History of English Poetry, Vol. i.

THO' THOUGH, THAH * (or, as our country-folks more purely pronounce it, THAF, THAF and THOF) is the Imperative Ðaf or Ðafiz of the verb Ðafian or Ðafizan; to allow, permit, grant, yield, assent: And Ðafiz becomes *Thab*, *Though*, *Thoug* (and *Thoch*, as G. Douglas and other Scotch authors write it) by a transition of the same sort, and at least as easy, as that of *Hawk* from Ðafuc. And it

is remarkable, that as there were originally two ways of writing the verb, either with the guttural G (Ðaƿiƿan) or without it (Ðaƿian): so there still continues the same difference in writing and pronouncing the remaining imperative of this same verb, with the guttural G (*Though*), or without it (*Tho'*). In English, the difference is only in the characters; but the Scotch retain in their pronunciation, the guttural termination.

In the earlier Anglo-Saxon the verb is written ƿeðaƿiƿan. In a charter of William the conqueror it is written—ic nelle ƿeðaƿian. And in a charter of Henry the first it is also written—ic nelle ƿeðaƿian. But a charter of Henry the second has it—ic nelle ƿeðauian.

See the preface to Hickes's Thesaurus, pag. 15, 16.

So that we thus have a sort of proof, at what time the ƿ was dropped from the pronunciation of ðaƿian; (namely, about the reign of Henry the second) and in what manner THAFIG became THAF, and THAF became THAU or THO'.

I reckon it not a small confirmation of this etymology, that our antient writers often used *All be. All be it. All had. All should. All were. All give. How be it. Set. Suppose. &c.* instead of *Although*.

N. B. In the year 1788 I saw the same use of SUPPOSE for THOUGH, in a letter written by a Scotch officer at Guernsey, to my most lamented and dear friend the late Lieutenant General James Murray. The letter in other respects was in very good and common English.

“ I feel exceedingly for Lord W. M. SUPPOSE I have
 “ not the honour of being personally acquainted with him.”

I believe that the use of this word SUPPOSE for THOUGH is still common in Scotland.

The German uses *Doeb* ; the Dutch *Doeb* and *Dog* ; the Danish *Dog* and *Endog* ; and the Swedish *Dock* ; as we use *Though* : all from the same root. The Danish employs *Skiont* and *Endskiondt* ; and the Swedish *Ånfkönt*, for *Though* :
 from

from the Danish verb *Skiønner*; and the Swedish verb *Skiönja*, both of which mean, to *perceive, discern, imagine, conceive, suppose, understand*.

As the Latin *si* (*if*) means *Be it*: and *Nisi* and *sine* (*unless* and *without*) mean *Be not*: so *Etsi* (*although*) means *And be it* *. The other Latin Conjunctions which are used for *Although*, (*as, Quam-vis, Licet, Quantum vis, Quam-libet*) are so uncorrupted as to need no explanation.

Skinner barely says—" **THOUGH**, ab AS Deah. Belg. " **Doch.** Belg. & Teut. **Doch.** etfi, *quamvis* †."

* It may not be quite needless to observe, that our conjunctions **IF** and **THOUGH** may very frequently supply each other's place, as—" **THOUGH** an host of men rise up against me, yet shall not my heart be afraid;" or, " **IF** an host of men, &c." So—" **THOUGH** all men should forsake you, yet will not I;" or, " **IF** all men should forsake you, &c."

† Though this word is called a conjunction of sentences, it is constantly used (especially by children and in low discourse) not only at the beginning, and between, but at the end of sentences.

" *Pro.* Why do you maintain your poet's quarrel so with velvet and good clothes? We have seen him in indifferent good clothes e're now himself.

" *Boy.* And may again. But his clothes shall never be the best thing about him, **THOUGH**. He will have somewhat beside, either of humane letters or severe honesty, shall speak him a man, though he went naked."

It was this word, BUT, which Mr. Locke had chiefly in view, when he spoke of Conjunctions as marking some “Stands, Turns, Limitations, and Exceptions of the mind.” And it was the corrupt use of this *One* word (BUT) in modern English, for *Two* words (BOT and BUT) originally (in the Anglo-saxon) very different in signification, though (by repeated abbreviation and corruption) approaching in sound, which chiefly misled him.

“ BUT (says Mr. Locke) is a Particle, none more familiar in our language; and he that says it is a *discretive* Conjunction, and that it answers SED in Latin, or MAIS in French *, thinks he has sufficiently explained it. But it seems to me to intimate several Relations the mind gives to the several propositions or parts of them, which it joins by this monosyllable.

“ First,——BUT *to say no more* :

“ Here it intimates a stop of the mind, in the course it was going, before it came to the end of it.

* It does not answer to *Sed* in Latin, or *Mais* in French; except only where it is used for *But*. Nor will any *one* word in *any* Language answer to our English BUT: because a similar corruption in the same instance has not happened in any other language.

“ Secondly,

“ Secondly,——*I saw BUT two Plants.*

“ Here it shews, that the mind limits the sense to what
“ is expressed, with a negation of all other.

“ Thirdly,——*You pray; BUT it is not that God would
“ bring you to the true religion :*

“ Fourthly,——*BUT that he would confirm you in your
“ own.*

“ The first of these BUTS intimates a supposition in the
“ mind of something otherwise than it should be : the
“ latter shews that the mind makes a direct opposition be-
“ tween that and what goes before it.

Fifthly,——*All animals have sense, BUT a dog is an animal.*

“ Here it signifies little more, but that the latter pro-
“ position is joined to the former, as the Minor of a
“ Syllogism.

“ To these, I doubt not, might be added a great many
“ other significations of this particle, *if it were my business
“ to examine it in its full latitude,* and consider it in all the
“ places.

“ places it is to be found ; which if one should do, I
 “ doubt whether in all those manners it is made use of, it
 “ would deserve the title of DISCRETIVE which Gramma-
 “ rians give to it.

“ But *I intend not * here a full explication of this sort*

 “ guage, and lead us into the contemplation of *several*
 “ *actions of our minds* in discoursing, which it has *found a*
 “ *way* to intimate to others by *these Particles*, some whereof
 “ constantly, and others in certain constructions, have the
 “ sense of a whole sentence contained in them.”

Now all these difficulties are very easily to be removed without any effort of the understanding : and for that very reason I do not much wonder that Mr. Locke missed the explanation : for he dug too deep for it. But that the Etymologists (who only just turn up the surface) should

* “ *Essentiam finemque conjunctionum satis aptè explicatum puto : nunc earum originem materiamque videamus. Neque vero Sigillatim percurrere omnes in Animo est.*”
 J. C. SCALIGER.

The constant excuse of them all, whether Grammatists, Grammarians or Philosophers ; though they dare not hazard the assertion, yet they would all have us understand that they can do it ; but *non in animo est*. And it has never been done.

mifs it, does indeed astonish me. It seems to me impossible, that any man who reads only the most common of our old English authors should fail to observe it.

Gawin Douglas, notwithstanding he frequently confounds the two words, and uses them often improperly, does yet (without being himself aware of the distinction, and from the mere force of customary speech) abound with so many instances, and so contrasted, as to awaken, one should think, the most inattentive reader.

The Glossarist of Douglas contents himself with explaining BOT by BUT.

The Glossarist to Urry's Edition of Chaucer says,—
 " BOT for BUT is a form of speech *frequently* used in
 " Chaucer to denote the greater certainty of a thing."—
 This is a most inexcusable assertion: for I believe the place
 cited in the Glossary is the only instance (in this edition of
 Chaucer) where BOT is used; and there is not the smallest
 shadow of reason for forming even a conjecture in favour
 of this unsatisfactory assertion: unsatisfactory, even if the
 fact had been so; because it contains no explanation: for
 why should BOT denote greater certainty?

And

And here it may be proper to observe, that Gawin Douglass's language (where *BUT* is very frequently found) though written about a century after, must yet be esteemed more ancient than Chaucer's: even as at this day the present English speech in Scotland is, in many respects, more ancient than that spoken in England so far back as the reign of Queen Elizabeth *. So Mer. Casaubon (de vet. ling. Ang.) says of his time—"Scotica lingua Anglicâ hodiernâ purior."—Where by *purior*, he means nearer to the Anglo-Saxon.

So G. Hickes, in his Anglo-Saxon Grammar, (Chap. 3.) says—"Scoti in multis *Saxonizantes*."

But, to return to Mr. Locke, whom (as B. Johnson says of Shakespeare) "I reverence on this side of idolatry;" in the *five* instances which he has given for *five* different meanings of the word *BUT*, there are indeed only two different meanings †: nor could he, as he imagined he could, have added

* This will not seem at all extraordinary, if you reason directly contrary to Lord Monboddo on this subject; by doing which you will generally be right, as well in this as in almost every thing else which he has advanced.

† "You must answer, that she was brought very near the fire, and as good as thrown in; or else that she was provoked to it by a divine inspiration. *BUT*, *BUT* that another divine inspiration moved the beholders

added any other significations of this particle, but what are to be found in BOT and BUT as I have explained them *.

BUT, in the *first*, *third*, *fourth*, and *fifth* instances, is corruptly put for BOT, the imperative of Botan:

In the *second* instance only it is put for Bute, or Butan, or Be-utan †.

In

“ to believe that she did therein a noble act, this act of her's might have been calumniated, &c.”

DONNE'S *Biathanatos*, Part II. *Distinct.* 5. *Sett.* 8.

In the above passage, which is exceedingly awkward, BUT is used in both it's meanings close to each other: and the impropriety of the corruption appears therefore in it's most offensive point of view. A careful author would avoid this, by placing these two BUTS at a distance from each other in the sentence, or by changing one of them for some other equivalent word. Whereas had the corruption not taken place, he might without any inelegance (in this respect) have kept the construction of the sentence as it now stands: for nothing would have offended us, had it run thus—“ BOT, “ *butan* that another divine inspiration moved the beholders, &c.”

* S. Johnson, in his Dictionary, has numbered up *eighteen* different significations (as he imagines) of BUT: which however are all reducible to BOT and *Be-utan*.

† “ I saw BUT two plants.”

Not or *Ne* is here left out and understood, which used formerly to be inserted, as it frequently is still.

So

In the *first* instance,—“*To say no more,*” is a mere parenthesis: and Mr. Locke has unwarily attributed to
BUT,

So Chaucer,

“ Tel forth your tale, spareth for no man,
And teche us yong men of your practike.
Gladly (quod she) if it may you lyke.
But that I pray to all this company,
If that I speke after my fantasy,
As taketh not a grefe of that I say,
For myn entent is NOT BUT to play.”

Wife of Bathes Prologue.

“ I ne usurpe not to haue founden this werke of my labour or of myne
“ engyn, I NAM BUT a leude compylatour of the laboure of olde astro-
“ logiens, and haue it translated in myn englyshe.”

Introduction to Conclusyons of the Astrolabye.

“ Forsake I wol at home myn herytage
And as I fayd, ben of your courte a page
If that ye vouchesafe that in this place
Ye graunte me to haue suche a grace
That I may haue NAT BUT my meate and drinke
And for my sustynauce yet wol I fwynke.”

“ Yet were it better I were your wyfe
Sithe ye ben as gentyl borne as I
And haue a realme NAT BUT faste by.”

Ariadne. Fol. 217. pag. 1. col. 1. and 2.

We should now say—*my intent is BUT to play.—I am BUT a compiler, &c.*

This omission of the negation before BUT, though now very common, is one of the most blameable and corrupt abbreviations of construction which is used in our language; and could never have obtained, but through the

BUT, the meaning contained in the parenthesis : for suppose the instance had been this,—“ BUT to proceed.”—Or this,—“ BUT, to go fairly through this matter.”—Or this,—“ BUT, not to stop.”

Does

utter ignorance of the meaning of the word BUT. “ There is not (says Chillingworth) so much strength required in the edifice as in the foundation : and if BUT wise men have the ordering of the building, they will make it much a surer thing, that the foundation shall not fail the building, than that the building shall not fall from the foundation. And though the building be to be of brick or stone, and perhaps of wood ; yet it may be possibly they will have a rock for their foundation ; whose stability is a much more indubitable thing, than the adherence of the structure to it.”

It should be written—“ If none but wise men.”—But the error in the construction of this sentence, will not excuse the present minister, if he neglects the matter of it. The blessings or execrations of all posterity for ever upon the name of PITT, (*pledged as he is*) will depend intirely upon his conduct in this particular.

The reader of this edition is requested to observe, that the above note is not inserted après coup ; but was published in the first edition of this volume in 1786 : when I was in possession of the following solemn, public engagement from Mr. Pitt, made to the Westminster DELEGATES in 1782.

“ Sir,

“ I am extremely sorry that I was not at home, when you and the other gentlemen from the Westminster Committee did me the honor to call. May I beg the favor of you to express that I am truly happy to find that the motion of Tuesday last, has the approbation of such zealous friends to the public, and to assure the Committee that my exertions shall never
“ be

Does BUT in any of these instances, intimate a stop of the mind in the course it was going? The truth is, that BUT itself is the farthest of any word in the language from "*intimating a stop.*" On the contrary it always

" be wanting in support of a measure, which I agree with them in thinking
 " essentially necessary to the independence of Parliament, and to the liberty
 " of the people.

" I have the honor to be,

" with great respect and esteem,

" Sir, your most obedient and

" most humble Servant

" Lincoln's-Inn,
 " May 10.

" W. PITT."

Although I had long known the old detestable maxim of political adventurers, (for Philip was no other);—" To amuse boys with playthings and men with " oaths"—yet, I am not ashamed to confess, I, at that time, placed the firmest reliance on his engagement: and in consequence of my full faith and trust, gave to him and to his administration, most especially when it tottered and seemed overthrown (at the time of the Regency Bill in 1788) a support so zealous and effectual, as to draw repeatedly from himself and his friends the warmest acknowledgments.

This letter was produced by me upon my trial at the Old Bailey in the year 1794: when fidelity to the sentiments it contains, was seriously and unblushingly imputed to me as High Treason. The original of this letter Mr. Pitt, upon his oath, to my astonishment acknowledged to be in his own handwriting; although every trace of DELEGATION was totally effaced from his memory.

intimates

intimates something MORE *, something to follow : (as indeed it does in this very instance of Mr. Locke's ; though
we

* In the French, Italian, Spanish, Portuguese, Dutch, and several other dead and living languages, the very word more is used for this conjunction BUT.

The French anciently used MAIS, not only as they now do for the conjunction MAIS ; but also as they now use *plus* or *d'avantage*.—

Y puis je *Mais* ?
Je n'en puis *Mais*,

are still in use among the vulgar people ; in both which expressions it means *more*. So Henry Estiene uses it ;

“ Sont si bien accoustumez à ceste syncope, ou plustost apocope, qu'ils en font quelquesfois autant aux diffyllabes, qui n'en peuvent *mais*.”

H. E. *de la precellence du langage Francois*, p. 18.

“ *Mais* vient de *magis* (j'entens *mais* pour *d'avantage*.”) Id. p. 131.

“ Helas ! il n'en pouvoit MAIS, le pauvre prince, ni mort, ny vivant.”
Brantome.

“ Enfin après cent tours aiant de la maniere
Sur ce qui n'en peut MAIS dechargé fa colere.”

Moliere. Ecole des Femmes. A. 4. Sce. 6.

In the same manner the Italians ;

“ Io t' ho atato, quanto ho potuto : sì ch' io non so, ch' io mi ti possa
“ piu atare : E però qui non ha MA che uno compenso. Comincia a
“ piangere, e io piangeroe con teo infieme.”

Cento Novelle. Nov. 35.

“ Fue

we know not what that something is, because the sentence is not completed.) And therefore whenever any one in discourse finishes his words with BUT, the question always follows—BUT *what?*

So that Shakespeare speaks most truly as well as poetically, when he gives an account of BUT, very different from this of Mr. Locke.

- “ *Meff.* Madam, he’s well.
 “ *Cleo.* Well said.
 “ *Meff.* And friends with Cæsar.
 “ *Cleo.* Thou art an honest man.
 “ *Meff.* Cæsar and he are greater friends than ever.
 “ *Cleo.* Make thee a fortune from me.
 “ *Meff.* BUT—YET—Madam,—
 “ *Cleo.* I do not like BUT—YET.—It does allay
 “ The good precedent. Fie upon BUT,—YET.—
 “ BUT—YET—is as a Jaylour, to bring forth
 “ Some monstrous malefactor.”

Antony and Cleopatra, Act II. Sc. 5.

- “ Fue un signore, ch’ avea uno giullare in sua corte, e questo giullare
 “ l’ adorava sicome un suo Iddio. Un altro giullare vedendo questo, si
 “ gliene disse male, e disse: Or cui chiami tu Iddio? Elli non é MA che
 “ uno.”
Cento Novelle. Nov. 18.

In the same manner also the Spanish language employs MAS both for *But* and *More*.

- “ Es la verdad la que *Mas* importa à los principes, y la que menos se
 “ halla en los palacios.”
Saavedra, Corona Gothica.
 “ Obra de *Mas* novedad, y *Mas* estudio.” Id.

Where you may observe that YET (tho' used elegantly here, to mark more strongly the hesitation of the speaker) is merely superfluous to the sense; as it is always when used after BUT: for either BUT or YET alone has the very same effect, and will always be found (especially BUT) to *allay* equally the *Good* or the *Bad* * *precedent*; by something MORE † that follows. For BUT means—to

BOOT,

* “ *Speed*. Item, She hath more hairs than wit, and more faults than
“ hairs; BUT more wealth than faults.

“ *Laun*. Stop there. She was mine, and not mine, twice or thrice in
“ that article. Rehearse that once more.

“ *Speed*. Item, she hath more hair than wit.

“ *Laun*. What's next?

“ *Speed*. And more faults than hairs.

“ *Laun*. That's monstrous! O that that were out!

“ *Speed*. BUT more wealth than faults.

“ *Laun*. Why that word makes the faults gracious.”

Here the word BUT allays the *bad* precedent; for which, without any shifting of its own intrinsic signification, it is as well qualified as to allay the *Good*.

† So Taffo,—

—————“ Am. Oh, che mi dici?

“ Silvia m'attende, ignuda, e fola? *Tir*. Sola,

“ Se non quanto v'è Dafue, ch' è per noi.

“ *Am*. Ignuda ella m'aspetta? *Tir*. Ignuda: MA—

“ Am. Oimè, *che* MA? Tu taci tu m' uccidi.”

Aminta, Att. II. Sc. 3.

BOOT *, i. e. to superadd †, to supply, to substitute, to atone for, to compensate with, to remedy with, to make amends with, to add something MORE in order to make up a deficiency in something else.

So likewise in the *third* and *fourth* instances (taken from Chillingworth) ‡. Mr. Locke has attributed to BUT a meaning

Where the difference of the construction in the English and the Italian is worth observing; and the reason evident, why in the question consequent to the conjunction, *what* is placed *after* the one, but *before* the other.

<i>Boot</i> what ?	}	What <i>more</i> ?
i. e.		i. e.
<i>But</i> what ?	}	Che <i>ma</i> ?

* S. Johnson, and others, have mistaken the expression—*To Boot*—(which still remains in our language) for a substantive; which is indeed the Infinitive of the same verb, of which the conjunction is the Imperative. As the Dutch also still retain *Boeten* in their language, with the same meaning.

† “ Perhaps it may be thought improper for me to address you on this subject. BUT a moment, my Lords, and it will evidently appear, that you are equally blameable for an omission of duty here also.”

This may be supposed an abbreviation of construction, for “ BUT indulge me with a moment, my Lords, and it will, &c.” but there is no occasion for such a supposition.

‡ Knott had said,—“ How can it be in us a fundamental error to say, the Scripture alone is not judge of controversies, SEEING (notwithstanding

E c

“ ing

meaning which can only be collected from the words which follow it.

But Mr. Locke says,—“ IF it were his business to “ examine it (BUT) in its full latitude.”—And that he “ *intends not here* a full explication of this sort of signs.”—And yet he adds, that—“ the instances he has given in “ this one (BUT) may lead us into the contemplation of “ several *actions of our minds* in discoursing, which it has

“ ing this our belief) we use for interpreting of Scripture all the means “ which they prescribe; as *Prayer*, conferring of Places, consulting the “ originals, &c.”

To which Chillingworth replies,

“ You pray, BUT it is not that God would bring you to the true religion, BUT that he would confirm you in your own. You confer places, “ BUT it is, that you may confirm or colour over with plausible disguises “ your erroneous doctrines; not that you may judge of them and forsake “ them, if there be reason for it. You consult the originals, BUT you regard them not when they make against your doctrine or translation.”

In all these places, BUT (i. e. BOT, or, as we now pronounce the verb, BOOT) only directs something to be added or supplied, in order to make up some deficiency in Knott's expressions of “ *Prayer*, conferring of places, “ &c.” And so far indeed as an omission of something is improper, BUT (by ordering it's insertion) may be said “ to intimate a supposition in the “ mind of the speaker, of something otherwise than it should be.” But that intimation is only, as you see, by consequence; and not by the intrinsic signification of the word BUT.

“ *found*

“*found a way* to intimate to others by these particles.” And these, it must be remembered, are *Actions*, or as he before termed them THOUGHTS of our minds, for which he has said, we have “either *none or very deficient names*.”

Now if it had been so, (which in truth it is not) it was surely for that reason, most especially the business of an Essay on human *understanding*, to examine these Signs in their *full latitude*: and to give a *full explication* of them. Instead of which, neither *Here*, nor *elsewhere*, has Mr. Locke given *Any* explication whatever.

Though I have said much, I shall also omit much which might be added in support of this double etymology of BUT: nor should I have dwelt so long upon it, but in compliment to Mr. Locke; whose opinions in any matter are not flightly to be rejected, nor can they be modestly controverted without very strong arguments.

None of the etymologists have been aware of this corrupt use of *one* word for *two* *.

Minshew,

* Nor have etymologists been any more aware of the meaning or true derivation of the words corresponding with BUT in other languages. Vossius derives the Latin conjunction AT from *ἀταρ*; and AST from AT, “*inferto s.*”

Minshew, keeping only one half of our modern BUT in contemplation, has fought for its derivation in the Latin imperative *Putā*.

(But how or why s happens to be inferted, he does not say.) Now to what purpose is such sort of etymology? Suppose it was derived from this doubtful word *αταρ*; what intelligence does this give us? Why not as well stop at the Latin word AT, as at the Greek word *αταρ*? Is it not such sort of trifling etymology (for I will not give even that name to what is said by Scaliger and Nunnefius concerning SED) which has brought all etymological inquiry into disgrace?

Voffius is indeed a great authority; but, when he has nothing to justify an useless conjecture but a similitude of sound, we ought not to be afraid of opposing an appearance of Reason to him.

It is contrary to the customary progress of corruption in words to derive AST from AT. Words do not gain but lose letters in their progress; nor has unaccountable accident any share in their corruption; there is always a good reason to be given for every change they receive: and, by a good reason, I do not mean those cabalistical words Metathesis, Epenthesis, &c. by which Etymologists work such miracles; but at least a probable or anatomical reason for those not arbitrary operations.

Adst, Adst, Ast, At.—This conjecture is not a little strengthened both by the antient method of writing this conjunction, and by the reason which Scaliger gives for it.—“AT fuit AD; *accessionem* enim dicit.”

De C. L. L. cap. CLXXIII.

I am not at all afraid of being ridiculed for the above derivation, by any one who will give himself the trouble to trace the words (corresponding with BUT) of any language to their source: though they should not all be quite so obvious as the French *Mais*, the Italian *Ma*, the Spanish *Mas*, or the Dutch *Maar*.

Junius confines his explanation to the other half; which he calls its "*primariam significationem.*"

And Skinner willing to embrace them both, found no better method to reconcile two *contradictory* meanings, than to say hardily that the transition from one* to the other † was—"LEVI FLEXU!"

Junius says—"BUT, Chaucero T. C. V. 194. bis positum

 “ Atque ita porro. BUT videtur dictum quasi *Be-ut*, pro
 “ quo Angli dicunt WITHOUT: unde quoque, hujus deri-
 “ vationis intuitu, præfens hujus Particulæ acceptio vide-
 “ bitur ostendere hanc esse *primarium ejus significationem.*”

The extreme carelessness and ignorance of JUNIUS, in this article is wonderful and beneath a comment.

Skinner says,—“ BUT, ut ubi dicimus—“ *None BUT*
 “ *be*;—ab A. S. Bute, Butan, *præter, nisi, sine*; Hinc,
 “ LEVI FLEXU, postea cœpit, loco antiqui Anglo-faxonici
 “ AC, *Sed*, designare. Bute autem & Butan tandem de-
 “ flecti possunt à Præp. Be, *circa*; vel Beon, *esse*, et ut
 “ vel utan, *foris.*”

Mr. Tyrwhit in his Glossary says—“ BUT. prep. *Sax.*
 “ *Without.* Gloss. Ur.—I cannot say that I have myself
 “ observed this preposition in Chaucer, but I may have
 “ overlooked it. The Saxons used it very frequently;
 “ and how long the Scottish writers have laid it aside I
 “ am doubtful. It occurs repeatedly in Bp. Douglas.”

Knowing

Knowing that no Englishman had yet laid this *preposition* aside, I was curious to see how many sentences Mr. Tyrwhit himself had written without the use of this preposition; and I confess I was a little disappointed in not meeting with it till the fourth page of his preface: where he says —“ Passages which have nothing to recommend them to credit, BUT the single circumstance of having been often repeated.”

So in Chaucer throughout—“ Hys study was BUT lytel on the Byble.” But Mr. Tyrwhit was not aware that, in all such instances, BUT is as much a *preposition*, as any in the language.

W I T H O U T.

BUT (as distinguished from *But*) and WITHOUT have both exactly the same meaning, that is, in modern English, neither more nor less than—*Be-out*.

And they were both originally used indifferently either as *Conjunctions* or *Prepositions*. But later writers having adopted the false notions and distinctions of language maintained by the Greek and Latin Grammarians, have successively endeavoured to make the English Language conform more and more to the same rules. Accordingly

WITHOUT, in approved modern speech*, is now intirely confined to the Office of a *Preposition*; and BUT is generally though not always used as a *Conjunction*. In the same manner as *Nisi* and *Sine* in Latin are distributed; which do both likewise mean exactly the same, with no other difference than that, in the former the *negation precedes*, and in the other it *follows* the verb.

Skinner only says,—“ WITHOUT, ab A. S. wiðutan, “ *Extra.*”

S. Johnson makes it a *Preposition*, an *Adverb*, and a *Conjunction*; and under the head of a *Conjunction*, says, “ WITHOUT, *Conjunct.* Unless; if not; Except—*Not in use.*”

Its true derivation and meaning are the same as those of BUT (from Butan.)

* It is however used as a *Conjunction* by Lord Mansfield in Horne's Trial, page 56.

“ It cannot be read, WITHOUT the Attorney General consents to it.”

And yet, if this reverend Earl's authority may be safely quoted for any thing, it must be for *Words*. It is so unfound in matter of law, that it is frequently rejected even by himself.

It

It is nothing but the Imperative $\beta\upsilon\eta\delta\upsilon\tau\alpha\eta$, from the Anglo-saxon and Gothic verb $\beta\epsilon\omega\delta\alpha\eta$, $\Psi\Lambda\text{IK}\Theta\Lambda\text{N}$; which in the Anglo-saxon and English languages is yoked and incorporated with the Verb Beon effe. And this will account to Mr. Tyrwhit for the remark which he has made, viz. that—" *By* and *With* are often synonymous *."

In modern English we have retained only a small portion of it; but our old English authors had not lost the use of any part of this verb $\beta\epsilon\omega\delta\alpha\eta$, and frequently employed it, instead of BE, in every part of the conjugation.

" But I a draught haue of that welle,

M. Cafaubon fuppofes AND to be derived from the Greek
 ειτα, poftea.

Skinner says—"Nescio an a Lat. *Addere* q. d. *Add*; "interjectâ per Epentheseſi N, ut in *Render* a reddendo."

Lye supposes it to be derived from the Greek *ἐτι*, adhuc, præterea, etiam, quinetiam, infuper.

I have already given the derivation which, I believe, will alone stand examination.

I shall only remark here, how easily men take upon trust, how willingly they are satisfied with, and how confidently they repeat after others, false explanations of what they do not understand.—Conjunctions, it seems, are to have their denomination and definition from the use to which they are applied: *per accidens, essentiam*. Prepositions connect words; but—"the Conjunction connects or joins together sentences; so as out of two to make one sentence. Thus—" *You and I and Peter, rode to London* *," is one sentence made up of three, &c."

* " *Petrus et Paulus disputant*: id est, *Petrus disputat et Paulus disputat*." Sanctij Minerva, Lib. 1. cap. XVIII.

So again, Lib. 3. cap. XIV. " *Cicero & filius valet*. Figura Syllepsis "est: ut, *valet Cicero, & valet filius*." Which Perizonius sufficiently confutes, by these instances—" *Emi librum x drachmis & iv obolis*." " *Saulus & Paulus sunt iidem*."

Well!

Well! So far matters seem to go on very smoothly.
It is,

“ *You rode, I rode, Peter rode.*”

But let us now change the instance, and try some others, which are full as common, though not altogether so convenient.

Two AND two are four.

A B and B C and C A form a Triangle.

John AND Jane are a handsome couple.

Does A B form a triangle, B C form a triangle? &c.—Is John a couple? Is Jane a couple?—Are two four?

If the definition of a Conjunction is adhered to, I am afraid that AND, in such instances, will appear to be no more a Conjunction, (that is a connector of sentences) than *Though* in the instance I have given under that word: or than *But*, in Mr. Locke's *second* instance: or than *Else*, when called by S. Johnson a *Pronoun*; or than *Since*, when used for *Sitbence* or for *Syne*. In short, I am afraid that the Grammarians will scarcely have an entire Conjunction left: for I apprehend that there is not one of those words which they call Conjunctions, which is not sometimes used (and that very properly) without connecting sentences.

L E S T.

L E S T.

Junius only says—"LEST, *least*, minimus. v. *little*." Under *Least*, he says—"LEAST, *lest*, minimus. Con-
" tractum est ex ελαχιστος. v. *little*, parvus." And under *little*, to which he refers us, there is nothing to the purpose.

Skinner says—"LEST, ab A. S. Lær, *minus*, q. d. *quo minus hoc fiat*."

S. Johnson says,—“LEST, Conj. (from the Adjective *Least*) *That not*.”

This last deduction is a curious one indeed; and it would puzzle as sagacious a reasoner as S. Johnson to supply the middle steps to his conclusion from *Least* (which always however means *some*) to “*That not*” (which means none at all.) It seems as if, when he wrote this, he had already in his mind a presentiment of some future occasion in which such reasoning would be convenient. As thus,—“The Mother Country, the Seat of Government, “ must necessarily enjoy the greatest share of dignity, “ power, rights, and privileges: an united or associated “ Kingdom must have in some degree a smaller share; and “ their

“ their Colonies the *least* share ;”—That is, (according to S. Johnson *) *None of any kind.*

It has been proposed by no small authority (Wallis followed by Lowth) to alter the spelling of *LEST* to *Least*; and vice versa. “ Multi,” says Wallis, “ pro *Leſt* ſcribunt “ *Least* (ut diſtinguatur a Conjunctione *Leſt, ne, ut non* :)

* Johnson’s merit ought not to be denied to him; but his Dictionary is the moſt imperfect and faulty, and the leaſt valuable of any of his productions; and that ſhare of merit which it poſſeſſes, makes it by ſo much the more hurtful. I rejoice however, that though the leaſt valuable, he found it the moſt profitable: for I could never read his preface without ſhedding a tear. And yet it muſt be confeſſed, that his *Grammar* and *Hiſtory* and Dictionary of what *he calls* the Engliſh language, are in all reſpects (except the bulk of the latter) moſt truly contemptible performances; and a reproach to the learning and induſtry of a nation, which could receive them with the flighteſt approbation.

Nearly one third of this Dictionary is as much the language of the Hot-tentots as of the Engliſh; and it would be no difficult matter ſo to tranſlate any one of the plaineſt and moſt popular numbers of the *Speſtator* into the language of that Dictionary, that no mere Engliſhman, though well read in his own language, would be able to comprehend one ſentence of it.

It appears to be a work of labour, and yet is in truth one of the moſt idle performances ever offered to the public: compiled by an author who poſſeſſed not one ſingle requiſite for the undertaking, and (being a publication of a ſet of bookſellers) owing its ſucceſs to that very circumſtance which alone muſt make it impoſſible that it ſhould deſerve ſucceſs.

“ Verum omnino contra analogiam Grammaticæ. Mallem
 “ ego Adjectivum *lest*, Conjunctionem *least* scribere.”

“ The superlative *Least*,” says Lowth, “ ought rather
 “ to be written without the A; as Dr. Wallis has long ago
 “ observed. The Conjunction of the same sound might
 “ be written with the A, for distinction.”

S. Johnson judiciously differs from this proposal, but
 for no other reason, but because he thinks “ the profit is
 “ not worth the change.”

Now though they all concur in the same Etymology, I
 will venture to affirm that LEST, for *Lesed* (as *blest* for
blessed, &c.) is nothing else but the participle past of
Leran, dimittere; and, with the article *That* (either ex-
 pressed or understood) means no more than *hoc dimisso* or
quo dimisso *.

* As LES the Imperative of *Leran* is sometimes used for UNLESS, as has
 been already shewn under the article *Unless*: so is the same imperative LES
 sometimes used instead of the participle LEST.

“ I knew it was past four hours of day,
 “ And thocht I wald na langare ly in May;
 “ LES Phœbus fuld me losingere attaynt.”

G. Douglas, Prol. to the 12th book of *Eneados*.

And, if this explanation and etymology of LEST is right, (of which I have not the smallest doubt) it furnishes one caution more to learned Critics, not to innovate rashly: *Lest*, whilst they attempt to amend a language, as they imagine, in one trifling respect, they mar it in others of more importance; and by their corrupt alterations and amendments, confirm error; and make the truth more difficult to be discovered by those who come after.

Mr. Locke says, and it is agreed on all sides, that—
 “ it is in the right use of these” (*Particles*) “ that more
 “ particularly consists the clearness and beauty of a good
 “ style :” and that, “ these words, which are *not truly by*
 “ *themselves the names of any ideas*, are of constant and in-
 “ dispensible use in language; and do much contribute to
 “ men’s well expressing themselves.”

Now this, I am persuaded, would never have been said, had these Particles been understood; for it proceeds from nothing but the difficulty of giving any rule or direction concerning their use; and that difficulty arises from a mistaken supposition that they are not “ *by themselves the names*
 “ *of any ideas* :” and in that case indeed I do not see how any rational rules concerning their use could possibly be given. But I flatter myself that henceforward, the true

force and nature of these words being clearly understood, the proper use of them will be so evident, that any rule concerning their use will be totally unnecessary: as it would be thought absurd to inform any one that when he means to direct *an addition*, he should not use a word which directs *to take away*.

I am induced to mention this in this place, from the very improper manner in which LEST (more than any other conjunction) is often used by our best authors: those who are most conversant with the learned languages being most likely to make the mistake.—“ *You make use of such indirect and crooked arts as these to blast my reputation, and to possess men’s minds with disaffection to my person; LEST peradventure, they might with some indifference bear reason from me.*” CHILLINGWORTH’S Preface to the Author of *Charity maintained*, &c.

Here LEST is well used—“ *You make use of these arts:*” —Why? the reason follows,—Leret̄ that i. e. *Hoc dimisso* —“ *men might bear reason from me.*” —Therefore,—“ *you use these arts.*”

Instances of the improper use of LEST may be found in almost every author that ever wrote in our language;

because none of them have been aware of the true meaning of the word; and have been misled by supposing it to be perfectly correspondent to some conjunctions in other languages; which it is not.

Thus King Henry the Eighth, in *A necessary Doctrine*, &c. *sixte petition*, says,—“*If we suffer the fyrste suggestion unto synne to tarry any whyle in our hartes, it is great peryll*”
 “*LEST that consent and dede wyll folowe shortly after.*”

Thus *Ascham*, in his *Scholemaster*, says,—“*If a yong gentleman will venture himselfe into the companie of ruffians,*”
 “*it is over great a jeopardie, LEST their facions, maners,*”
 “*thoughts, taulke, and dedes will verie sone be over like.*”

Any tolerable judge of English will immediately perceive something aukward and improper in these sentences; though he cannot tell why. Yet the reason will be very plain to him, when he knows the meaning of these unmeaning particles (as they have been called :) for he will then see at once that *LEST* has no business in the sentences; there being nothing *dimisso*, in consequence of which something else would follow: and that, if he would employ *LEST*, the sentences must be arranged otherwise.

As,—“ *We must take heed that the first suggestion unto sin,*
 “ *tarry not any while in our hearts, LEST that, &c.*”

“ *A young gentleman should be careful not to venture*
 “ *himself, &c. LEST, &c.*”

“ Il est bon quelquefois (says Leibnitz) d'avoir la com-
 “ plaissance d'examiner certaines objections : car, outre
 “ que cela peut servir à tirer les gens de leur erreur, il
 “ peut arriver que nous en profitons nous-mêmes. Car
 “ les paralogismes specieux renferment souvent quelque
 “ ouverture utile, et donnent lieu à résoudre quelques dif-
 “ ficultés considerables. C'est pourquoi j'ai toujours aimé
 “ des objections ingenieuses contre mes propres sentimens,
 “ et je ne les ai jamais examinées sans fruit *.”

I shall, in this instance, be more complaisant than Leibnitz ; and will descend to examine objections which are neither specious nor ingenious : and the rather, because (before their publication) the substance of the *Criticisms on the Diversions of Purley* was, with singular industry and a characteristical affectation, gossiped by the present precious Secretary at War, in Payne the bookseller's shop ; the

* *Essais de Theodicée. Discours de la conformité de la foi avec la raison.*

cannibal commencing with this modest observation, that—
 “ I had found a mare’s nest *.”

I shall examine them in this place, because one fourth part of these criticisms (20 pages out of 79) is employed in objections to the derivation of UNLESS, ELSE, and LEST: which have all three one meaning (viz. of *Separation*) and are all, as I contend, portions of the same verb *Leran*. i. e. of *On-leran*, *A-leran*, *Leran*.

My Norwich critics (for I shall couple them) blame me,

G. Hickee.

* Mr. Secretary and his secretary will not be surpris'd that their disapprobation does not move me; when they consider that, as far as corrupt and unbridled power has been able to enforce the decree, I have, on account of these politics, been, for the last thirty years, robbed of the fair use of life, *interdictus aqua et igni*: and, by what I can prognosticate, I suppose I am still to lay down my life for them. I might have quitted them, as Mr. Secretary has done, and have received the reward of my treachery. But my politics will never be changed, nor be kept back on any occasion: and whilst I have my life, it will neither be embittered by any regret for the past, nor fear for the future.

All

All these I willingly abandon to their mercy and discretion; although they have not shewn any symptoms of either.

But I should be sorry if any of my readers were hastily misled by them to believe,

1st. That “ Grammar was one of the *First* arts which “ probably engaged the attention of the curious.” Pag. 4.

For the contrary is not a matter of conjecture, but of historical fact: and whoever pleases may know at what precise period Grammar, as an art, had its commencement in every nation of Europe.

Or 2dly. That “ The desire which arises in the mind, “ next to that of communicating thought, is certainly to “ use such signs as will convey the meaning clearly and “ precisely.” Pag. 19.

For a desire of *communicating thought*, and a desire of *conveying our meaning* clearly and precisely (though expressed by different words) are not two desires, but one desire: for *as far as* our meaning is not conveyed clearly and precisely, it is not conveyed at all; *so far* there is no communication of thought.

Or

Or 3dly. That “ This desire of conveying our meaning clearly and precisely naturally leads to the use of abbreviations : and that abbreviations seem to bear a much stronger affinity to the desire of perspicuity than to that of dispatch.” Pag. 20.

For, to satisfy himself that the desire of clearness and perspicuity does not lead to the use of abbreviations, (which are substitutes) any person needs only to consult the legal instruments of any civilized nation in the world : for, in these instruments, perspicuity or clearness is the only object. Now these legal instruments have always been, and always must be, remarkably more tedious and prolix than any other writings, in which the same clearness and precision are not equally important. For abbreviations open a door for doubt ; and, by the use of them, what we gain in time we lose in precision and certainty. In common discourse we save time by using the short substitutes HE and SHE and THEY and IT ; and (with a little care on one side and attention on the other) they answer our purpose very well ; or, if a mistake happens, it is easily set right. But this substitution will not be risked in a legal instrument ; and the drawer thinks himself compelled, for the sake of certainty to say—HE (the said John A.) to HIM (the said Thomas B.) for THEM (the said William C. and Anne

Anne D.) as often as those persons are mentioned *. And for the same reason he is compelled to employ many other prolixities of the same kind.

Or 4thly. That "A desire of variety gave birth to
"Pronouns in language, which otherwise would not have
"appeared in it." Pag. 20.

For Pronouns prevent variety.

Or 5thly. That "Articles and Pronouns are neither
"Nouns nor Verbs." Page 26.

For I hope hereafter to satisfy the reader that they are nothing else, and *can be* nothing else.

Or 6thly. That Johnson considered Skinner as so ignorant that his authority ought not to be regarded. Pag. 39 †.

* Abbreviations and substitutes undoubtedly cannot safely be trusted in legal instruments. But it is an unnecessary prolixity and great absurdity which at present prevails, to retain the substitute in these writings at the same time with the principal, for which alone the substitute is ever inserted and for which it is merely a proxy. HE, SHE, THEY, IT, WHO, WHICH, &c. should have no place in these instruments, but be altogether banished from them. And I know a Solicitor of eminence who, at my suggestion, near twenty years ago, did banish them.

† "Skinner, indeed, translates *Onleran*, or rather *Aleran*, to *Dismiss*.
"But Skinner is often ignorant, says Dr. Johnson."

For Johnson speaks of him as one whom "he ought not to mention but with the reverence due to his instructor and benefactor," and to whom he was chiefly indebted for his northern etymologies*.

Or 7thly. That I have myself represented Junius as a "very careless and ignorant" writer. Pag. 51 †.

For (under the article AN) I have noticed "the judicious distinction which Johnson has made between Junius and Skinner." And when I had occasion (under the article BUT) to say that he was careless and ignorant concerning that particular word, I mentioned it as "*wonderful*." But thus these critics meanly attempt to mislead their readers: catching at the word *ignorant* (which when applied to a person in a particular instance, means only that he *did not*

* "For the Teutonic etymologies I am commonly indebted to Junius and Skinner, the only names which I have forbore to quote when I copied their books: not that I might appropriate their labours or usurp their honours, but that I might spare a perpetual repetition by one general acknowledgment. These I ought not to mention but with the reverence due to instructors and benefactors." Johnson's Preface.

know that particular thing) in order fraudulently to fasten an imputation of *general ignorance*.

Or 8thly. That those who have spelled LESS with a single s, were not “civilized people*.” i. e. (I suppose) not capable of the accustomed relations of peace and amity.

Or 9thly. That “The blemishes of Johnson’s Dictionary are not of the kind, *quas incuria fudit*, but the result of too much nicety and exactness.” Pag. 46.—But of this in another place: for it is of more consequence than any thing which relates to these Norwich Critics.

Or, 10thly. That it requires much practice in the Anglo-Saxon or old English writers, and much attention to the circumstance, to observe “the various spellings of one and the same word in the language †.”

For not only are almost all the words spelled differently by different authors; but even by the same author, in the

My critics commence with a solemn protestation, that they “ aim at nothing but a fair representation of the
“ truth.” Pag. v.

Yet twice in the 7th page, and twice in the 8th page, and again in the 25th page of the *Criticisms*, they pretend to quote my words; and falsely, to serve their own purpose, insert a word of their own. My words are—“ Ab-
“ breviations *employed* for the sake of dispatch.” They, five times repeatedly, assert that my words are—“ words
“ *necessary* for dispatch.”

* This groundless apprehension is not unnatural in *one* of my critics. He startles at his own expression—an article of faith. But fear not me, Cassander. I pay the same regard to a sickly conscience that I do to a sickly appetite: and I have known those who, like some honest sectaries, have fainted at the smell of roast beef. No, I shall never wish to impose articles of faith on others, though I am not scared at their imposition upon me. I am a willing conformist to all that is not fatal. I would surely reject poison, i. e. power in the priesthood, and despotism any where; but otherwise I am not dainty: and can feed heartily upon any wholesome food, both in the church and out of it; although it might happen to be coarse and not overpleasing to my palate.

In

In their 8th page they twice assert that I “rank *Articles*, “*Prepositions*, and *Conjunctions*, under the title of *Abbreviations*: and in their 11th page they assert, that I have “made “*Abbreviations* the principal object of the work” I have published, i. e. of the first edition of this volume.

I hope I have there spoken with sufficient clearness to make it impossible for any attentive reader to fall into such an error; or to suppose that I have hitherto spoken one word about those *Abbreviations* which compose my second class. It is evident however that my Critics made no such mistake, but falsified the matter wilfully: for, in their 35th page, they contradict their own previous statement, and acknowledge the fact.—“*Conjunctions* in your system “(say they) are not separate parts of speech, but words “belonging to the species either of *Nouns* or *Verbs*.”

I hardly think it necessary to inform the reader, that I have hitherto spoken little of the *Noun*, nothing of the *Verb*, and nothing of the *Abbreviations*; but have chiefly employed myself to get rid of the false doctrine concerning *Conjunctions*, *Prepositions* and *Adverbs*. The method I have taken may perhaps be injudicious: indeed I have been told so: I may perhaps have begun at the wrong end: but I did it not wantonly or carelessly, but after the most ma-

ture reflexion, and with the view of lessening the difficulties and sparing the labour of those who may chuse to proceed with me in this enquiry. Perhaps when we come to the close of it, my readers will feel with me (they will hardly feel so forcibly as I do) the justness of the following reflexion of Mr. Necker—" Je reviens à mon triste travail. " On aura peine, je le crains, à se former une idée de son " étendue ; car, *en resultat, tout devient simple* : et l' un des " premiers effets de la methode, c'est de cacher les diffi- " cultés vaincues : aussi dans les plus grandes choses comme " dans les plus petites, tous ceux qui jouissent de l' ordre, " n'en connoissent pas le merite *."

In their 13th page, they say, that " It is evident from " my words, that, in my opinion, Mr. Locke was no better " than in a mist when he wrote his famous Essay."

In their 19th page, they represent me (who have denied any abstract or complex ideas) as affirming—" that, in " my opinion, it is the term that gives birth to the ab- " stract idea."

Because I have, in the 255th page of my first edition, observed that " it is contrary to the *customary* progress of

* Nouveaux Eclaircissements sur le compte rendu.

" corruption

“ corruption in words to gain letters ;” and in the 131st page, that “ Letters, like foldiers, are very apt to desert “ and drop off in a long march :”—They twice, in their 41st page, represent me as denying the possibility that any word should ever gain a letter *, or be written by any succeeding author with more letters than by his predecessor.

Because I have, in the 218th page of my first edition, given the corresponding *Terminations* in the other northern languages ; which terminations I suppose likewise, as well as LESS (which is not a modern English imperative) to have been originally the imperatives of their verbs ; They, in their 44th page, and again in their 46th page, charge me with “ contending” that LOOS (so written) is the *present modern* imperative in Dutch.

In their 55th page, though I call Douglas (in the very place alluded to by them) “ one of the most common of “ our old English authors ;” they would make their readers believe that I produce him “ as an Anglo-Saxon writer.”

In the conclusion of their *Criticisms* they say—“ Pro-
“ fessor Schultens was the *first* philologist who *suspected*

* I had given instances in *Unles*, *Whiles*, *Amiddes*, *Amonges*, which afterwards became *Unles*, *Whilst*, *Amidst*, *Amongst*.

“ Prepositions, Conjunctions, Particles in general to be no
 “ more than Nouns or *Verbs*, and *refused* therefore to
 “ make separate classes of them, among those that com-
 “ prehend the Parts of Speech. But he confined himself
 “ in the application of this *Truth* to the learned *Languages*.
 “ You are the first who *applied it* to those which are called
 “ modern.”

These are the gentlemen who commence with a solemn protestation, that they “ aim at nothing but a fair representation of the truth.” And yet, in the above extract, there is not a single proposition that does not convey more than one wilful falsehood.

I will here insert the whole which Schultens has said upon the subject.

Thus it appears that Schultens, without reasoning at all upon the subject, took the old division of language exactly as he found it; and, with his predecessors on the Oriental tongues, considered and ranked the *Particles* as a distinct part of speech. But he condemns the subdivision of particles into *declinable* and *indeclinable*, and proposes to divide them into *separate* and *inseparable*.

In my opinion neither of these distributions is blameable in the grammar of a particular language, whose object is only to assist a learner of that language: but the one subdivision is just as *unphilosophical* as the other. If the *Particles* are all merely Nouns or Verbs, they are equally so whether used separately or not. The term *inseparable*, instead of *not separated*, is likewise justifiable in Schultens, who confined himself to a dead language; and who did not intend to consider the nature of general speech: for, in a dead language, authority is every thing; and those words which cannot be found to have been used separately
 by

by those who bequeathed it, are, to us (speaking or writing it) not only *not separate* but *inseparable*.

But Schultens no where asserts that these particles are ALL nouns or verbs; nor does he adduce a single argument on the subject. He evidently supposes that there might be particles which were neither nouns nor verbs: for, besides the separate rank which he allows them, his words are always carefully coupled when he speaks of these particles. He confines them to *Nouns*, *substantiva* vel *adjectiva* (he never adds *Verba*, which my critics have modestly flipped in for him); but even then he always scrupulously repeats—*bona pars. multa. maximam partem. ferme. præsertim. originis. oriunde. propagantur. referenda. specimina quædam. Nonnulla tangentur. Horum enucleatio ampliora exigit spatia.*—In which (so far from being “the first who suspected it”) he carefully and closely adopts the *qualifying* expressions of very many grammarians (especially Latin grammarians) who had used the same long before him. Many of these I have cited, who went much farther in the *doctrine* than he has done: for it surely was not my business to sink them; but to avail myself of their *partial* authority, and to recommend my *general* doctrine by their *partial* hints and suspicions.

But

But my critics, who say that Schultens *suspected*, in five lines farther impudently convert this *suspicion* into a *Truth*, which they represent him as having demonstrated or at least asserted : and with equal effrontery they tell us, he applied it to the dead *languages* ; and that I *applied* his *Truth* to those which are called modern.

It is however of little consequence to the reader from what quarter he may receive a discovered truth ; or (if it be a discovery) whose name it may bear ; nor do I feel the smallest anxiety on the subject. But bear with my infirmity, reader, if it be an infirmity.—The enemies of the *established* civil liberties of my country have hunted me through life, without a single personal charge against me through the whole course of my life ; but barely because I early descried their conspiracy, and foresaw and foretold the coming storm, and have to the utmost of my power *legally* resisted their corrupt, tyrannical and fatal innovations and usurpations : They have destroyed my fortunes : They have illegally barred and interdicted my usefulness to myself, my family, my friends, and my country : They have tortured my body * : They have aimed at my life and
honour :

* The antient legal and mild imprisonment of this country (mild both in manner and duration, compared to what we now see) was always held to be
Torture

honour :—Can you wonder that, whilst one of these critics takes a cowardly advantage (where I could make no defence) to brand me as an *acquitted Felon* ; I am unwilling (where I can make a defence) that he should, in conjunction with his anonymous associate, exhibit me as a convicted plagiary and impostor ? But no more of these cowardly assassins. I consign them to the lasting contempt they have well earned, and which no future *Title* will ever be able to obliterate from the name of *Windbam*.

It may however be useful to examine the objections to my explanation of UNLESS, ELSE, and LEST ; which are to be found in pages 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 51, 52, 53, 67, 68, 69, 70, 71, 72, of the *Criticisms on the Diversions of Purley*.

Four instances are produced, and only four, in which it is contended that my solution cannot be admitted.

Torture and even *civil death*. What would our old, honest, uncorrupted lawyers and judges (to whom and to the law of the land the word *CLOSE* was in abhorrence) what would they have said to *seven months* of *CLOSE* custody, such as I have lately suffered, without a charge, without a legal authority (for their own monstrous law, which arbitrarily suspended the Habeas Corpus, did not authorize *CLOSE* custody) and without even the most flimsy pretence of any occasion for it ?

“ I have already observed” (say the Critics, page 53.)
 “ that it [Aleran] is not susceptible of the signification
 “ you have all along affixed to it as its primary one ; but
 “ let us suppose it to signify *Dismiss*, and nothing besides ;
 “ we shall find many phrases in which ELSE will hardly
 “ bear to be resolved into *Hoc dismisso* * : witness the fol-
 “ lowing, *Nothing else. How else. What else. Where else.*”

To have a proof of the solidity or futility of this objection, we must have compleat sentences.

EXAMPLE I. *Nothing ELSE.*

You shall have a fool's cap for your pains ; and *Nothing ELSE.*

RESOLUTION.

You shall have a fool's cap for your pains ; and *Nothing BUT* a fool's cap.

i. e. *BUT* for *Be-out.*

You shall have a fool's cap for your pains ; and *Nothing EXCEPT* a fool's cap.

* I have said that ELSE is the Imperative of Aleran, and means *Dimitte*, but they give what they please as my words.

You shall have a fool's cap for your pains ; and, IF NOT a fool's cap, *Nothing*.

You shall have a fool's cap for your pains ; and, DISMISS the fool's cap, *Nothing*.

EXAMPLE 2. *How* ELSE.

If a nation's liberties cannot be secured by a fair representation of the people ; *How* ELSE can they be secured ?

RESOLUTION.

If a nation's liberties cannot be secured by a fair representation of the people ; WITHOUT it, *How* can they be secured ? i. e. WITHOUT for *Be-out*.

If a nation's liberties cannot be secured by a fair representation of the people ; EXCEPT by a fair representation of the people, *How* can they be secured ?

If a nation's liberties cannot be secured by a fair representation of the people ; DISMISS it, (i. e. a fair representation of the people) *How* can they be secured ?

EXAMPLE 3. *What* ELSE.

You have shewn impotence and malice enough ; *What* ELSE have you shewn ?

RESOLUTION.

You have shewn impotence and malice enough ; *What* have you shewn BUT impotence and malice ? Or, *What* BUT them have you shewn ?

You have shewn impotence and malice enough ; EXCEPT them (i. e. impotence and malice) *What* have you shewn ?

You have shewn impotence and malice enough ; DISMISS them, *What* have you shewn ?

EXAMPLE 4. *Where* ELSE.

Honour should reside in the breast of a king ; although it might not be found any *Where* ELSE.

RESOLUTION.

Honour should reside in the breast of a king ; although, EXCEPT in the breast of a king, it might not be found any *where*.

I

Honour

Honour should reside in the breast of a king; although, DISMISS (i. e. *Leave out, Take away, &c.*) the breast of a king, it might not be found any *where*.

Having thus, as I trust, satisfactorily resolved the only instances they have produced as irreconcilable with my etymology; I will proceed to consider their other objections.

I.

They say—"The Latin, the Italian, the French, make use here [that is, where the English use UNLESS] of the word *Except*." Pag. 38.

The Latin commonly employs *Ni si*. i. e. *Ne fit*, the negative preceding the verb: the Italian, *se non*, and the French, *si ne*. i. e. *Sit non, Sit ne*, the negative following the verb: Instances have been already given of the same conjunctive use of *Be not*, or *Be it not* in English. The Italians sometimes use *In fuori, Senza che*; and, if they please, the participle *Eccetto*: the French also sometimes use *Si non que, Si ce n'est que, A moins que, A moins de*; and, if they please, the imperative *Exceptez*, or the participle *Excepté*. And any word or words directing SEPARATION (and none other) in our own, or in any other language, will always be equivalent to UNLESS. And, in-

stead of being an objection, I think this circumstance strongly enforces my etymology.

II.

“ If there be such a verb [as Onleran] in the Anglo-faxon, it must be the same as Onleron, a compound of “ On and Leran.” Pag. 39.

Why it should be doubted that there is any such verb as Onleran in the Anglo-faxon, I cannot imagine; but if any one, beside my critics, should entertain such a doubt, it may easily be removed by opening Lye’s Anglo-faxon dictionary; where both Onleran and Onlyran will be found, with various references to the places where they are used. But that Onleron should be preferred by the critics to Onleran, is truly extraordinary; An being the common termination of the Anglo-faxon Infinitives.

III.

“ Leran in the Anglo-faxon does not signify to *Dismiss*. “ Leran in its primary signification, means to *unbind*; in its secondary, to *redeem*, to *unload*, to *set at liberty*. “ Solvere, redimere, liberare, says the dictionary. In the first sense it answers to the English, to *Loosen*, i. e. to “ *make loose*.” Pag. 39.

“ It is possible that LES should be the Imperative of
 “ Leran; but LESS can have no pretensions to it.” Pag. 40.

“ No sooner has the imperative of the Anglo-saxon verb
 “ Leran shewn itself with you in one form, than it ap-
 “ pears in another. In the very next article to that we
 “ are upon here, you suppose it to be, not LES but LEAS.
 “ But it will be said, how can Lear be the imperative of
 “ Leran?—Certain it is, that the verb Leran is here all
 “ of a sudden transformed into Leoran, in consequence of
 “ which its alliance with the affix Lear becomes unquestion-
 “ able. But Leoran signifies *perdere*, and is the same verb
 “ with the English to *Lose*.” Pag. 41.

If the reader will cast his eye over the following column,
 he will find that no transformation has been suddenly made
 by me; and that the alteration of a letter in the spelling
 of LES, LESS and LEAS, will be no reasonable objection to
 the etymology.

 On-lyran.

Under all these shapes this word appears in the Anglo-faxon language : for I take them all to be one and the same verb, differently pronounced, and therefore differently spelled. And from this Gothic and Anglo-faxon verb, I imagine, proceed not only the conjunctions, as they are called, UNLESS, ELSE, and LEST, and the privative termination LESS, together with LESS the adjective, as it is called, and the comparative LESS, and the superlative LEAST ; but also

To go a *Leasing* *.

And however this word (for they are all one) may be now differently spelled, and differently used and applied in modern English; the reader will easily perceive that SEPARATION is always invariably signified in every use and application of it †.

* *Leasing*, i. e. *Loosing*, i. e. picking up that which is *Loose* (i. e. *Loosed*) separate (i. e. *separated*) or detached (*detaché*) from the sheaf (a).

He never *sent from* his hand. He never *parted with*. He never *miffed* his hold. He never *let go* his hold. He never *lost* his hold. He never *loosed* his hold. He never *let go*.

(a) SHEAF (A. S. *ŕceap*. Dutch *Schoof*) which we call a substantive, is no other than the past participle *ŕceap* (or *ŕceapob*) from the verb *ŕcupian*; which past participle in modern English we write *shove* (or *shoved*). *Sheaf* means, that which is *shov'd* together. N. B. The past participle in the Anglo-saxon is usually formed by adding *ob* (which we now write *ed*) to the præterperfect; but the præterperfect itself is often used (both in Anglo-saxon and in English) for the past participle, without the termination *ob* or *ed*. Now the præterperfect of *ŕcupian* is *ŕceap*.

SHAFT (A. S. *ŕceapƿ*) which seems to us so different a word from *Sheaf*, is yet no other than the same past participle *ŕceapob*, *ŕceapb*, *ŕceapƿ*. *Shaft* means that which is *shov'd*.

I will give a few instances, out of very many, to shew how variously our old English writers spelled and used this same word.

IV.

“ Skinner, Minshew and Johnson agree in deriving it
 “ [ELSE] from the Greek *αλλως* or the Latin *alias*. There
 “ is indeed as much reason to suppose that the Greeks and
 “ Latins borrowed the word from the Germans, as that
 “ these borrowed it from them.—AL and EL may be said
 “ to convey the *same idea* as the Greek *αλλως* and the Latin
 “ *alias*; and, if so, why should we have recourse to the
 “ verb *Alexan* to find their origin?” Pag. 52.

This is truly curious: ELSE from *αλλως* or *alias*; although there is as much reason to suppose that the Greeks and Latins borrowed the word from the Germans, as that these borrowed it from them.

But AL and EL convey the *same idea* as *αλλως* and *alias*: —What is that idea? This is a question which my critics never ask themselves; and yet it is the only rational object of etymology. These gentlemen seem to think that *translation* is *explanation*. Nor have they ever yet ventured to ask themselves, what they mean; when they say that any word *comes* from, is *derived* from, *produced* from, *originates* from, or *gives birth* to, any other word. Their ignorance and idleness make them contented with this vague and misapplied metaphorical language: and if we should beg

them to consider that words have no *loco-motive* faculty, that they do not *flow* like rivers, nor *vegetate* like plants, nor *spiculate* like salts, nor are *generated* like animals; they would say, we quibbled with them; and might perhaps in their fury be tempted to exert against us “ a *vigour* “ *beyond the law.*” And yet, until they can get rid of these metaphors from their *minds*, they will not themselves be fit for etymology, nor furnish any etymology fit for reasonable men.

V.

“ As there is an equivalent in the French of the word
 “ UNLESS, very much resembling it in turn, it is some-
 “ what extraordinary that it should never have occurred to
 “ you, that possibly the one is a translation, or at least an
 “ imitation of the other. This equivalent is *À moins que.*
 “ What word more likely to have *given birth* to UNLESS;
 “ if we may suppose the latter to be a compound of ON
 “ and LESS.” Pag. 39.

“ You add in a note”—“ It is the same imperative LES,
 “ placed at the end of nouns and coalescing with them,
 “ which has given to our language such adjectives as
 “ Hopeless, Restless, &c.”—“ These words have been
 “ all along considered as compounds of *Hope, Rest, &c.*

“ and the adjective *Lefs*, Anglo-faxon *Lear*, and Dutch
 “ *Loos*: and this explanation is so *natural*, so clear and
 “ satisfactory, that it is inconceivable how a man, who
 “ has any notion of neatness and consistency in etymo-
 “ logical disquisitions, could ever think of their being
 “ compounds of a noun, and the imperative of the verb
 “ *Leran*. *LEAS* and *Loos* are still extant, this in the
 “ Dutch, and that in the Anglo-faxon language: and both
 “ answer to the Latin *solutus* in this phrase *solutus cura*.

—“ *Multa adjectiva formantur ex substantivis addendo*
 “ *affixum negativum Lear* vel *Leare*. Hinc apud nos
 “ *carelesse*, &c. Sciendum vero est *Lear* Anglo-faxonicum
 “ deduci a M. Gothico *Laus*, quod significat *liber*, *solutus*,
 “ *vacuus*, et in compositione *privationem* vel *defectum* de-
 “ notat. Hickes. A. S. Gram. Pag. 42.

“ Dr. Johnson gives us, in his dictionary, the following
 “ deduction of the word *LEST*;—“ *LEST*, conjunction from
 “ the adjective *LEAST*, *That not*.” Pag. 70. “ Your im-
 “ provement upon Dr. Johnson is, *Lezed* * *that*, i. e. *Hoc*
 “ *Dimisso*.

* “ *Lezed*.”—They misrepresent my words just as it suits their purpose.
 I have said *LESED*, not *LEZED*. They have not introduced the *z* here by
 accident; for the change is important to the etymology. We could never
 arrive

“ *Dimisso.* Is it not astonishing that a man should plume
 “ himself on having substituted this strange and far-fetched
 “ manner of speaking, for the easy and *natural* explana-
 “ tion which precedes?” Pag. 71.

“ LEST, in the sense of *That not*, or the *Ne* emphati-
 “ cum of the Latin, is generally written in the ancient
 “ language thus, LÆST. And as Læſ is used also in the
 “ Anglo-saxon for the comparative of lýtél, parvus, it is
 “ evident that þ læſ answers to the modern THE, or THAT
 “ LESS. þ Læſt, to THAT LEAST, supple, OF ALL
 “ THINGS.” Pag. 72.

I may answer them in the language of Shakespeare,

———“ merely ye are death’s fools;
 For him ye labour by your flight to shun,
 And yet run toward him still.”

They contend that the conjunction UNLESS, and the pri-
 vative termination LESS, come from the adjective LESS;
 and the conjunction LEST, from the superlative LEAST.
 Well: And what *is* the adjective LESS? What *is* the com-

arrive at LEST from LEZED: for (when the vowel between them is removed)
 z must be followed by d in pronunciation, as s by t.—Take the word
Greased for an instance: if you remove the vowel, you must either pro-
 nounce it *Greaz’d*, or *Greas’t*.

parative

parative LESS? and what *is* the superlative LEAST? I say, *What are they?* for that is the rational etymological question; and not, whence do they *come*.—It is with words as with men: Call this Squire, my Lord; then he will be comparative: Call him by the new-fangled title of Marquis, or call him Duke; then he will be superlative: And yet whosoever shall trust him, or have to do with him, will find to their cost that it is the same individual Squire Windham still. So neither is the substance or meaning or real import or value of any word altered by its grammatical class and denomination.

The adjective *Less* and the comparative *Lesser** are the imperative of *Lesser*; and the superlative *Least* is the past participle.

The idle objections of these critics have brought me to mention this etymology out of its due course: and I do not intend to pursue its consequences in this place. But the reader will see at once the force of this adjective, as used by our ancestors, when, instead of *nineteen* and *eighteen*,

* Parvum—Comparative Minus. Little or Small—Comparative Lesser.

The reader will not be surprised at the irregularity (as it is called) of the above comparisons, when he considers the real meaning and import of *Minus* and *Lesser*.

they said, *Ān lær tƿentiz—Tƿa lær tƿentiz.* i. e. Twenty, *Dismiss* (or *Take away*) one. Twenty, *Dismiss* (or *Take away*) two. We also say,—“ He demanded twenty : I gave him two *Lefs*.” i. e. I gave him twenty, *Dismiss* two. The same method of *resolution* takes place, when we speak of any other quantity besides bare numbers : nor can any instance of the use of *Lefs* or *Least* be found in the language, where the signification of *Dismissing*, *separating*, or *Taking away*, is not conveyed.

VI.

“ LEST for LESED, say you, as BLEST for BLESSED.—
 “ This is the whole of what you tender for our deference
 “ to your opinion : and small as the consideration is, it is
 “ made up of bad coin. LESAN and BLESSIAN cannot,
 “ whatever you may think of the matter, be coupled to-
 “ gether, as belonging to one and the same order of verbs ;
 “ the one has a single, the other a double consonant before
 “ the termination of the infinitive mood : that forms a
 “ long, this a short syllable in the participle passive ; and
 “ consequently, though the latter will bear the contraction,
 “ it does not follow that the former will bear it likewise.
 “ And thus much for the bad coin with which you at-
 “ tempt to put us off.” Pag. 68.

The

The change of the terminating *D* to *T* in the past participles (or in any other words) does not depend either upon single or double consonants, or upon the length or shortness of the syllables; but singly upon the *sound* of the consonant which precedes it. There is an anatomical reason and necessity for it, which I have explained in pages 130 and 402 of the first edition of this volume. But, without the reason, and without the explanation, the facts are so notorious and so constantly in repetition, that they had only to open their eyes or their ears to avoid so palpable an absurdity as this rule about double consonants and long syllables, which they have, for the first time, conjured up. What then; Should I not speak common English, if I should say to Mr. Windham,

“ Thou hast *Fac't* many things;

“ Face not me.”

“ You have *Fleec't* the people, and *Splic't* a rope for your
“ own neck.”

Here are no double consonants; and there are long syllables. But, if they will not believe their eyes and their ears, let them try their own organs of speech; and they will find, that without a vowel between *s* and *D* (or an interval equal to the time of a vowel) they cannot follow

M m

the

the found s with the audible found d; and that, if they will *terminate* with d, they must change the preceding s to a z. All this would be equally true of the *found*, even if the spelling had always continued with a d, and that no writer had ever conformed his orthography to the pronunciation *. But we have very numerous written authorities to dumbfound these critics †. I shall give them but two; believing they are two more than they wish to see.

S I N C E.

SINCE is a very corrupt abbreviation; confounding together different words and different combinations of words:

* He *dismissed*. He *put away*. He *relinquished*.

and is therefore in modern English improperly made (like BUT) to serve purposes which no one word in any other language can answer; because the same accidental corruptions, arising from similarity of sound, have not happened in the correspondent words of any other language.

Where we now employ SINCE was formerly (according to its respective signification) used,

Sometimes,

1. Seoððan, Sioððan, Seððan, Siððan, Siððen, Sithen, Sithence, Sithens, Sithnes, Sithns :

Sometimes,

2. Syne, Sine, Sene, Sen, Syn, Sin :

Sometimes,

3. Seand, Seeing, Seeing that, Seeing as, Sens, Senfe, Sence.

Sometimes,

4. Siððe, Sið, Sithe, Sith, Seen that, Seen as, Sens, Senfe, Sence.

Accordingly SINCE in modern English, is used four ways. Two, as a preposition; connecting (or rather *affecting*)

affecting) words: and Two, as a Conjunction; *affecting* sentences*.

When used as a preposition, it has always the signification either of the past participle *Seen* joined to *thence*, (that is, *seen and thenceforward*;)—or else it has the signification of the past Participle *seen* only.

When used as a Conjunction, it has sometimes the signification of the present participle *Seeing*, or *Seeing that*; and sometimes the signification of the past participle *Seen*, or *Seen that*.

As a Preposition,

I. SINCE (for *Sithan*, *Sithence*, or *Seen and thenceforward*) as,

“ *Such a system of Government, as the present, has not been ventured on by any King SINCE the expulsion of James the Second.*”

* It is likewise used adverbially: as when we say—It is a year SINCE: i. e. a year SEEN.

In French—*une année passée.*

In Italian—*un anno fa*: i. e. *fatto.*

2. SINCE (for Syne, Sene, or Seen) as,
 “ *Did George the Third reign before or SINCE that*
 “ *example ?*”

As a Conjunction,

3. SINCE (for Seanò, Seeing, Seeing as, or Seeing
 that :) as,

“ *If I should labour for any other satisfaction, but that*
 “ *of my own mind, it would be an Effect of pbrenzy in me,*
 “ *not of hope; SINCE it is not Truth, but Opinion that can*
 “ *travel the world without a passport.*”

4. SINCE (for Siðce, Sith, Seen as, or Seen that); as,

“ *SINCE Death in the end takes from all, whatsoever*
 “ *Fortune or Force takes from any one; it were a foolish*
 “ *madness in the shipwreck of worldly things, where all*
 “ *sinks but the sorrow, to save that *.*”

Junius says,—“ *SINCE that Time, exinde. Contractum*
 “ *est ex Angl. Sith thence, q. d. ferò post: ut Sith illud*

* *Vû*, the French past participle of *Voir*, to *See*, is used in the same
 conjunctive manner in that language.

“ *Dis nous pourquoi Dieu l' a permis,*
 “ *Veù qu'il paroît de ses amis ?*”

“ *originem*

“ originem traxerit ex illo **σειφν**, Serò ; Quod habet Arg.
 “ Cod.”

Skinner says,—“ **SINCE**, a Teut. **Sint** Belg. **Sind**.
 “ Post, Postea, Postquam. Doct. Th. H. putat deflexum
 “ à nostro *Sithence*. Non absurdum etiam effet declinare
 “ à Lat. *Exbinc*, E & H abjectis, & x facillimâ mutatione
 “ in s transeunte.” Again he says,—“ **SITH** ab A. S.
 “ **Siddan**, **Syddan**. Belg. **Seyd**, **Sint**. Post, Post illa, Postea.”

After the explanation I have given, I suppose it unnecessary to point out the particular errors of the above derivations.

Sithence and *Sith*, though now obsolete, continued in good use down even to the time of the Stuarts.

Hooker in his writings uses *Sithence*, *Sith*, *Seeing*, and *Since*. The two former he always properly distinguishes; using *Sithence* for the true import of the Anglo-Saxon **Siddan**, and *Sith* for the true import of the Anglo-Saxon **Sidde**. Which is the more extraordinary, because authors of the first credit had very long before Hooker's time confounded them together; and thereby led the way for the

present indiscriminate and corrupt use of *SINCE* in all the four cases mentioned.

Seeing Hooker uses sometimes, perhaps, (for it will admit a doubt *) improperly. And *SINCE* (according to the corrupt custom which has now universally prevailed in the language) he uses indifferently either for *Sitbence*, *Seen*, *Seeing*, or *Sith*.

T H A T.

There is something so very singular in the use of this Conjunction, as it is called, that one should think it would alone, if attended to, have been sufficient to lead the Grammarians to a knowledge of most of the other conjunctions, as well as of itself. The use I mean is, that the conjunction *THAT* generally makes a part of, and keeps

* Such is the doubtful use of it by Shakespear in the following passage :

“ Of all the wonders that I yet have heard,
It seems to me most strange that men should fear;
SEEING that death, a necessary end,
Will come when it will come.”

For it may either be resolved thus;—It seems strange that men, SEEING that death will come when it will come, should fear;

Or—Strange that men should fear; it being SEEN that death will come when it will come.

company

company with most of the other conjunctions.—*If that, An that, Unless that, Though that, But that, Without that, Lest that, Since that, Save that, Except that, &c.* is the construction of most of the sentences where any of those conjunctions are used.

Is it not an obvious question then, to ask, why this conjunction alone should be so peculiarly distinguished from all the rest of the same family? And why this alone should be able to connect itself with, and indeed be usually necessary to almost all the others? So necessary, that even when it is compounded with another conjunction, and drawn into it so as to become one word, (as it is with *sith* and *since*) we are still forced to employ again this necessary index, in order to precede, and so point out the sentence which is to be affected by the other Conjunction?

B.

Ðe, in the Anglo-Saxon, meaning THAT, I can easily perceive that SITH (which is no other than the Anglo-Saxon Siððe) includes THAT. But when SINCE is (as you here consider it) a corruption for *Seeing-as* and *Seen-as*; how does it then include THAT?—In short what is AS? For I can gather no more from the Etymologists concern-

N n

ing

ing it, than that it is derived either from $\acute{\omega}\varsigma$ or from ALS*: But still this explains nothing: for what $\acute{\omega}\varsigma$ is, or ALS, remains likewise a secret.

H.

The truth is that AS is also an article; and (however and whenever used in English) means the same as *It*, or *That*, or *Which*. In the German, where it still *evidently* retains its original signification and use, (as so † also does) it is written—*Es*.

It

* Junius says,—“As, *ut, sicut*, Græcis est $\acute{\omega}\varsigma$.” Skinner, whom S. Johnson follows, says—“AS a Teut. *Als*, *sicut*; eliso scil. propter euphoniâ intermedio L.”

† The German so and the English so (though in one language it is called an *Adverb* or *Conjunction*; and in the other. an *Article* or *Pronoun*) are yet both of them derived from the Gothic article **SΛ, SΩ**. And have in *both* languages retained the original meaning, viz. *It*, or *That*.

Mr. Tyrwhit indeed (not perceiving that *Al-es* and *Al-fo* are different compounds) in a note on the *Canterbury Tales*, V. 7327. says—“Our AS is the same with *Als*. Teut. and Sax. It is only a further corruption of *Alfo*.” But the *etymological* opinions of Mr. Tyrwhit (who derives *For the Nones* from *Pro nunc*) merit not the smallest attention.

Dr. Lowth, amongst *some* false English which he has recommended, and *much* good English which he has reprobated, says—“So—AS, was used by
“ the

It does not come from *Als*; any more than *Though*, and *Be-it*, and *If* (or *Gif*), &c. come from *Although*, and *Albeit*, and

“ the writers of the last century, to express a consequence, instead of so—
 “ THAT. Swift, I believe, is the last of our good writers who has fre-
 “ quently used this manner of expression. It seems *improper*, and is *de-*
 “ *servedly* grown obsolete.”

But Dr. Lowth, when he undertook to write his *Introduction*, with the best intention in the world, most assuredly sinned against his better judgment. For he begins most judiciously, thus,—“ Universal Grammar explains the principles which are common to *All* languages. The Grammar of any particular language *applies* those common principles to that particular language.” And yet, with this clear truth before his eyes, he boldly proceeds to give a *particular* grammar; without being himself possessed of one single principle of *Universal* Grammar. Again, he says,—“ The connective parts of sentences are the most important of all, and require the greatest care and attention: for it is by these chiefly that the train of thought, the course of reasoning, and the whole progress of the mind, in continued discourse of all kinds, is laid open; and on the right use of these, the perspicuity, that is the first and greatest beauty of style, principally depends. Relatives and Conjunctions are the instruments of connection in discourse: it may be of use to point out some of the most common inaccuracies that writers are apt to fall into with respect to them; and a few examples of faults may perhaps be more instructive, than any rules of propriety that can be given.”

And again,—“ I have been the more particular in noting the proper uses of these conjunctions, because they occur very frequently; and, as it was observed before of connective words in general, are of great importance with respect to the clearness and beauty of style. I may add too, because mistakes in the use of them are very common.”

and *Algif*, &c.—For *Als*, in our old English is a contraction of *Al*, and *es* or *as* : and this *Al* (which in comparisons used to be very properly employed before the first *es* or *as*, but was not employed before the second) we now, in modern English, suppress : As we have also done in numberless other instances ; where *All* (though not improper) is not necessary.

Thus,

“ She glides away under the foamy seas
“ As swift as Darts or feather’d arrows fly.”

That is,

“ She glides away (with) THAT swiftness, (with) WHICH feather’d
“ arrows fly.”

After which he proceeds to his examples of the proper and improper use of these connectives :—without having the most distant notion of the *meaning* of the words whose *employment* he undertakes to settle. The consequence was unavoidable : that, (having no *reasonable* rule to go by, and no apparent *signification* to direct him) he was compelled to trust to his own *fanciful* taste (*as in the best it is*), and the uncertain authority of others : and has consequently approved and condemned without truth or reason. “ Pour-
“ quoi (says Girard) apres tant de siecles & tant d’ouvrages, les gens de
“ Lettres ont-ils encore des idées si informes & des expressions si confuses,
“ sur ce qu’ils font profession d’étudier & de traiter ? Ou s’ils ne veulent
“ pas prendre la peine d’approfondir la matiere, comment osent-ils en
“ donner des leçons au public ? C’est ce que je ne conçois pas.”

When

When in old English it is written,

“ Sche—————
 “ Glidis away under the fomy Seis
 “ ALS swift as Ganze or fedderit arrow fleis.”

Douglas. Booke 10. Pag. 323.

Then it means,

“ With ALL THAT swiftness *with* WHICH, &c.”

After what I have said, you will see plainly why so many of the conjunctions may be used almost indifferently (or with a very little turn of expression) for each other. And without my entering into the particular minutiae in the use of each, you will easily account for the slight differences in the turn of expression, arising from different customary abbreviations of *construction*.

I will only give you one instance, and leave it with you for your entertainment: from which you will draw a variety of arguments and conclusions.

“ And soft he fighed, LEST men might him hear.
 And soft he figh'd, THAT men might NOT him hear.
 And soft he fighed, ELSE men might him hear.
 UNLESS he fighed soft, men might him hear.
 BUT that he fighed soft, men might him hear.
 WITHOUT he fighed soft, men might him hear.
 SAVE that he fighed soft, men might him hear.
 EXCEPT he fighed soft, men might him hear.”

According to your account then, Lord Monboddo is extremely unfortunate in the particular care he has taken to make an exception from the general rule he lays down, of the Verbs being the *Parent* word of all language, and to caution the *candid* reader from imputing to him an opinion that the *conjunctions* were intended by him to be included in his rule, or have any connexion whatever with *Verbs* *.

H. In

* “ This so copious derivation from the verb in Greek, naturally leads
 “ one to suspect that it is the *Parent* word of the whole language: and
 “ indeed I believe that to be the fact: for I do not know that it can be
 “ certainly shewn that there is any word that is undoubtedly a primitive,
 “ which is not a *verb*; I mean a *verb* in the stricter sense and common
 “ acceptance of the word. By this the candid reader will not understand
 “ that I mean to say that *prepositions*, *conjunctions*, and such like words,
 “ which are rather the *Pegs* and *Nails* that fasten the several parts of the
 “ language together than the language itself, are derived from verbs or are
 “ derivatives of any kind.” Vol. II. Part 2. B. 1. Ch. 15.

Court

H.

In my opinion he is not less unfortunate in his *rule* than in his *exception*. They are both equally unfounded: and yet as well founded, as almost every other position which he has laid down in his two first volumes. The whole of which is perfectly worthy of that profound politician and philosopher, who esteems that to be the most perfect form, and as he calls it—“*the last stage of civil society* *,” where government leaves nothing to the free-will of individuals; but interferes with the domestic private lives of the citizens,

Court de Gebelin is as positive in the contrary opinion,—“ Il a fallu nécessairement,” (says he) “ que tous les autres mots vinssent des noms. Il n’est aucun mot, de quelqu’ espece que ce soit, & dans quelque langue que ce soit, qui ne descende d’un nom.”—Hist. de la Parole, page 180.

* “ But the *private* lives of the subjects under those governments are left as much to the free will of each individual, and as little subjected to rule, as in the American Governments above mentioned: and every man in such a state may with impunity educate his children in the worst manner possible; and may abuse his own person and fortune as much as he pleases; provided he does no injury to his neighbours, nor attempts any thing against the state. The *last* stage of civil society, in which the progression ends, is that most perfect form of polity which, to all the advantages of the Governments last mentioned, joins the care of the education of the youth, and of the private lives of the citizens; neither of which is left to the will and pleasure of each individual; but both are regulated by PUBLIC WISDOM.”—Vol. I. page 243.

and

and the education of their children! Such would in truth be the *last* stage of civil society, in the sense of the lady in the comedy; whose lover having offered—"to give her the *last* proof of love and marry her."—She aptly replied, "The *last* indeed; for there's an end of loving."

B.

But what say you to the bitter irony with which Mr. Harris treats the moderns in the concluding note to his doctrine of Conjunctions? Where he says,—“It is somewhat surprising that the politest and most elegant of the Attic writers, and Plato above all the rest, should have their works filled with *Particles* of all kinds and with *Conjunctions* in particular; while in the modern polite works, as well of ourselves as of our neighbours, scarce such a word as a *Particle* or *Conjunction* is to be found. Is it that where there is connection in the meaning, there must be words had to connect; but that where the connection is little or none, such connectives are of little use? That houses of cards without *cement* may well answer their end; but not those houses where one would chuse to dwell? Is this the cause? Or have we attained an elegance to the antients unknown?”

“*Venimus ad summam fortune, &c.*”

What will you say to Lord Monboddo, who holds the same opinion with Mr. Harris * ?

H.

I say that a little more reflection and a great deal less reading, a little more attention to common sense †, and less blind prejudice for his Greek commentators, would have made Mr. Harris a much better Grammarian, if not perhaps a Philosopher.—What a strange language is this to come from a man, who at the same time supposes these *Particles* and *Conjunctions* to be words *without meaning!* It should seem, by this insolent pleasantry, that Mr. Harris reckons it the perfection of composition and discourse to

* “ This abundance of Conjunctions and Particles,” (says he, Vol. II. page 179) “ is, in my opinion, one of the greatest beauties of the Greek language, &c. For I am so far from thinking that that disjointed composition and short cut of style, which is so much in fashion at present, and of which Tacitus among the ancients is the great model, is a beauty: that I am of opinion it is the affectation of a deformity; nor is there, in my apprehension, any thing that more disfigures a style, or makes it more offensive to a man of true Taste and Judgement in writing, &c.”

“ I shall only add at present, that one of the greatest difficulties of composing in English appears to me to be the *want* of such connecting particles as the Greeks have, &c.”

† The author would by no means be understood to allude to the COMMON SENSE of Doctors Oswald, Reid, and Beattie; which appears to him to be senseless.

use a great many words *without meaning!*—If so, perhaps Master Slender's language would meet with this learned Gentleman's approbation.

“ I keep *but* three men *and* a boy *yet, till* my mother
 “ be dead; *but what though yet* I live a poor gentleman
 “ born.”

Now here is *cement* enough in proportion to the building. It is plain, however, that Shakespeare (a much better philosopher by the bye than most of those who have written philosophical Treatises) was of a different opinion in this matter from Mr. Harris. He thought the best way to make his Zany talk unconnectedly and nonsensically was to give him a quantity of these elegant words *without meaning* which are such favourites with Mr. Harris and Lord Monboddo.

B.

This may be raillery perhaps, but I am sure it is neither reasoning nor authority. This instance does not affect Mr. Harris: for *All cement* is no more fit to make a firm building than no cement at all. Slender's discourse might have been made equally as unconnected without any particles, as with so many particles together. It is the proper mixture

ture of particles and other words which Mr. Harris would recommend; and he only censures the moderns for being too sparing of Particles.

H.

Reasoning! It disdains to be employed about such conceited nonsense, such affected airs of superiority and pretended *elegance*. Especially when the whole foundation is false: for there are not any useful connectives in the Greek, which are not to be found in modern languages. But for his opinion concerning their employment, you shall have *authority*, if you please; Mr. Harris's favourite authority: an Antient, a Greek, and one too writing professedly on Plato's opinions, and in defence of Plato; and which if Mr. Harris had not forgotten, I am persuaded, he would not have contradicted.

Plutarch says—“ Il n'y a ny Beste, ny instrument, ny

CHAP. IX.

OF PREPOSITIONS.

B.

WELL, Sir, what you have hitherto said of the Conjunctions will deserve to be well considered. But we have not yet entirely done with them : for, you know, the Prepositions were originally, and for a long time, classed with the Conjunctions : and when first separated from them, were only distinguished by the name of *Prepositive Conjunctions* *.

H. Very

* The philosophers of Hungary, Turkey and Georgia at least were in no danger of falling into this absurdity : for Dr. Jault, in his preface to (what is very improperly, though commonly, called) Menage's Dictionary, tells us—" Par le fréquent commerce que j'ai eu avec eux [*les Hongrois*] " pendant plusieurs années, ayant tâché de pénétrer à fonds ce que ce " pouvoit être que cet idiôme si différent de tous les autres d' Europe, je " les ai convaincus qu'ils étoient Scythes d' origine, ou du moins que leur " langue étoit une des branches de la Scythique ; puisqu' à l' égard de " l'inflexion

H.

Very true, Sir. And these *Prepositive* conjunctions, once separated from the others, soon gave birth to another subdivision *; and Grammarians were not ashamed to have a class of *Postpositive Prepositives*.—"Dantur etiam *Postpositiones* (says Caramuel); quæ *Præpositiones postpositivæ* solent dici, nullâ vocabulorum repugantiâ: vocantur enim *Præpositiones*, quia sensu saltem præponuntur; & *Postpositivæ*, quia vocaliter postponi debent."

B.

But as Mr. Harris still ranks them with *Connectives*, this, I think, will be the proper place for their investigation. And as the title of *Prepositive* or *Preposition* "only expresses their place and not their character; their Definition, he says, will distinguish them from the former *Connectives*." He therefore proceeds to give a *complete* definition of them, viz.

"l'inflexion elle avoit rapport à celle des Turcs, qui constamment passoient pour Scythes, étant originaire du Turquestan, et de la Tranfoxiane; et qu' outre cela les PRÉPOSITIONS de ces deux langues, aussi bien que de la Georgienne, se mettoient toujours *après leur regime*, contre l'ordre de la nature et la signification de leur nom."

* Buonmattei has still a farther subdivision; and has made a separate part of speech of the *Segnacasi*.

—“ *A Preposition is a part of speech, devoid itself of signification; but so formed as to unite two words that are significant, and that refuse to coalesce or unite of themselves.*”—Now I am curious to know, whether you will agree with Mr. Harris in his definition of this part of Speech; or whether you are determined to differ from him on every point.

H.

Till he agrees with himself, I think you should not disapprove of my differing from him; because for this at least I have his own respectable authority. Having defined a word to be a “ *Sound significant;*” he now defines a Preposition to be a word “ *devoid of signification.*” And a few pages after, he says, “ *Prepositions commonly transfuse something of their own meaning into the word with which they are compounded.*”

Now, if I agree with him that words are founds *significant*; how can I agree that there are sorts of words *devoid of signification*? And if I could suppose that Prepositions are *devoid of signification*; how could I afterwards allow that they transfuse something of *their own meaning*?

B.

This is the same objection repeated, which you made before to his definition of the *first* sort of Connectives. But is it not otherwise a complete definition?

H.

Mr. Harris no doubt intended it as such: for, in a note on this passage, he endeavours to justify his doctrine by a citation from Apollonius*; which he calls “rather a descriptive sketch than a complete definition.” But what he gives us in the place of it, as *complete*, is neither definition nor even description. It contains a *Negation* and an *Accident*; and nothing more. It tells us what the Preposition *is not*; and the *purpose* for which he supposes it to be *employed*. It might serve as well for a definition of the *East India Company*, as of a Preposition: for of that we may truly say—“It is not itself any part of the

“ Government, but so formed as to unite those who would not have coalesced of themselves *.”—Poor Scaliger (who well knew what a definition should be) from his own melancholy experience exclaimed—“ *Nibil infelicius grammatico definitore !*” Mr. Harris’s logical ignorance most happily deprived him of a sense of his misfortunes. And so little, good man, did he dream of the danger of his situation ; that whilst all others were acknowledging their successful though indefatigable labours, and lamenting their insuperable difficulties, he prefaces his doctrine of *Connectives* with this singularly confident introduction ;—“ What remains of our work is a matter of less difficulty ; “ it being the same here as in some historical picture :

* Let the reader who has any sense of justice, or who feels any anxiety for the welfare of his country, look back and re-consider the corrupt use which one Coalition would have made of this company in the year 1783, and the corrupt use which another Coalition has made of it since. Let him then recall to his mind the parallel history of the Company of St. George, at the close of the flourishing days of the Republic of Genoa ; and, in spite of all outward appearances, he will easily be able to foretell the speedy fate of this pilfered and annihilated body. Without any external shock, the sure cause of its rapid destruction is in its present despotic and corrupt constitution : to the formation of which (and to no supposed delinquency nor personal enmity) that much injured man, Mr. Hastings, was made the victim by all the corrupt parties in the kingdom.

“ when

“ when the principal figures are once formed, it is an *easy*

However contradictory and irregular all this may appear to you, Mr. Harris has advanced nothing more than what the most approved Greek and Latin Grammarians have de-

H.

Yes. Yes. I know the errors are ancient enough, to have been long ago worn out and discarded. But I do not think that any excuse for repeating them. For a much less degree of understanding is necessary to detect the erroneous principles of others, than to guard against those which may be started for the first time by our own imagination. In these matters it shews less weakness of judgment, because it is more easy, to deceive ourselves, than to be deceived by others.

B.

You will do well, Sir, to be particularly mindful of what you said last; and to place your strongest guard there,

where

where it may be most wanted: for you seem sufficiently determined not to be deceived by *others*. And with this caution, I shall be glad to hear your account of the Preposition. Perhaps I shall save time, at least I shall sooner satisfy myself, by asking you a few questions.—Pray how many Prepositions are there?

H.

Taking the Philosophy of language as it now stands, your question is a very proper one. And yet you know, that Authors have never hitherto been agreed concerning their number. The ancient Greek Grammarians admitted only eighteen, (six monosyllables and twelve dissyllables). The ancient Latin Grammarians above fifty*. Though the moderns, Sanctius, Scioppius, Perizonius, Voffius, and others, have endeavoured to lessen the number without fixing it †.

Our countryman Wilkins thinks that thirty-six are sufficient ‡.

* Scotus determines them to be forty-nine.

† Sanctius says,—“ Ex numero Præpositionum, quas Grammatici pertinaciter asserunt; aliquas sustulimus.”

‡ “ There are thirty-six Prepositions which may, with much less equivocalness than is found in instituted languages, suffice to express those various respects which are to be signified by this kind of Particle.”

Girard says, that the French language has done the business effectually with thirty-two : and that he could not, with the utmost attention, discover any more *.

But the authors of the Encyclopedie [*Preposition*] though they also, as well as Girard, admit only *simple* Prepositions, have found in the same language, forty-eight.

And Buffier gives a list of seventy-five ; and declares that there is a great number besides, which he has not mentioned.

The greater part of authors have not ventured even to talk of any particular number : and of those who have, (except in the Greek) no two authors have agreed in the

same language. Nor has any one author attributed the same number to any two different languages.

Now this discordance has by no means proceeded from any carelessness or want of diligence in Grammatists or Lexicographers: but the truth is, that the fault lies with the Philosophers: for though they have pretended to teach others, they have none of them known themselves what the nature of a Preposition is. And how is it possible that Grammarians should agree, what words ought or ought not to be referred to a class which was not itself ascertained. Yet had any of the definitions or accounts yet given of the Preposition and of language been just, two consequences would immediately have followed; viz. That all men would have certainly known the precise number of Prepositions; and (unless Things, or the operations of the human mind, were different in different ages and climates) their number in all languages must have been always the same.

B.

You mean then now at last, I suppose, to fix the number of real Prepositions in our own, and therefore in all other languages.

H. Very

H.

Very far from it. I mean on the contrary to account for their variety. And I will venture to lay it down as a rule, that, of different languages, the least corrupt will have the fewest Prepositions: and, in the same language, the best etymologists will acknowledge the fewest. And (if you are not already aware of it) I hope the reason of the rule will appear in the sequel.

There is not, for instance, (as far as I am aware) a preposition in any language, answering directly to the French preposition CHEZ *. Yet does it by no means follow, that the modern French do therefore employ any operation of the mind, or put their minds into any posture different from their ancestors or from other nations; but only that

* In the same manner *Temoin* and *Moyennant* are prepositions peculiar also to the French, but which require no explanation: because the *Substantive* *Temoin*, and the *Participle* *Moyennant*, are not confined to their *prepositive* employment alone (or, as in the Latin it is termed, put *absolutely*), but are used upon all other common occasions where those denominations are wanted; and their signification is therefore evident. *MOIENING* was antiently used in English.—“ At whose instigation and stirring I (Robert Copland) have me “ applied, *Moiening* the helpe of God, to reduce and translate it.” (See *Ames’s History of Printing*; or see *Percy’s Reliques*, Vol. II. p. 273.) Had the use of this word continued in our language, it would certainly have been ranked amongst the prepositions; and we should consequently have been considered as exerting one *operation of the mind* more than we do at present.

there happens not to be in any other language a similar corruption of some word corresponding precisely with CHEZ. Which is merely a corruption of the Italian substantive CASA *: in the same manner as *Cbofe* is from *Cofa*; or as
Cheval,

* Though the bulk of the French language is manifestly a corrupt derivation from the Italian, yet, as Scaliger observed of the Romans—"Aliqui autem, inter quos Varro, etiam malignè eruerunt omnia è Latinis, Græcisque suas origines invadere:" So have the French, in all former times, shewn a narrow jealousy and envy towards Italy, its authors, and language: to which however they originally owe every thing valuable which they possess. From this spirit Henri Estiene, *De la precellence du langage François*, (a book of ill-founded vanity, blind prejudice and partiality) asserts that the Italians have taken—"la bande des mots qu'on appelle *indeclinables*; " comme sont *Adverbes, Conjonctions, & autres particules*" from the French: and amongst others he mentions, *se, se non, che, ma, and Senza*. But I shall hereafter have occasion to shew clearly the injustice of Henry Estiene to the Italian language, when I come to compare the respective advantages and disadvantages of the modern languages of Europe, and whence they flow. In the mean time it may not perhaps be improper to offer a general rule, by which (when applicable) all etymological disputants ought to be determined, whether such determination be favourable or adverse to their national vanity and prejudice. Viz. That where different languages use the same or a similar *particle*, that language ought to be considered as its legitimate parent, in which the true meaning of the word can be found, and where its use is as common and familiar as that of any other verbs and substantives.

A more modern author (and therefore less excusable) Bergier, *Elémens primitifs des langues*, having first absurdly imagined what is contradicted by all experience, viz.—"A mesure que les langues se sont éloignées de leur source primitive, les mots ont reçu de nouveaux accroissemens: plus elles

Cbeval, cbémise, chemin, cbetif, chevreuil, cber, cbenu, cbien, toucher, &c. are corrupted from *Cavallo, camiscia, camino, cattivo, cavriuolo, caro, canuto, cane, toccare, &c.*

If

ont été cultivées plus elles se font allongées. On ne leur a donné de l'agrément, de la cadence, de l'harmonie qu'aux dépens de leur brieveté :— Proceeds to this consequence,—“ Les Romains ne nous ont pas communiqué que les termes simples, les liaisons du discours : la plupart de ces termes sont *plus courts* en François qu'en Latin, & les Gaulois s'en servoient avant que de connoître l'Italie ou ses habitants.”—And then to shew more strongly the spirit which animates him (a spirit unworthy of letters and hostile to the investigation of truth) adds—“ Sommes nous suffisamment instruits, lorsque nous avons appris de nos Etymologistes, que tel mot François est emprunté du Latin, tel autre du Grec, celui-ci de l'Espagnol, celui-la du Teuton ou de l'Allemand ? Mais les Latins ou les Allemands de qui l'ont ils reçu ? Ne semble-t-il pas que nos ayeux ne subsistoient que des emprunts, tandis que les autres peuples estoient riches de leur propre fonds ? *Je ne puis souffrir qu'on nous envoie mendier ailleurs, tandis que nous l'avons chez nous.*”

Perhaps there was something of this jealousy in Menage, when (not being able to agree with Sylvius, that *CHEZ* should be written *Sus* or *Sur*) he asserts that—“ *CHEZ* vient de *APUD* d'ou les Italiens ont fait *APU*, & les Espagnols *CABE* en preposant comme nous un *c.*”

Mr. de Brosses however, superior to all little prejudices, says—“ On voit bien que *CHEZ* est une traduction de l' Italien *CASA*, & que quand on dit *CHEZ VOUS*, c'est comme si l'on disoit *CASA VOI* (*MAISON* de vous.) Et encore ce dernier mot est plutot dans notre langue une *adverbe* qu'une *particule* ; ainsi que beaucoup d'autres dont l'origine devient plus facile a reconnoître. Mais quand ce sont de *pures Particules*, il est mal aisé de retrouver la premiere cause de leur formation ; qui sans doute a souvent
“ été

If the ingenious Abbé Girard had known what CHEZ really was, he would not have said (*vrais principes*, Disc. 11.) “CHEZ a pour son partage particulier une idée d’habitation, soit comme patrie, soit comme simple demeure domestique.” But he would have said CHEZ is merely a corruption of CASA, and has all the same meaning in French, which CASA has in Italian *: and that is something more than *patrie* or *demeure domestique*; viz.—*Race, Family, Nation, Sect, &c.* [“Ancien patron de la CASE,” says M. de Buffon Rabutin in his Memoirs. Tom. 2. pag. 175.] Neither again would he have said—“Il s’agit ici de la per-

“été arbitraire & précipitée: comme je l’ai remarqué en parlant de petites expressions conjonctives, qui ne servent qu’à former la liaison du discours.”

Formation mécanique des langues, Tom. II. Chap. 14. Art. 254.

The French Law Term *Chezé*, which has caused to that people so much litigation, and to their lawyers so much controversy (and which some of their authors would have written *Chezné*, because they supposed the land to have been formerly measured with a *Chain*; and others would have written *choisé* parce-que l’ainé *choisit*) is derived in like manner from CASA, and means no more than what we in English call the *Home-stead* or *Home-stall*, whose extent is, of course, variable; but ought in reason to go with the house.

If therefore the French Etymologists thus stumbled at CHEZÉ, it is no wonder they knew not what to make of CHEZ, whose corruption had proceeded one step farther.

* S. Johnson (who was conversant with no languages, but English, Latin, and Greek) under the word AT, says hardily, but not truly, that—“CHEZ means sometimes *application to*, or *dependance on*.”

“ mission que l'usage a accordée à quelques prepositions
 “ d'en regir d'autres en certaines occasions : c'est, à dire,
 “ de les souffrir dans les complemens dont elles indiquent
 “ le rapport ; comme—*Je viens DE CHEZ vous.*” He
 would have seen through this grammatical mystery of one
 preposition's governing another ; and would have said, that
 DE may be prefixed to the *Substantive* CHEZ (id est, CASA) in
 the same manner as to any other substantive. For,—“ *Je*
 “ *viens De CHEZ vous,*” is no other than—*Je viens de CASA*
à vous : or (omitting the *Segnacaso* *) *de CASA vous ;* or,
de CA vous †.

But

* That this omission of the *Segnacaso* is not a strained supposition of my
 own, we have the authority of Henri Estiene (*De la precell. du lang. Fran.*
 p. 178.)

“ *Qui la maison son voisin ardoir voit,*
 “ *De la fienne douter se doit.*

“ Et faut noter—*la maison son voisin*—estre dict. à la façon ancienne ; au
 “ lieu de dire—*la maison DE son voisin.*”

So the Diction. della Crusca—“ *CASA.* Nome dopo di cui vien lasciato

So

But thus it is that when Grammar comes at length (for its application is always late) to be applied to a language; some long preceding corruption causes a difficulty: ignorance of the corruption gives rise to some ingenious system to account for these words which are considered as original and not corrupted. Succeeding ingenuity and heaps of misplaced learning increase the difficulty, and make the error more obstinate, if not incurable.

B.

Do you acknowledge the preposition to be an indeclinable word?

No.

B.

Do you think it has a meaning of its own?

H.

Yes most certainly. And indeed, if prepositions had no proper meaning of their own, why several unmeaning prepositions * ; when one alone must have answered the purpose equally ? The cypher, which has no value of itself, and only serves (if I may use the language of Grammarians) to *connote* and *consignify*, and to change the value of the figures, is not several and various, but uniformly one and the same.

You were not mistaken, Sir. For though Vossius and others have concurred with the censure which Priscian passes on the Stoics for classing Prepositions and Conjunctions, &c. together under one head; yet in truth they are both to be accounted for in the same way.

“ cation even when taken by itself. *Adjectives, Prepositions, Adverbs, &c.* have all compleat, separate meanings, not difficult to be discovered.”

Having in that letter explained the *unmeaning* conjunctions, with which alone I had at that time any *personal* concern; and not foreseeing that the *equally unmeaning* Prepositions were afterwards by a solemn decision (*but without explanation*) to be determined *more certain* than *certainty*; I was contented by that note to set other persons who might be more capable and more at leisure than myself, upon an enquiry into the subject: being very indifferent from whose hand the explanation might come to the public. I must acknowledge myself a little disappointed, that in eight years time, no person whatever has pursued the inquiry; although the success I had had with the Conjunctions might reasonably have encouraged, as it much facilitated, the search. But though all men (as far as I can learn) have admitted my particular proofs concerning the Conjunctions, none have been inclined (as I wished they might be) to push the *principle* of my reasoning farther, and apply it to the other *Particles*. The ingenious author of *Essays Historical and Moral*, published in 1785, says, (page 125)—“ Possibly *Prepositions* were, “ at first, short interjectional words, such as our carters and shepherds make “ use of to their cattle, to denote the relations of place. Or perhaps a “ more skilful Linguist and antiquarian may be able to trace them from “ other words, as the Conjunctions have been traced by the author above “ mentioned.”—It is therefore manifest, that the *principle* of my reasoning was either not sufficiently opened by me, or has not taken sufficient hold of the minds of others; and that it is necessary still farther to apply it to the other *Particles*.

The

The Prepositions as well as the Conjunctions are to be found amongst the other Parts of Speech. The same sort of corruption, from the same cause, has disguised both : and ignorance of their true origin has betrayed Grammarians and Philosophers into the mysterious and contradictory language which they have held concerning them. And it is really entertaining, to observe the various shifts used by those who were too sharp-witted and too ingenuous to repeat the unsatisfactory accounts of these Prepositions, handed down by others ; and yet not ingenuous enough to acknowledge their own total ignorance on the subject.

The Grammarian says, it is none of his business ; but that it belongs to the philosopher : and for that reason only he omits giving an account of them. Whilst the Philosopher avails himself of his dignity ; and, when he meets with a stubborn difficulty which he cannot unravel, (*and only then*), disdains to be employed about *Words* : although they are the necessary channel through which his most precious liquors must flow.

“ Grammatico satis est, says Sanctius, si tres has partes

Mr. Locke complains of the neglect of others in this particular; denies it to be his business “to examine them
 “in their full latitude:” and declares that he “intends
 “not here, a full explication of them.” Like Scaliger—
Non in animo est.—And this serves him as an apology for
 not examining them at all in any latitude; and for giving
 no explication of them whatever in *any* place.

The Author of the Port Royal philosophical grammar, saves himself by an *Almost*. “Ce sont *presque* les mêmes
 “rappports dans toutes les langues, qui sont marqués par
 “les Prepositions.” And therefore he will content himself to mention some of the *principal* French Prepositions, without obliging himself to fix their exact number. And as Sanctius had his reason for turning the business over to a philosophical grammar, whilst he was treating of a *particular* language: so this author, who was writing a *general* grammar, had his reason for leaving it to those who wrote particular grammars.—“C’est pourquoi je me contenterai
 “de

“ de rapporter ici les *principaux* de ceux qui sont marqués
 “ par les prepositions de la Langue Française; sans
 “ m’obliger à en faire un denombrement exact, comme il

M. L’Abbé de Condillac’s method is most conveniently cavalier, and perfectly adapted to a writer of his description.—“ Je me bornerai à vous en donner quelques
 “ exemples: car *vous jugez bien*, Monseigneur, que je *ne*
 “ *me propose pas* d’analyser les acceptions de toutes les pre-
 “ positions.” And again, concludes—“ En voilà assez,
 “ Monseigneur * !”

Even the learned President de Broffes, in his excellent treatise De la formation mechanique des Langues, is compelled to evade the inquiry. “ L’accroissement en tête

 “ cessoires. C’est un effet commun des Prepositions; qui

The laborious and judicious R. Johnson, includes in one page of his National Grammar all that he has to offer on the *Adverb, Conjunction, and Preposition*: and concludes with saying—“ And here, if I would shew the reader the
 “ defectiveness of this Grammar (Lilly’s) in the account

perly within his province; but saves himself by *selecting* such as he conceives *sufficient*. Speaking of Particles, he says, (Part 3. Chap. 2.)—"The words of this kind are
 " exceeding numerous and equivocal in all languages, and
 " add much to the difficulty of learning them. It being
 " a very hard matter to establish the just number of such
 " as in all kinds are necessary *, and to fix to them their
 " proper significations: which yet *ought to be done in a*
 " *philosophical grammar*. I shall in this Essay *select* out of
 " instituted languages, such of the several sorts as I con-
 " ceive *sufficient* for this purpose."

The learned Alexander Gil employs the denomination *Consignificativa*; which is more comprehensive than *Particle*, but not more explanatory.

" DE CONSIGNIFICATIVIS.

" Vox consignificativa *Articulos* comprehendit, *Adverbia*
 " item, *Conjunctiones, Præpositiones, Interjectiones*. Et quia
 " in his invariabilibus *nihil difficultatis* est, præter ipsam

* No wonder that Wilkins found it so hard to fix the number which was necessary, since their number in every language depends merely upon how many of the most common words shall become obsolete or corrupted. This being mere matter of particular fact and of accident, can have no place in general or philosophical grammar.

“ vocum cognitionem, classēs enim eædem sunt, ut usus
 “ idem qui Latinæ, et aliis linguis, *ad Lexicographos*
 “ harum rerum studiosum lectorem ablegabo.”

Logonomia Anglica. Pag. 67, 68.

Doctor Wallis, after Gil’s example, says—“ Adverbia
 “ eandem sortiuntur naturam apud nos quam apud Latinos,
 “ aliasque gentes. Conjunctiones item eundem habent
 “ usum quem apud Latinos, aliosque. Præpositiones
 “ etiam eandem sortiuntur naturam, quam aliis linguis.
 “ Si quis tamen harum aliquot voces potius adverbia esse
 “ dicat; aut etiam ex adverbii aliquot ad conjunctionum
 “ classē referre malit: non tanti est ut hac de re quis
 “ contendat; cum, & apud Latinos, eadem non raro vox
 “ nunc pro adverbio, nunc pro conjunctione censenda est.
 “ Neque aliquod grave detrimentum pateremur, si tam ad-
 “ verbia quam conjunctiones & interjectiones, ad eandem
 “ classē redigerentur. *Est quidem nonnihil discriminis,*
 “ *sed leviusculum.*” Cap. XIII.

Greenwood rashly ventures a little farther than any other person; and upon Mr. Locke’s authority, acknowledging it to be his duty to do what other grammarians had neglected, says—

“ I am sensible that what I have here done”—(and he has done nothing)—“ is slight and superficial to what may
 “ and ought to be done; but if this shall meet with any
 “ encouragement, I may be excited to make farther im-
 “ provements in these matters, by taking more pains to
 “ observe nicely the several *postures of the mind* in dif-
 “ course *.”

Now Greenwood's grammar did actually meet with very great and extraordinary encouragement; and went through several editions speedily during the author's life; but he never fulfilled his promise: nor indeed is there any thing about him, to incline us to believe that he was a fit person for such an undertaking.

But not to multiply quotations without end (in which you are much better versed than I am) you know that all philosophers, philologers and grammarians, who have owned a dissatisfaction in the accounts already given of the Particles, have yet, for some shuffling reason or other, all

* In the same manner Greenwood slips the Conjunctions. “ But this

desired to be excused from giving a satisfactory account themselves.

B.

But why not concur with M. M. de Port Royal, and the President de Broffes? They are free from the contradiction and inconsistency of Mr. Harris's account of the Prepositions. For they acknowledge them to have a signification. —“ On a eu recours, *say* the former, dans toutes les “ langues à une autre invention; qui a été *d'inventer de* “ *petits mots* pour être mis avant les noms; ce qui les a “ fait appeller Prepositions.”

And M. de Broffes, with great ingenuoufness tells us, (Traité de la formation mécanique des langues, Tom. 2. Chap. XI. Art. 198.)—“ Chacune des Prepositions a son “ sens propre, mais qu'on applique à beaucoup d'autres “ sens par extension & par approximation. Elles sont des “ formules abrégées, dont l'usage est le plus frappant & le “ plus commode dans toutes les langues pour circonftancier “ les idées: elle sont d'elles-mêmes Racines primitives; “ mais je n'ai pas trouvé *qu'il fut possible d'assigner la cause* “ *de leur origine*: tellement que j'en crois la formation “ *purement arbitraire*. Je pense de même des Particules, “ des Articles, des Pronoms, des Relatifs, des Conjonctions; “ en

“ en un mot, de tous les *monosyllabes* si frequens qu'on
 “ emploie pour lier les paroles d'un discours, en former
 “ une phrase construite, & lui donner un sens determiné
 “ pour ceux qui l'entendent. Car ce n'est qu'en faveur de
 “ ceux qui ecoutent qu'on introduit cet appareil de tant de
 “ conjonctions. Un homme seul au monde ne parleroit
 “ que peu ou point. Il n'auroit besoin d'aucune de ces
 “ conjonctions pour former sa phrase mentale. Les seuls
 “ termes principaux lui suffiroient; parcequ'il en a dans
 “ l'esprit la perception circonstanciée, & qu'il sçait assez
 “ sous quel aspect il les emploie. Il n'en est pas de même,
 “ lorsqu'il faut exprimer la phrase au dehors. Un tas de
 “ mots isolés ne feront non plus une phrase pour l'audi-
 “ teur, qu'un tas de pierres toutes taillées ne seroient une
 “ maison, si on ne les arrangeoit dans leur ordre, & si on
 “ ne les lioit pas du fable & de la chaux. L'apprêt de
 “ cette espece est tres-pressé pour un homme qui veut se
 “ faire entendre. Cependant *la nature, les images, l'imi-*
 “ *tation, l'onomatopée, tout lui manque ici*: car il n'est pas
 “ question de peindre & de nommer *aucun objet reel*; mais
 “ seulement de donner à entendre *de petites combinaisons*
 “ *mentales, abstraites, & vagues*. Alors l'homme aura usé
 “ pour conjonctions des *premiers sons brefs & vagues* qui
 “ lui venoient à la bouche. L'habitude en aura bientôt

“ fait connoître la force & l'emploi. Ces petits signes de liaison sont restés en grand nombre dans chaque langue, où l'on peut les considérer comme sons radicaux; & ils y ont en effet leurs dérivés.”

And again (Art. 254.) “ J'ai fait voir combien il étoit difficile de trouver le premier germe radical des *Particules* conjonctives du discours. Leur examen m'a fait pencher à croire qu'elles étoient pour la plupart *arbitraires*; & que le prompt & prodigieux besoin qu'on en a pour s'enoncer, ayant forcé les hommes de chaque pays à prendre le premier monosyllabe ou geste vocal indéterminé qui lui venoit à la bouche dans le besoin pressant, l'usage reiteré en avoit déterminé l'habitude significative. Il n'est guère plus aisé d'affigner la première origine de *Prepositions*, quoiqu'un peu plus composées que les simples particules conjonctives.”

And again (Art. 274.) “ On auroit à parler aussi de la cause des différentes terminaisons dans les langues, de la signification des prepositions, de leur variété à cet égard: car les mêmes ont plusieurs sens très-différents. C'est une matière extrêmement vaste & très-philosophique.”

H. Messieurs

H.

Messieurs de Port-Royal and M. de Broffes deserve for ever to be mentioned with respect and gratitude; but, upon this occasion, I must answer them in the words of Mer. Casaubon (*de lingua Hebraica*)—"Perfuadeant fortasse
 " illis; qui de verbis fingulis, etiam vulgatissimis, à phi-
 " losophis, priusquam imponerentur, itum in consilium
 " cedunt. Nos, qui de verborum origine longe aliter
 " opinamur, planè pro fabula habemus."

Language, it is true, is an Art, and a glorious one; whose influence extends over all the others, and in which finally all science whatever must centre. But an art springing from necessity, and originally invented by artless men; who did not sit down like philosophers to invent
 " *de petits mots pour etre mis avant les noms;*" nor yet did they take for this purpose "*des premiers sons brefs &*
 " *vagues qui leur venoient à la bouche** : but they took such

* It will seem the more extraordinary that M. de Broffes should entertain this opinion of the *Particles*, when we remember what he truly says of *Proper names*.—"Tous les mots formant les noms propres ou appellatifs des personnes, ont en quelque langage que ce soit, ainsi que les mots formants les noms des choses, une origine certaine, une signification déterminée, une etymologie véritable. Ils n'ont pas, plus que les autres mots, été imposés sans cause, ni fabriqués au hasard, seulement pour produire
 " un.

such and the same (whether great or small, whether monosyllable or polysyllable, without distinction) as they employed upon other occasions to mention the same *real objects*. For *Prepositions* also are the names of *real objects*. And these *petits mots*, happen in this case to be so, merely from their repeated corruption, owing to their frequent, long-continued, and perpetual use.

B.

You assert then that what we call *Prepositions*, and distinguish as a separate part of speech, are not a species of words essentially or in any manner different from the other parts: that they are not “*little words invented to put before nouns, and to which all languages have had recourse* :” but that they are in fact either Nouns or Verbs. And that (like the Conjunctions) *Prepositions* are only words which have been disguised by corruption; and that Etymology will give us in all languages, what Philosophy has attempted in vain. And yet I cannot but perceive that such words as *Prepositions*, are absolutely necessary to discourse.

“ un bruit vague. Cependant comme la plupart de ces mots ne portent à l’oreille de ceux qui les entendent aucune autre signification que de désigner les personnes nommées; c’est sur tout à leur égard que le vulgaire est porté à croire qu’ils sont dénués de sens & d’étymologie.”

H.

I acknowledge them to be undoubtedly necessary. For, as the necessity of the *Article* (or of some equivalent invention) follows from the impossibility of having in language a distinct name or *particular term* for each particular individual *idea* *; so does the necessity of the *Preposition* (or of some equivalent invention) follow from the impossibility of having in language a distinct *complex term* for each different *collection of ideas* which we may have occasion to put together in discourse. The addition or subtraction of *any one* idea to or from a collection, makes it a different collection: and (if there were degrees of impossibility) it is still more impossible to use in language a different and distinct *complex term* for each different and distinct *collection of ideas*, than it is to use a distinct *particular term* for each particular and individual idea. To supply, therefore, the place of the complex terms which are wanting in a language, is the Preposition employed. By whose aid *complex* terms are prevented from being infinite or too numerous, and are used only for those collections of ideas which we have most frequently occasion to mention in discourse. And this end is obtained in the most simple manner in the world. For having occasion in communication to mention a collection

* See before, Chap. V.

of ideas, for which there is no one single *complex* term in the language, we either take that complex term which includes the greatest number, though not *All*, of the ideas we would communicate ; or else we take that complex term which includes *All*, and the fewest ideas *more* than those we would communicate : and then by the help of the Preposition, we either make up the deficiency in the one case, or retrench the superfluity in the other.

For instance,

1. " *A House WITH a Party-wall.*"
2. " *A House WITHOUT a roof.*"

In the first instance, the complex term is deficient : The Preposition directs to add what is wanting. In the second instance, the complex term is redundant : The Preposition directs to take away what is superfluous.

Now considering it only in this, the most simple light, it is absolutely necessary, in either case, that the Preposition itself should have a meaning of its own : for how could we otherwise make known by it our intention, whether of adding to or retrenching from, the deficient or redundant complex term we have employed ?

If to one of our modern grammarians, I should say—“*A House*, JOIN;”—He would ask me—“JOIN *what* ?”—But he would not contend that JOIN is an indeclinable word, and has no meaning of its own: because he knows that it is the Imperative of the Verb, the other parts of which are still in use; and its own meaning is clear to him, though the sentence is not completed. If, instead of JOIN, I should say to him,—“*A House* WITH;”—he would still ask the same question, “WITH *what* ?” But if I should discourse with him concerning the word WITH, he would tell me that it was a *Preposition*, an *indeclinable* word, and that it had no meaning of its own, but only a *connotation* or *consignification*. And yet it would be evident by his question, that he felt it had a meaning of its own; which is indeed the same as JOIN *. And the only difference

* WITH is also sometimes the Imperative of *þyrðan*. *To be*. Mr. Tyrwhit, in his Glossary (*Art.* BUT) has observed truly, that—“BY and WITH are often synonymous.”—They are always so, when WITH is the Imperative of *þyrðan*: for BY is the Imperative of *Beon*. *To be*.

He has also in his Glossary (*Art.* WITH) said truly, that—“WITH *mischance*. WITH *mifadventure*. WITH *sorwe*. 5316. 7797. 6916. 4410. 5890. 5922. are to be considered as parenthetical curses.”—For the literal meaning of those phrases, is (not *God yeve*, but)—BE *mischance*, BE *mifadventure*, BE *sorrow*, to him or them concerning whom these words are spoken. But Mr. Tyrwhit is mistaken, when he supposes—“WITH *evil* *prese*. 5829. WITH *harde grace*. 7810. WITH *sory grace*. 12810.”—to

ference between the two words WITH and JOIN, is, that the other parts of the verb $\Psi\Omega\Lambda\text{N}$, $\pi\acute{\iota}\delta\alpha\text{n}$, *to join* (of which WITH is the imperative) have ceased to be employed in the language *. So that my instances stand thus,

1. *A House*

have the same meaning : for in those three instances, WITH is the Imperative of $\Psi\Omega\Lambda\text{N}$; nor is any parenthetical curse or wish contained in either of those instances.

As WITH means JOIN, so the correspondent French Preposition, AVEC, means—*And Have that, or Have that also*. And it was formerly written *Avecque*, i. e. *Avezque*. So Boileau, *Satire 1*.

“ Quittons donc pour jamais une ville importune :
 “ Où l’honneur est en guerre AVECQUE la fortune.”

And again, *Satire 5*.

“ Mais qui m’assurera, qu’en ce long cercle d’ans,
 “ A’ leurs fameux epoux vos ayeules fidelles
 “ Aux douceurs des galands furent toujours rebelles ?
 “ Et comment sçavez-vous, si quelqu’ audacieux
 “ N’a point interrompu le cours de vos ayeux ?
 “ Et si leur sang tout pur AVECQUE leur noblesse,
 “ Est passé jusqu’ à vous de Lucrece en Lucrece.”

* We still retain in English speech, though not often used in books, the substantives WITH or WITHE, WITHERS, and WITHER-BAND.

“ Me thou shalt use in what thou wilt, and doe that with a slender twist,
 “ that none can doe with a tough WITH.”

Euphues and his England. Pag. 136.

“ They

1. *A House JOIN a Party-wall.*
2. *A House BE-OUT a roof.*

And indeed so far has always been plainly perceived, that WITH and WITHOUT are directly opposite and contradictory. Wilkins, without knowing what the words really were, has yet well expressed their meaning, where he says that WITH is a preposition—"relating to the notion of *social* or circumstance of *society affirmed*; and that WITH-OUT is a preposition relating to the same notion of *social*, or circumstance of *society denied*."

"They had arms under the straw in the boat; and had cut the WITHES that held the oars of the town-boats, to prevent any pursuit, if they should be forced to fly." *Ludlow's Memoirs.* Pag. 435.

And again, pag. 437. "One of the four watermen was the person who cut the WITHES of all the town-boats, to prevent them from pursuing."

"This troublesome rowing, though an ingenious invention of the Chinese, hath raised this proverb amongst them, *that their boats are paper, and their watermen iron*; because they are made of very thin boards, like our flit deal, which are not nailed, but fastened together with WITHS, in the Chinese tongue called *rotang*; by which means the boats, though often beaten by the strong current against the rocks, split not, but bend and give way." *History of China.* By John Ogilby. Vol. 2. pag. 609.

"The only furniture belonging to the houses, appears to be an oblong vessel made of bark, by tying up the ends with a WITHE."

Captain Cook's description of Botany Bay.

And it would puzzle the wisest philosopher to discover opposition and contradiction in two words, where neither of them had any signification.

B.

According then to your explanation, the Preposition WITHOUT, is the very same word, and has the very same meaning as the Conjunction WITHOUT. Does not this in some measure contradict what you before asserted, concerning the faithfulness of words to the standard under which they were originally enlisted? For there does not appear in this case to be any melting down of two words into one, by such a corruption as you before noticed in some of the Conjunctions. And yet here is one and the same word used both as a Conjunction and as a Preposition.

H.

There is nothing at all extraordinary, much less contradictory in this; that one and the same word should be applied indifferently either to single *words* or to *sentences*: (for you must observe that the apparently *different application* constitutes the only difference between Conjunctions and Prepositions): For I may very well employ the same word of direction, whether it be to add a *word* or to add a *sentence*: And again, one and the same word of direction
will

will serve as well to take away a *word* as to take away a *sentence*. No wonder therefore that our ancestors (who were ignorant of the false divisions and definitions of Grammar which we have since received) should have used BUT indifferently to direct the omission either of a *word*, or of a *sentence*: and should have used WITHOUT also indifferently for the omission of a *sentence* or of a *word*. But after our authors became more generally and better acquainted with the divisions and definitions of the Greek and Latin Grammarians, they attempted by degrees to make our language also conform to those definitions and divisions. And after that it was, that BUT ceased to be commonly used as a *known* Preposition; and WITHOUT ceased to be *correctly* used as a Conjunction.

As the meaning of these two words BUT (I mean that part which is corrupted from ΒΥΤΑΝ) and WITHOUT, is exactly the same, our authors would most likely have had some difficulty to agree amongst themselves, which should be the Preposition and which the Conjunction; had it not been for the corruption of ΒΟΤ, which becoming BUT, must necessarily decide the choice: for though WITHOUT could very well supply the place of the *Preposition* BUT, it could not supply the place of the Βοτ part of the *Conjunction* BUT: whereas BUT could entirely supply the place
of

of the *Conjunction* WITHOUT. And this, I take it, is the reason why BUT has been retained as a Conjunction, and WITHOUT has been retained as a Preposition.

Not however that they have been able so to banish the old habit of our language, as that BUT should always be used as a Conjunction, and WITHOUT always as a Preposition. (I mean that BUT should always apparently be applied to *sentences*, and WITHOUT always to *words*; for that, it must be remembered, is the only difference between Conjunctions and Prepositions): for BUT is still used frequently as a *Preposition*: though Grammarians, forgetful or heedless of their own Definitions, are pleased to call it always a Conjunction;

As thus, “ *All BUT one.*”

And, though it is not *now* an *approved* usage, it is very frequent in common speech to hear WITHOUT used as a conjunction; where, instead of WITHOUT, a correct modern speaker would use UNLESS, or some other equivalent acknowledged conjunction: and that for no other reason, but because it has pleased our Grammarians to exclude WITHOUT from the number of conjunctions.

B. And

B.

And is not that reason sufficient, when the best writers have for a long time past conformed to this arrangement?

H.

Undoubtedly. Nor do I mean to censure those who follow custom for the propriety of a particular language : I do not even mean to condemn the custom : for in this instance it is perfectly harmless. But I condemn the false philosophy which caused it. I condemn those who wilfully shut their eyes, and affect not to perceive the indifferent application of **BUT, AND, SINCE, IF, ELSE, &c.** both to *words* and to *sentences* ; and still endeavour by their definitions to uphold a distinction which they know does not exist even in the practice of any language, and which they ought to know cannot exist in theory.

To the pedagogue indeed, who must not trouble children about the corruption of words, the distinction of prepositions and conjunctions may be useful enough (on account of the *cases* which they govern when applied to *words* ; and which they cannot govern when applied to *sentences*) ; and for some such reason perhaps, both this and many other distinctions were at first introduced. Nor would they have caused any mischief or confusion, if the *philosopher*

had not adopted these distinctions; taken them for real differences in *nature*, or in the *operations of the human mind*; and then attempted to account for what he did not understand. And thus the *Grammatist* has misled the Grammarian, and both of them the Philosopher.

B.

“ SANS eyes, SANS teeth, SANS taste, SANS every thing.”

This preposition too, which was formerly used instead of WITHOUT, you mean, I suppose, to account for in the same manner: It can be shewn, I suppose, to be the Imperative of some obsolete Saxon verb, having a similar meaning.

H.

SANS, though sometimes used instead of WITHOUT, is not an English but a French Preposition, and therefore to be derived from another source.

“ Et je conferverai, malgré votre menace,

“ Une âme SANS-courroux, SANS crainte, et SANS audace.”

Adelâide.

Nor is it a *verb*, but a *substantive*: and it means simply *Absence*. It is one proof, amongst many others, that Plutarch's half-conjecture was not ill-founded. After all, he thinks it may be worth considering, whether the Prepositions

fitions may not be perhaps little fragments of words, used in haste and for dispatch, instead of the whole words *. SANS is corrupted from the preposition *Senza* of the Italians (by old Italian authors written *Sanza* †) who frequently use it

* Ορα δε μη κομμασι και θραυσμασιν ονοματων εοικασιν, ωσπερ γραμματων παρασμοσι και κεραιας οι σπενδοντες γραφουσι, &c.

Again Menage says, that SANS *deffus deffous*, should be written SENS *deffus deffous* “ comme on escrit, *En tout Sens, dece Sens là, &c.* SENS, c'est à dire, *Face, visage, situation, posture, &c.*—Menage is surely wrong: for it means, *without top or bottom*, i. e. a situation of confusion in which you cannot discern the top from the bottom; or say which is the top and which the bottom. We translate it by a similar expression in English, *Upside down*, by our old authors more properly written *Up so down*.

it thus; SENZA *di te*. i. e. ASSENZA *di te*. The French (as we have seen in *Chez*) omit the *Segnacaso*, and say SANS *toi*. And as from the Italian Assenza they have their *Absence*; or, as they pronounce it, Absence or Absans; so have they their preposition SANS from SENZA or SANZA. But I persuade myself that you can have no doubt of the meaning of this preposition SANS, when you find the signification of its *correspondent* words equally clear in other languages.

The Greek preposition $\chi\omega\rho\iota\varsigma$, is the corrupted Imperative of $\chi\omega\rho\iota\zeta\epsilon\iota\nu$, to sever, to disjoin, to separate.

B.

If there were no other relations declared by the prepositions, besides those of *adding* or *taking away*, perhaps this explanation might convince me ; but there are assuredly Prepositions employed for very different purposes. And instead of selecting such instances as may happen to be suited particularly to your own hypothesis, I should have more satisfaction if you would exemplify in those which Mr. Harris has employed to illustrate his hypothesis.

“ From these principles” (he says, Book II. Chap. 3.)
 “ it follows, that when we form a sentence, the substan-
 “ tive without difficulty coincides with the verb, from the

“ à dire, *Bourg de Debors*.” Histoire de la ville de Geneve par Jacob Spon ; who gives us likewise from their Archives the translation of it into *Burgi Foris*.  “ à elle et au galant, si elle avoit *Forfait* à son honneur.”

George Dandin. Act I. Sce. 4.

From the French we have many English words preceded by *For* with this meaning ; as, *Forfeit*, *Foreclose*, &c. and we had anciently many more.

“ natural coincidence of substance and energy.—*The Sun*
 “ *warmeth*.—So likewise the energy with the subject on
 “ which it operates.—*Warmeth the earth*.—So likewise
 “ both substance and energy with their proper attributes.
 “ —*The splendid sun genially warmeth the fertile earth*.—
 “ But suppose we were desirous to add other substantives ;
 “ as for instance, *Air*, or *Beams* : How would these coin-
 “ cide, or under what character could they be introduced ?
 “ Not as Nominatives or Accusatives, for both those places
 “ are already filled ; the Nominative, by the substance
 “ *Sun* ; the Accusative by the substance *Earth*. Not as
 “ Attributes to these last, or to any other thing : for at-
 “ tributes by nature, they neither are nor can be made.
 “ Here then we perceive the rise and use of *prepositions*.
 “ By these we connect those substantives to sentences,
 “ which at the time are unable to coalesce of themselves.
 “ Let us assume for instance a pair of these connectives,
 “ THRO' and WITH, and mark their effect upon the sub-
 “ stances here mentioned. *The splendid sun WITH his*
 “ *beams genially warmeth THRO' the air the fertile earth*.—
 “ The sentence as before remains intire and one ; the
 “ substantives required are both introduced ; and not a
 “ word which was there before, is detruded from its
 “ proper place.”

The first of this pair of his connectives (WITH) you have already explained, and I am willing to admit the explanation. It is,—*The splendid sun JOIN his beams*—instead of one single complex term including *Sun and beams*.

But of what *real object* is THROUGH the name?

H.

Of a very common one indeed*. For as the French peculiar preposition CHEZ is no other than the Italian substantive CASA or CA, so is the English Preposition THOROUGH †, *Thourough, Thorow, Through, or Thro'*, no other than the Gothic *substantive* **ἈΛΗΚΣ**, or the Teutonic

* All *Particles* are in truth, in all languages, the signs of the most common and familiar ideas, and those which we have most frequently occasion to communicate: they had not otherwise become *Particles*. So very much mistaken was Mr. Locke, when he supposed them to be the signs or marks of certain operations of the mind for which we had either *none or very deficient names*; that the *Particles* are always the words which were the most common and familiar in the language from which they came.

† S. Johnson calls "*Thorough*,—the word *Through* extended into two syllables."—What could possibly be expected from such an Etymologist as this? So that Mr. Harris's instance (translated into modern English) stands thus,

 “ —PASSAGE *the air—(or, the air being the passage or medium) “the fertile earth.”* And in the same manner may you translate the preposition *Through* in every instance where *Thro'* is used in English, or its equivalent preposition is used in any other language*.

After having seen in what manner the substantive *House* became a preposition in the French, you will not wonder to see *Door* become a preposition in the English: and though in the first instance it was more easy for you to perceive the nature of the French preposition *Chez*; because, having no preposition corresponding to it in English, there was so much prejudice out of your way; yet I am persuaded you will not charge this to me as a fantastical or far-fetched etymology, when I have placed before you, at

Though it is not from Asia or its confines, that we are to seek for the origin of this part of our language; yet is it worth noticing here, that the Greek (to which the Gothic has in many particulars a considerable resemblance) employs the word *Θυρα* for *Door*. And both the Persian (which in many particulars resembles the Teutonic*) and

* “ On n'est pas étonné de trouver du rapport entre l'*Anglois* & le

the Chaldean, use THRO for *Door*. You will observe, that the Teutonic uses the same word *Tburab* both for the *substantive*, (*Door*) and for what is called the *Preposition* (*Thorough*). The Dutch, which has a strong antipathy to our *Tb*, uses the very word *Door* for both. The Anglo-saxon, from which our language immediately descends, employs indifferently for *Door* either *Dure* or *Thure*. The modern German (directly contrary to the modern English) uses the initial *Tb* (*Tbur*) for our *substantive* (*Door*) and the initial *D* (*Durch*) for our *preposition* (*Thorough*): and it is remarkable, that this same difference between the German and the English, prevails in almost all cases, where the two languages employ a word of the same origin, having either of those initials. Thus *Distel und Dorn*—in German are—*Thistles and Thorns* in English. So the English *Dear, Dollar, Deal*, are in German *Theur, Thaler, Theil*.

Minshew and Junius both concur that *Door*, &c. are derived from the Greek *Thura*: Skinner says, *perhaps* they are all from the Greek *Thura*: and then without any reason (or rather as it appears to me against all reason) chuses rather uselessly to derive the substantive *Door* from the Anglo-saxon preposition *Thor, Tbrub, Thurb*. But I am persuaded, that *Door* and *Thorough* have one and the same

same Gothic origin $\alpha\lambda\eta\kappa\alpha$, mean one and the same thing; and are in fact one and the same word.

B.

There is an insuperable objection, which, I fear, you have not considered, to this method of accounting for the Prepositions: for if they were really and merely, as you imagine, common Nouns and Verbs, and therefore, as you say, the names of *real objects*, how could any of them be employed to denote not only *different* (*¹) but even contrary relations? Yet this is universally maintained, not only by Mr. Harris, but by Messrs. de Port Royal (†²) by the

(*¹) “ Certains mots sont *Adverbes, Prepositions, & Conjonctions* en même temps. Et repondent ainsi en même temps à diverses parties d’oraison, selon que la Grammaire les employe diversément.”

(†²) “ On n’a suivi en aucune langue, sur le sujet des prepositions, ce que la raison auroit désiré: qui est, qu’un rapport ne fût marqué que par une preposition; & qu’une preposition ne marquât qu’un seul rapport. Car il arrive au contraire dans toutes les langues ce que nous avons vu dans ces exemples pris de la Françoisé; qu’un même rapport est signifié par plusieurs prepositions; & qu’une même preposition marque divers rapports.”

M. M. de Port Royal.

president de Broffes, and by all those writers whom you most esteem; and even by Wilkins (* 3) and Locke.

Now if these words have a meaning as you contend, and are constantly used according to their meaning, which you must allow, (because you appeal to the use which is made of them as proof of the meaning which you attribute to them): how can they possibly be the names of *real and unchangeable objects*, as common nouns and verbs are? I am sure you must see the necessity of reconciling these contradictory appearances.

H.

Most surely. And I think you will as readily acknowledge the necessity of first establishing the facts, before you call upon me to reconcile them. Where is the Preposition to be found which is at any time used in contrary or even in different meanings?

(* 3) " Some of these prepositions are *absolutely determined* either to *motion* or to *rest*, or the *Terminus of Motion*. Others are relatively applicable to *both*. Concerning which this rule is to be observed: that those which belong to motion cannot signify rest; but those which belong to rest may signify motion in the *terminus*."

WILKINS. Part III. Chap. 3.

B.

Very many instances have been given ; but none stronger than those produced by Mr. Harris of the Preposition FROM ; which he shews to be used to denote *three* very different relations, and the two last in absolute contradiction to each other.

“ FROM, he says, denotes the detached relation of Body ;
 “ as when we say—*These Figs came FROM Turkey.*—So as
 “ to *Motion* and *Rest*, only with this difference, that *here*
 “ the preposition *varies its character with the Verb.* Thus
 “ if we say—*That lamp hangs FROM the ceiling*—the pre-
 “ position FROM assumes a character of *quiescence.* But
 “ if we say—*That lamp is falling FROM the ceiling,*—the
 “ preposition in such case assumes a character of *Motion.*”

Now I should be glad you would shew me what one Noun or Verb can be found of so versatile a character as this preposition : what name of any one real object or sign of one idea, or of one collection of ideas, can have been instituted to convey these different and opposite meanings ?

H.

Truly, none that I know of. But I take the word FROM (*preposition*, if you chuse to call it so)—to have as
 clear,

clear, as precise, and at all times as uniform and unequivocal a meaning, as any word in the language. FROM means merely BEGINNING, and nothing else. It is simply the Anglo-saxon and Gothic Noun *Frum*, *FROM*, *Beginning*, *Origin*, *Source*, *fountain*, *author* *. Now then, if you please, we will apply this meaning to Mr. Harris's formidable instances, and try whether we cannot make FROM speak clearly for itself, without the assistance of the *interpreting* Verbs; who are supposed by Mr. Harris, to vary its character at will, and make the preposition appear as inconsistent and contradictory as himself.

Figs *came* FROM Turkey.

Lamp *falls* FROM Ceiling.

Lamp *hangs* FROM Ceiling.

Came is a complex term for one species of motion.

Falls is a complex term for another species of motion.

Hangs is a complex term for a species of attachment.

Have we occasion to communicate or mention the COMMENCEMENT OR BEGINNING of these motions and of this

* "Ne wæðð ge se ðe on frumman worhte. he worhte wæpman and wifman." That is, Annon legistis, quod qui eos *in principio* creavit, creavit eos marem & foeminam. St. Matt. xix. 4.

attachment; and the *place* where these motions and this attachment commence or begin? It is impossible to have complex terms for each occasion of this sort. What more natural then, or more simple, than to add the signs of those ideas, viz. the word BEGINNING (which will remain always the same) and the name of the *place* (which will perpetually vary)?

Thus,

- “ Figs came—BEGINNING Turkey.
- “ Lamp falls—BEGINNING Cieling.
- “ Lamp hangs—BEGINNING Cieling.”

That is

Turkey the *Place* of BEGINNING to come.
 Cieling the *Place* of BEGINNING to fall.
 Cieling the *Place* of BEGINNING to hang.

B.

You have here shewn its meaning when it relates to *place*; but Wilkins tells us, that “ FROM refers *primarily* to *place* and *situation*; and *secondarily* to *time*.” So that you have yet given but half its meaning.

—“ FROM morn till night th’ eternal Larum rang.”—

There is no *place* referred to in this line.

H. FROM

H.

FROM relates to every thing to which BEGINNING relates *, and to nothing else: and therefore is referable to *Time* as well as to *motion*: without which indeed there can be no *Time*.

* Is it unreasonable to suppose that, if the meaning of this word FROM, and of its correspondent prepositions in other languages, had been clearly understood; the Greek and Latin Churches would never have differed concerning the *Eternal Procession* of the Holy Ghost FROM the Father, or FROM the Father and the Son. And that, if they had been determined to separate, they would at least have chosen some safer cause of schism?

“ *Apelles*. I have now, *Campaspe*, almost made an end.

“ *Campaspe*. You told me, *Apelles*, you would never end.

“ *Ap*. Never end my love: for it shall be *Eternal*.

“ *Cam*. That is, neither to have *Beginning* nor ending.”

“ To say that *Immensity* does not signify boundless space, and that *Eternity* does not signify Duration or Time *without Beginning* and end; is, I think, affirming that words have no meaning.”

Dr. Sam. Clarke's fifth Reply to Leibnitz's fifth Paper. Sect. 104-106.

Is it presumptuous to say, that the explanation of this single preposition, would have decided the controversy more effectually, than all the authorities and all the solid arguments produced by the wise and honest bishop Procopowicz? And thus have withheld one handle at least of reproach, from those who assert—“ *Que l'on pourroit justement definir la theologie—L'art de composer des chimeres en combinant ensemble des qualites impossibles à concilier.*”—*Systeme de la Nature*, Tom. II. p. 55.

“ The

“ The Larum rang BEGINNING Morning.”

i. e. Morning being the *time* of its BEGINNING to ring.

B.

Still I have difficulty to trust to this explanation. For Dr. S. Johnson has numbered up *twenty* different meanings of this Preposition FROM. He says, it denotes,

- “ 1. *Privation.*
- “ 2. *Reception.*
- “ 3. *Descent or Birth.*
- “ 4. *Transmission.*
- “ 5. *Abstraction.*
- “ 6. *Succession.*
- “ 7. *Emission.*
- “ 8. *Progress from premisses to inferences.*
- “ 9. *Place or Person from whom a message is brought.*

- “ 17. *Derivation.*

Y y

“ 18.

- “ 18. *Distance from the past.*
 “ 19. *Contrary to.*
 “ 20. *Removal.*”

To these he adds *twenty-two* other manners of using it. And he has accompanied each with instances sufficiently numerous, as proofs*.

H.

And yet in all his instances (which, I believe, are above *seventy*) FROM continues to retain invariably one and the

* Greenwood says—“ FROM signifies *Motion* from a place; and then it
 “ is put in opposition to TO.

“ 2. It is used to denote the *Beginning of time.*

“ 3. It denotes the *Original of Things.*

“ 4. It denotes the *Order of a thing.* (“ And in these three last senses
 “ it is put before *Adverbs.*”)

“ 5. It signifies *Off.*”

The caprice of language is worth remarking in the words *Van* (the Dutch *From*) and *Rear*, both of which we have retained in English as *Substantives*, and therefore they are allowed with us to have a meaning. But being only employed as *Prepositions* by the Dutch, Italian and French; our philosophers cannot be persuaded to allow them any transmarine meaning.—*Animam mutant qui trans mare currunt.* And thus *Van* in Holland, *Von* in Germany, *Avanti* in Italy, and *Avant* and *Derriere* in France, are merely *des petits mots inventés pour être mis AVANT les noms*, or, in the VAN of Nouns.

fame

favour); since FROM means *Commencement* or *Beginning*, TO must mean *End* or *Termination*. And indeed I perceive that, if we *produce* Mr. Harris's instances, and say,

“ *These figs came from Turkey to England.*

“ *The lamp falls from the ceiling to the ground.*

“ *The lamp hangs from the ceiling to the floor;*”

as the word FROM denotes the *commencement* of the motion and hanging; so does the word TO denote their *termination*: and the places where they end or terminate, are respectively *England, Ground, Floor.*

And since we have as frequently occasion to mention the *termination*, as we have to mention the *commencement* of motion or time; no doubt it was as likely that the word denoting *End* should become a particle or preposition, as the word which signified *Beginning*. But in the use of these two words TO and FROM, I observe a remarkable difference. FROM seems to have *two* opposites; which ought therefore to mean the same thing: and, if meaning the same, to be used indifferently at pleasure. We always use FROM (and *From* only) for the *beginning* either of *time* or *motion*: but for the *termination*, we apply sometimes TO and sometimes TILL: TO, indifferently either to *place*

or *time*; but TILL to *time* only and never to *place*. Thus, we may say,

“ *From morn TO night th’ eternal larum rang.*”
or, *From morn TILL night, &c.*

But we cannot say,—*From Turkey TILL England.*

H.

The opposition of Prepositions, as far as it reaches, does undoubtedly assist us much in the discovery of the meaning of each opposite. And if, by the total or partial extinction of an original language, there was no root left in the ground for an etymologist to dig up, the philosopher ought no doubt to be satisfied with reasoning from the contrariety. But I fear much, that the inveterate prejudices which I have to encounter, and which for two thousand years have universally passed for learning throughout the world, and for deep learning too, would not easily give way to any arguments of mine *à priori*. I am therefore compelled to resort to etymology, and to bring forward the original word as well as its meaning. That same etymology will very easily account for the peculiarity you have noticed: and the difficulty solved, like other enemies subdued, will become an useful ally and additional strength to the conqueror.

The

The opposition to the preposition FROM, resides singly in the preposition TO. Which has not *perhaps* (for I am not clear that it has not) precisely the signification of *End* or *Termination*, but of something tantamount or equivalent. The preposition TO (in Dutch written TOE and TOT, a little nearer to the original) is the Gothic substantive **ṬΛHI** or **ṬΛHITS**, i. e. *Act, Effect, Result, Consummation*. Which Gothic substantive is indeed itself no other than the past participle **ṬΛHIA** or **ṬΛHIAS**, of the verb **ṬΛHGAN** * *agere*. And what is *done*, is *terminated, ended, finished* †.

After this derivation, it will not appear in the least mysterious or wonderful that we should, in a peculiar manner, in English, prefix this same word TO to the infinitive of our verbs. For the verbs, in English, not being distinguished, as in other languages, by a peculiar termination, and it being sometimes impossible to distinguish them by their *place*, when the old termination of the

* In the Teutonic, this verb is written *Tuan* or *Tuon*, whence the modern German *Tun*, and its preposition (varying like its verb) *Tu*.

In the Anglo-Saxon the verb is *Teogan*, and preposition *To*.

† “Dativus cuicumque orationi adjungi potest, in qua acquisitio vel ademptio, commodum aut incommodum, aut FINIS, quem in scholis Logici *Finem* cui dicunt, significatur.”

Scioppii Gram. Philosoph. pag. xiii.

Anglo-Saxon verbs was dropped, this word *to* (i. e. *Æt*) became necessary to be prefixed, in order to distinguish them from *NOUNS*, and to invest them with the *verbal* character: for there is no difference between the *NOUN*, *Love*, and the *VERB*, *to Love*, but what must be comprized in the prefix *to*.

The infinitive therefore, appears plainly to be what the Stoics called it, the very verb itself; pure and uncompounded with the various accidents of *mood*, of *number*, of *gender*, of *person*, and (in English) of *tense*; which accidents are, in some languages, joined to the verb by variety of *termination*; and in some, by an *additional word* signifying the *added circumstance*. And if our *English* Grammarians and Philosophers had trusted something less to their reading and a little more to their own reflection, I cannot help thinking that the very awkwardness and imperfection of our own language, in this particular of the *infinitive*, would have been a great benefit to them in all their difficulties about the *VERB*: and would have led them to understand and explain that which the perfection of more artificial and improved languages contributed to conceal from others. For I reckon it a great advantage which an *English* philosopher has over those who are acquainted with such languages only which do this business by *termination*.

For

For though I think I have good reasons to believe, that all these *Terminations* may likewise be traced to their respective origin; and that, however *artificial* they may now appear to us, they were not originally the effect of premeditated and deliberate *art*, but separate words by length of time corrupted and coalescing with the words of which they are now considered as the *Terminations*: Yet this was less likely to be suspected by others. And if it had been suspected, they would have had much farther to travel to their journey's end, and through a road much more embarrassed; as the corruption in those languages is of much longer standing than in ours, and more complex.

And yet, by what fatality I know not, our Grammarians have not only flighted, but have even been afraid to touch this friendly clue: for of all the points which they endeavour to shuffle over, there is none in which they do it more grossly than in this of the Infinitive.

Some are contented to call *to*, a *mark* of the *infinitive* mood *. But *how*, or *why*, it is so, they are totally silent.

* Lowth (page 66) says—"The *Preposition* *to* placed before the Verb "makes the *Infinitive Mood*." Now this is manifestly not so: for *to* placed before the Verb *loveth*, will not make the *Infinitive Mood*. He would have said more truly, that *to* placed before some *Nouns* makes *Verbs*. But of this I shall have occasion to speak hereafter, when I come to treat of the *Verb*.

Others

Others call it a *Preposition*.

Others, a *Particle*.

Skinner calls it an *Equivocal Article* *.

And others † throw it into that common sink and repository of all heterogeneous unknown corruptions,—the *Adverb*.

And when they have thus given it a *name*, they hope you will be satisfied: at least they trust that they shall not be arraigned for this conduct; because those who should arraign them, will need the same shift for themselves.

There is one mistake however, from which this Prefix *to* ought to have rescued them: they should not have repeated the error, of insinuating that the *Infinitive* was a

Canones Etymologici.

† S. Johnson says—“*To*, *adverb* [*to*, Saxon; *Te*, Dutch.]” And then, according to his usual method, (a very convenient one for making a bulky book without trouble) proceeds to give instances of its various significations, viz. “1. mere *Noun* * : since it was found necessary in English to add another word (viz.) *το*, merely to distinguish the *Infinitive* from the *Noun*, after the *Infinitive* had lost that distinguishing *Termination* which it had formerly.

B.

I do not mean hastily and without farther consideration absolutely to differ from what you have said, because some

* “ The words *Ἀξιῶνες* and *Λεξιῶνες* (Wilkins says) are but the plural number of *Agere, Legere.*” However it must be acknowledged, that Wilkins endeavours to save himself by calling the *Infinitive*, not a mere noun, but a *Participle Substantive.*—“ That which is called the *Infinitive Mode* should, according to the true analogy of speech, be styled a *Participle Substantive.* There hath been formerly much dispute among some learned men, *whither* the notion called the *Infinitive Mode* ought to be reduced according to the philosophy of speech. Some would have it to be the *prime* and *principal* verb; as signifying more directly the notion of action: and then the other varieties of the verb, should be but the inflexions of this. Others question whether the *Infinitive Mode* be a verb or no, because in the Greek it receives articles as a noun. Scaliger concludes it to be a *verb*, but will not admit it to be a *Mode.* Vossius adds, that though it be not *Modus in Actu*, yet it is *Modus in Potentia.* All which difficulties will be most clearly stated by asserting it to be a *Substantive Participle.*”
Real Character, Part iv. Chap. 6.

Mr. Harris without any palliation, says,—“ These *Infinitives* go farther. They not only lay aside the character of *Attributives*, but they also assume that of *Substantives.*”
Hermes, Book I. Chap. 8.

part of it appears to me plausible enough. And had you confined yourself only to the *Segnacaso* or *Preposition*, I should not suddenly have found much to offer in reply. But when instead of the *Segnacaso* (as Buonmattei classes it), or the *Preposition* (as all others call it), or the *mark* of the *Infinitive* (as it is peculiarly used in English), you direct me to consider it as the necessary and distinguishing *sign* of the VERB, you do yourself throw difficulties in my way which it will be incumbent on you to remove. For it is impossible not to observe, that the *Infinitive* is not the only part of our English verbs, which does not differ from the noun : and it rests upon you to explain why this necessary *sign* of the *Verb* should be prefixed only to the *Infinitive*, and not also to those other parts of the verb in English which have no distinguishing *Termination*.

H.

The fact is undoubtedly as you have stated it. There are certainly other parts of the English verb, undistinguished from the noun by termination ; but this is to me rather a circumstance of confirmation than an objection. For the truth is, that to them also (*and to those parts only* which have not a distinguishing termination) as well as to the *Infinitive*, is this distinguishing *sign* equally necessary, and equally *prefixed*. Do (the *auxiliary* verb as it has been

called *) is derived from the same root, and is indeed the same word as *to*. The difference between a *T* and a *D* is
fo

* “ The verb *to do* (says Mr. Tyrwhit, *Essay*, Note 37) is considered “ by Wallis and other later grammarians, as an *auxiliary* verb. It is fo used, “ though very *rarely*, by Chaucer. It must be confessed that the exact “ power which *do*, as an auxiliary, now has in our language, is not easy to “ be defined, and still less to be accounted for from *Analogy*.”

In Chaucer’s time the distinguishing terminations of the verb still remained, although not constantly employed ; and he availed himself of that situation of the language, either to use them or drop them, as best suited his purpose, and sometimes he uses both *termination* and *sign*. Thus, in the *Wife of Bathes Tale*, he drops the *Infinitive termination* ; and uses *to*.

“ My liege lady : generally, quod he,
“ Women desyren *to have* soveraynte
“ As well over her husbondes as her love.”

And again a few lines after, he uses the *infinitive termination*, excluding *to*,

“ In al the court nas there wife ne mayde
“ Ne widow, that contraried that he saide,
“ But said, he was worthy *HAN* his lyfe.”

So also,

“ I trowe that if Envye iwys
“ Knewe the best man that is
“ On thys syde or beyonde the fee
“ Yet somewhat *LACKEN* him wold she.”

Romaunt of the Rose:

The same may be shewn by innumerable other instances throughout Chaucer.

B. Johnson, in his *Grammar*, says—“ The *Persons plural* keepe the “ *termination* of the first person singular. In former times, till about the
“ reigne

so very small, that an Etymologist knows by the *practice* of languages, and an Anatomist by the *reason* of that practice, that in the derivation of words it is scarce worth regarding *. And for the same reason that TO is put before the Infinitive, DO used formerly to be put before such other parts of the VERB which likewise were not distinguished from the noun by termination. As we still say—*I DO love*,—instead of—*I love*. And *I DOED* or *DID love*—instead of *I loved*. But it is worth our while to observe, that if a distinguishing *termination* is used, then the distinguishing DO or DID *must* be omitted, the *Termination* fulfilling its office. And therefore we never find—“*I DID loved;*” or “*He DOTH loveth.*” But “*I DID love*” “*He DOTH love.*”

It is not indeed an approved practice at present, to use DO before those parts of the *Verb*, they being now by custom sufficiently distinguished by their *Place*: and therefore the redundancy is now avoided, and DO is considered, in that case, as unnecessary and expletive.

“reigne of King Henry the Eighth, they were wont to be formed by adding *en*. But now (whatsoever is the cause) it hath quite growne out of use, and that other so generally prevailed that I dare not presume to set this afoot againe.” This is the reason why Chaucer used both TO and DO more rarely than we use them at present.

* See the Note, page 93.

However it is still used, and is the common practice, and should be used, whenever the distinguishing *Place* is disturbed by *Interrogation*, or by the *insertion* of a *negation*, or of some other words between the nominative case and the verb. As,—

“ He DOES not *love* the truth.

“ DOES he *love* the truth ?

“ He DOES at the same time *love* the truth.”

And if we chuse to avoid the use of this *verbal Sign*, DO, we must supply its place by a distinguishing termination to the verb. As,—

He *loveth* not the truth.

Loveth he the truth ?

He at the same time *loveth* the truth.

Or where the verb has not a distinguishing termination (as in plurals)—

They DO not *love* the truth.

Do they *love* the truth ?

They DO at the same time *love* the truth.

Here, if we wish to avoid the *verbal sign*, we must remove the negative, or other intervening word or words
from

from between the nominative case and the verb; and so restore the distinguishing *Place*. As,—

“ They *love* not the truth.

“ *Love* they the truth?

“ At the same time they *love* the truth *.”

And thus we see that, though we cannot, as Mr. Tyrwhit truly says, account for the use of this *verbal sign* from any *Analogy* to other languages, yet there is no caprice in these methods of employing TO and DO, so differently from the practice of other languages: but that they arise from the peculiar method which the English language has taken to arrive at the same necessary end, which other languages attain by distinguishing *Termination*.

B.

I observe, that Junius and Skinner and Johnson, have not chosen to give the slightest hint concerning the derivation of TO. Minshew distinguishes between the preposition TO, and the *sign* of the Infinitive TO. Of the first

* It is not however uncommon to say—“ *They*, at the same time, *love* the truth.” Where the intervening words (*at the same time*) are considered as merely parenthetical, and the mind of the speaker still preserves the connexion of *place* between the nominative case and the verb.

he is silent, and of the latter he says—"το, as *to make*, "*to walk, to do*, a Græco articulo τὸ; idem est ut το ποιεῖν, "*το περιπατεῖν, το πρᾶττειν.*" But Dr. Gregory Sharpe is persuaded, that our language has taken it from the Hebrew. And Voffius derives the correspondent Latin Preposition AD from the same source.

H.

Yes. But our Gothic and Anglo-saxon ancestors were not altogether so fond of the Hebrew, nor quite so well acquainted with it, as Dr. Sharpe and Voffius were. And if Boerhaave could not consent, and Voltaire * thought it ridiculous, to seek a remedy in South America, for a disease which was prevalent in the North of Europe, how much more would they have resisted the etymology of this pretended Jewish Preposition! for my own part, I am persuaded that the correspondent Latin Preposition AD has a more natural origin, and a meaning similar to that of το.

* " La Quinquina, seul spécifique contre les fièvres intermittentes, placé par la nature dans les montagnes du Pérou, tandis qu'elle a mis la fièvre dans le reste du monde." *Voltaire's Hist. generale.*

" Il meurt à Mocha dans le fable Arabe
Ce café nécessaire aux pays des frimats;
Il met la fièvre en nos climats,
Et le remède en Amérique."

Voltaire's Lettre au roi de Prusse.

It is merely the past participle of *Agere**. (Which past participle is likewise a Latin *Substantive*.)

$$\textit{agitur-agtum} \left\{ \begin{array}{l} \textit{agDum} \text{ --- } \textit{agD} \text{ --- } \textit{AD} \\ \text{OR} \text{ --- } \text{OR} \text{ --- } \text{OR} \\ \textit{actum} \text{ --- } \textit{act} \text{ --- } \textit{AT.} \end{array} \right.$$

The most superficial reader of Latin verse knows, how easily the Romans dropped their final *um*: for their poets would never have taken that licence, had it not been previously justified by common pronunciation. And a little consideration of the organs and practice of speech, will convince him how easily *Agd* or *Act*, would become *AD* or *AT* †,

as

* My much valued and valuable friend Dr. Warner, the very ingenious author of *METRONARISTON, or a new pleasure recommended, in a dissertation upon Greek and Latin prosody*; has remarked that—"C and G were by the Romans always pronounced hard, i. e. as the Greek K and Γ, before ALL VOWELS: which sound of them it would have been well if we had retained; for, had this been done, the inconvenience of many equivocal sounds, and much appearance of irregularity in the language would have been avoided."—Perhaps it may seem superfluous to cite any thing from a book which must assuredly be in every classical hand; but it is necessary for me here to remind the reader of this circumstance; lest, instead of *Aggere* and *Aggitum*, he should pronounce these words *Adjere* and *Adjitum*, and be disgusted with a derivation which might then seem forced and unnatural.

† If the reader keeps in mind the note to page 93, he will easily perceive how *actum* became the irregular participle of *agere*, instead of *agitur*

as indeed this preposition was indifferently written by the antients. By the moderns the *preposition* was written AD with the D only, in order to distinguish it from the other corrupt word called the *Conjunction*, AT; which for the same reason was written with the T only, though that likewise had antiently been written, as the *preposition*, either AD OR AT*.

B.

You have not yet accounted for the different employment of TILL and TO.

or *agtum*. For it depended entirely on the employment or omission of the *compression* there noticed. And it is observable, that in *all* languages (for the natural reason is the same) if two of the letters (coupled in that note) come together, in one of which the *compression* should be employed and in the other omitted, the speaker for his own convenience will either employ the *compression* in both, or omit it in both; and that without any regard to the written character. Thus (amongst innumerable instances) an Englishman pronounces—*obzerve*—and a Frenchman—*opserver*. So we learn from Quintillian (lib. 1. cap. 7.) that the Romans pronounced *optinuit*, though they wrote *obtinuit*.—“Cum dico *obtinuit*, secundam B literam ratio poscit; aures magis audiunt P.”—In the same manner a Roman would pronounce the word either—*agtum*, or *actum*, that he might not in two letters coming close together, shift so instantly from the *employment* to the *omission* of the *compression*.

* “AD & at, non tantum ob significationem, sed & originem diversam, “diversimodè scribere *fatius* est.”

G. J. Vossius, Etymol. Ling. Lat.

H. That

H.

That TILL should be opposed to FROM, only when we are talking of *Time* and upon no other occasion, is evidently for this reason (viz.) that TILL is a word compounded of TO and *While*, i. e. *Time*. And you will observe that the coalescence of these two words, To-hpile, took place in the language long before the present wanton and superfluous use of the article THE, which by the prevailing custom of modern speech is now interposed. So that when we say—"From morn TILL night,"—it is no more than if we said—"From morn TO TIME night *." When we say—"From morn TO night," the word *Time* is omitted as unnecessary. So we might say—"From Turkey TO the PLACE called England;" or "TO PLACE England." But we leave out the mention of *Place*, as superfluous, and say only—"TO England."

* It is not unusual with the common people, and some antient authors, to use *While* alone as a *preposition*; that is, to leave out TO, and say—*I will stay WHILE Evening*. Instead of—TILL *Evening*; or, TO WHILE *Evening*. That is—*I will stay TIME Evening*,—instead of—TO TIME *Evening*. Thus—"Sygeberte wyth hys two bretherne gave backe WHYLE they came to the ryver of Sigoune."—He commaunded her to be bounden to a wyld "horfe tayle by the here of her hedde and so to be drawen WHYLE she were dede."

B.

You acknowledge then that the opposition of prepositions is useful, as far as it reaches. But, besides their *opposition* and absolute *contradiction*, I should imagine that the marked and distinguished manner also, in which different prepositions are sometimes used in the same sentence, must very much tend to facilitate the discovery of their distinct significations.

“ *Well! ’tis e’en so! I have got the London disease they call Love. I am sick OF my husband, and FOR my gallant*.*”

Love makes her sick OF, and sick FOR. Here OF and FOR seem almost placed in opposition; at least their effects in the sentence are most evidently different: for, by the help of these two Prepositions alone, and without the assistance of any other words, she expresses the two contrary affections of *Loathing* and *Desire*.

H.

No. Small assistance indeed, if any, can be derived from such instances as this. I rather think they tend to

* Wycherley’s Country Wife.

mislead than to direct an inquirer. Love was not here the only disease. This poor lady had a complication of distempers; she had two disorders; a sickness OF Loathing—and a sickness OF Desire. She was sick FOR Disgust, and sick FOR Love.

Sick OF disgust FOR her husband.

Sick OF love FOR her gallant.

Sick FOR disgust OF her husband.

Sick FOR love OF her gallant.

Her disgust was the OFFSPRING of her husband, *proceeded from* her husband, was *begotten* upon her *by* her husband. Her gallant was the *cause* of her love.

I think I have clearly expressed the meaning of her declaration. And I have been purposely tautologous, that by my indifferent application of the two words OF and FOR—both to her disgust and to her love, the smallest appearance of opposition between these prepositions might be done away. Indeed, the difference between them (*thus considered*) appears to be so small, that the author, if it had pleased him, might have used OF, where he has put FOR. And that he might so have done, the following is a proof.

“ *Marian.* ”

“ *Marian.* Come, *Amie*, you'll go with us.”

“ *Amie.* I am not well.”

“ *Lionel.* She's sick OF the yong shep'ard that bekist
“ ber *.”

In the same manner we may, with equal propriety, say—
“ *We are sick OF hunger,*”—or, “ *We are sick FOR hunger.*”
And in both cases we shall have expressed precisely the
same thing.

B.

'Tis certainly so in practice. But is that practice justifi-
fiable? For the words still seem to me to have a very dif-
ferent import. Do you mean to say that the words OF
and FOR are synonymous?

H.

Very far from it. I believe they differ as widely as
CAUSE and CONSEQUENCE. I imagine the word FOR
(whether denominated *Preposition*, *Conjunction*, or *Adverb*)
to be a *Noun*, and to have always one and the same single
signification, viz. CAUSE, and nothing else. Though
Greenwood attributes to it *eighteen*, and S. Johnson *forty-*

* Sad Shepherd, Act I. Sc. 6.

six different meanings: for which Greenwood cites above *forty*, and Johnson above *two hundred* instances. But, with a little attention to their instances, you will easily perceive, that they usually attribute to the *Preposition* the meaning of some other words in the sentence.

Junius (changing P into F, and by metathesis of the letter R) derives FOR from the Greek *προ*. Skinner from the Latin *Pro*. But I believe it to be no other than the Gothic substantive **FAIKINA**, CAUSE.

I imagine also that OF (in the Gothic and Anglo-saxon **AF** and **AF**) is a fragment of the Gothic and Anglo-saxon **AFALA**, posteritas, &c. **AFona**, proles, &c. *. That it is a noun substantive, and means always *consequence, offspring, successor, follower, &c.*

And I think it not unworthy of remark, that whilst the old patronymical termination of our northern ancestors

* “OF, A, ab. abs. de A. s. OF. D. aff. B. af. Goth. **AF**. Exprimunt
“ Gr. *προ*, ab. de: præsertim cum *προ* ante vocabulum ab adspiratione in-
“ cipiens, fiat *αφ*.” JUNIUS.

Minshew and Skinner derive OF from the Latin **AB**, and that from the Greek *προ*.

was SON, the Slavonic and Ruffian patronymic was OF. Thus whom the English and Swedes named *Peterfon*, the Ruffians called *Peterhof*. And as a polite foreign affectation afterwards induced some of our ancestors to assume *Fils* or *Fitz* (i. e. *Fils* or *Filius*) instead of SON; so the Ruffian affectation in more modern times changed OF to *Vitch* (i. e. *Fitz*, *Fils*, or *Filius*) and *Peterhof* became *Petrovitch* or *Petrowitz*.

So M. de Broffes (Tom. 2. p. 295.) observes of the Romans—"Remarquons sur les noms propres des familles Romaines qu'il n'y en a pas un seul qui ne soit terminé en *ius*; definance fort semblable à l' *υιος* des Grecs, c'est à dire *filius* *."

B.

Stop, Stop, Sir. Not so hafty, I beseech you. Let us leave the Swedes, and the Ruffians, and the Greeks, and the Romans, out of the question for the present; and con-

fine yourself, if you please, as in the beginning you confined my enquiry, to the English only. Above *two hundred* instances, do you say, produced by Johnson as proofs of at least *forty-six* different meanings of this one preposition FOR, when Harris will not allow one single meaning to all the prepositions in the world together! And is it possible that one and the same author, knowing this, should in the same short preface, and in the compass of a very few short pages, acknowledge the former to be "*the person best qualified to give a perfect Grammar* *," and yet compliment the grammar of the latter, as the standard of accuracy, acuteness and perfection †!

H.

Oh, my dear Sir, the wise men of this world know full well that the family of the *Blandishes* ‡ are universal favourites. Good breeding and policy direct us to mention the living only with praise; and if we do at any time hazard a censure, to let it fall only on the dead.

‡ See the *Heirefs*. (One little morsel of false moral excepted) the most perfect and meritorious comedy, without exception, of any on our stage.

B.

Pray, which of those qualities dictated that remark?

H.

Neither. But a quality which passes for brutality and ill-nature: and which, in spite of hard blows and heavy burdens, would make me rather chuse in the scale of beings to exist a mastiff or a mule, than a monkey or a lapdog. But why have you overlooked my civility to Mr. Harris? Do you not perceive that by contending for only one meaning to the word FOR, I am forty-five times more complaisant to him than Johnson is?

B.

He loves every thing that is Greek, and no doubt therefore will owe you many thanks for this *Greek* favour.—*Danaos dona ferentes*.—But confirm it, if you please; and (if you can) strengthen your doubtful etymology (which I think wants strengthening) by extracting your single meaning of FOR from all Greenwood's and Johnson's numerous instances.

H.

That would be a tedious task; and, I trust, unnecessary; and for that reason only I have not pursued the method

you now propose, with all the other particles which I have before explained. But as this manner of considering the prepositions, though many years familiar to me, is novel to you, I may perhaps suppose it to be easier and clearer than it may at first sight appear to others. I will risque therefore your impatience, whilst I explain one single instance under each separate meaning attributed to FOR.

Greenwood says—“ The Preposition FOR has a great
 “ many significations, and denotes chiefly for what *purpose*,
 “ *end*, or *use*, or for whose *benefit* or *damage* any thing is
 “ done; As—*Christ died FOR us.*” [i. e. *Cause* us; or We
 being the *Cause* of his dying.]

“ 1. FOR serves to denote the *End* or *Object* which one
 “ proposes in any action; As—*To fight FOR the public good.*”
 [i. e. *CAUSE* the public good; or, The public good being
 the *Cause* of fighting.]

“ 2. It serves to mark the *Motive*, the *Cause*, the *Subject*
 “ of any action; As—*He does all things FOR the love of*
 “ *virtue.*” [i. e. The love of virtue being the *Cause*.]

“ 3. It is used to mark the use for which a thing is
 “ done; As—*Chelsea Hospital was built FOR disabled*
 B b b 2 “ *soldiers.*”

“ *soldiers.*” [i. e. Disabled Soldiers being the *Cause* of its being built.]

“ 4. It is used likewise to denote *Profit, Advantage, Interest*; As—*I write FOR your satisfaction.*” [i. e. Your satisfaction being the *cause* of my writing.]

“ 5. It is used to denote for what a thing is *Proper*, or “ not; As—*It is a good remedy FOR the Fever.*” In which last example *to cure* is to be understood. [i. e. Curing the Fever being the *Cause* that it is called a *good* remedy.]

“ 6. This preposition is used to denote *Agreement* or “ *Help*; As—*The Soldier fights FOR the King.*” [i. e. The King being the *Cause* of his fighting.]

“ 7. It is used to denote the *Convenience* or *Inconvenience* of a thing; As—*He is big enough FOR his age.*” [i. e. His age being the *Cause* that he is big ENOUGH; or that his size answers our expectation.]

“ 8. It is used to denote *Exchange* or *Trucking, Recompence, Retribution* or *Requital* and *Payment*; As—*He rewarded him FOR his good services.*” [i. e. His good services being the *Cause* of reward.]

“ Hither

“ Hither we may likewise refer these phrases, *Eye FOR Eye,*” &c. [i. e. An eye (destroyed by malicious violence) being the *Cause* of an eye taken from the convict in punishment.]

“ 9. It is used to denote *Instead of, in the Place of;* As—*I will grind FOR him.*” [i. e. He being the *Cause* of my grinding.]

“ Sometimes it serves to denote a *Mistake;* As—*He speaks one word FOR another.*” [i. e. Another word being the *Cause* of his speaking that word which he speaks.]

“ 10. It is used to denote the *Distribution* of things by *Proportion* to several others; As—*He sets down twelve Acres FOR every man.*” [i. e. Every or each man being the *Cause* of his setting down *twelve* acres.]

“ 11. It denotes the *Condition of Persons, Things and Times;* As—*He was a learned man FOR those times.*” [i. e. The darkness or ignorance of those times being the *Cause* why he may be considered as a *learned* man.]

“ 12. It is likewise used to denote *in the quality of*; As
 “ —*He suborned him FOR a witness.*” [i. e. FOR that he
 might be a witness; or, FOR to be a witness.—That he
 might be a witness; or, to be a witness being the *Cause*
 of his suborning him.]

“ It signifies likewise as much as *Because of*, *By reason*
 “ *of*; As—*To punish a man FOR his crimes.*” [i. e. His
 crimes being the *Cause* of punishment.]

“ It signifies *As*, or *To be*; As—*He was sent FOR a*
 “ *pledge.*” [i. e. That he might be a pledge, or to be a
 pledge being the *Cause* of his being sent.]

“ *During*; to denote the *Future Time*; As—*He was*
 “ *chosen [to some office] FOR life.*” [i. e. To continue in
 that office FOR life; or, FOR the continuance of his life—
 The continuance of his life being the *Cause* of the conti-
 nuance of his office.]

“ *Concerning*, *About*; As—*As FOR me.*” [The sentence
 here is not complete; but it shall be explained amongst
 Johnson's instances.]

“ Not-

“ *Notwithstanding* : As, after having spoke of the faults
 “ of a man, we add, FOR *all that, he is an honest man.*”
 [i. e. Though all that has been said may be the *Cause* of
 thinking otherwise, yet he is an honest man.]

S. Johnson says, “ FOR, Preposition.

“ 1. *Because of*—*That which we.* FOR *our unworthiness*
 “ [i. e. our unworthiness the *Cause*] *are afraid to crave,*
 “ *our prayer is, that God* FOR *the worthiness of his Son*
 “ [i. e. the worthiness of his Son being the *Cause*].
 “ *would notwithstanding vouchsafe to grant.*”

“ 2. *With respect to, with regard to* ; As

“ *Lo, some are vellom, and the rest as good*
 “ FOR *all his lordship knows, but they are wood.*”

[i. e. As far as all that his lordship knows is the *Cause* of
 their being denominated *good* or bad, the rest are as good.]

“ 3. In this sense it has often *As* before it ; As—*As*
 “ FOR *Maramaldus the general, they had no just cause to*
 “ *mislike him, being an old captain of great experience.*”
 [i. e. As far as Maramaldus the general might be a *Cause*
 of their discontent, they had no *just* cause to mislike him.]

“ 4. In

“ 4. In the *Character* of; As—

“ *Say, is it fitting in this very field,
 “ This field, where from my youth I’ve been a carter,
 “ I in this field should die FOR a deserter.”*

[i. e. Being a Deserter, being the *Cause* of my dying.]

“ 5. *With resemblance* of; As—

“ *Forward he flew, and pitching on his head,
 “ He quiver’d with his feet, and lay FOR dead.”*

[i. e. As if Death, or his being dead, had been the *Cause* of his laying; or, He lay in that *manner*, in which death or being dead is the *Cause* that persons so lay.]

“ 6. *Considered as; in the place* of; As—

“ *Read all the Prefaces of Dryden:
 “ FOR those our critics much confide in:
 “ Though merely writ at first FOR filling,
 “ To raise the volume’s price a shilling.”*

[i. e. Read, &c. the *Cause* why you should read them, being, that our critics confide in them. Though to fill up and to raise the volume’s price was the *Cause* that they were at first written.]

“ 7. *In*

“ 7. *In advantage of; For the sake of; As—*

“ *Shall I think the world was made FOR one,
“ And men are born FOR kings, as beasts FOR men.”*

[i. e. Shall I think that one man was the *Cause* why the world was made; that kings are the *Cause* why men were born; as men are the *Cause* why there are beasts.]

“ 8. *Conducive to; Beneficial to; As—It is FOR the
“ general good of human society, and consequently of parti-
“ cular persons, to be true and just: and it is FOR men’s
“ health to be temperate.”* [i. e. The general good, &c. is the *Cause* why it is *fit* or a *duty* to be true and just: and men’s health is the *Cause* why it is *fit* or a *duty* to be temperate.]

“ 9. *With intention of going to a certain place; As—
“ We sailed directly FOR Genoa.”* [i. e. Genoa, or that we might go to Genoa, being the *Cause* of our sailing.]

“ 10. *In comparative respect; As—FOR Tusks with Indian
“ elephants he strove.”* [i. e. He contended for a superiority over the elephants; Tusks, or the claim of a superiority in point of Tusks, being the *Cause* of the striving or contention.]

“ 11. *In proportion to; As—As he could see clear, FOR those times, through superstition, so he would be blinded, now and then, by human policy.*” [i. e. The darknes, or ignorance, or bigotry of those times being the *Cause*, why even such fight, as he then had, may be called or reckoned clear.]

“ 12. *With appropriation to; As—Shadow will serve FOR summer. Prick him: FOR we have a number of Shadows to fill up the Muster-book.*” [i. e. Summer is the *Cause* why *Shadow* will *serve*, i. e. will do; or will be proper to be taken. Prick him: the *Cause* (why I will have him pricked, or set down) is, that we have many shadows to fill up the Muster-book.]

“ 13. After O, *an expression of Desire; As—*

“ O! FOR a Muse of fire, that would ascend

“ The brightest heaven of invention.”

[i. e. O! I wish FOR a Muse of fire, &c. i. e. A Muse of fire being the *Cause* of my wishing.]

“ 14. *In account of; In solution of; As—Thus much FOR the beginning and progress of the deluge.*” [i. e. The beginning and progress of the deluge is the *Cause* of thus

thus much, or of that which I have written.] N. B. An obsolete and aukward method of signifying to the reader, that the subject mentioned shall not be the *Cause* of writing any more. It is a favourite phrase with Mr. Harris, repeated perpetually with a disgusting and pedantic affectation, in imitation of the Greek philosophers; but has certainly passed upon some persons, as “*elegance of method,*” “*as Beauty, Taste, and Fine Writing.*”

“ 15. *Inducing to as a motive; As—There is a natural, immutable, and eternal reason FOR that which we call virtue; and against that which we call vice.*” [Or, That which we call virtue, we call virtue FOR a natural, eternal, and immutable reason, i. e. a natural, eternal, and immutable reason being the *Cause* of our so calling it.—Or, There is a natural, eternal, and immutable reason the *Cause* of that which we call virtue.]

“ 16. *In expectation of; As—He must be back again by one and twenty, to marry and propagate: the father cannot stay any longer FOR the portion, nor the mother FOR a new set of babies to play with.*” [i. e. The Portion being the *Cause* why the father cannot stay any longer: a new set of babies to play with being the *Cause* why the mother cannot stay longer.]

“ 17. Noting *Power* or *Possibility*; *As*—*FOR* a holy person
 “ to be humble; *FOR* one, whom all men esteem a saint, to
 “ fear lest himself become a devil, is as hard as *FOR* a prince
 “ to submit himself to be guided by Tutors.” [i. e. To be
 humble is hard or difficult *Because*, or, the *Cause* being, he
 is a holy person: To fear lest himself become a devil is
 difficult *Because*, or, the *Cause* being, he is one whom all
 men esteem a saint: To submit himself to be guided by
 Tutors is difficult *Because*, or, the *Cause* being, he is a
Prince. And all these things are equally difficult.]

“ 18. Noting *Dependence*; *As*—*The colours of outward*
 “ *objects, brought into a darkened room, depend FOR their*
 “ *visibility upon the dimness of the light they are beheld by.*”
 [i. e. Depend upon the dimness of the light as the *Cause*
 of their visibility.]

“ 19. *In Prevention of, for Fear of; As*

“ *Corn being had down, any way ye allow,*
 “ *Should wither as needeth FOR burning in Mow.*”

[i. e. Burning in Mow, the *Cause* why it needeth to
 wither.]

And,

“ *And, FOR the time shall not seem tedious,*
 “ *I’ll tell thee what befell me on a day *.*”

[i. e. The *Cause* of my telling thee, is, that the time may not seem tedious.]

“ 20. *In Remedy of; As—Sometimes hot, sometimes cold*
 “ *things are good for the tooth-ach.*” [i. e. Their curing the tooth-ach the *Cause* of their being called *good*.]

“ 21. *In Exchange for; As—He made considerable*
 “ *progress in the study of the law, before he quitted that*
 “ *profession FOR this of Poetry.*” [i. e. The profession of Poetry, the *Cause* of his quitting the profession of the law.]

“ 22. *In the Place of, Instead of; As—To make him*
 “ *copious is to alter his character; and to translate him*
 “ *line FOR line is impossible.*” [i. e. Line *Cause* of line, or, Each line of the original being the *Cause* of each line of the translation.]

* So Chaucer,

“ This dronken myller hath ytolde us here
 Howe that begyled was a carpentere
 Peraenture in skorne, FOR I am one.”

“ FOR they seemed philosophers, they weren purfued to the dethe and
 “ slayne.” *Boecius.* Boke 1. Fol. 221. pag. 1. col. 1.

“ 23-

“ 23. *In Supply of, to serve in the Place of; As—*
 “ *Most of our ingenious young men take up some cried-up*
 “ *English poet FOR their model.*” [i. e. To be their model
 the *Cause* of taking him.]

“ 24. *Through a certain Duration; As*

“ *Since bir'd FOR life thy servile muse must sing,*
 “ *Successive conquests and a glorious king.*”

[i. e. The continuance of your life the *Cause* of the con-
 tinuance of your hire.]

“ 25. *In Search of, in Quest of; As—Some of the*
 “ *philosophers have run so far back FOR arguments of*
 “ *comfort against pain, as to doubt whether there were*
 “ *any such thing.*” [i. e. Arguments of comfort against
 pain the *Cause* of running so far back.]

“ 26. *According to; As—Chymists have not been able,*
 “ *FOR aught is vulgarly known, by fire alone to separate*
 “ *true sulphur from antimony.*” [i. e. Any thing which
 is vulgarly known, being the *Cause* of ability, or of their
 being supposed to be able.]

“ 27. *Noting a State of Fitness or Readiness; As—*
 “ *Nay if you be an Undertaker, I am FOR you.*” [i. e. I

am an Undertaker, an Adversary, a Fighter, &c. FOR you; or, I will undertake you; i. e. You the *Cause* of my being an Undertaker, &c.]

“ 28. *In Hope of, for the Sake of, noting the final Cause;*
 “ *As—Scholars are frugal of their words, and not willing to*
 “ *let any go FOR ornament, if they will not serve FOR use.*”
 [i. e. Ornament the *Cause*; Use the *Cause*.]

“ 29. *Of Tendency to, Towards; As—It were more FOR*
 “ *his honour to raise the siege, than to spend so many good*
 “ *men in the winning of it by force.*” [i. e. His honour
 the *Cause* why it were more *expedient, fitting, proper, &c.*
 to raise the siege.]

“ 30. *In Favour of, on the Part of, on the Side of; As*
 “ *—It becomes me not to draw my pen in the defence of a*
 “ *bad cause, when I have so often drawn it FOR a good one.*”
 [i. e. A good one being the *Cause* of drawing it.]

“ 31. Noting *Accommodation, or Adaptation: As—*
 “ *Persia is commodiously situated FOR trade both by sea and*
 “ *land.*” [i. e. Trade the *Cause* of its being said to be
commodiously situated.]

“ 32.

“ 32. *With Intention of; As—*

“ *And by that justice hast remov'd the Cause*
 “ *Of those rude tempests, which, FOR rapine sent,*
 “ *Too oft alas involv'd the innocent.*”

[i. e. Rapine the *Cause* of their being sent.]

“ 33. *Becoming, Belonging to; As—*

“ *It were not FOR your quiet, nor your good,*
 “ *Nor FOR my manhood, honesty and wisdom,*
 “ *To let you know my thoughts.*”

[i. e. Your quiet is a *Cause*, your good is a *Cause*, my manhood, my honesty, my wisdom, each is a *Cause*, why it is not *fit* or *proper* to let you know my thoughts.]

“ 34. *Notwithstanding; As—Probability supposes that a*
 “ *thing may, or may not be so, FOR any thing that yet is*
 “ *certainly determined on either side.*” [i. e. Any thing yet determined being the *Cause* of concluding.]

“ 35. FOR ALL. *Notwithstanding; As—FOR ALL his*
 “ *exact plot, down was he cast from all his greatness.*”
 [i. e. His exact plot being, all of it, a *Cause* to expect otherwise; yet he was cast down.]

“ 36.

“ 36. *To the Use of, to be used in; As—*

“ *The Oak FOR nothing ill;*

“ *The Ofier good FOR twigs; the Poplar FOR the Mill.*”

[i. e. Not any thing the *Cause* why the oak should be pronounced bad; Twigs the *Cause* why the ofier should be called good; the Mill the *Cause* why the poplar should be esteemed useful.]

“ 37. *In consequence of; As—FOR love they force*
“ *through thickets of the wood.*” [i. e. Love the *Cause*.]

“ 38. *In recompense of; As—*

“ *Now FOR so many glorious actions done*

“ *FOR peace at home, and FOR the public wealth,*

“ *I mean to crown a bowl to Cæsar’s health:*

“ *Besides in gratitude FOR such high matters,*

“ *Know I have vow’d two hundred Gladiators.*”

[i. e. I mean to crown a bowl to Cæsar’s health, the *Cause*—so many glorious actions; the *Cause*—peace at home; the *Cause*—the public weal. Besides, I have in gratitude vowed two hundred gladiators, such high matters being the *Cause* of my gratitude.]

“ 39. *In proportion to; As—He is not very tall, yet*
“ *FOR his years he’s tall.*” [i. e. His years the *Cause* why he may be esteemed tall.]

“ 40. *By means of; by interposition of; As—Moral considerations can no way move the sensible appetite, were it not FOR the will.*” [i. e. Were not the will the *Cause*.]

“ 41. *In regard of; in preservation of; As—I cannot FOR my life.*” [i. e. My life being the *Cause*; or, To save my life being the *Cause* why I should do it: i. e. though my life were at stake.]

“ 42. *FOR to: As—I come FOR to see you.*” [i. e. To see you being the *Cause* of my coming.]

———“ *A large posterity*

“ *Up to your happy palaces may mount,*

“ *Of blessed saints FOR to increase the count:*”

[i. e. To increase the number being the *Cause* of their mounting.]

FOR. *Conjunction* *; As—

“ *Heav'n*

* So the French correspondent *Conjunction* CAR (by old French authors written *Quabar*) is no other than *Quã re*, or, *Que* (i. e. *Kai*) *eã re*.

Of which innumerable other instances might also be given. And the Latins in cutting off the *ε* at the end of *Que*, only followed the example of the Greeks, who did the same by *Και* (as should have been mentioned before in the note to page 92). Thus in Sappho's ode to Venus,

Ἦρε ὅτι δ' ἦν το σπεουθα, κ' ὅτι
 Δευρο καλοισαι.
 Κ' ὅτι γ' ἐμω μαλις' εβελω γινισθαι.
 Αἰ δε μη φιλει ταχως φιλησει
 Κ' ὅτι κελευης.

“ 2. *Because; on this account that; As—I doubt not*
 “ *but great troops would be ready to run; yet FOR that the*
 “ *worst men are most ready to move, I would wish them*
 “ *chosen by discretion of wise men.*” [i. e. The worst
 men are the most ready to move. That is the *Cause* why
 I would wish *them* (not the worst men, but the troops)
 chosen by discretion of wise men.

“ 3. *For as much. In regard that; in consideration of;*
 “ *As—FOR as much as the thirst is intolerable, the patient*
 “ *may be indulged the free use of Spaw water.*” [i. e. As
 much as the thirst is intolerable, is the *Cause* why the
 patient may be indulged.]

“ 4. FOR WHY. *Because; For this reason that; As,*
 “ *Solyman had three hundred field pieces, that a Camel*
 “ *might well carry one of them, being taken from the car-*
 “ *riage: FOR WHY, Solyman purposing to draw the emperor*
 “ *unto battle, had brought no greater pieces of battery with*
 “ *him.*” [i. e. the *Cause*, that.]

B.

FOR, is not yet your own, however hard you have
 struggled for it: for, besides Greenwood and S. Johnson,
 you have still three others to contend with. Wilkins

affigns *two* meanings to FOR. He fays, it denotes—“ *the efficient or final caufe, and adjuvancy or agreement with.*”

Lowth afferts that—“ FOR, *in its primary fenfe, is loco alterius, in the ftead or place of another.*” And he therefore cenfures Swift for faying—“ *Accufed the minifters FOR betraying the Dutch.*” And Dryden for faying—“ *You accufe Ovid FOR luxuriancy of verfe.*” Where, inftead of FOR, he fays OF fhould be written.

And Mr. Tyrwhit, in his Gloffary, fays—“ FOR. *Prep. Sax. fometimes fignifies AGAINST.*” Of which he gives three inftances.

“ He didde next his white lere
 “ Of cloth of lake fin and clere
 “ A breche and eke a fherte
 “ And next his fhert an haketon
 “ And over that an habergeon
 “ FOR percing of his herte.”

Mr. Tyrwhit fays,—“ AGAINST, or to prevent piercing.”

“ Therefore FOR ftealyng of the rofe
 “ I rede her nat the yate unclofe.”

Mr. T. fays—“ *Against ftealing.*”

“ Some fhall fow the facke
 “ FOR fheding of the wheate.”

Mr. T. fays—“ to prevent fhedding.”

H. As

H.

As Wilkins has produced no *instances*, he has given me nothing to take hold of. And let any ingenuity try whether it can, with any colour of plausibility, apply Dr. Lowth's meaning of *loco alterius*, or any other *single* meaning (except *Cause*) to the instances I have already explained. His corrections of Swift and of Dryden, are both misplaced. For the meaning of these passages, is,—

“ *Betraying the Dutch* } CAUSE of the accusation.
 “ *Luxurianscy of verse* }

So also in Mr. Tyrwhit's instances, though their construction is awkward and faulty, and now out of use, yet is the meaning of FOR equally conspicuous. The *Cause* of putting on the Habergeon, of the advice not to open the gate, of sowing the sack—being respectively—that the heart might not be pierced, that the rose might not be stolen, that the wheat might not be shed.

B.

I will trouble you with only one instance of my own. How do you account for this sentence?—“ *To the disgrace*
 “ *of common sense and common honesty, after a long debate*
 “ *concerning the Robillas, a new writ was moved FOR FOR*
 “ *old Sarum : and every orator was tongue-tied, Although*
 “ *it*

“ *it is as much the duty of the House of Commons to examine
 “ the claim of representation, as of the other house to examine
 “ the claim of peerage.*” Is the repetition of FOR tauto-
 logous, or only awkward?

H.

Only awkward. For here are two *Causes* mentioned. The *Cause* of the writ, and the *Cause* of the motion. By a small transposition of the words you may remove the awkwardness and perceive the signification of the phrase. —“ *A motion was made FOR a new writ FOR old Sarum.*” [i. e. A new writ—*Cause* of the motion. Old Sarum, or a vacancy at Old Sarum—*Cause* of the writ.] And you will perceive that FOR may be repeated in a sentence as often as you mean to indicate a *Cause*; and never else. As, “ *A motion was made FOR an order FOR a writ FOR
 “ the election of a burghers FOR to serve in parliament FOR
 “ the borough of Old Sarum.*”

1. An order—*Cause* of the motion.
2. A writ—*Cause* of the order.
3. Election of a burghers—*Cause* of the writ.
4. To serve in Parliament—*Cause* of the election.
5. Borough of Old Sarum—*Cause* of the service in Parliament.

So

So in these lines of Butler,

“ The Devil’s master of that office
 “ Where it must pass, it’s be a drum ;
 “ He’ll sign it with *Cler. Parl. Dom. Com.*
 “ To him apply yourselves, and he
 “ Will soon dispatch you FOR his fee.”

i. e. his fee the CAUSE.

B.

But if the words FOR and OF differ so widely as you say ; if the one means *Cause* and the other means *Consequence* ; by what etymological legerdemain will you be able to account for that indifferent use of them which you justified in the instances of

“ *Sickness* OF hunger ; and *Sickness* FOR hunger.”
 “ *Sickness* OF love ; and *Sickness* FOR love.”

H.

Qualified as it is by you, it is fortunate for me that I shall not need to resort to Etymology for the explanation. Between the respective terms

“ <i>Sickness</i>	—	<i>Hunger,</i>
“ <i>Sickness</i>	—	<i>Love,</i> ”

it is certainly indifferent to the signification which of the two prepositions you may please to insert between them, whether

whether OF or FOR: this being the only difference, that if you insert OF, it is put in *apposition* to *Sickness*; and *Sickness* is announced the *Consequence*: if you insert FOR, it is put in *apposition* to *Hunger* or to *Love*; and *Hunger* or *Love* is announced the *Cause* *.

B.

I do not well understand how you employ the term *Apposition*. Scaliger, under the head *Appositio*, (Cap. CLXXVII. de causis) says—“ *Causa propter quam duo*
“ *substantiva non ponuntur sine copula, è philosophia*
“ *petenda est. Si aliqua substantia ejusmodi est, ut ex ea*
“ *& alia, unum intelligi queat; earum duarum substan-*
“ *tiarum totidem notæ (id est nomina) in oratione sine*
“ *conjunctioe cohærere poterunt.*”

* The Dutch are supposed to use *Van* in two meanings; because it supplies indifferently the places both of our OF and FROM. Notwithstanding which *Van* has always one and the same single meaning, viz. *Beginning*. And its use both for OF and FROM is to be explained by its different *apposition*. When it supplies the place of FROM, *Van* is put in *apposition* to the same term to which FROM is put in *apposition*. But when it supplies the place of OF, it is *not* put in *apposition* to the same term to which OF is put in *apposition*, but to its *correlative*. And between two *correlative* terms, it is totally indifferent to the meaning which of the two correlations is expressed.

E e e

H. What

H.

What Scaliger says is very true. And this is the case with all those *prepositions* (as they are called) which are really *substantives*. Each of these—*ejusmodi est, ut ex ea & alia* (to which it is *prefixed, postfixed, or by any manner attached*) *unum intelligi queat.*

B.

If it be as you say, it may not perhaps be so impossible as Lord Monboddo imagines, to make a Grammar even for the most barbarous languages: and the Savages may possibly have as compleat a *syntax* as ourselves. Have you considered what he says upon that subject, Vol. I. Book 3. of his *Origin and Progress of Language* * ?

H. I

* “ The last thing I proposed to consider was, the expression of the
“ *relation or connexion* of things, and of the words expressing them: which
“ makes what we call *Syntax*, and is the principal part of the grammatical
“ art.”

“ Now let ever so many words be thrown together of the most clear and
“ determinate meaning, yet if they are not some way connected, they will
“ never make discourse, nor form so much as a single proposition. This
“ connexion of the parts of speech in languages of art is either by separate
“ words, such as prepositions and conjunctions, or by cases, genders, and
“ numbers, in nouns, &c. But in less perfect languages the most of
“ them are denoted by separate words.

“ Now

H.

I could fooner believe with Lord Monboddo, that there are men with tails like cats, as long as his lordship pleases * ;
and

“ Now as every kind of relation is a *pure idea of intellect*, which never
“ can be apprehended by sense, and as some of those relations, particularly
“ such of them as are expressed by cases, are very abstract and metaphy-
“ sical, it is not to be expected that savages should have any separate and
“ distinct idea of those relations. They will therefore not express them
“ by separate words, or by the variation of the same word, but will throw
“ them into the lump with the things themselves. This will make their
“ syntax wretchedly imperfect.—There are only three barbarous languages,
“ so far as I know, of which we have any particular account published that
“ can be depended upon. The Huron, the Galibi, and the Caribbee ; of
“ which we have Dictionaries and Grammars also, *so far as it is possible to*
“ *make a Grammar of them*. With respect to syntax, the Hurons appear
“ to have *none at all*: for they have not *prepositions* or *conjunctions*. They
“ have no genders, numbers, or cases, for their nouns ; nor moods for their
“ verbs. In short they have not, so far as I can discover, any way of con-
“ necting together the words of their discourse. Those savages therefore,
“ though they have invented words, use them as our children do when they
“ begin to speak, without connecting them together : from which we may
“ infer, that Syntax, which completes the work of language, comes last in
“ the order of invention, and perhaps is the most difficult part of language.
“ It would seem however, that persons may make themselves understood
“ without syntax. And there can be no doubt but that the *position* of the
“ word will commonly determine what other word in the sentence it is
“ connected with.”

* As his Lordship (Vol. I. page 238) seems to wish for farther authori-
ties for human tails, especially of any tolerable length, I can help him to a
tail of a foot long, if that will be of any service.

and conclude with him, from the authority of his *famished* friend, that human flesh (even to those who are not *famished*)

“ Avant que d’avoir vû cette ile, j’avois souvent ouï dire qu’il y avoit
 “ des hommes à longues queues comme les bêtes ; mais je n’avois jamais

Voyages de Jean Struys, An. 1650. Tom. I. Chap. x.

The meek, modest, sincere, disinterested, and amiable Doctor Horsley, LORD bishop of Rochester, could have furnished the *other Lord* with an authority for Tails nearer home, in his own metropolitan city:—“ Ex
 “ hujus modi vocibus, fuerunt improbi nonnulli, quibus visa est occulta
 “ voluntas regis esse, ut Thomas e medio tolleretur; qui propterea velut
 “ hostis regis habitus, jam tum cæpit sic vulgo negligi, contemni ac in
 “ odio esse, ut cum venisset aliquando Strodum, qui vicus situs est ad
 “ Medveiam flumen, quod flumen Rofestriam alluit, ejus loci accolæ
 “ cupidi bonum patrem ita despectum ignominia aliqua affiendi, non du-
 “ bitarint amputare caudam equi quem ille equitaret; seipfos perpetuo
 “ probro obligantes: nam postea, nutu dei, ita accidit, ut omnes ex eo
 “ hominum genere, qui id facinus fecissent, nati sint instar brutorum ani-
 “ malium caudati.”—As this change of shape may afford a good additional
 reason why such fellows should have “nothing to do with the laws, but
 “to obey them,” the bishop perhaps will advise to sink what Polydore
 kindly adds in conclusion,—“ Sed ea infamiæ nota jam pridem una cum
 “ gente illa eorum hominum, qui peccarint, deleta est.”

Polyd. Virg. Urb. Angl. Hist. Fol. 218.

“ But who considers right will find indeed,

“ of intellect, which never can be apprehended by sense;
 “ and that those particularly which are expressed by cases,
 “ are more abstract and metaphysical than the others.”

But his lordship and his fautors will do well to contend stoutly and obstinately for their doctrine of language, for

All Litanys in this have wanted faith,

Iohan Bale. Actes of English Votaries.

they are menaced with a greater danger than *they* will at first apprehend: for if they give up their doctrine of language, they will not be able to make even a battle for their Metaphysics: the very term *Metaphysic* being nonsense; and all the systems of it, and controversies concerning it, that are or have been in the world, being founded on the grossest ignorance of words and of the nature of speech.

As far as relates to *Prepositions* and *Conjunctions*, on which (he says) *Syntax* depends, the *principal and most difficult part* (as he calls it) of the Grammatical art, and which (according to him) is the *last in order of invention*, and compleats the work of language: As far as relates to these prepositions and conjunctions, I hope it is by this time pretty evident that, instead of *invention*, the *classes* of them spring from *corruption*; and that, in this respect, the Savage languages are upon an equal footing with the languages (as they are called) of *art*, except that the former are less corrupted: and that savages have not only as *separate and distinct ideas* of those relations as we have, but that they have this advantage over us (an advantage in point of intelligibility, though it is a disadvantage in point of brevity) that they also *express* them separately and distinctly. For our *Prepositions* and *Conjunctions*, like the language of the Savages, are merely—" so many words of the most clear
" and

“ and determinate meaning thrown together,” or, (as he afterwards strangely expresses it)—“ *thrown into the lump* “ *with the things themselves* *.”

* What Lord Monboddo has delivered concerning Syntax, he has taken, in his own clumsy way, from the following erroneous article of M. de Broffes.—147. *Fabrique des Syntaxes barbares.*—“ Dans son origine, elle “ n’a d’abord eu qu’un amas confus de signes épars appliqués selon le “ besoin aux objets à mesure qu’on les découvrait. Peu à peu la nécessité “ de faire connoître les circonstances des idées jointes aux circonstances “ des objets, & de les rendre dans l’ordre où l’esprit les place, a, par une “ logique naturelle, commencé de fixer la véritable signification des mots, “ leur liaison, leur régime, leurs dérivations. Par l’usage reçu & invétéré, “ les tournures habituelles sont devenues les préceptes de l’art bons ou “ mauvais, c’est à dire bien ou mal faits selon le plus ou le moins de logique “ qui y a présidé ; & comme les peuples barbares n’en ont gueres, aussi “ leurs langues sont elles souvent pauvres & mal construites : mais à mesure “ que le peuple se police, on voit mieux l’abus des usages, & la syntaxe “ s’épure par de meilleures habitudes qui deviennent de nouveaux préceptes. “ Je n’en dis pas davantage sur l’établissement des syntaxes ; & même si j’y “ reviens dans la suite, ce ne sera qu’en peu de mots. *C’est une matière* “ *immense* dans ses détails, qui demanderait un livre entier pour la suivre “ dans toutes les opérations mécaniques du concept, qui en général la “ rendent nécessaire en conséquence de la fabrique du sens intérieur, mais “ très arbitraire dans ses petits détails, par le nombre infini de routes longues “ ou courtes, droites ou tortues, bonnes ou mauvaises, que l’on peut “ prendre pour parvenir au même but. Au surplus toutes ces routes bien “ ou mal faites servent également dans l’usage lorsqu’elles sont une fois “ frayées & connues.” This *matière immense*, as M. de Broffes imagined it, is in truth a very small and simple business. The whole of cultivated languages, as well as of those we call barbarous, is merely “ *un amas de* “ *signes épars appliqués selon le besoin aux objets.*”

B. Well,

B.

Well, Sir, after this tedious investigation of FOR, (one half of which I think might have been spared) let us now, if you please, pause for a moment, and consider the ground which we have beaten. The Prepositions IF, UNLESS, BUT, WITHOUT, SINCE, you had before explained amongst the *Conjunctions*. To these you have now added the prepositions WITH, SANS, THROUGH, FROM, TO, WHILE, TILL, OF and FOR. Though we have spent much time, we have made but little progress, compared with what still remains to be done : at least if our language is as fertile in prepositions as Buffier supposes the French to be.

H.

I rather think we have made great progress. And, if you have nothing to object to my derivations and explanations, I must consider the battle as already won. For I am not here writing a dictionary (*which yet ought to be done, and of a very different kind indeed from any thing ever yet attempted anywhere*), but only laying a foundation for a new theory of language. However, though the remaining prepositions are numerous, the greater part require but little, and many of them no explanation.

BY.

By (in the Anglo-saxon written B₁, Be, B₁ȝ) is the Imperative Byð, of the Anglo-saxon verb Beon, *to be*. And our ancestors wrote it indifferently either BE or BY. “ Damville “ BE right ought to have the leading of the army, but, “ BYcause thei be cofen germans to the Admirall, thei be “ mistrusted.” 1568. See *Lodge's Illustrations*. Vol. 2. pag. 9. This preposition is frequently, but not always, used with an abbreviation of construction. Subauditur, *instrument, cause, agent, &c.* Whence the meaning of the omitted word has often been improperly attributed to BY. *With* (when it is the imperative of *pyrðan*) is used indifferently for *By* * (when it is the imperative of *Beon*)

* In compound prepositions also, the Anglo-saxon uses indifferently either *pyð* or *Be*; as,

wið-æftan	Be-æftan
wið-foþan	Be-foþan
wið-geondan	Be-geondan
wið-innan	Be-innan
wið-neoðan	Be-neoðan
wið-uþan	Be-uþan
wið-utan	Be-utan
wið-hindan	Be-hindan

though the modern English has given the preference to *Be*: having retained only two of the above prepositions commencing with *pyð*, and dropped only two commencing with *Be*.

and

and with the same *subauditur* and imputed meaning: As—
 “ *He was slain BY a sword, or, he was slain WITH a sword.*”
 —“ *Kenwalcus was warreyd WITH the King of Britons.*”
 Wallis, confounding together the imperative of *wyrdan*
 with the imperative of *ϥΙΦΑΝ*, says—“ WITH indicat
 “ *instrumentum, ut Latinorum ablativus instrumenti; atque*
 “ *etiam concomitantiam, ut Latinorum cum.*”

By was also formerly used (and not improperly nor with
 a different meaning) where we now employ other prepo-
 sitions, such as *For, In, During, Through*. As;—

“ Aboute the xviii yere of the reygne of Jue dyed
 “ the holy byshop Aldelme. Of him it is written, that
 “ when he was styred by his gostly enmy to the fynne
 “ of the flesh, he to do the more torment to himselfe
 “ and of hys body, wolde holde within his bedde by hym
 “ a fayre mayden BY so long a tyme as he myght fay over
 “ the hole fauter.” Fabian LXXVI.

“ The which BY a longe time dwelled in warre.” XLV.

“ To whom the fader had BY hys lyfe commytted
 “ him.” LXXII.

“ He made Clement BY his lyfe helper and successeur.”
LV.

“ Whom Pepyn BY his lyfe hadde ordeyned ruler of
“ Guian.” LXXXIII.

“ Sleyng the people without mercy BY all the wayes
“ that they passyd.” LXXVIII.

So also OF was formerly used, and with propriety, where
we now employ BY with equal propriety.

“ These quenes were as two goddes
Of arte magike forcereffes
Thei couthe muche, he couthe more :
Thei shape and cast ayenst hym fore,
And wrought many a subtile wile.
But yet thei might hym not begyle.
Such crafte thei had aboue kynde,
But that arte couth thei not fynde,
OF whiche Ulisses was deceived.”

Gower. Lib. 5. Fol. 135. Pag. 1. Col. 2.

BETWEEN. BETWIXT.

BETWEEN (formerly written *Twene, Atwene, Bytwene*) is
a *dual* preposition, to which the Greek, Latin, Italian,
French, &c. have no word correspondent; and is almost
peculiar to ourselves, as some languages have a peculiar
dual

dual number. It is the Anglo-saxon Imperative *Be*, and *тpeгeн* or *twain*.

BETWIXT (by Chaucer written *Bytwyt* *) is the imperative *Be*, and the Gothic *тvꝥs*, or *two* : and was written in the Anglo-saxon *Beтpeohs*, *Beтpeox*, *Beтpux*, *Beтpꝥx*, and *Beтpꝥxt*.

BEFORE, BEHIND, BELOW, BESIDE, BESIDES.

These Prepositions are merely the imperative *BE*, compounded with the nouns *FORE*, *HIND*, *LOW*, *SIDE*, which remaining still in constant and common use in the language ; as—The *fore part*, the *hind part*, a *low place*, the *side*,—require no explanation.

BENEATH.

BENEATH means the same as *Below*. It is the imperative *Be* compounded with the noun, *Neath*. Which word *Neath* (for any other use but this of the *preposition*) having flipped away from our language, would perhaps have given some trouble, had not the nouns, *Nether* and *Nethermost*

* “ Thy wife and thou mote hange fer atwynne,
“ For that *Bytwyt* you shall be no fynne.”

Miller's Tale.

(corrupted)

(corrupted from Neoðemærτ, Niðemærτ) still continued in common use *. The word *Nether* is indeed at present fallen into great contempt, and is rarely used but in ridicule and with scorn: and this may possibly have arisen from its former application to the house of commons, anciently called (by Henry 8) “*The NETHER house of parliament* †.” That the word should thus have fallen into disgrace is nothing wonderful: for in truth this *Nether end* of our parliament has for a long time past been a mere sham and mockery of representation, but is now become

* “ ——— yet higher than their tops
The verd’rous wall of paradise up sprung:
Which to our general Sire gave prospect large
Into his NETHER empire neighb’ring round.”

Par. Lost. Book IV. Ver. 445.

———“ among these the seat of men,
Earth with her NETHER ocean circumfus’d
Their pleasant dwelling place.”

P. L. Book VII. V. 624.

“ In yonder NETHER world where shall I seek
His bright appearances, or foot-step trace?”

P. L. Book XI. V. 328.

† “ Which doctrine also the lordes bothe spirituall and temporall, with
“ the NETHER house of our parliament, have both sene, and lyke very wel.”
*A necessary doctrine and erudition for any christen man. Set furthe by
the Kynges maiestie of Englande. 1543.*

an impudent and barefaced usurpation of the rights of the people.

NEATH, Neoðan, Neoðe, (in the Dutch *Neden*, in the Danish *Ned*, in the German *Niedere*, and in the Swedish *Nedre* and *Neder*) is undoubtedly as much a substantive, and has the same meaning as the word NADIR; which Skinner (and after him S. Johnson) says, we have from the Arabians. This etymology (as the word is now applied only to astronomy) I do not dispute; but the word is much more ancient in the northern languages, than the introduction of that science amongst them. And therefore it was that the whole serpentine class was denominated **NΛΔΚ** in the Gothic, and *Nebpe* in the Anglo-saxon.

If we say in the English,—“*From the TOP to the BOTTOM,*”—the *nouns* are instantly acknowledged: and surely they are to the full as evident in the collateral Dutch, “*Van BOVEN tot BENEDEN.*—*BENEDEN stad, &c.*”

U N D E R.

UNDER (in the Dutch *Onder*) which seems by the sound to have very little connexion with the word *Beneath*, is yet in fact almost the same, and may very well supply its place: for it is nothing but *On neder*, and is a Noun.

“ Nor engine, nor device polemic,
 Disease, nor Doctor epidemic,
 Though stor'd with delectory med'cines
 (Which whosoever took is dead since)
 E'er sent so vast a colony
 To both the UNDER worlds, as He.”

Hudibras. Can. 2. V. 320.

B E Y O N D.

BEYOND (in the Anglo-saxon *wiðgeondan*, *Biȝeond*, *Beȝeond*) means *be passed*. It is the imperative *Be*, compounded with the past participle *geond*, *geoned*, or *goneo*, of the verb *ġan*, *ġanȝan*, or *ġonȝan*, to *go*, or to *pass*. So that—“ BEYOND *any place*,” means—“ *Be passed* that *place*,”—or, *Be* that place *passed*.

W A R D.

WARD, in the Anglo-saxon *warþ* or *wearþ*, is the imperative of the verb *warþian* or *wearþian*, to *look at*; or to *direct the view*. It is the same word as the French *garder**: and so Chaucer uses it, where it is not called a preposition.

 “ and theron fuche punyishment let fal.”

Testament of Loue. Boke 2. Fol. 322. p. 2. c. 1.

* Skinner fays—“ REWARD q. d. *Re Award* (i. e. *contra* seu *viciffim*
 “ assignare, ab A. S. *pearð* verfus, erga. v. AWARD.” And under Award,
 he fays—“ AWARD, a part. initiali otiofa A, et A. S. *pearð*. verfus. erga.
 “ q. d. erga talem (i. e.) tali addicere, assignare.”

S. Johnson fays, “ REWARD [*Re* and *Award*] to give in return. Skinner.”
 Which is the more extraordinary becaufe under the article Award, Johnson
 fays, that it is “ derived by Skinner, fomewhat *improbably*, from *pearð*.
 Sax. *towards*.”

recompence, *To benefit* in return for some good action done; yet sometimes means very far from benefit: as thus,—“*Reward* them after their doings”—where it may convey the signification of punishment; for which its real import is equally well calculated: for it is no other than *Regarder*. i. e. *To look again*, i. e. *To remember*, *to reconsider*; the natural consequence of which will be either benefit or the contrary, according to the action or conduct which we *review*.

In a figurative or secondary sense only, *Garder* means to *protect*, to *keep*, to *watch*, to *ward*, or to *guard*. It is the same in Latin: *Tutus*, guarded, *looked* after, safe, is the past participle of *Tueor*. *Tuitus*. *Tutus*. So *Tutor*, he who *looks* after. So we say either,—*Guard* him well, or, *Look* well after him. In different places in England, the same agent is very properly called either a *Looker*, a *Warden*, a *Warder*, an *Overseer*, a *Keeper*, a *Guard*, or a *Guardian*.

Accordingly this word *WARD* may with equal propriety be joined to the name of any person, place, or thing, *to* or *from* which our view or sight may be directed.

I suppose *AWARD* to be *à garder*, i. e. a determination *à qui c'est à garder* the thing in dispute; i. e. to *keep* it—not *custodire*, as Spelman imagined; but to *have* or *hold* it in possession: for *garder* in French is used both ways, as *keep* is in English, and in both properly.

So we may bid the hearer *look at* or *regard* either the *End* or *Beginning* of any *action* or *motion* or *time*. Hence the compound prepositions TOWARD and FROMWARD, and Adverbs of this termination without number: in all of which, WARD is always the imperative of the verb, and always retains one single meaning; viz. *Regard, Look at, See, Direct your view.*

Minshew, Junius, and Skinner, though they are very clear that WARD and GARDER are, on all other occasions, the same word; (and so in *Warden* and *Guardian*, &c.) yet concur that WARD the *Affix* or *postpositive preposition*, is the Latin *Verfus*: Skinner, with some degree however of doubt, saying—“ A. S. autem Weapb, si a Lat. *Vertere* “ *deflecterem, quid sceleris effet?*”—Surely none. It would only be an error to be corrected.

The French preposition *Vers*, from the Italian *Verfo*, from the Latin *Verfus* (which in those languages supply the place of the English WARD, as *Adversus* also does of

To-ward) do all indeed derive from the Latin verb *vertere*, to *turn*; of which those prepositions are the past participle, and mean *turned*. And when it is considered that in order to *direct our view* to any place named, we must *turn* to it; it will not seem extraordinary, that the same purpose should in different languages be indifferently obtained by words of such different meanings, as *to look at*, or, *to turn to*.

ATHWART (i. e. *Atbweort*, or *Atbweoried*) *wrested, twisted, curved*, is the Past participle of *Ðpeopian*, to *wrest*, to *twist*; *flexuosum, sinuosum, curvum* reddere; from the Gothic verb **TNZYERGAN**. Whence also the Anglo-saxon *Ðpeop*. *Ðpeoph*. the German *Zwerch*. *Zwar*. the Dutch *Dwars*. *Swërven*. the Danish *Tverer*. *Tvert*. *Tver*. the Swedish *Twert*. and *Swarfwa*. and the English *Tbwart*, *Swerve* and *Veer* *.

Skinner says—" ab A. S. Lemang, hoc a verbo Lemengan*."

Junius says—" Manifeste est ex A. S. Mængan, Mengian,
" miscere."

Here all our Etymologists are *right* in the meaning of the word, and *therefore concur* in their etymology. Mr. Tyrwhitt alone seems to have no notion of the word. For he says—" *I suspect* the Saxon Lemang had originally " a termination in *an*." But Mr. Tyrwhitt must not be reckoned amongst Etymologists.

AMONG,

AMONG, is the past participle *Ge-mæncgeob*, *Ge-mencgeob*, (or, as the Dutch write it, *Gemengd*, *Gemengt*; and the old English authors, *Meynt* *,) of the Anglo-saxon verb *Gemæncgan*, *Gemencgan*, and the Gothic verb **TAMAINGAN**. Or rather, it is the præterperfect *Lemanǝ*, *Lemonǝ*, *Lemunǝ*, or *Amang*, *Among*, *Amung*, (of the same verb *Mængan*, *Mengān*) used as a participle, without the participial termination *ob*, *aþ*, or *eb*: and it means purely and singly *Mixed*, *Mingled*. It is usual with the Anglo-saxons (and they seem to be fond of it) to prefix especially to their past participles *A*, *Æ*, *Be*, *for*, *Ge*.

Chaucer uses this participle *AMONGES* in a manner which, I suppose, must exclude all doubt upon the subject; and where it cannot be called a preposition.

This manner of using the præterperfect as a participle, without the participial termination *ed* or *en*, is still very common in English; and was much more usual formerly*. In the similar verbs, To sink *Ge-yencan*, To drink *Ge-þrencan*, To stink *Ge-rcencan*, To hang *þengan*, To spring *A-ppungan*, To swing *Spengan*, To ring *Ringan*, To shrink *A-rcincan*, To sting *Stingan*, and in very many others, the same word is still used by us, both as præterperfect and participle; *Sunk, Drunk, Stunk, Hung, Sprung, Swung, Rung, Sbrunk, Stung*. All these were formerly written with an *o* (as *Among* still continues to be) *Sonk, Dronk* (or *A-dronk*) *Stonk, Hong* (or *A-hong*) *Sprong* (or *Y-sprong*) *Swong, Rong, Sbronk, Stong*. But the *o* having been pro-

* Doctor Lowth is of a different opinion. He says—“ This abuse has
 “ been long growing upon us, and is continually making further incroach-
 “ ments,” &c. But Doctor Lowth was not much acquainted with our
 old-English authors, and still less with the Anglo-saxon. It is not an abuse,
 but coeval with the language, and analogous to the other parts of it: but
 it must needs have been highly disgusting to Doctor Lowth, who was excel-
 lently conversant with the learned languages, and took them for his model.

nounced as an *u*, the literal character has been changed by the moderns in conformity with the found. And though *Among* (by being ranked amongst prepositions, and being unsuspected of being a participle like the others) has escaped the change, and continues still to be written with an *o*, it is always sounded like an *u*; *Amung*, *Amunkft*.

In the Reve's tale, Chaucer uses the Preposition *YMELL* instead of *among*.

“ Herdest thou ever sike a song er now ?

“ Lo whilke a complin is *YMELL* hem alle.”

But this will give us no trouble, but afford a fresh confirmation to our doctrine: for the Danes use *Mellem*, *Imellem*, and *Iblandt*, for this preposition *Among*, from their verbs *Megler*, *Melerer*, (in the French *Mesler* or *Méler*) and *Iblander*, to *mix*, to *blend*; and the Swedes *Ibland*, from their verb *Blanda*, to *blend*.

YMELL means *y-medled*, i. e. *mixed*, *mingled*. A *medley* is still our common word for a *mixture*. *Ymeddled*, *ymelled*, and *ymell* by the omission of the participial termination, than which nothing is more common in all our old English writers.

A G A I N S T.

AGAINST (in the Anglo-faxon Ongegen) is derived by Junius from *geonð*.

“ Dr.

“ Dr. Mer. Casaubon “ *mirabiliter* (says Skinner) de-
 “ flectit a Gr. *κατα*.

Minshew derives it from *καταεναντι*.

I can only say that I believe it to be a past participle, derived from the same verb (whatever it be, for I know it not) from which comes the collateral Dutch verb *Jegenen*, to meet, *rencontrer*, to oppose, &c. And I am the more confirmed in this conjecture, because in the room of this preposition the Dutch employ *jegens* from *jegenen*: and the Danes *Mod* and *Imod*, from their verb *Möder* of the same meaning: and the Swedes *Emot* from their verb *Möta* of the same meaning. The Danish and Swedish verbs from the Gothic *MRTGAN*; whence also our verb, to *meet*, and the Dutch *Moeten*, *Gemoeten*.

A M I D O R A M I D S T.

These words (by Chaucer and others written *Amiddes*) speak for themselves. They are merely the Anglo-saxon *On-middan*. *On-miodes*, in *medio*: and will the more easily be assented to, because the *nouns* *Mid*, *Midale*, (i. e. *Mid-dæl*) and *Midst*, are still commonly used in our language.

ALONG.

A L O N G.

On long, secundum longitudinem, or *On length*: “ And these wordes said, she streyght her *On length* (i. e. she stretched herself ALONG) and rested awhile.”

Chaucer. Test. of Loue. Fol. 325. pag. 1. col. 2.

The Italians supply its place by *Lungo*:

“ *Così Lungo l'amate rive andai.*” *Petrarch.*

And the French by the obvious noun and article *Le Long*:

“ *Joconde là deffus se remet en chemin*

“ *Révant à son malheur tout Le Long du voyage.*”

La Fontaine.

So far there is no difficulty. But there was another use of this word formerly; now to be heard only from children or very illiterate persons:

“ King James had a fashion, that he would never admit any to nearness about himself, but such an one as the queen should commend unto him, and make some suit on his behalf; that if the queen afterwards, being ill treated, should complain of this *Dear one*, he might make his answer—“ It is LONG of yourself, for you were the party that commended him to me.”

Archbishop Abbot's narrative. In *Rushworth's Collections.* Vol. I. p. 456.

The Anglo-faxon used *two* words for these *two* purposes, *Andlang*, *Andlong*, *Ondlong*, for the first; and *Elang* for the second: and our most antient English writers observed the same distinction, using *ENDLONG* for the one, and *ALONG* for the other.

“ She slough them in a fodeine rage
“ *ENDELONGE* the borde as thei ben fet.”

Gower. Lib. 2. Fol. 31. pag. 1. col. 2.

“ Thys kynge the wether gan beholde,

Gower. Lib. 4. Fol. 66. pag. 2. col. 1.
- “ I wote well ye haue long serued,
 “ And God wote what ye haue deserued,
 “ But if it is ALONGE on me,
 “ Of that ye unauanced be
 “ Or els if it be LONGE on you,
 “ The soth shall be preued nowe.”
 Lib. 5. Fol. 96. pag. 1. col. 2.
- “ And with hir selfe she toke such strife,
 “ That she betwene the deth and life
 “ Swounende lay full ofte amonge :
 “ And all was this on hym ALONGE,
 “ Whiche was to loue unkinde so.”
 Lib. 5. Fol. 113. pag. 1. col. 2.
- “ But thus this maiden had wronge
 “ Whiche was upon the kyng ALONGE,
 “ But ageyne hym was none apele.”
 Lib. 7. Fol. 172. pag. 2. col. 1.

" Ye wote your felfe, as wel as any wight
 " Howe that your loue al fully graunted is
 " To Troylus, the worthyest wyght
 " One of the worlde, and therto trouth yplight
 " That but it were on him ALONGE, ye nolde
 " Him neuer falsen, whyle ye lyuen sholde."

Chaucer. Troylus. Booke 3. Fol. 176. pag. 2. col. 2.

Once indeed (and only once, I believe) Gower has confounded them, and has used ALONG for both purposes :

" I tary forth the night ALONGE,
 " For it is nought on me ALONGE
 " To flepe, that I soon go."

Lib. 4. Fol. 78. pag. 2. col. 1.

Anblanȝ or ENDLONG is manifestly *On long*, But what is
 Gelanȝ or ALONG?

S. Johnson says it is—" a word now out of use, but
 " truly English." He has no difficulty with it: according
 to him, it is—" Gelanȝ, a fault, Saxon."—But there is
 no such word in Saxon as Gelanȝ, *a fault*. Nor is that,
 at any time, the meaning of this word LONG (OR ALONG,
 as I have always heard it pronounced). *Fault* or *not*
Fault, always depends upon the other words in the sen-
 tence: for instance,

" Thanks

“ Thanks to Pitt: it is ALONG of him that we not
 “ only keep our boroughs, but get peerages into the
 “ bargain.”

“ Curses on Pitt: it is ALONG of him that the free
 “ constitution of this country is destroyed.”

I suppose that Lord Lonsdale, Lord Elliot and the father of Lady Bath, would not mean to impute any *fault* to the minister in the former of these sentences: though the people of England do certainly impute an inexcusable crime and treachery to him in the latter.

But Johnson took carelessly what he thought he found, without troubling himself about the fact or the meaning; and he was misled by Skinner*: as he was also concerning the verb *To Long*. I mention the verb *To Long*, because it may possibly assist us in discovering the meaning of the

* Skinner says—“ LONG ab A. S. Lelang. *causa, culpa*, ut dicimus, *It is LONG of him.*” Which were evidently intended by Skinner to be understood *causa, culpa*.

So Lye says—“ Lelang. *Long of. Opera, causa, impulsu, culpa cuiusvis.*—æt ðe ýr upe lýfe zelang, ut Anglice dici solet, *It is LONG of thee that we live.*” Here is no *Fault*.

other word.—“ To Long, fays Skinner, valde defiderare, “ ut nos dicimus, *to think the time LONG till a man ha's a thing.*”

The word LONG is here lugged in by head and shoulders, to give something of an appearance of connexion between the verb and the noun. But when we confider, that we have, and can have, no way of expreffing the acts or operations of the mind, but by the fame words by which we exprefs fome corresponding (or fuppofed corresponding) act or operation of the body: when (amongft a multitude of fimilar instances) we confider that we exprefs a moderate defire for any thing, by faying that we *incline* (i. e. *Bend ourfelves*) to it; will it furprize us, that we fhould exprefs an eager defire, by faying that we LONG, i. e. Make long, lengthen, or ftretch out ourfelves *after* it, or *For* it? efpecially when we obferve, that after the verb *To incline* we fay *To* or *Towards* it; but after the verb *To Long* we muft ufe either the word *For* or *After*, in order to convey our meaning.

Langian in the Anglo-faxon is *To Long*, i. e. *To make long*, *To lengthen*, *To ftretch out*, *To produce*, *extendere*, *protendere*.

Langap ðe apuht, Aðam, up to Gode." i. e. *Longeth* you, *Lengtheneth* you, *Stretcheth* you up to God.

Lang or *Long* is the præterperfect of Lenġian. The Anglo-faxon and old English writers commonly use the præterperfect as a participle, especially with the addition of the prefixes *a* or *ge*.—

“ Nota fecundo,” says Hickes, “ has præpositiones sœpe “ in vicem commutari, præfertim Ge, Be, et A.”—May we not then conclude that Ge-lang or A-LONG is the past participle of Lenġian, and means *Produced*?

ROUND, AROUND.

Whose place is supplied in the Anglo-faxon by hpeil and On-hpeil. In the Danish and Swedish by *Om-kring*. In Dutch by *Om-ring*; and in Latin by *circum*, a Gr. *Κερκῶ*, of which *circulus* is the diminutive.

ASIDE, ABOARD, ACROSS, ASTRIDE, require no explanation.

DURING.

DURING.

The French participle *Durant*; from the Italian; from the Latin. The whole verb *Dure* was some time used commonly in our language.

“ And al his luste, and al his besy cure

“ Was for to loue her while his lyfe mai DURE.”

Chaucer. Man of Lawes T. Fol. 19. pag. 1. col. 2.

“ How shuld a fysh withouten water DURE.”

Troilus. Boke 4. Fol. 186. pag. 2. col. 1.

Ibid. Boke 1. Fol. 306. pag. 1. col. 2.

PENDING.

The French participle *Pendant*; from the Italian; from the Latin.

OPPOSITE.

The Latin participle *Oppositus*.

MOIENING.

M O I E N I N G.

The French participle *Moyennant*; from the Italian *Mediante*; from the Low Latin.

The Imperative of the verb. This prepositive manner of using the imperative of the verb *To save*, afforded Chaucer's Sompnour no bad *equivoque* against his adversary the Friar;

“ God *save* you all, *save* this curfed Frere.”

O U T C E P T.

The imperative of a miscoined verb, whimsically composed of *Out* and *capere*, instead of *Ex* and *capere*.

 simply the *nigbest*, and never implies either *following* or
preceding. As, “ To fit NEXT.” &c.

I N S T E A D.

From the Anglo-faxon *On ꝛeðe, In ꝛeðe, i. e. In place.*
 In the Latin it is *Vice* and *Loco.* In the Italian *In luogo.*
 In the Spanish *En lugar.* And in French *Au lieu.* In the
 Dutch it is either *In stede* or *In plaats.* In the German
On statt. In the Danish *Istæden.* And in the Swedish (as
 we use either *Home STEAD* or *Home STALL*) it is *Istaellet.*

Our oldest English writers more rarely used the French
 word *Place*, but most commonly the Gothic and Anglo-
 faxon word *STĀAS, Stæð, Stæde.* The Instances are so abun-
 dantly numerous that it may seem unnecessary to give any.

“ But take this lore into thy wit,

“ Furth of that STEDE I went.”

Douglas. Boke 2. pag. 59.

“ But ze, unhappy men, fle fra this STEDE.”

Douglas. Boke 3. Pag. 89.

The substantive STEAD is by no means obsolete, as S. Johnson calls it; nothing being more common and familiar than—“ *You shall go in their STEAD.*” It is likewise not very uncommon in composition; as *Homestead*, *Bedstead*, *Roadstead* *, *Girdlestead* †, *Noonsted* ‡, *Steadfast*, *Steady*, &c.

* We often meet with the word *Roadstead* in Voyages, and I suppose it is still a common term with all seafaring men.—“ On Thursday Captain Fauchey arrived at Plymouth. The purport of his dispatches, we conceive, can only be a representation of the necessity of evacuating L’Isle Dieu; as it produces nothing, has no good *Roadsted*, and is not tenable, if not protected by a fleet.”

“ She

thinks, that *Step mother* is, quasi *Stiff mother*, from *Stief*, *durus*; and so called because she is commonly “*dura*, “*seva, immitis, rigida.*” Voffius on the contrary thinks she is so called, quasi *fulciens mater*, as a *stiff* and *strong* support of the family; “*quia fulcit domum cum nova hæreditate.*” Junius, observing that there is not only *Stepmother*, but also *Stepchild*, *Stepson*, *Stepdaughter*, *brother*, *sister*, &c. to all of whom this imputation of severity cannot surely belong, (neither can they be said *fulcire domum cum nova hæreditate*) says *Stepmother* is so called, *quasi orphanorum mater*: “*nam ꝛæpan Anglo-* “*faxonibus, et Stiufan Alamannis videntur olim usurpata,* “*pro orbare.*” S. Johnson, neither contented with any of the foregoing reasoning, nor yet with the *videntur olim usurpata*, determined also to try his hand (and a clumsy one God knows it is) at an etymology; but instead of it produced a Pun. *Stepmother*, according to him, is—“*a* “*woman who has stepped into the place of the true* “*mother.*”

“*She by her spells could make the moon to stay,*
 “*And from the East she could keep back the day,*

But in the Danish collateral language, the compounds remain uncorrupted; and there they are, with a clear and unforced meaning applicable to all—*Stedfader, Stedmoder, Stedbroder, Stedsöfter, Stedbarn, Stedson, Steddotter*. i. e. Vice, Loco, in the place of, INSTEAD of a father, a mother, a brother, &c.

Spelman, Junius, Skinner and Menage, all resort to *Franco-Gall.* for their etymology. As for *BOTO* and its diminutive *BOTONTINUS* (which have been quoted) they are evidently the translation of a Gothic word common to all the northern nations: which word, as it still remains in the Anglo-saxon dialect, was by our ancestors written *Boða* (whence our English *To BODE* and many other words)

* So, *Vitalis de Limit.* “ *Hi non sunt semper a ferro taxati, & circa*

AFTER (Goth. *𐌵𐌹𐌰𐌶𐌰* A. S. *Æfter*. Dutch *Agter*, *Achter*. Danish, *Efter*, *Bag*. Swedish *Efter*, *Åtta*, *Achter*.) is used as a noun adjective in Anglo-saxon, in English, and in most of the northern languages. I suppose it to be no other than the comparative of the noun AFT: (A. S. *Æft*) for the retention of which latter noun in our language we are probably obliged to our seamen.

Hind, *Aft*, and *Back*, have all originally the same meaning. In which assertion (although AFT had not remained in our language) I should think myself well justified by the authority, or rather the sound judgment, of Mr. de Brosses; who says well—" *Quelquefois la signification primitive nous est derobée, faute de monuments qui l'indiquent en la langue. Alors cependant on la retrouve parfois en la recherchant dans les langues meres ou collaterales.*" In the Danish language they express the same meaning by, *For* og *Bag*, which we express by *Fore* and *Aft*, or, *Before* and *Behind*. And in the Anglo-saxon they use indifferently *Behindan*, *Beæftan*, and *Onbæc*.

DOWN,

D O W N, A D O W N.

In the Anglo-saxon Dun, Æbun. Minshew and Junius derive it from Δυνα, fubeo.

Skinner says—"Speciose alludit Gr. Δυνα."

Lye says,—“Non male referas ad *Arm. Down*, profundus.”

S. Johnson, in point of etymology and the meaning of words, is always himself.

“ADOWN, the adverb, he says, is from *A*, and *Down*; and means—*On the ground*.”

“ADOWN, the preposition, means—*Towards the ground*.”

But though ADOWN comes from *A*, and *Down*,—
 “DOWN, the preposition, he says, comes from Æbuna,
 “Saxon: and means; 1st. Along a descent; and 2dly.
 “Towards the *mouth* of a *River*.”

“DOWN, the adverb, he says, means—*On the ground*.”
 But “DOWN, the substantive, he says, is from *Dun*, Saxon,
 “a Hill;

“ a Hill; but is used now as if derived from the adverb:
 “ for it means, 1st. A large open *plain or valley*.”

And as an instance of its meaning a *valley*, he immediately presents us with *Salisbury Plain*.

“ On the *Downs* as we see, near Wilton the fair,
 “ A haſt'ned hare from greedy greyhound go.”

He then gives four instances more to shew that it means a *valley*; in every one of which it means hills or rising grounds. To compleat the absurdity, he then says, it means, “ 2dly. A hill, a rising ground; and that, *This sense is very rare*.” Although it has this sense in every instance he has given for a contrary sense: nor has he given, nor could he give, any instance where this substantive has any other sense than that which he says is so rare.—But this is like all the rest from this quarter; and I repeat it again, the book is a disgrace to the country.

Freret, Falconer, Wachter and De Broffes, have all laboriously and learnedly (but, I think, not happily) considered the word *Dun*.

From what Camden says of the antient names (*Danmonii* or *Dunmonii*, and *Dobuni*) of the inhabitants of
 Cornwall

Cornwal and Gloucestershire, and of the two rivers (*Daven* or *Dan* or *Dun* or *Don*) in Cheshire and in Yorkshire; it seems as if he supposed, that our English word DOWN came to us from the Britons.

Solinus, he observes, called the Cornish men *Dunmonii*;
“ which name seems to come from their dwelling there
“ under hills. For their habitation all over this country
“ is low and in vallies; which manner of dwelling is
“ called in the British tongue *Danmunitb*. In which sense
“ also the province next adjoining is at this day named by
“ the Britons *Duffneint*, that is to say, *Low vallies*.”

Of the *Dobuni* he says,—“ This their name, I believe,
“ is formed from *Duffen*, a British word; because the
“ places where they planted themselves, were for the most
“ part low and lying under the hills.”

Speaking of the river in Cheshire, he says,—“ Then
“ cometh this *Dan* or more truly *Daven*, to *Davenport*,
“ commonly called *Danport*.”

Of the river in Yorkshire, he says,—“ The river *Danus*,
“ commonly called *Don* or *Dune*, so termed, as it should
“ seem, because it is carried in a channel low and sunk
“ in

“ in the ground : for fo much signifieth *Dan* in the British
“ language *.”

Selden, in his notes on the first song of Drayton's *Poly-*
olbion, gives full assent to Camden's etymology. He says,
—“ *Duffneint*, i. e. low valleys in British, as judicious
“ Camden teaches me.”

Milton, I doubt not on the same authority, calls the
river “ the *gulphy DUN*.”

“ Rivers arise ; whether thou be the son
“ Of utmost Tweed, or Oose, or gulphy *Dun*.”

* “ Regionem illam infedêrunt antiquitùs Britanni, qui Solino *Dunmonii*
“ dicti. Quod nomen ab habitatione sub montibus factum videatur. In-
“ ferius enim, et convallibus passim per hanc regionem habitatur, quod
“ *Danmunith* Britannicè dicitur : quo etiam sensu proxima provincia *Duff-*
“ *neint*, i. e. Depressæ valles a Britannis hodie vocatur.”

Pag. 133. Folio Edit. 1607.

“ *Dobunos* videamus, qui olim, ubi nunc Gloucestershire et Oxfordshire,
“ habitârunt. Horum nomen factum a *Duffen* Britannica dictione credi-
“ mus ; quòd maxima ex parte loca jacentia et depressa sub collibus in-
“ fidebant.” Pag. 249.

“ *Dan* vel *Daven* e montibus &c. fertur ad &c. Deinde Davenport,
“ vulgò *Danport* accedit.” Pag. 461.

“ *Danus*, vulgò *Don* et *Dune*, ita, ut videtur, nominatus, quòd preffiori
“ et inferiori in solum labitur alveo ; id enim *Dan* Britannis significat.”
Pag. 562.

And Bishop Gibson concurs with the same; translating, without any dissent, the marginal note, “ *Duffen* Britan-
 “ *nicè profundum five depreffum,*” in these words, “ *Duffen,*
 “ in British, deep or low.”

How then, against such authorities, shall I, with what-
 ever reason fortified, venture to declare, that I am far
 from thinking that the Anglo-faxons received either the
 name of these rivers, or their word *DUN*, *ADUN* (which
 is evidently our word *DOWN*, *ADOWN*, differently spelled) in
 any manner from the British language. And as for *Duffen*
 (from which, with Camden, I think the words proceeded)
 we have it in our own language the Anglo-faxon, and with
 the same meaning of *sunk*, *depreffum*, *deep* or *low*.

If, with Camden, we can suppose the Anglo-faxon *Dun*
 to have proceeded through the gradations of

$$\begin{array}{l} \textit{Dufen} \left\{ \begin{array}{l} \textit{Duven, Duvn, Dun, Don, Down.} \\ \textit{Daven, Davn, Dan.} \end{array} \right. \end{array}$$

I should think it more natural to derive both the name of
 the rivers* and the preposition from *Dufen* †, the past
 participle

* I suppose the river *Dove* in Staffordshire to have its denomination from
 the same word, and for the same reason.

Test. of Loue. Fol. 312. pag. 1. col. 1.

It is not necessary for my present purpose, to trace the Particles any farther than to some Noun or Verb of a determinate signification; and therefore I might here stop at the Anglo-saxon noun Ufan, *Altus*. But I believe that Ufon, Ufa; UPON, UP, means the same as *Top* or *Head*, and is originally derived from the same source. Thus,

“ Low-

“ *Lowliness* is young ambition's ladder,
 “ Whereto the climber *Upwards* turns his face ;
 “ But when he hath attain'd the *Topmost* round,
 “ He then unto the ladder turns his back.”

Where you may use indifferently either *Upward*, *Topward*, or *Headward*; or *Topmost*, *Upmost*, or *Headmost*.

Some etymologists have chosen to derive the name of that part of our body from the Scythian *HA*, *altus*; or the Islandic *HAD*, *altitudo*; or the Gothic *hAuh*, *altus*; or (with Junius) from the Greek *υπατος*; or Theot. *HOH*; or the Anglo-saxon *Heab*. But our English words *Head* and *Heaven* are evidently the past participles *Heaved* and *Heaven* of the verb to *Heave*: as the Anglo-saxon *Heafod*, *Heafod*, *caput*, and *Heofen*, *Heofen*, *coelum*, are the past participles of the verb *Heafan*, *Heofan*, to *beave*, to *lift* up. Whence *Upon* also may easily be derived, and with the same signification. And I believe that the names of all abstract relation (as it is called) are taken either from the adjectived common names of objects, or from the participles of common verbs. The relations of *place* are more commonly from the names of some parts of our body; such as, *Head*, *Toe*, *Breast*, *Side*, *Back*, *Womb*, *Skin*, &c.

Wilkins seems to have felt something of this sort, when he made his ingenious attempt to explain the local prepositions by the help of a man's figure in the following Diagram. But confining his attention to ideas (in which he was followed by Mr. Locke) he overlooked the etymology of words, which are their signs, and in which the secret lay.

“ For the clearer explication of these *local* prepositions
“ (says he) I shall refer to this following Diagram. In
“ which by the *oval* figures are represented the preposi-
“ tions determined to motion, wherein the *acuter* part
“ doth point out the tendency of that motion. The
“ *Squares* are intended to signify rest or the term of mo-
“ tion. And by the *round* figures are represented such
“ relative prepositions, as may indifferently refer either to
“ motion or rest.”

In all probability the Abbé de l'Épée borrowed his method of teaching the prepositions to his deaf and dumb scholars from this notion of Wilkins.

“ Tout ce que je puis regarder directement *en Face*, est
 “ *Devant* moi : tout ce que je ne peux voir sans retourner
 “ la tête de l'autre côté, est *Derrière* moi.

“ S'agissoit-il de faire entendre qu'une action étoit passée ?
 “ Il jettoit au hasard, deux ou trois fois sa main du côté
 “ de son épaule. Enfin s'il desiroit annoncer une action
 “ future, il faisoit avancer sa main droite directement de-
 “ vant lui.”

Des sourds et muets. 2 Edit. pag. 54.

You will not expect me to waste a word on the prepositions *touching, concerning, regarding, respecting, relating to, saving, except, excepting, according to, granting, allowing, considering, notwithstanding, neighbouring, &c.* nor yet on the compound prepositions *In-to, Un-to, Un-till, Out-of, Through-out, From-off, &c.*

B.

I certainly should not, if you had explained all the simple terms of which the latter are compounded. I ac-
 6. knowledge

knowledge that the meaning and etymology of some of your prepositions are sufficiently plain and satisfactory : and of the others I shall not permit myself to entertain a decided opinion till after a more mature consideration. *Pedetentim progredi*, was our old favourite motto and caution, when first we began together in our early days to consider and converse upon philosophical subjects ; and, having no fanciful system of my own to mislead me, I am not yet prepared to relinquish it. But there still remain five simple prepositions, of which you have not yet taken the smallest notice. How do you account for IN, OUT, ON, OFF, and AT.

H.

Oh ! As for these, I must fairly answer you with *Martin Luther*,—“ Je les defendrois aisément devant le Pape, mais “ je ne sçais comment les justifier devant le diable.” With the common run of Etymologists, I should make no bad figure by repeating what others have said concerning them ; but I despair of satisfying you with any thing they have advanced or I can offer, because I cannot altogether satisfy myself. The explanation and etymology of these words require a degree of knowledge in all the antient northern languages, and a skill in the application of that knowledge, which I am very far from assuming : and, though I am
almost

almost persuaded by some of my own conjectures concerning them *, I am not willing, by an apparently forced and far-fetched derivation; to justify your imputation of etymological legerdemain. Nor do I think any farther inquiry necessary to justify my conclusion concerning the prepositions; having, in my opinion, fully intitled myself to the application of that axiom of M. de Broffes (Art. 215.) —“ La preuve connue d’un grand nombre de mots d’une
 “ espece, doit etablir un precepte generale fur les autres
 “ mots de meme espece, à l’origine desquels on ne peut
 “ plus remonter. On doit en bonne logique juger des
 “ choses que l’on ne peut connoitre, par celles de même
 “ espece qui sont bien connues; en les ramenant à un
 “ principe dont l’evidence se fait appercevoir par tout où
 “ la vue peut s’étendre.”

* In the Gothic and Anglo-saxon **ĪNNA**, *inna*, means *Uterus, viscera, venter, interior pars corporis*. (*Inna, inne*, is also in a secondary sense used for *Cave, Cell, Cavern*.) And there are some etymological reasons which make it not improbable that *OUT* derives from a word originally meaning *Skin*. I am inclined to believe that *IN* and *OUT* come originally from two *Nouns* meaning those two parts of the body.

ΕΠΕΑ ΠΤΕΡΟΕΝΤΑ, &c.

CHAP. X. OF ADVERBS.

B.

THE first general division of words (and that which has been and still is almost universally held by Grammarians) is into *Declinable* and *Indeclinable*. All the *Indeclinables* except the *Adverb*, we have already considered. And though Mr. Harris has taken away the Adverb from its old station amongst the other Indeclinables, and has, by a singular whim of his own, made it a secondary class of *Attributives*, or (as he calls them) *Attributes of Attributes*; yet neither does he nor any other Grammarian seem to have any clear notion of its nature and character.

B. Johnson * and Wallis and all others, I think, seem to confound it with the Prepositions, Conjunctions and Interjections.

* " Prepositions are a peculiar kind of *Adverbs*, and ought to be referred thither."
B. Johnson's Grammar.

terjections. And Servius (to whom learning has great obligations) advances something which almost justifies you for calling this class, what you lately termed it, the common sink and repository of all heterogeneous, unknown corruptions. For, he says,—“ *Omnis pars orationis, quando definit esse quod est, migrat in Adverbium **.”

H.

I think I can translate Servius intelligibly—Every word, *quando definit esse quod est*, when a Grammarian knows not what to make of it, *migrat in Adverbium*, he calls an Adverb.

These Adverbs however (which are no more a separate part of speech than the particles we have already considered) shall give us but little trouble, and shall waste no time: for I need not repeat the reasoning which I have already used with the Conjunctions and Prepositions.

“ Interjectio posset ad Adverbium reduci; sed quia majoribus nostris placuit illam distinguere; non est cur *in re tam tenui* hæreamus.”

Caramuel.

“ CHEZ est plutôt dans notre langue un *Adverbe*, qu'une *Particule*.”

De Broffes.

* “ *Rectè dictum est ex omni adjectivo fieri adverbium.*” *Campanella.*

All Adverbs ending in LY (the most prolific branch of the family) are sufficiently understood: the termination (which alone causes them to be denominated Adverbs) being only the word LIKE corrupted; and the corruption so much the more easily and certainly discovered, as the termination remains more pure and distinguishable in the other sister languages, the German, the Dutch, the Danish and the Swedish; in which it is written *lich, lyk, lig, liga*. And the Encyclopædia Britannica informs us, that—"In Scotland the word *Like* is at this day frequently used instead of the English termination *Ly*. As, for a goodly figure, the common people say, a *goodlike* figure."

A D R I F T

Is the past participle *Adrifed, Adrif'd, Adrift*, of the Anglo-saxon verb *Dripan, Ādripan*, to *Drive*.

"And quhat auenture has the hiddir *DRIFFE*?"

Douglas. Booke 3. pag. 79.

i. e. *Drifed* or *Driffen*.

A G H A S T, A G A S T.

May be the past participle *Agazed*.

"The French exclaim'd—The Devil was in arms.

"All the whole army stood *Agazed* on him."

First part of Henry 6. Act 1. Sce. 1.

I

Agazed

Agazed may mean, made to *gaze* : a verb built on the verb *To gaze*.

In King Lear (Act 2. Sce. 1.) Edmund says of Edgar,

———“ GASTED by the noise I made,
“ Full suddenly he fled.”

Gasted, i. e. made aghast : which is again a verb built on the participle *agbafst*. This progressive building of verb upon verb is not an uncommon practice in language.

In Beaumont and Fletcher's *Wit at several Weapons*, (Act 2.) “ Sir Gregory Fopp, *a witlefs lord of land*,” says of his clown,

“ If the fellow be not out of his wits, then will I never
“ have any more wit whilst I live ; either the fight of the
“ lady has GASTERED him, or else he's drunk.”

I do not bring this word as an authority, nor do I think it calls for any explanation. It is spoken by a fool of a fool ; and may be supposed an ignorantly coined or fantastical cant word ; or corruptly used for *Gasted*.

An objection may certainly be made to this derivation : because the word AGAST always, I believe, denotes a considerable

considerable degree of terror; which is not denoted by the verb *To Gaze*: for we may *gaze* with delight, with wonder or admiration, without the least degree of fear. If I could have found written (as I doubt not there was in speech) a Gothic verb formed upon the Gothic noun **AFIS**, which means *Fear* and *Trembling* (the long-fought etymology of our English word *Ague* *); I should have avoided this objection,

* Junius says—"AGUE, febris. G. *Aigù* est *acutus*. Nihil nempe usitatus est, quam *acutas* dicere febres."

But Skinner, a medical man, was aware of objections to this derivation, which Junius never dreamed of. He therefore says—"Fortasse a Fr. *Aigú*, *acutus*. Quia (*saltem in paroxysmo*) *acutus* (*quodammodo*) morbus est, et *acutis doloribus* exercet: licet a medicis, durationem magis quam vehementiam hujus morbi respicientibus, non inter *acutas*, sed *chronicas* febres numeretur."

But Skinner's qualifying *paroxysmo*, *quodammodo*, *acutis doloribus*, by which (for want of any other etymology) he endeavours to give a colour to the derivation from *Aigu*, *acutus*, will not answer his purpose: for it is not true (and I speak from a tedious experience) that there are any *acute pains* in any period of the AGUE. Besides, S. Johnson has truly observed, that—"The *cold* fit is, in popular language, more particularly called the AGUE; and the *hot*, the fever." And it is commonly said—"He has an AGUE and fever."

I believe our word AGUE to be no other than the Gothic word **AFIS**, fear, trembling, shuddering.

1. Because the Anglo-saxons and English, in their adoption of the Gothic substantives, (most of which terminate in s) always drop the terminating s.

2. Because,

jection, and with full assurance have concluded that AGAST was the past participle of ἈΓΙΣΑΝ, i. e. ἈΓΙΣΕΑ, ἈΓΙΣ'Α, ἈΓΙΣΤ. i. e. made to shudder, terrified to the degree of trembling. There is indeed the verb ἈΓΩΝ, timere; and the past participle ἈΓΙΩΣ, territus; and it is not without an appearance of probability, that, as *Whiles, Amonges, &c.* have become with us *Whilst, Amongst, &c.* so ἈΓΙΩΣ might become AGIDST, AGIST, AGAST; or ἈΓΙΩΣ might become AGISD, AGIST, AGAST. And the last seems to me the most probable etymology.

2. Because, though the English word is written AGUE, the common people and the country people always pronounce it AGHY, or AGUY.

3. Because the distinguishing mark of this complaint is, the *trembling* or *shuddering*; and from that distinguishing circumstance it would naturally take its name.

4. Because the French, from whom the term *Aigu* is supposed to have been borrowed, never called the complaint by that name.

S. Johnson says—To *Stray* is from the Italian *Straviare* from the Latin *extra viam*. But **СТРАΥΛΑΝ**, **СТРЕАРΙΑΝ**, **СТРЕОРΙΑН**, **СТРЕРΙΑН**, **СТРЕЖΙΑН**, **СТРЕЖІАН** : and **СТРАР**, **СТРЕОР**, **СТРЕО**, **СТРЕА**, **СТРЕ**, were used in our own mother tongues, the Gothic and Anglo-faxon ; long before the existence of the word *Straviare*, and the beginning of the corrupted dialect of the Latin called Italian, and even of the corrupted dialect of the Greek called Latin. And as the words *To Sunder* and *Afunder* proceed from **SONÐ**, i. e. *Sand* : so do the words *To Stray*, *To Straw*, *To Strow*, *To Strew*, *To Straggle*, *To Stroll*, and the well-named *Strawberry* (i. e. *Straw'd-berry*, *Stray-berry*) all proceed from *Straw*, or as our peasantry still pronounce it *Strab* *. And *Astray*, or *Astray'd*, means *Strawed*, scattered and dispersed as the *Straw* is about the fields.

E N O U G H.

In Dutch *Genoeg* from the verb *Genoegen*, to content, to satisfy. S. Johnson cannot determine whether this word is a substantive, an adjective, or an adverb; but he thinks it is all three.

“ It is not easy, he says, to determine whether this
 “ word be an adjective or adverb; perhaps, when it is
 “ joined with a substantive, it is an adjective, of which
 “ *Enough* is the *Plural**. In other situations it seems an
 “ adverb; except that, after the verb *To have* or *To be*,
 “ either expressed or understood, it may be accounted a
 “ substantive.”

According to him, it means,—“ In a sufficient measure,
 “ so as may satisfy, so as may suffice. 2. Something
 “ sufficient in *greatness or excellence*. 3. Something *equal*
 “ *to a mans power or abilities*. 4. In a sufficient degree.
 “ 5. It notes a *slight* augmentation of the positive degree.
 “ 6. Sometimes it notes *Diminution*! 7. An exclamation
 “ noting fulness or satiety.”

* In his Grammar, he says,—“ Adjectives in the English language are
 “ wholly indeclinable; having neither case, gender, nor *number*; being
 “ added to Substantives, in all relations, without any change.”

In the Anglo-saxon it is *Lenoȝ* or *Lenoh*: and appears to be the past participle *Lenoȝeð*, multiplicatum, *manifold*, of the verb *Lenoȝan*, multiplicare.

LIEF. LIEVER. LIEVEST.

Leop, *Leopne*, *Leopert*.

“ I had as LIEF not be, as live to be in awe
 “ Of such a thing as I myself.”

Shakespeare's Julius Cæsar.

No modern author, I believe, would now venture any of these words in a serious passage: and they seem to be cautiously shunned and ridiculed in common conversation, as a vulgarity. But they are good English words, and more frequently used by our old English writers, than any other word of a corresponding signification.

Leop (for Leopeo, or Lupab, or Lupob or Lup) is the past participle of Lupian, To love; and always means *beloved**.

“ And nethes by daies olde,

ADIEU. FAREWELL.

The former from the French *à dieu*, from the Italian *Addio*: the latter the imperative of *fare*, to go, or to fare. So it is equally said in English—How fares it? or, How goes it?—

The Dutch and the Swedes also say, *Vaarwel*, *Farväl*: The Danes *Lev-vel*, and the Germans *Lebet-wobl*.

HALT.

H A L T.

Means—*Hold*, Stop, (as when we say—*Hold your band*),
Keep the present situation, *Hold still*.

In German *Still halten* is *To halt* or stop; and *Halten* is
To Hold. In Dutch *Still houden*, to halt or stop; and
Houden, to hold.

Menage says well—“*Far Alto*, proprio di quel fermarsi
“ che fanno le ordinanze militari: Dal Tedesco *Halte*, che
“ vale, *Ferma là*; *dimora là*; imperativo del verbo *Halten*,
“ cioè arrestarsi.”

The Italians assuredly took the military term from the
Germans.

Our English word HALT is the imperative of the Anglo-
saxon verb Healban, to hold; and *Hold* itself is from Heal-
ban, and was formerly written HALT.

“ He leyth downe his one eare all plat

“ Unto the grounde, and HALT it fast.”

Gower. Lib. 1. Fol. 10. pag. 1. col. 2.

“ But so well HALTE no man the plough,

“ That he ne balketh otherwhile.”

Lib. 2. Fol. 50. pag. 1. col. 1.

" The golde, whiche auarice enclofeth,
 " But all to litell hym fuppoſeth,
 " He let it neuer out of his honde,
 " But gette hym more, and HALT it faſt.
 " To ſeie howe ſuche a man hath good,
 " Who ſo that reaſone underſtoode,

Troilus. Boke 3. Fol. 182. pag. 1. col. 1.

L o.

The imperative of *Look*. So the common people fay corruptly,—“ *Lo’* you there now”—“ *La’* you there.”—

Where we now employ ſometimes LOOK and ſometimes LO, with diſcrimination; our old Engliſh writers uſed indifferently LO, LOKE, LOKETH, for this imperative. Chaucer, in the Pardoners Tale, ſays

“ Al

“ Al the fouerayne actes, dare I say,
 “ Of victories in the Olde Testament
 “ Were don in abtynence and in prayere,
 “ **LOKETH** the Byble, and there ye mowe it lere.”

“ **LOKETH** * Attyla, the great conquerour
 “ Dyed in his slepe, with shame and dishonour.”

“ **LOKE** * eke howe to kyng Demetrius
 “ The king of Parthes, as the boke fayth us,
 “ Sent him a payre of dyce of golde in scorne.”

“ *Beholde* and *se* that in the first table
 “ Of hye gods hestes honourable,
 “ How that the seconde hefte of him is this,
 “ Take not my name in ydelnesse amys.
 “ **Lo**, he *Rather* † forbyddeth suche fwering
 “ Than homicide, or any other cursed thing.”

Fol. 66. pag. 2. col. 2. Fol. 67. pag. 1. col. 1.

So B. Johnson, (*Alcbymist*, A. 2. Sc. 3.)

“ For **LOOK**, how oft I iterate the work,
 “ So many times I add unto his virtue.”

Here, if it had pleased him, he might have said—**Lo**
 how oft &c.

* In both these places a modern writer would say **Lo**.

† *Sooner, Earlier*.—He forbids such swearing, *Before* he forbids homicide.
 i. e. in a *foregoing* part of the table.

And again

“ *Subtle*. Why, Rascall—

“ *Face*. Lo you here, Sir.”

Here, if it had pleased him, he might have said—LOOK you here.

The Dutch correspondent adverb is *Siet* from *Sien*, to look or see. The German *Siehe* or *Sibe* from *Sehen*, to see. The Danish *See* from *Seer*, to look or see. The Swedish *Si*, or *Si der*, from *Se*, to look.

T O W I T.

Though it is the infinitive of *pran*, does not mean *To Know*, as Skinner and S. Johnson have supposed; but *To Be known*, *Sciendum*. For so (for want of *Gerunds*, as they are most absurdly called) our ancestors used the Active Infinitives, as well of other verbs as of *pran**. Similar adverbs

* “ False fame is not TO DREDE, ne of wyse persons TO ACCEPTE.”

Test. of Loue. Boke 1. Fol. 308. pag. 2. col. 2.

Instances of this use of the Active Infinitives in English, are very numerous; but the reason of it appears best from old translations.

adverbs are those of the Latin and French, *Videlicet*, *scilicet*, *à sçavoir*. And it is worth noting, that the old Latin authors used the abbreviated *Videlicet* for *Videre licet*, when not put (as we call it) adverbially*.

“ Quod si nec Anaxagoræ fugam, nec Socratis venenum, nec Zenonis tormenta novisti; at Canios, at Senecas, at Soranos scire potuisti. Quos nihil aliud in cladem detraxit, nisi quod nostris moribus instituti, studiis improborum dissimillimi videbantur. Itaque nihil est quod admirere, si in hoc vitæ falo circumstantibus agitemur procellis, quibus hoc maxime propositum est, *pestimis displicere*. Quorum quidem tametsi est numerosus exercitus, SPERNENDUS tamen est.”

Boetius de Consol. Lib. 1. Prosa 3.

Thus translated by Chaucer :

“ If thou hast not knowen the exilynge of Anaxagoras, ne the enoyfoning of Socrates, ne the turmentes of Zeno; yet mightest thou have knowen the Senecas, the Canios, and the Soranos. The whiche men nothing els ne brought to the deth, but only for they were enformed of my maners and semeden most unlyke to the studies of wicked folke. And for thy thou oughtest not to wondren, though that I in the bitter see be driuen with tempestes blowing aboute. In the which thys is my moste purpose, that is to fayne, to displese wicked men. Of whiche shrewes al be the hooste neuer so great, it is TO DISPISE.”

BELIKE.

This word is perpetually employed by Sir Philip Sydney, Hooker, Shakespear, B. Johnson, Sir W. Raleigh, Bacon, Milton, &c. But is now only used in low language, instead of *perhaps*.

In the Danish language *Lykke*, and in the Swedish *Lycka*, mean *Luck*, i. e. chance, hazard, *Hap*, fortune, adventure.

“ *Dionysus*. He thought BELIKE, if Damon were out
 “ of the citie, I would not put him to death.”

* I have been compelled to make the above long extract, that my reader's judgment may have fair play; and that he may not be misled by the interpretation given of ASSETH in the glossary of Urry's edition of Chaucer; where we are told, that ASSETH means—“ *Assent*, to *Answer*; “ from the Anglo-saxon *ǣreðian*, *affirmare*.” When the reader recollects the *suffysaunce* which is spoken of in the first part of the extract; he will have little difficulty, I imagine, to perceive clearly what ASSETH here means: for the meaning of the whole passage is—*suffisance* alone makes riches; which *suffisance* the miser's greediness will never permit him to obtain.

CAZZO, a common Italian oath (or rather obscenity, in lieu of an oath) first introduced about the time of James the first, and made familiar in our language afterwards by our affected travelled gentlemen in the time of Charles the second. See all our comedies about that period.

M U C H. M O R E. M O S T.

These adverbs have exceedingly gravelled all our etymologists, and they touch them as tenderly as possible.

M U C H.

Junius and Skinner, (whom Johnson copies) for MUCH, irrationally refer us to the Spanish *Mucho*.

M O R E.

Under the article MORE, (that he may seem to say something on the subject) Junius gives us this so little pertinent or edifying piece of information ;—“ Anglicum
 “ *interim* MORE est inter illa, quæ saxonicum A in o convertunt ; sicuti videmus usum advenisse in *ban*, bone, os, offis. *Hal*, whole, integer, fanus. *Ham*, home, domus, habitatio. *ŕtan*, stone, lapis, &c.”

Skinner says—“ MORE, Mo. ab A. S. *Ma*, *Maþa*, *Maþe*, *Maþe*, &c. Quid si omnia a Lat. *Major* ?”

S. Johnson finds MORE to be Adjective, Adverb, and Substantive. The adjective, he says, is—"The comparative of *Some* or *Great*." The adverb is—"The *particle* that forms the comparative degree."—"Perhaps some of the examples which are adduced under the adverb, should be placed under the substantive."—It is doubtful whether the word, in some cases, be noun or adverb."

M O S T.

Junius says, untruly,—“MOST, Expositivo nempe mæpe, fuit comparativus mæppe, et superlativus mæperc; et contractè mærc.”

Skinner—"Teut. *Meist*, feliciter alludit Gr. *μεισον*, plurimum, maximum, contr. a *μεγισον*."

S. Johnson again finds in MOST, an adjective, an adverb, and a substantive. Of the adverb he says, it is—"The *particle* noting the superlative degree." Of the substantive he says—"This is a *kind* of substantive, being according to its signification, *singular* or *plural*." And he gives instances, as he conceives, of its plurality and singularity.—I have wasted more than a page in repeating what amounts to nothing.—

Though

Though there appears to be, there is in reality no irregularity in MUCH, MORE, MOST: nor indeed is there any such thing as capricious irregularity in any part of language.

In the Anglo-saxon the verb *Mopan*, *metere*, makes regularly the præterperfect *Mop*, or *Mope*, (as the præterperfect of *Slagan* is *Slob*) and the past participle *Mowen* or *Meopen*, by the addition of the participial termination *en*, to the præterperfect. Omit the participial termination *en* (which omission was, and still is, a common practice through the whole language, with the Anglo-saxon writers, the old English writers, and the moderns) and there will remain *Mope* or *Mow*; which gives us the Anglo-saxon *Mope* and our modern English word *Mow*: which words mean *simply*—that which is *Mowed* or *Mown*. And as the Hay, &c. which was *mown*, was put together in a heap; hence, *figuratively*, *Mope* was used in Anglo-saxon to denote *any* heap: although in modern English we now confine the application of it to country produce, such as *Hay-mow*, *Barley-mow*, &c. * This participle or substantive

* Gawin Douglas uses the word *Mowe*, for a heap of wood, or a funeral pile.

“ Under the oppin sky, to this purpos,
 “ Pas on, and of treis thou mak an bing
 “ To be ane fyre, &c.

stantive (call it which you please : for, however classed, it is still the same word, and has the same signification) *Mow* or *Heap*, was pronounced (and therefore written) with some variety, *Ma*, *Mæ*, *Mo*, *Mope*, *Mow*; which, being regularly compared, give

<i>Ma</i>	- - -	<i>Ma-er</i>	(i. e. <i>mape</i>)	- -	<i>Mæst</i>	(i. e. <i>mærc</i>)
<i>Mæ</i>	- - -	<i>Mæ-er</i>	(i. e. <i>mæpe</i>)	- -	<i>Mæ-est</i>	(i. e. <i>mærc</i>)
<i>Mope</i>	- -	<i>Mow-er</i>	(i. e. <i>mope</i>)	- -	<i>Mowest</i>	(i. e. <i>moꝛc</i>)
<i>Mo</i>	- - -	<i>Mo-er</i>	(i. e. <i>MORE</i>)	- -	<i>Mo-est</i>	(i. e. <i>MOST</i>)

I have here printed in the Anglo-faxon character, those words which have come down to us so written in the Anglo-faxon writings : and in Italics, the same words in found ; but so written, as to shew the written regularity of the comparison : and in capitals, the words which are used in what we call English ; though indeed it is only a continuation of the Anglo-faxon, with a little variation of the written character.

Mo

Mo (mope, *acervus*, *heap*) which was constantly used by all our old English authors, has with the moderns, given place to MUCH : which has not (as Junius, Wormius, and Skinner imagined of *Mickle*) been borrowed from *μεγαλος*; but is merely the diminutive of MO, passing through the gradual changes of *Mokel*, *Mykel*, *Mochil*, *Muchel* (still retained in Scotland) *Mochel*, MUCH.

In English we have *Rath*, *Rather*, *Rathest*; which are simply the Anglo-saxon *Rað*, *Raðor*, *Raðort*. *celer*, *velox*.

Some have derived this English word RATHER from the Greek; as Mer. Casaubon from *ορθρος*, “quod sané (says Skinner) longius distat quam mané a vespere:” and others, with a little more plausibility, from *Ραδιος*.

The Italians have received this same word from our northern ancestors, and pronounce it *Ratto*, with the same meaning: which Menage derives either from *Raptus* or from *Rapidus*, “*Rapdus*, *Rapdo*, *Raddo*, *Ratto*.”

Skinner notices the expressions *Rath* fruit, and *Rath* wine, from the Anglo-saxon *Rað*; of which, after Menage, he says—“Nescio an contract. a Lat. *rapidus*.”

Minshew derives *Rather* from the Lat. *Ratus*. Ray has a proverb—"The *Rath* fower never borrows of the late."

S. Johnson cites *Spenser* (except himself, the worst possible authority for English words)

"Thus is my harvest haften'd all to *Ratbe*."

And *May*—

"*Rath* ripe and purple grapes there be."

"*Rath* ripe are some, and some of later kind."

And *Milton*—

"Bring the *Ratbe* primrose that forsaken dies."

And he adds most ignorantly—"To have *Rather*, This, I think a barbarous expression, of late intrusion into our language; for which it is better to say—*will rather*."

Dr. Newton, in a note on *Lycidas*, says of the word *Ratbe*—"This word is used by *Spenser*, B. 3. Cant. 3. St. 28.—

"Too *Ratbe* cut off by practice criminal."

"And *Shepherd's Calendar*,

"The *Rather* lambs been starved with cold."

T. Warton, in his note on the same passage of *Milton*, says,—“The particular combination of, *Ratbe primrose*,

“ is perhaps from a pastoral called a Palinode by E. B.
 “ probably *Edmond Bolton*, in *England's Helicon*, Edit.
 1614. signat. B. 4.

“ And made the *Ratbe* and timely primrose grow.”

“ In the West of England, there is an early species of
 “ apple called the *Ratbe*-ripe. We have—“ *Rathe* and
 “ late”—in a pastoral, in *Davison's* poems, Edit. 4. London,
 “ 1621. p. 177. In *Bastard's* epigrams, printed 1598,
 “ I find—“ *The Rasbed* primrose and the violet.” Lib. 1.
 “ Epigr. 34. p. 12. 12mo. Perhaps *Rasbed* is a provin-
 “ cial corruption from *Rathe*.”

By the quotations of Johnson, Newton and Warton,
 from Spenser, *May*, *Bolton*, *Davison* and *Bastard*, a reader
 would imagine that the word *Ratbe* was very little autho-
 rized in the language; and that it was necessary to hunt
 diligently in obscure holes and corners for an authority.

The Imperative of the Gothic and Anglo-faxon verb
 FIAN, fian, To hate.

Q U I C K L Y.

Quick-like: from cpic, cpicu, cpicob, vivus, (as we still
 oppose the *Quick* to the *Dead*). Cpic is the past participle
 of Cpician, vivificare. QUICKLY means, in a *life-like* or
lively manner; in the manner of a creature that has life.

S C A R C E.

The Italians have the adjective *Scarso*;

“ Queste parole affai passano il core
 “ Al tristo padre, e non sapea che fare
 “ Di racquistar la sua figlia e l'onore,
 “ Perche tutti i rimedj erano SCARSI.”

Il Morgante. Cant. 10. St. 128.

Which

Which Menage improbably derives from *Exparcus*. The same word in Spanish is written *Escasso*. Both the Italian and the Spanish words are probably of northern origin. In Dutch *Skaars* is, rare, unfrequent. It is still commonly used as an adjective in modern English; but anciently was more common.

“ Hast thou be SCARSE or large of gifte
 “ Unto thy loue, whom thou seruest?
 “ And faith the trowth, if thou hast bee
 “ Unto thy loue or SCARSE or free.”

Gower. Lib. 5. Fol. 109. pag. 1. col. 2.

“ What man that SCARSE is of his good,

The Dutch have also the adjective *Zelden, Selten* : The Germans *Selten* : The Danes *Seldsom* : The Swedes *Sellfynt* : rare, unufual, uncommon.

S T A R K.

According to S. Johnson this word has the following significations—*Stiff, strong, rugged, deep, full, mere, simple, plain, gros*s. He says, “ it is used to intend or augment “ the signification of a word : as, *Stark mad*, mad in the “ higheft degree. It is now little used but in low “ language.”

In the Anglo-saxon *Starc, Stearc*, German *Starck*, Dutch *Sterk*, Danish *Stærk*, Swedish *Stark*, as in the English, all mean *Strong*. It is a good English word ; common in all our old writers, still retaining its place amongst the moderns, and never had an interval of difufe.

“ And she that helmed was in STARKE stoures

“ And wan by force townes stronge and toures.”

Chaucer. Monkes Tale. Fol. 85. pag. 2. col. 2.

Chaucer. Boecius. Boke 4. Fol. 241. pag. 2. col. 2.

It is merely the French adjective *Vrai*, from the Italian, from the Latin. When this word was first adopted from the French, (and long after) it was written by them, and by us, VERAY; which they have since corrupted to *Vrai*, and the English to VERY.

“ For if a kynge shall upon geffe

ONCE. AT ONCE. TWICE. THRICE.

Antiently written ANES, ANIS, ANYS, ONES, ONYS, TWIES, TWYIS, TWYISE, THRIES, THRYIS, &c. are merely the Genitives of Ane, An, ΤΥΛΙ, Τρα, Τρεζ, Τριζ, Δπλ, Δπύ, &c. i. e. *One, Two, Three* (The substantive *Time, Turn, &c.* omitted.)

* The word *Aliis* in this passage, should in a modern version be translated *Lord Grenville, Mr. Rose, Mr. Dundas, Mr. Wyndham, Mr. Pitt, Lord Liverpool, &c.* Who only *assert* modestly (what our pilfering stewards and bailiffs will shortly tell us), that they hold their emoluments of office by *as good* a title, as any man in England holds his private estate and fair-earned property; and immediately after *prove* to us, that they hold by a much better title.—Their proof is, for the present only a triple or quadruple (they may take half or two thirds of our income next year) additional assessment upon our innocent property; whilst their guilty emoluments of office (how earned we know) remain untouched.

The Italian and French have no correspondent adverb: they say *Une fois, deux fois, una volta, due volte* &c. The Dutch have *Eens* for the same purpose; but often forego the advantage.

A N O N.

Junius is right. ANON means *In one* (subauditur *instant, moment, minute.*)

“ For I woll ben certayne a wedded man,
 “ And that ANON in all the-haft I can.”

Marchauntes Tale. Fol. 29. pag. 1. col. 2.

“ Than Dame Prudence, without delay or tarieng, fent
 “ ANONE her meffanger.”

Tale of Chaucer. Fol. 82. pag. 1. col. 2.

All our old authors use ANON, for *immediately, instantly.*

Mr. Tyrwhit, Vol. 4. Note to Verse 381, says—"From *Pro nunc*, I suppose, came *For the nunc*; and so, *For the Nonce*. Just as from *Ad nunc* came ANON."—I agree with Mr. Tyrwhit, that the one is *just as* likely as the other."

In the Anglo-saxon, *An* means *One*, and *On* means *In*: which word *On* we have in English corrupted to *An*, before a vowel; and to *A*, before a consonant; and in writing and speaking have connected it with the subsequent word: and from this double corruption has sprung a numerous race of Adverbs; which (only because there has not been a similar corruption) have no correspondent adverbs in other languages.

Thus from *On* *ðæg*, *On niht*, *On lenge*, *On bræde*, *On bæc*, *On lande*, *On life*, *On middan*, *On rihte*, *On tpa*, *On peg*; we have *Aday*, *Anight*, *Along*, *Abroad*, *Aback*, *Aland*, *Alive*, *Amid*, *Aright*, *Atwo*, *Away*: and from *On An*, ANON.

Gower and Chaucer write frequently *In one*: and Douglas, without any corruption, purely ON ANE.

"Thus sayand, fcho the bing ascendis ON ANE."

Douglas. Booke 4. pag. 124.

IN A TRICE.

Skinner, not so happily as usual, says—" *In a Trice*,
 " fort. a Dan. *at reyfe*, *furgere*, *se erigere*, *attollere*, q. d.
 " *tantillo temporis spatio quanto quis se attollere potest.*"

S. Johnson—" believes this word comes from *Trait Fr.*
 " corrupted by pronunciation. A short time, an instant,
 " a *stroke*."

The etymology of this word is of small consequence;
 but, I suppose, we have it from the French *Trois*: and
 (in a manner similar to ANON) it means—In the time in
 which one can count *Three—One, Two, Three* and away.—
 Gower writes it TREIS.

" All sodenly, as who saith TREIS,
 " Where that he stode in his paleis,
 " He toke him from the mens fight,
 " Was none of them so ware, that might
 " Set eie where he become."

Gower. Lib. 1. Fol. 24. pag. 2. col. 1.

The greater part of the other Adverbs have always been
 well understood: such as, *Gratis*, *Alias*, *Amen*, *Alamode*,
Indeed, *In fact*, *Methinks*, *Forsooth*, *Infooth*, &c.

B. But

B.

But I suppose there are some adverbs which are merely *cant* words; belonging only to the vulgar; and which have therefore no certain origin nor precise meaning; such as SPICK and SPAN, &c.

H.

SPICK, SPAN.

I will not assert that there may not be such; but I know of none of that description. It is true S. Johnson says of *Spick and Span*, that "he should not have expected to find this word authorized by a polite writer." "*Span* *new*," he says, "is used by Chaucer *, and is supposed

* Chaucer uses it, in the third book of *Troilus*. Fol. 181. pag. 2. col. 1.

" This is a worde for al, that Troylus
 " Was neuer ful to speke of this matere.
 " And for to prayfen unto Pandarus
 " The bounte of his right lady dere,
 " And Pandarus to thanke and maken chere.
 " This tale was aye SPAN newe to begynne,
 " Tyl that the nyght departed hem *atwynne*."

But I see no reason why Chaucer should be blamed for its use; any more than Shakespear for using *Fire-new*, on a much more solemn occasion.

" Maugre thy strength, youth, place and eminence,
 " Despight thy victor sword, and *Fire-new* fortune,
 " Thy valour and thy heart,—thou art a traitor."

King Lear. Act 5. Sc. 3.

" to

“ to come from *rpannan*, to stretch, *Sax.* *expandere*, *Lat.*
 “ whence *span*. *Span new* is therefore originally used of
 “ Cloth, new extended or dressed at the clothier’s: and
 “ *spick* and *span new*, is, newly extended on the spikes or
 “ tenters. It is, however, a *low* word.” In *spick* and *span*
 however, there is nothing stretched upon spikes and tenters
 but the etymologist’s ignorance. In Dutch they say *Spick-*
spëlder-nieuw. And *spyker* means a warehouse or magazine.
Spil or *Spel* means a spindle, *schiet-spoel*, the weaver’s
 shuttle; and *spoelder* the shuttle-thrower. In Dutch, there-
 fore, *Spikspëlder-nieuw* means, new from the warehouse
 and the loom.

In German they say—*Span-neu* and *Funckel-neu*. *Spange*
 means any thing shining; as *Funckel* means to glitter or
 sparkle.

In Danish *Funckelnye*.

In Swedish *Spitt spangande ny*.

In English we say *Spick and Span-new*, *Fire-new*, *Brand-*
new. The two last *Brand* and *Fire* speak for themselves.
Spick and *Span-new* means *shining new from the warehouse*.

B.

A Y E, Y E A, Y E S.

You have omitted the most important of all the Adverbs—AYE and NO. Perhaps because you think Greenwood has sufficiently settled these points—“*Ay*, he says, “seems to be a contraction of the Latin word *Aio*, as *Nay* “is of *Nego*. For our *Nay*, *Nay*; *Ay*, *Ay*; is a plain imitation “of Terence’s *Negat quis? Nego. Ait? Aio.*” Though I think he might have found a better citation for his purpose—“*An nata est sponfa prægans? vel Ai, vel nega.*”

H.

I have avoided AYE and NO, because they are two of the most mercenary and mischievous words in the language, the degraded instruments of the meanest and dirtiest traffic in the land. I cannot think they were borrowed from the Romans even in their most degenerate state. Indeed the Italian, Spanish and French * affirmative adverb, *Si*, is

* The French have another (and their principal) affirmative adverb, *Oui*: which, Menage says, some derive from the Greek $\alpha\iota\omicron\sigma\iota$, but which he believes to be derived from the Latin *Hoc est*, instead of which was pronounced *Hocé*, then *Oe*, then *Oue*, then *Oi*, and finally *Ouy*. But (though rejected by Menage) *Oui* is manifestly the past participle of *Ouir*, to hear; and is well calculated for the purpose of assent: for when the proverb says—“*silence gives consent*,”—it is always understood of the silence, not of a deaf or absent person, but of one who has both heard and noticed the request.

derived

derived from the Latin, and means *Be it* (as it does when it is called an hypothetical conjunction). But our *Aye*, or *Yea*, is the Imperative of a verb of northern extraction; and means—*Have it, possess it, enjoy it*. And YES, is *Ay-es*, *Have, possess, enjoy that*. More immediately perhaps, they are the French singular and plural Imperative *Aye* and *Ayez*; as our corrupted *O-yes* of the Cryer, is no other than the French Imperative *Oyez*, *Hear, Listen* *.

Danish, *Ejer*, to possess, have, enjoy. *Eja*, Aye or yea. *Eje*, possession. *Ejer*, possessor.

Swedish, *Ega*, to possess, *ja*, aye, yea. *Egare*, possessor.

German, *Ja*, aye, yea. *Eigener*, possessor, owner. *Eigen*, own.

Dutch, *Eigenen*, to possess, *ja*, aye, yea. *Eigenschap*, *Eigendom*, possession, property. *Eigenaar*, owner, proprietor.

* “ And after on the daunce went
 “ Largeffe, that set al her entent
 “ For to ben honorable and free,
 “ Of Alexander’s kynne was she,
 “ Her most ioye was ywis,
 “ Whan that she yafe, and sayd: HAUE THIS.”

Which might, with equal propriety, have been translated,

“ When she gave, and said YES.

Anglo-

Anglo-sax. *Agen*, own. *Agenoe*, proprietor. *Agenyrre*, property.

NOT, NO.

As little do I think, with Greenwood, that NOT, or its abbreviate NO, was borrowed from the Latin; or, with Minshew, from the Hebrew; or, with Junius, from the Greek. The inhabitants of the North, could not wait for a word expressive of dissent, till the establishment of those nations and languages; and it is itself a surly sort of word less likely to give way and to be changed than any other used in speech. Besides, their derivations do not lead to any meaning, the only object which can justify any etymological inquiry. But we need not be any farther inquisitive, nor, I think, doubtful concerning the origin and signification of NOT and NO, since we find that in the Danish *Nödig*, and in the Swedish *Nödig*, and in the Dutch *Noode*, *Node*, and *No*, mean, *averse*, *unwilling* *.

And

* M. L'Eveque, in his *Essai sur les rapports de la langue des Slaves, avec celle des anciens habitans du Latium*, (prefixed to his *History of Russia*) has given us a curious etymology of three Latin adverbs; which I cannot forbear transcribing in this place, as an additional confirmation of my opinion of the Particles.—“ Le changement de l' o en A doit à peine être regardé comme une alteration. En effet ces deux lettres ont en Slavon tant d' “ affinité,

And I hope I may now be permitted to have done with Etymology : for though, like a microscope, it is sometimes useful

“ affinité, que les Russes prononcent en A le tiers au moins des syllabes qu'ils écrivent par un o.”

“ Let mot qui signifioit auparavant (before *Terra* was used) la surface de la terre. Ce mot en Slavon est POLE ; qui par l'affinité de l'o avec l'A, a pu se changer en PALE. Ce qui me fait presumer que ce mot se trouvoit aussi en Latin, c'est qu'il reste un verbe qui paroît formé de ce substantif ; c'est le verbe PALO OU PALARE, errer dans le campagne : PALANS, qui erre de côté & d'autre, qui court les champs. L'Adverbe PALAM tire son origine du même mot. Il signifie *manifestement, a decouvert*. Or, qu'est ce qui se fait *a decouvert* pour des hommes qui habitent des tentes ou des cabannes ? C'est ce qui se fait en plein champs. Ce mot PALAM semble même dans sa formation avoir plus de rapport à la langue Slavonne qu' à la Latine. Il semble qu'on dise PALAM pour POLAMI *par les champs, à travers les champs*. Ce qui me confirme dans cette idée, c'est que je ne me rappelle pas qu'il y ait en Latin d'autre Adverbe qui ait une formation semblable, si ce n'est son opposé, CLAM, qui veut dire *secrettement, en cachette* ; & qui me paroît aussi Slavon. CLAM se dit pour KOLAMI, & par une contraction tres conforme au genie de la langue Slavonne, KLAMI, au milieu des Pieux ; c'est à dire dans des cabannes qui estoient formées de *Pieux* revêtus d'écorces, de peaux, ou de branchages.”

“ J'oublois l'Adverbe CORAM, qui veut dire *Devant, en presence*.—“ Il differe de PALAM (dit Ambroise Calepin) en ce qu'il se rapporte seulement à quelques personnes, & PALAM se rapporte a toutes : il entraîne d'ailleurs avec lui l'idée de proximité.”—Il a donc pu marquer autrefois que l'action se passoit en presence de quelqu'un dans un lieu circonscrit ou fermé. Ainsi on aura dit CORAM pour KORAMI, ou, *Mejdou Korami* ; parceque la cloture des habitations estoit souvent faite d'écorce, *Kora*.”

useful to discover the minuter parts of language which would otherwise escape our sight; yet is it not necessary to have it always in our hands, nor proper to apply it to every object.

B.

If your doctrine of the *Indeclinables* (which I think we have now pretty well exhausted) is true, and if every word in all languages has a separate meaning of its own, why have you left the conjunction THAT undecyphered? Why content yourself with merely saying it is an *Article*, whilst you have left the *Articles* themselves unclassed and unexplained?

I am the better pleased with Mr. L'Eveque's etymology, because he had *no system* to defend, and therefore cannot be charged with that partiality and prejudice, of which, after what I have advanced, I may be reasonably suspected. Nor is it the worse, because M. L'Eveque appears not to have known the strength of his own cause: for CLAM was antiently written in Latin *calim*: (though Festus, who tells us this, absurdly derives *clam* from *clavibus*, "quod his, quæ celare volumus, claudimus") and *cala* was an old Latin word for wood, or logs, or stakes. So Lucilius (quoted by Servius) "Scinde puer, *Calam*, ut caleas." His derivation is also still farther analogically fortified by the Danish correspondent adverbs: for in that language *Geheim*, *gebeimt*, *I Hemmelighed*, (from *Hiem* home), and *I enrum* (i. e. in a room) supply the place of *Clam*, and *Fordagen* (or, in the face of day) supplies the place of *Palam*.

H.

I would fain recover my credit with Mr. Burgefs, at least upon the score of *liberality*. For the freedom (if he pleases, harshness) of my strictures on my “*predecessors* on the “subject of language.” I may perhaps obtain his pardon, when he has learned from Montesquieu that—“*Rien ne recule plus le progrès des connoissances, qu’un mauvais ouvrage d’un auteur celebre : parcequ’ avant d’instruire, il faut detromper :* or from Voltaire, that—La faveur “prodiguée aux mauvais ouvrages, est aussi contraire aux “progrès de l’esprit, que le déchainement contre les bons.” But Mr. Burgefs himself has undertaken to explain the *Pronouns* : and if I did not leave the field open to him (after his undertaking) he might perhaps accuse me of illiberality towards my *followers* also. I hope the title will not offend him ; but I will venture to say that, if he does any thing with the pronouns, he must be contented to *follow* the etymological path which I have traced out for him. Now the *Articles*, as they are called, trench so closely on the *Pronouns*, that they ought to be treated of together : and I rather chuse to leave *one* conjunction unexplained, and my account of the *Articles* imperfect, than forestall in the smallest degree any part of Mr. Burgefs’s future discovery. There is room enough for both of us. The garden of science is overrun with weeds ; and whilst
every

every coxcomb in literature is anxious to be the importer of some new exotic, the more humble, though (at this period of human knowledge especially) more useful business of *sarculation* (to borrow an exotic from Dr. Johnson) is miserably neglected.

B.

If you mean to publish the substance of our conversation, you will probably incur more censure for the *subject* of your inquiry, than for your manner of pursuing it. It will be said to be *υπερ ους σκιας*.

H.

I know for what building I am laying the foundation : and am myself well satisfied of its importance. For those who shall think otherwise, my defence is ready made :

Se questa materia non è degna,
 Per esser piu leggieri,
 D'un huom che voglia parer faggio e grave,
 Scusatelo con questo ; che s'ingegna
 Con questi van pensieri
 Fare il suo tristo tempo piu suave :
 Perche altrove non have
 Dove voltare il viso ;
Che gli è stato interciso
Mostrar con altre imprese altra virtue.
