POCKET CALCULATIONS
FOR
TIMBER MERCHANTS.

4/-

[The body of the page contains extremely faint and illegible text, likely bleed-through from the reverse side of the paper. The text is too light to be transcribed accurately.]

POCKET CALCULATIONS

FOR THE USE OF

TIMBER MERCHANTS, BUILDERS,
CONTRACTORS, CARPENTERS, JOINERS,
PACKING CASE MAKERS,
PIANOFORTE MANUFACTURERS,
AND
ALL BUYERS AND SELLERS OF WOOD.

BY

WILLIAM RICHARDSON.

LONDON:

PRINTED AND PUBLISHED BY KELLY AND CO.,

51, GREAT QUEEN STREET, LINCOLN'S INN FIELDS. W.C.

MDCCCLXXIV

181. f. 38.

LONDON :
KELLY AND CO.,
15 & 16, GATE STREET, LINCOLN'S INN FIELDS.

P R E F A C E.

So long as deals, &c., are sold by different standards, a work like the present is a necessity to all trades dealing in timber and deals.

The increased number of dimensions now imported, and the recent advance in the prices of timber, afford sufficient reasons for the present work, which aims at giving information adapted to present and altered conditions of the timber trade.

In a work intended for the pocket, brevity is the next recommendation to accuracy, and without sacrificing any important matter, the Author has endeavoured to compress a great amount of useful information into the smallest possible compass.

That which "The Calculator" supplies for use at the desk, this work supplies (so far as regards equivalent prices) for pocket use in the yard or sale room, and for the numerous other occasions when its aid may be an advantage.

NOTE.

NUMEROUS sizes are not given in the following tables for which they are nevertheless available. For instance, if $2 \times 10 = 20$ is required, the column for $2\frac{1}{2} \times 8 = 20$ should be used, 2 multiplied by 10 giving 20 and $2\frac{1}{2} \times 8$ giving 20 also. Hence any dimensions, the width and thickness of which multiplied together give numbers corresponding to those below, the size given against it corresponds to it and should be referred to, as giving a precisely similar result.

48 ... 4 × 12	27 ... 3 × 9
44 ... 4 × 11	24 ... 3 × 8
40 ... 4 × 10	18 ... 3 × 6
36 ... 4 × 9	15 ... 3 × 5
28 ... 4 × 7	$22\frac{1}{2}$... $2\frac{1}{2} \times 9$
24 ... 4 × 6	20 ... $2\frac{1}{2} \times 8$
33 ... 3 × 11	$17\frac{1}{2}$... $2\frac{1}{2} \times 7$
30 ... 3 × 10	$16\frac{1}{4}$... $2\frac{1}{2} \times 6\frac{1}{2}$

Many other ways of working the tables will readily suggest themselves, such as halving an amount or doubling it. For instance, if $2\frac{1}{2} \times 12$ had not been given, twice the amount of 3×5 would have given the same result.

EXAMPLES.

→

At £7 10s. per Petg. Sta., what is that per 120
 3×9 ?

See page 10, under the column headed £7 10s., and
 being equal to £7 10s. per Petg. Sta.

The use of the columns at the bottom of the ab
 other pages is this:—If the price per 120 12 ft. is not t
 price required, or not near enough for all practical
 then a glance below will give further informati
 instance:—

At £7 12s. 6d. per Petg. Sta., what is that per
 3×8 ?

See page 10.

£7 10 0	for $3 \times 8 =$	£10 18 2
0 2 6	"	0 3 8
£7 12 6	"	£11 1 10

The remaining tables are so simply arranged
 explanation

TABLES

Shewing the equivalent per 120 12ft. of various dimensions to the price per Petersburg Standard of 120 12ft. 1½ × 11 from £6 to £30 per Sta.

THE following Table reverses the process followed in Table 1, and gives the equivalent price per Petersburg Standard for the selling price per 120 12ft. of various sizes. To illustrate this, turn to page 15, and under the head of £12 per Petersburg Standard we have £34 18s. 2d. as the equivalent per 120 12ft. 4 × 12. But planks not being sold at such a price (it would be either £34 15s. or £35), it is very useful to know what is the exact equivalent per Petersburg Standard of these two prices. To find them, turn in the following Table to 4 × 12, and on the right-hand side of £35 will be found £12 0s. 8d., and for £34 15s. proceed thus:—

	£	s.	=	£	s.	d.
On the line above the preceding is .	34	0	=	11	13	9
And the third line from the top is .	0	15	=	0	4	3
	<hr style="width: 50%; margin: 0 auto;"/>			<hr style="width: 50%; margin: 0 auto;"/>		
	£34 15		=	11	18	0

This insures perfect accuracy, whichever information is sought.
