G. B. Nutt, Esq.

Commission Europeene Du Danube,

Sulina,

ROUMANIA.

My dear Geordie,

You will think, I am sure, we are all duffers here for not answering your letter of the 25th May re Floating Crane, but Cowans Sheldon & Co did not reply to our letter of the 29th May until the 24th June. I was then away in Scotland on a holiday, and did not return till yesterday, and on arriving at the office this morning find C. S. & Co's letter and blue print waiting for me. I now send it on in the sincere hope that it is not too late to be of any use. The price delivered c.i.f. Sulina would be approximately £10500. If we send a man to superintend erection - £40 per month. The total weight of the Crane including ballast would be 415 tons, and the heaviest piece for shipment is 10 tons.

I hope this information will answer your purpose for the present, and if you can give us any further details of what you want
